LEADING
WITH PURPOSE

UHS
2023
ANNUAL REPORT

OUR MISSION

*Established in 1979 by Alan B. Miller,
Founder and Executive Chairman*

TO PROVIDE SUPERIOR QUALITY HEALTHCARE SERVICES THAT:

PATIENTS recommend to family and friends,

PHYSICIANS prefer for their patients,

PURCHASERS select for their clients,

EMPLOYEES are proud of, and

INVESTORS seek for long-term returns.

*Our Mission statement has been repeatedly
praised by industry experts for being honest
and authentic, and for identifying value
offered to all key stakeholders from patients
and employees to our investors.*

UHS is a registered trademark of UHS of Delaware, Inc., a subsidiary of Universal Health Services, Inc. Universal Health Services, Inc. is a holding company that operates through its subsidiaries. All healthcare and management operations are conducted by subsidiaries of Universal Health Services, Inc. Any reference to "UHS" or "UHS facilities" including any statements, articles or other publications contained herein which relates to healthcare or management operations is referring to Universal Health Services, Inc.'s subsidiaries. Further, the terms "we," "us," "our" or "the company" in such context similarly refer to the operations of the subsidiaries of Universal Health Services, Inc. Any reference to employment at UHS or employees of UHS refers to employment with one of the subsidiaries of Universal Health Services, Inc.

LETTER TO OUR SHAREHOLDERS

Dear Valued Shareholders,

This year marks the 45th anniversary of our company. Growing steadily since our inception into a highly regarded Fortune 500 corporation, UHS has remained true to our core strategy which includes building or acquiring high-quality hospitals in rapidly growing markets, investing in the people and equipment needed to allow each facility to thrive and becoming a leading healthcare provider in each community we serve.

Today, UHS is one of the nation's largest and most respected providers of hospital and healthcare services, with more than 400 acute care hospitals, behavioral health facilities and ambulatory centers across the United States, Puerto Rico and the United Kingdom.

While 2023 was on multiple accounts a challenging year across the healthcare industry, we are proud of our many achievements, realizing that the important work that we are doing fulfills an integral need within the communities we serve. Through our network of subsidiaries, we served nearly 3.6 million patients in 2023.

During the year, UHS generated net revenues of \$14.3 billion, an increase of 7% over the prior year. On a same facility basis during 2023 as compared to 2022, net revenue growth of 8% was experienced within both the Acute Care and Behavioral Health operating segments. Adjusted admissions, over the same period, grew 8% and 3% across the Acute Care and Behavioral Health Divisions, respectively.

We continued to manage the impacts of market challenges, including labor shortages and increasing inflation; however, we recognize that while our revenues have improved, expenses have continued to grow as well. We are currently focused on operational initiatives to increase efficiencies, standardize approaches, optimize and right-size where prudent.

We continue to make significant capital expenditures and are well positioned to succeed. Our growth and development through new facility construction, expansions and renovations and strategic partnerships position us for a new era of success. Three de novo Acute Care hospitals are currently under construction – in Nevada, Florida and Washington, D.C. Further, we are building two new Behavioral Health facilities and have multiple growth initiatives – inpatient and outpatient – in the pipeline. We continue to prioritize the integration of ambulatory care access points along the care continuum in existing markets, including having opened five new freestanding emergency departments (FEDs) in 2023, with others in strategic markets on the near horizon.

We are proud of the reputation we have earned as a leader in the healthcare industry. Among our accolades and rankings this year:

- Fortune magazine's World's Most Admired Companies – UHS was named for the 14th consecutive year; ranking #2 in the Healthcare: Medical Facilities category
- Fortune 500 list – UHS has been ranked for 20 years, currently #311
- Forbes Global 2000 – #434 among American companies
- The American Opportunity Index – #45 in total and #2 within the Medical Care Facilities category. The Index scores how well America's largest companies drive economic mobility and positive career outcomes for their employees — actions that can help fuel business performance.

Further, our facilities are regularly honored by national, state and local organizations for delivering high-quality care, for pioneering innovation, for their thought leadership and for their commitment to serving their local communities.

Most importantly, we continue to stay true to our Mission and values. Our focus remains on positioning employees and facilities to provide the highest quality and most efficient care to our millions of current and future patients. We are intent on maintaining our reputation as an industry leader and preferred provider, employer and partner. Looking ahead, we expect this will yield profitable growth in attractive markets, business segments and care delivery venues.

On behalf of UHS leadership, we are grateful to patients for entrusting their care to UHS facilities; to employees at those facilities for all their hard work; to our business partners for their collaboration; and to our shareholders for your continued support and investment.

Sincerely,

Alan B. Miller
Founder and Executive Chairman
of the Board

Marc D. Miller
President and
Chief Executive Officer

FINANCIAL HIGHLIGHTS

Year Ended December 31	2023	2022	Percentage Change	2021
Net revenues	\$14,281,976,000	\$13,399,370,000	7%	\$12,642,117,000

UHS ACUTE CARE DIVISION

The Acute Care Division operates 27 hospitals, providing high-quality care to millions annually. In our served markets, we are competitively positioned as a provider of choice.

Our focus has been – and remains – on our three key divisional priorities: Quality & Service; Operational Efficiency; and Physician Alignment. We are optimistic about the future and continue to exude passion and commitment to improving and saving lives. It is the engagement, passion and drive of aligned teams that delivers results. We work hard every day to be valued providers to our patients, their families and our local communities.

QUALITY & SAFETY

Our commitment to providing superior quality healthcare is core to UHS' Mission and differentiates us in our served communities. We take the responsibility of protecting the health, well-being and safety of our patients to heart. We have a strong foundation to build on and always strive to do even better.

Our relentless focus on quality will be evidenced in higher Q-scores, an internal UHS metric, translating across Centers for Medicare & Medicaid Services (CMS) star ratings and other industry indicators that are publicly visible metrics, referenced by consumers making healthcare decisions. They represent our core purpose – which is striving to provide the best, safest care to each and every one of our patients.

Many of our hospitals are consistently praised for delivering high-quality care including those who have earned Leapfrog A Hospital Safety Grades, a testament to their excellence in safety, quality and resource use. In particular, we are proud of the achievements of **Henderson Hospital** in Nevada, and **Temecula Valley Hospital** in California, who each received their 11th “A” rating. Further, **Cornerstone Regional Hospital** in Texas received

the Top General Hospital designation from Leapfrog, recognizing the hospital's achievements in patient safety.

We were pleased to announce **The George Washington University Hospital** (GW Hospital) in Washington, D.C., earned a U.S. News & World Report Best Regional Hospital distinction, recognizing that GW Hospital is among the very best in the D.C. area. GW Hospital achieved High Performing status in three specialty areas and 10 common procedure and condition areas. **South Texas Health System Edinburg** was named a Best Regional Hospital in the McAllen, TX, area for the second consecutive year, with High Performing designations in seven common procedure and condition areas.

Cornerstone Regional Hospital is co-owned with physician investors.

Recognizing excellence in maternity care, **GW Hospital, Centennial Hills Hospital Medical Center, Corona Regional Medical Center** and **Southwest Healthcare Rancho Springs Hospital** each received acknowledgment as a High Performing Hospital, providing new moms with peace of mind that they are receiving care from highly skilled medical professionals.

Continuing with the achievements, Newsweek/ Statista named **Lakewood Ranch Medical Center** to the America's Best Maternity Hospitals list for the second consecutive year. Lakewood Ranch was one of only 384 hospitals in the U.S. recognized. This is a testament to the commitment and dedication of the entire Women's Center team.

The reputation of the hospitals operated by our subsidiaries are vital to our business. Patients often have a choice, and we aim to continue to differentiate our care such that patients see our high star ratings and choose us. In 2023, our online reputation management team responded to approximately 30,000 reviews posted on Google. UHS Acute Care hospitals ended the year with an overall average star rating by consumers of 4.3 out of 5 stars. Overall average star rating of our freestanding emergency departments (FEDs) was 4.7 stars. Our focus is clear: deliver a 5-star Patient Experience.

We are committed to providing high-quality care to our patients – smiling patients make us smile – here at ER at West Craig Road, an extension of Centennial Hills Hospital Medical Center.

ENHANCING PATIENT EXPERIENCE

We are committed to continuous improvement and enhancing the patient experience while optimizing performance, reducing costs and improving patient care. Significant results from the year include:

- We changed the drug formulary, which is the list of drugs we carry and allow prescribers to use, resulting in \$4.2 million in cost avoidance.
- Patient volume in the hospital-based/full-service Emergency Departments (EDs) increased 5.6%.
- Overall length of stay for low-acuity ED patients was reduced by 6.4%.
- We implemented an in-house Managed Service Provider to manage over 117 contract labor agencies.
- We drove a 53% reduction in contract labor spend and a 15.3% reduction in RN turnover.
- We reduced Hospital Acquired Pressure Injuries by 41% and Central Line Associated Blood Stream Infections by 29%.

Ten of 11 Rehabilitation units ended the year with Program Evaluation Model (PEM) scores greater than 90. Meanwhile, units at **St. Mary's Regional Medical Center**, **Texoma Medical Center**, **South Texas Health System Edinburg** and **South Texas Health System McAllen** ranked in the top 10% in the country based on their PEM scores.

Overall, we continued to see positive improvements that delivered exceptional results, and we anticipate these improvements will continue to accelerate into 2024.

“Healthcare is better where we are. Our Division

goals are predicated upon the foundation of our strong team. From senior leadership through all functions, we hold the bar high, employ the best in the industry and engage our team to contribute their very best...all for patients.”

> **EDWARD SIM, PRESIDENT, ACUTE CARE DIVISION**

PATIENT FEATURE

“I have end-stage heart failure and currently live with an LVAD. An LVAD is a left ventricular assist device that is implanted in the chest. It helps pump blood from the left ventricle to the rest of the body. The LVAD is doing the work for my heart while I wait for a transplant. The LVAD team at GW Hospital helped me overcome my fears and helped me understand what to expect during this time. I am most thankful to GW Hospital for giving my kids their mom back.”

Taneea is doing well and in good health.

- > Taneea, patient
The George Washington University Hospital
Washington, D.C.

The Alan B. Miller Medical Center will be a new neighborhood hospital that provides medical center excellence, serving the thriving regional population. Left to Right: President & CEO Marc D. Miller, Founder & Executive Chairman Alan B. Miller and his grandson TJ Miller.

GROWTH TO SERVE MORE PATIENTS

As the populations in key markets continue to grow and expand, so too do we. We are making great strides on building three new hospitals.

West Henderson Hospital, in Southern Nevada, will open in 2024 and will feature 150 beds and a 37-bay Emergency department, among many other healthcare suites and departments. This will be the sixth Acute Care hospital within The Valley Health System, a robust integrated delivery network that also includes various ambulatory care access points.

In Washington, D.C., we raised the final steel beam in constructing **Cedar Hill Regional Medical Center GW Health**, a new 136-bed hospital. Cedar Hill will provide a comprehensive network of care to serve all District residents, but more importantly it will ensure residents of Wards 7 and 8 have access to high-quality care in their community. We are developing comprehensive services to improve health and wellness for the residents of this great city. Cedar Hill is scheduled to open in 2025.

In Florida, we broke ground on the new **Alan B. Miller Medical Center**, a 150-bed neighborhood hospital with medical center excellence that will serve the growing population of the greater Palm Beach Gardens community. Named after UHS Founder and Executive Chairman Alan B. Miller, the hospital is currently scheduled to open in late 2025.

Prominence Health is driving physician alignment through value-based care initiatives, enabling greater access to better care at lower cost. With seven Accountable Care Organizations (ACOs) and 200,000 lives across five U.S. states and Washington, D.C., Prominence Health and partnered clinicians continue to produce meaningful cost savings to Medicare. During the year, Prominence Health announced \$93 million in savings for Medicare and more than \$65 million in earnings for 3,000 participating physicians. This yields a total of over \$468 million saved since the establishment of the first UHS ACO in 2014.

Prominence Health Plan achieved a 4-star rating for Medicare Advantage and a 97% quality score given by CMS for 2023. Prominence Health Plan and the ACOs are key strategic vehicles to partner with Primary Care around population health initiatives.

Independence Physician Management (IPM), a subsidiary of UHS, develops and manages multi-specialty physician networks and urgent care clinics which align with our Acute Care and Behavioral Health facilities in 13 markets across seven states and the District of Columbia. With over 880 providers, IPM treated patients in over 1.7 million encounters during the year.

ENABLING CONVENIENT ACCESS TO CARE

During the year, we expanded our network of Freestanding Emergency Departments (FEDs). The FED model is strategic, efficient and generates high patient satisfaction ratings.

We have 26 FEDs fully operational, several under construction, and have acquired land to build additional FEDs. In 2023, the FEDs handled over 421,000 ER visits and had over 26,000 transfers to UHS hospitals. By the end of 2024, we expect to have over 30 FEDs open and serving patients.

During 2023, we opened:

- **ER at Spanish Springs**, an extension of Northern Nevada Medical Center
- **Manatee ER at Bayshore Gardens**, an extension of Manatee Memorial Hospital
- **ER at North Las Vegas**, an extension of Valley Hospital
- **ER at West Craig Road**, an extension of Centennial Hills Hospital
- Desert Springs Hospital was transitioned to the **ER at Desert Springs**, an extension of Valley Hospital.

SEVERAL FEDs ARE COMING SOON ACROSS NEVADA, TEXAS AND FLORIDA:

PATIENT FEATURE

Henderson Police Officer Scott Nelson was brought to the Henderson Hospital ER in serious condition.

"The medical team was able to restore my heartbeat and they worked hard to save my life," said Mr. Nelson. "I was quite sick and required care in the ICU for over a week. I am making progress on my recovery. To say thank you, the Henderson Police Department visited Henderson Hospital and brought snacks and a plaque to recognize the dedicated staff and the medical team."

Henderson, NV

CREATING HEALTH IN HARMONY FOR SOUTHERN CALIFORNIA

In Southern California, we aligned our Acute Care hospitals as a unified network of care – **Southwest Healthcare** – employing over 7,000 dedicated team members and comprised of five hospitals, multiple urgent care locations and affiliated doctors' practices.

Also in Southern California, we continue to make progress on the integration of Riverside Medical Clinic (RMC), a premier multi-specialty physician practice that employs more than 180 physicians and advanced practice providers in seven physician offices. RMC has served the local community for over 85 years.

Rendering of the new patient tower at Southwest Healthcare Inland Valley Hospital.

RIISING TO NEW HEIGHTS

Southwest Healthcare continues to expand services and provide care and employment opportunities across the Southern California region. Most recently, Southwest Healthcare Inland Valley Hospital celebrated the milestone of the installation of the final steel beam in its new, seven-story patient tower, currently under construction.

The tower will include modern, private patient rooms, the installation of advanced clinical technologies for minimally invasive procedures and globally sustainable infrastructure

enhancements, including energy-efficient LED fixtures and solar panels. The tower, expected to open in 2026, is part of a \$400 million project to expand and renovate Southwest Healthcare Inland Valley and Rancho Springs Hospitals.

Hospital leaders and staff were joined by members of the construction crew and city officials to witness the installation of the final steel beam. The beam – adorned with a pine tree, American flag, the hospital brand logo, and the signatures of hospital employees, local physicians, the construction workers on the project and community members – was raised and positioned atop the tower.

UHS BEHAVIORAL HEALTH DIVISION

The Behavioral Health Division brings hope, help and healing. Across 39 states, Washington, D.C., Puerto Rico and the United Kingdom, our teams of trusted caregivers provide high-quality behavioral healthcare services in the communities we serve.

With the growing demand nationally, our care teams are working hard to deliver strong patient outcomes, engage and recognize employee teams and deliver business growth across the division. The Behavioral Health Division cared for approximately 730,000 individuals across the full continuum of care including inpatient, outpatient, partial hospitalization and telehealth settings.

CLINICAL EXCELLENCE

As a leader in the behavioral health space, we know individuals come to us for hope, resiliency and connection. During the year, from a clinical excellence perspective, we delivered

exciting and innovative enhancements. We rolled out Trauma-Informed Care, the cultural transformation strategy for the Division. Trauma-Informed Care is a comprehensive framework that provides quality, clinical care to survivors of trauma by emphasizing safety and the notion that healing occurs through safe and collaborative relationships.

We launched Cerner, an electronic health record (EHR), at three additional facilities in 2023 while planning for an additional six implementations in the coming year. EHR launches will continue over the next few years and promise to deliver on our commitment of using technology to support the clinical teams in conducting their work.

We continued to roll out and implement ObservSMART at our facilities. The use of this proximity-based rounding technology has increased our capacity for patient engagement and has shown great promise in reducing high-risk events as well as improving overall timeliness.

All facilities aim to be highly regarded, trusted providers of behavioral health in the communities we serve. **Black Bear Lodge, La Amistad Behavioral Health Services, Pride Institute, Talbott Recovery and The Ridge Behavioral Health System** were listed on Newsweek/Statista's

annual America's Best Addiction Treatment Centers for 2023. Recognitions such as this help families choose from the best treatment options available.

Leadership and staff celebrated the go-live of the electronic health record (EHR) at Brooke Glen Behavioral Hospital, located in Fort Washington, PA. Left to Right: Leaders Michael McDonald, Karen E. Johnson and Brooke Glen CEO Neil Callahan.

Patient Satisfaction

Our care teams provide evidence-based treatment and support to patients resulting in lasting improvement and recovery for the hundreds of thousands of patients whom we are privileged to serve each year.

In CMS' Quality Reporting requirements, our facilities are compared to 1,500 psychiatric providers across the country. Our results exceed the national averages in 8 out of 12 indicators. In 2023, patients rated their overall care as 4.4 out of 5 in our patient satisfaction surveys; 91% indicated they felt better following care at one of our facilities.

We expanded uptake of the Net Promoter Score (NPS) in our patient surveys. NPS measures the loyalty of consumers and has been widely adopted by most Fortune 1000 companies. We measure NPS using the question: "How likely would you be to recommend this facility to a friend or family member?" In 2023, the UHS Behavioral Health Division's NPS was 40 on a scale of -100 to 100. This score is considered very good/great by industry standards.

We received approximately 8,300 Google reviews and improved the Division's average star rating. We are moving the needle in a positive direction on these highly visible consumer reviews. Higher average star ratings instill confidence as prospective patients, families and referral sources evaluate their care options.

SPECIALTY SERVICES AND PROGRAMS

“The care teams at our Behavioral Health facilities are

compassionate, dedicated individuals who make a difference in the lives of patients and their families. Our Division is honored to continue to serve the growing demand for therapeutic treatment. Our team members are our strongest asset, and we are appreciative of their unwavering dedication to serving with excellence.”

> **MATT PETERSON, PRESIDENT, BEHAVIORAL HEALTH DIVISION**

As a dominant player in the industry, our teams constantly expand service lines to best serve and support patients. We handled over a million referrals during the year and received over 7,700 referral source satisfaction surveys.

We offer hundreds of specialty programs to address diverse audiences. Through our Patriot Support Programs, we serve the unique needs of active-duty military, reservists, veterans and their families. We have also increased the number of programs catering specifically to First Responders to address the needs of police, firefighters, healthcare providers and Emergency Medical Services professionals.

Substance Use Disorder treatment – a core service line priority – features a broad array of options including inpatient detoxification programs, partial hospitalization programs (with and without boarding), intensive outpatient programs and sober living supports.

We are nationally recognized for our programs that treat Eating Disorders. In fact, **Center for Change** was recently the first behavioral health facility in the U.S. to earn validation as a Gluten Free Safe Spot®, another valuable way we are putting patients’ needs at the forefront.

Autism Spectrum Disorder treatment referrals are at an all-time high. We have programs available at select facilities and provide care for individuals referred to us from many states. We are proceeding with plans to expand our capacity to care for this population.

For adolescents in longer-term care with us, we provide structured education. In 2023, 136 students completed their high school requirements. By providing personalized lessons utilizing a combination of direct instruction, online platforms and community-based instruction, we enable academic success.

PATIENT FEATURE

“I was at Talbott from late November 2022 to mid-February 2023. I was a heavy drinker for years and was intervened by my family. The counselors at Talbott are among the best in the country and truly care about the recovery of all the patients. I am happier and healthier now. I feel fortunate to be from Atlanta and have this facility in my backyard, and would recommend it to anyone, from anywhere. If you are reading this and considering treatment, I urge you to take the plunge. It may save your life.”

> Scott, alumnus
Talbott Recovery
Atlanta, GA

With overwhelming support from community partners, elected officials, school district members, first responders and mental health advocates, River Vista Behavioral Health hosted a ribbon cutting ceremony commemorating opening.

CELEBRATING GROWTH AND EXPANSION

Our continually expanding portfolio of services has supported noteworthy growth and expansion. We are privileged to serve an increasing number of patients, ultimately saving and improving lives.

In June, we opened 128-bed **River Vista Behavioral Health** in Madera, California, in partnership with Valley Children’s Healthcare. This beautiful new facility is off to a strong start.

At the site of the new **Southridge Behavioral Hospital** in Western Michigan, we held a ceremonial beam topping in November. Our joint venture partner, Trinity Health Michigan, has a strong reputation as an anchor in the region and we are pleased to collaborate with them. The new facility is on schedule to open in 2025.

In February, we announced an exciting partnership with Lehigh Valley Health Network, in Northeastern Pennsylvania to build a de novo Behavioral Health Facility. Groundbreaking will be held in the Spring of 2024.

We opened new replacement buildings for three Behavioral Health locations: **Prairie St. John’s** in North Dakota in 2023; **Mountain Youth Academy** in Tennessee and **The Hughes Center** in Virginia in early 2024. These achievements solidify our work in a critical component of the care continuum with additional residential treatment center beds.

Each of these new construction and expansion projects underscores our commitment to closing the gaps in much-needed care. We are a trusted provider with whom other major health systems seek to partner. We aim to be the #1 choice for referral sources and consumers for all levels of care. In the year ahead, we are on pace to bring on over 200 new beds at de novo and existing facilities.

SUICIDE AWARENESS AND PREVENTION

UHS continues its strategic partnership with the National Action Alliance for Suicide Prevention, helping individuals connect with support when they find themselves in crisis. During the year, we supported the one-year anniversary of the launch of the 988 Suicide & Crisis Lifeline. 988 provides 24/7 access to trained crisis counselors and 100% privacy. Help is available via phone, text or chat. Since it launched, there have been over 6 million calls, texts and chat messages pouring in to trained counselors who are providing emotional support and stabilization.

The 988 Lifeline helps thousands of people struggling to overcome suicidal crises or mental health-related distress every day. Care delivered has resulted in statistically meaningful improvement.

“Cygnet aims to make our name synonymous with hope,

opportunity and possibility at every location where we are delivering care in the U.K. We are proud to be part of UHS and look forward to many years of success.”

> **DR. TONY ROMERO,**
CEO, CYGNET

CYGNET

As part of its 35th anniversary in 2023, UHS’ subsidiary in the U.K. announced the creation of two divisions under the Cygnet umbrella brand: Cygnet Health Care and Cygnet Social Care. In 2023, Cygnet achieved 10% growth in revenue and bolstered its commitment to providing the highest standards of care.

Cygnet’s investment in services and focus on quality has strengthened its reputation, and in the last year Cygnet provided care to a record number of individuals. Cygnet is a trusted partner to the National Health Service and local authorities in England, Scotland and Wales. It is a positive sign of how commissioners value the care being offered and defines Cygnet as one of the largest and leading providers of behavioral health services in the U.K.

For the second year in a row, Cygnet outperformed the national average in regulatory ratings with 83% of services evaluated across the U.K. rated ‘Good’ or ‘Outstanding’ and 100% of inpatient schools in Cygnet’s Child and Adolescents Mental Health Services (CAMHS) rated ‘Good.’

Cygnet is grateful to its talented workforce and leadership teams who are committed to sustaining and exceeding quality standards. In the past year, Cygnet achieved a reduction in staff turnover, used fewer agency workers and enhanced the retention of its workforce. Cygnet’s goal is to grow more talent in-house, provide opportunities for staff to progress with us and develop current staff members into future leaders.

As part of an extensive expansion program, Cygnet will open six new hospitals and modernize five existing facilities during 2024. New services will generate employment in local communities, and Cygnet will recruit up to 1,000 more people into its workforce.

SERVICE USER FEATURE

“I have struggled with my mental health for as long as I can remember. My mental well-being declined to the point where I was admitted to an acute ward, where I remained for three years. I was fortunate to be able to move to Cygnet Hospital Maidstone’s Roseacre Ward. While at Roseacre Ward, I had the most incredible support that has been invaluable for my recovery. I also received my autism diagnosis which made me feel validated.”

“After my stay at Roseacre Ward, I moved to Cygnet Supported Living and now I have started my dream course at university. I am the happiest I have ever been. I have a bright future ahead of me and I am so proud of all I have achieved through the support of Cygnet.””

SERVING OUR NATION'S MILITARY

Via Linda Behavioral Hospital in Scottsdale, Arizona, held a ribbon cutting for their new Patriot Support Program. The 20-bed unit is dedicated for active-duty U.S. Armed Forces, U.S. Reserve and National Guard members. Left to Right: Matt Mueller, Andy Laning, Jerry Fenwick, Matt Peterson, Jackie Hull, Megan James, Michael Leal and Michael Tapp.

We were privileged to serve over 17,500 active duty military personnel, veterans and family members across the Division via our designated Patriot Support Programs. Our Division received referrals from 317 Active Duty Military Installations, Military Medical Facilities, National Guard and Air National Guard Units and Reserve locations from both the United States and overseas.

Services are designed to address the effects of combat stress, PTSD, depression, Substance Use Disorder and other behavioral health issues.

In many of our programs, services and care are provided by former military, providing real-world expertise and understanding. Five new Patriot Support Veterans Programs were added during the year.

We now have 10 Child and Adolescent programs within the Patriot Support Programs network. Facilities were selected based on the high volume of military dependents receiving care along with their high patient satisfaction scores, outstanding Online Reputation star ratings, NPS, Patient Safety data and clinical outcomes.

As a TRICARE®-authorized provider, there are opportunities to provide services for 10 million active service members, retirees and their families globally. UHS facilities play a vital role by working with the U.S. Department of Defense, through the Defense Health Agency, to provide inpatient and outpatient psychiatric and substance use services.

In 2023, UHS Facilities educated communities about Veterans Affairs (VA) benefits made available through the COMPACT (Veterans Comprehensive Prevention, Access to Care and Treatment) Act. There are 18 million veterans across the U.S., and we were honored to provide services to over 7,000 veterans, a growth rate of 24%.

Charles Cole, Former Chief
of the Medical Enlisted
Force, United States
Air Force

PATIENT FEATURE

“The time I spent at Laurel Ridge Treatment Center changed my life for the good. They have world class staff and service. The accommodations, respect, compassion, love and drive that Mission 100 nurses, staff therapists and all others give through this program cannot be matched anywhere else. I was nervous to come here like most, but once I got here, not only did the staff welcome me with open arms and a smile, but the TRIBE from Mission 100 did as well. I have never felt this free in my life, nor have I had this much clarity. Laurel Ridge and their staff save people’s lives and changes them for the better.”

> Beth, former military patient

SUSTAINABILITY

Serving communities with integrity and purpose

UHS is committed to being a high-quality healthcare provider, trusted and respectful employer and valued partner to the local communities we serve. This has been – and remains – core to our Mission throughout our 45-year history.

Our sustainability efforts are an extension of this commitment to doing business right and are reflected in our day-to-day operations. In the coming year, we will continue to focus on further development of new efficiencies, products and processes that support our business, services and environment.

ONLINE ONLY – to access the 2023 UHS Sustainability Report, visit uhs.com/sustainability

OUR PRINCIPLES

We stand for excellence, each and every day, at each and every encounter. Our Principles set a high bar and reflect our purpose.

We Provide Superior Quality Patient Care

We Value Each Member of Our Team and All Their Good Work

We Are Committed to Being a Highly Ethical Healthcare Provider

We Are Devoted to Serving Our Local Community

OUR SUSTAINABILITY IMPACT

2023 BY THE NUMBERS

FOCUSING ON PATIENTS

100% of U.S. facilities are licensed by their state and accredited by regulatory bodies, such as The Joint Commission and/or Commission on Accreditation of Rehabilitation Facilities

15 facilities with Gluten-Free Food Service validation

91% of Behavioral Health patients indicated they felt better following care at one of our facilities*

89% of Behavioral Health patients indicated they were treated with dignity and respect**

SUPPORTING OUR VALUED TEAMS

75% of U.S. workforce are women

57% of U.S. workforce is ethnically diverse

1,600+ veterans hired in U.S.

81% of U.S. employees report that they feel included on their team/work unit***

87% of U.S. employees report that the person they report to treats them with respect***

PARTNERING WITH LOCAL COMMUNITIES

\$7.1 billion in salaries, wages and benefits

10+ year partnership with the National Action Alliance for Suicide Prevention to help those in crisis

14 years on Fortune magazine's World's Most Admired Companies list

\$2.6 billion of uncompensated care at our Acute Care hospitals

INVESTING IN THE ENVIRONMENT

15 Energy Star certifications

90% of lights in UHS' U.S. facilities are equipped with LED versions

5,080.5 metric tons of paper collected, shredded and recycled

13 Acute Care hospitals using new application to track food waste

100% of electricity has been procured from renewable sources since 2021 across all Cygnet facilities in the U.K.

GOVERNING STRUCTURE

4 (of 6) Board Committees provide oversight of sustainability-related issues

43% of UHS Board of Directors members are women

48 privacy and data-security-related policies maintained at the Corporate level and locally by U.S. facilities

2 Patient Safety Organizations registered under the Agency for Healthcare Research and Quality to govern patient-safety initiatives (one for each Division)

*Based on 378,534 respondents to 2023 patient satisfaction surveys

**Based on 378,750 respondents to 2023 patient satisfaction surveys

***Based on 50,064 employees who responded to U.S. Pulse Employee Engagement Survey

BUILDING FOR THE FUTURE

As we move forward, we maintain a long-term focus on the future.

With a commitment to delivering healthcare with excellence and quality, we will identify, develop and pursue rational new opportunities that complement our core business and achieve our Mission, ensuring UHS is well positioned for the decades ahead.

We will remain a vibrant company that rises to challenges, leverages opportunities and cultivates visionary leaders.

Identification Number)

19406-0958
(Zip Code)

Registrant's telephone number, including area code: (610) 768-3300

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Class B Common Stock, \$0.01 par value	UHS	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act:

Class D Common Stock, \$.01 par value
(Title of each Class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>
		Emerging growth company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report.

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements.

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b).

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of voting stock held by non-affiliates at June 30, 2023 was \$9.5 billion. (For the purpose of this calculation, it was assumed that Class A, Class C, and Class D Common Stock, which are not traded but are convertible share-for-share into Class B Common Stock, have the same market value as Class B Common Stock. Also, for purposes of this calculation only, all directors are deemed to be affiliates.)

The number of shares of the registrant's Class A Common Stock, \$.01 par value, Class B Common Stock, \$.01 par value, Class C Common Stock, \$.01 par value, and Class D Common Stock, \$.01 par value, outstanding as of January 31, 2024, were 6,577,100; 59,969,747; 661,688 and 12,802, respectively.

DOCUMENTS INCORPORATED BY REFERENCE:

Portions of the registrant's definitive proxy statement for our 2024 Annual Meeting of Stockholders, which will be filed with the Securities and Exchange Commission within 120 days after December 31, 2023 (incorporated by reference under Part III).

-------------------	----

This Annual Report on Form 10-K is for the year ended December 31, 2023. This Annual Report modifies and supersedes documents filed prior to this Annual Report. Information that we file with the Securities and Exchange Commission (the “SEC”) in the future will automatically update and supersede information contained in this Annual Report.

In this Annual Report, “we,” “us,” “our” “UHS” and the “Company” refer to Universal Health Services, Inc. and its subsidiaries. UHS is a registered trademark of UHS of Delaware, Inc., the management company for, and a wholly-owned subsidiary of Universal Health Services, Inc. Universal Health Services, Inc. is a holding company and operates through its subsidiaries including its management company, UHS of Delaware, Inc. All healthcare and management operations are conducted by subsidiaries of Universal Health Services, Inc. To the extent any reference to “UHS” or “UHS facilities” in this report including letters, narratives or other forms contained herein relates to our healthcare or management operations it is referring to Universal Health Services, Inc.’s subsidiaries including UHS of Delaware, Inc. Further, the terms “we,” “us,” “our” or the “Company” in such context similarly refer to the operations of Universal Health Services Inc.’s subsidiaries including UHS of Delaware, Inc. Any reference to employees or employment contained herein refers to employment with or employees of the subsidiaries of Universal Health Services, Inc. including UHS of Delaware, Inc.

PART I

ITEM 1. *Business*

Our principal business is owning and operating, through our subsidiaries, acute care hospitals and outpatient facilities and behavioral health care facilities.

As of February 27, 2024, we owned and/or operated 360 inpatient facilities and 48 outpatient and other facilities, including the following, located in 39 states, Washington, D.C., the United Kingdom and Puerto Rico:

Acute care facilities located in the U.S.:

- 27 inpatient acute care hospitals;
- 27 free-standing emergency departments, and;
- 10 outpatient centers & 1 surgical hospital.

Behavioral health care facilities (333 inpatient facilities and 10 outpatient facilities):

Located in the U.S.:

- 186 inpatient behavioral health care facilities, and;
- 8 outpatient behavioral health care facilities.

Located in the U.K.:

- 144 inpatient behavioral health care facilities, and;
- 2 outpatient behavioral health care facilities.

Located in Puerto Rico:

- 3 inpatient behavioral health care facilities.

Net revenues from our acute care hospitals, outpatient facilities and commercial health insurer accounted for 57% of our consolidated net revenues during each of 2023 and 2022. Net revenues from our behavioral health care facilities and commercial health insurer accounted for 43% of our consolidated net revenues during each of 2023 and 2022.

Our behavioral health care facilities located in the U.K. generated net revenues of approximately \$761 million in 2023 and \$685 million in 2022. Total assets at our U.K. behavioral health care facilities were approximately \$1.327 billion as of December 31, 2023 and \$1.235 billion as of December 31, 2022.

Services provided by our hospitals include general and specialty surgery, internal medicine, obstetrics, emergency room care, radiology, oncology, diagnostic care, coronary care, pediatric services, pharmacy services and/or behavioral health services. We provide capital resources as well as a variety of management services to our facilities, including central purchasing, information services, finance and control systems, facilities planning, physician recruitment services, administrative personnel management, marketing and public relations.

Available Information

We are a Delaware corporation that was organized in 1979. Our principal executive offices are located at Universal Corporate Center, 367 South Gulph Road, P.O. Box 61558, King of Prussia, PA 19406. Our telephone number is (610) 768-3300.

Our website is located at www.uhs.com. Copies of our annual, quarterly and current reports that we file with the SEC, and any amendments to those reports, are available free of charge on our website. Our filings are also available to the public at the website maintained by the SEC, www.sec.gov. The information posted on our website is not incorporated into this Annual Report. Our Board of Directors' committee charters (Audit Committee, Compensation Committee, Nominating & Governance Committee and Quality and Compliance Committee), Code of Business Conduct and Corporate Standards applicable to all employees, Code of Ethics for Senior Financial Officers, Corporate Governance Guidelines and our Code of Conduct, Corporate Compliance Manual and Compliance Policies and Procedures are available free of charge on our website. Copies of such reports and charters are available in print to any stockholder who makes a request. Such requests should be made to our Secretary at our King of Prussia, PA corporate headquarters. We intend to satisfy the disclosure requirement under Item 5.05 of Form 8-K relating to amendments to or waivers of any provision of our Code of Ethics for Senior Financial Officers by promptly posting this information on our website.

In accordance with Section 303A.12(a) of the New York Stock Exchange Listed Company Manual, we submitted our CEO's certification to the New York Stock Exchange in 2023. Additionally, contained in Exhibits 31.1 and 31.2 of this Annual Report on Form 10-K, are our CEO's and CFO's certifications regarding the quality of our public disclosures under Section 302 of the Sarbanes-Oxley Act of 2002.

Our Mission

Our company mission is:

To provide superior quality healthcare services that
PATIENTS recommend to families and friends,
PHYSICIANS prefer for their patients,
PURCHASERS select for their clients,
EMPLOYEES are proud of, and
INVESTORS seek for long-term returns.

To achieve this, we have a commitment to:

- service excellence
- continuous improvement in measurable ways
- employee development
- ethical and fair treatment of all
- teamwork
- compassion
- innovation in service delivery

Business Strategy

We believe community-based hospitals will remain the focal point of the healthcare delivery network and we are committed to a philosophy of self-determination for both the company and our hospitals.

Acquisition of Additional Hospitals. We selectively seek opportunities to expand our base of operations by acquiring, constructing or leasing additional hospital facilities. We are committed to a program of rational growth around our core businesses, while retaining the missions of the hospitals we manage and the communities we serve. Such expansion may provide us with access to new markets and new healthcare delivery capabilities. We also continue to examine our facilities and consider divestiture of those facilities that we believe do not have the potential to contribute to our growth or operating strategy. In recent years our behavioral health services segment has been focused on efforts to partner with non-UHS acute care hospitals to help operate their behavioral health services. These arrangements include hospital purchases, leased beds and joint venture operating agreements.

Improvement of Operations of Existing Hospitals and Services. We also seek to increase the operating revenues and profitability of owned hospitals by the introduction of new services, improvement of existing services, physician recruitment and the application of financial and operational controls.

We are involved in continual development activities for the benefit of our existing facilities. From time-to-time applications are filed with state health planning agencies to add new services in existing hospitals in states which require certificates of need, or CONs. Although we expect that some of these applications will result in the addition of new facilities or services to our operations, no assurances can be made for ultimate success by us in these efforts.

Quality and Efficiency of Services. Pressures to contain healthcare costs and technological developments allowing more procedures to be performed on an outpatient basis have led payers to demand a shift to ambulatory or outpatient care wherever possible. We are responding to this trend by emphasizing the expansion of outpatient services. In addition, in response to cost containment pressures, we continue to implement programs at our facilities designed to improve financial performance and efficiency while continuing to provide quality care, including more efficient use of professional and paraprofessional staff, monitoring and adjusting staffing levels and equipment usage, improving patient management and reporting procedures and implementing more efficient billing and collection procedures. In addition, we will continue to emphasize innovation in our response to the rapid changes in regulatory trends and market conditions while fulfilling our commitment to patients, physicians, employees, communities and our stockholders.

In addition, our aggressive recruiting of highly qualified physicians and developing provider networks help to establish our facilities as an important source of quality healthcare in their respective communities.

Hospital Utilization

We believe that the most important factors relating to the overall utilization of a hospital include the quality and market position of the hospital and the number, quality and specialties of physicians providing patient care within the facility. Generally, we believe that the ability of a hospital to meet the health care needs of its community is determined by its breadth of services, level of technology, emphasis on quality of care and convenience for patients and physicians. Other factors that affect utilization include general and local economic conditions, market penetration of managed care programs, the degree of outpatient use, the availability of

reimbursement programs such as Medicare and Medicaid, and demographic changes such as the growth in local populations. Utilization across the industry also is being affected by improvements in clinical practice, medical technology and pharmacology. Current industry trends in utilization and occupancy have been significantly affected by changes in reimbursement policies of third party payers. We are also unable to predict the extent to which these industry trends will continue or accelerate. In addition, our acute care services business is typically subject to certain seasonal fluctuations, such as higher patient volumes and net patient service revenues in the first and fourth quarters of the year.

Sources of Revenue

We receive payments for services rendered from private insurers, including managed care plans, the federal government under the Medicare program, state governments under their respective Medicaid programs and directly from patients. See *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations—Sources of Revenue* for additional disclosure. Other information related to our revenues, income and other operating information for each reporting segment of our business is provided in Note 12 to our Consolidated Financial Statements, *Segment Reporting*.

Regulation and Other Factors

Overview: The healthcare industry is subject to numerous laws, regulations and rules including, among others, those related to government healthcare participation requirements, various licensure and accreditations, reimbursement for patient services, health information privacy and security rules, and Medicare and Medicaid fraud and abuse provisions (including, but not limited to, federal statutes and regulations prohibiting kickbacks and other illegal inducements to potential referral sources, false claims submitted to federal or state health care programs and self-referrals by physicians). Providers that are found to have violated any of these laws and regulations may be excluded from participating in government healthcare programs, subjected to significant fines or penalties and/or required to repay amounts received from the government for previously billed patient services. Although we believe our policies, procedures and practices comply with governmental regulations, no assurance can be given that we will not be subjected to additional governmental inquiries or actions, or that we would not be faced with sanctions, fines or penalties if so subjected. Even if we were to ultimately prevail, a significant governmental inquiry or action under one of the above laws, regulations or rules could have a material adverse impact on us.

Licensing, Certification and Accreditation: All of our U.S. hospitals are subject to compliance with various federal, state and local statutes and regulations in the U.S. and receive periodic inspection by state licensing agencies to review standards of medical care, equipment and cleanliness. Our hospitals must also comply with the conditions of participation and licensing requirements of federal, state and local health agencies, as well as the requirements of municipal building codes, health codes and local fire departments. Various other licenses and permits are also required in order to dispense narcotics, operate pharmacies, handle radioactive materials and operate certain equipment. Our facilities in the United Kingdom are also subject to various laws and regulations.

All of our eligible hospitals have been accredited by The Joint Commission. All of our acute care hospitals and most of our behavioral health centers in the U.S. are certified as providers of Medicare and Medicaid services by the appropriate governmental authorities.

If any of our facilities were to lose its Joint Commission accreditation or otherwise lose its certification under the Medicare and Medicaid programs, the facility may be unable to receive reimbursement from the Medicare and Medicaid programs and other payers. We believe our facilities are in substantial compliance with current applicable federal, state, local and independent review body regulations and standards. The requirements for licensure, certification and accreditation are subject to change and, in order to remain qualified, it may become necessary for us to make changes in our facilities, equipment, personnel and services in the future, which could have a material adverse impact on operations.

Certificates of Need: Certain of the states in which we operate hospitals have certificates of need (“CON”) laws as a condition prior to hospital capital expenditures, construction, expansion, modernization or initiation of major new services. Failure to obtain necessary state approval can result in our inability to complete an acquisition, expansion or replacement, the imposition of civil or, in some cases, criminal sanctions, the inability to receive Medicare or Medicaid reimbursement or the revocation of a facility’s license, which could harm our business. In addition, significant CON reforms have been proposed in a number of states that would increase the capital spending thresholds and provide exemptions of various services from review requirements. In the past, we have not experienced any material adverse effects from those requirements, but we cannot predict the impact of these changes upon our operations.

Conversion Legislation: Many states have enacted or are considering enacting laws affecting the conversion or sale of not-for-profit hospitals to for-profit entities. These laws generally require prior approval from the attorney general, advance notification and community involvement. In addition, attorneys general in states without specific conversion legislation may exercise discretionary authority over these transactions. Although the level of government involvement varies from state to state, the trend is to provide for increased governmental review and, in some cases, approval of a transaction in which a not-for-profit entity sells a health care facility to a for-profit entity. The adoption of new or expanded conversion legislation and the increased review of not-for-profit hospital conversions may limit our ability to grow through acquisitions of not-for-profit hospitals.

Utilization Review: Federal regulations require that admissions and utilization of facilities by Medicare and Medicaid patients must be reviewed in order to ensure efficient utilization of facilities and services. The law and regulations require Peer Review Organizations (“PROs”) to review the appropriateness of Medicare and Medicaid patient admissions and discharges, the quality of care provided, the validity of diagnosis related group (“DRG”) classifications and the appropriateness of cases of extraordinary length of stay. PROs may deny payment for services provided, assess fines and also have the authority to recommend to the Department of Health and Human Services (“HHS”) that a provider that is in substantial non-compliance with the standards of the PRO be excluded from participating in the Medicare program. We have contracted with PROs in each state where we do business to perform the required reviews.

Audits: Most hospitals are subject to federal audits to validate the accuracy of Medicare and Medicaid program submitted claims. If these audits identify overpayments, we could be required to pay a substantial rebate of prior years’ payments subject to various administrative appeal rights. The federal government contracts with third-party “recovery audit contractors” (“RACs”) and “Medicaid integrity contractors” (“MICs”), on a contingent fee basis, to audit the propriety of payments to Medicare and Medicaid providers. Similarly, Medicare zone program integrity contractors (“ZPICs”) target claims for potential fraud and abuse. Additionally, Medicare administrative contractors (“MACs”) must ensure they pay the right amount for covered and correctly coded services rendered to eligible beneficiaries by legitimate providers. The Centers for Medicare and Medicaid Services (“CMS”) consolidated many of these Medicare and Medicaid program integrity functions into new unified program integrity contractors (“UPICs”), though it remains unclear what effect, if any, this consolidation may have. We have undergone claims audits related to our receipt of federal healthcare payments during the last three years, the results of which have not required material adjustments to our consolidated results of operations. However, potential liability from future federal or state audits could ultimately exceed established reserves, and any excess could potentially be substantial. Further, Medicare and Medicaid regulations also provide for withholding Medicare and Medicaid overpayments in certain circumstances, which could adversely affect our cash flow.

Self-Referral and Anti-Kickback Legislation

The Stark Law: The Social Security Act includes a provision commonly known as the “Stark Law.” This law prohibits physicians from referring Medicare and Medicaid patients to entities with which they or any of their immediate family members have a financial relationship, unless an exception is met. These types of referrals are known as “self-referrals.” Sanctions for violating the Stark Law include civil penalties up to \$29,899 for each violation, and up to \$199,338 for sham arrangements. There are a number of exceptions to the self-referral prohibition, including an exception for a physician’s ownership interest in an entire hospital as opposed to an ownership interest in a hospital department unit, service or subpart. However, federal laws and regulations now limit the ability of hospitals relying on this exception to expand aggregate physician ownership interest or to expand certain hospital facilities. This regulation also places a number of compliance requirements on physician-owned hospitals related to reporting of ownership interest. There are also exceptions for many of the customary financial arrangements between physicians and providers, including employment contracts, leases and recruitment agreements that adhere to certain enumerated requirements. CMS issued a final rule in 2020 that created a new Stark exception for value-based models. Although the final regulations provide exceptions to the Stark Law, there may remain regulatory risks for participating hospitals, as well as financial and operational risks.

We monitor all aspects of our business and have developed a comprehensive ethics and compliance program that is designed to meet or exceed applicable federal guidelines and industry standards. Nonetheless, because the law in this area is complex and constantly evolving, there can be no assurance that federal regulatory authorities will not determine that any of our arrangements with physicians violate the Stark Law.

Anti-kickback Statute: A provision of the Social Security Act known as the “anti-kickback statute” prohibits healthcare providers and others from directly or indirectly soliciting, receiving, offering or paying money or other remuneration to other individuals and entities in return for using, referring, ordering, recommending or arranging for such referrals or orders of services or other items covered by a federal or state health care program. However, changes to the anti-kickback statute have reduced the intent required for violation; one is no longer required to have actual knowledge or specific intent to commit a violation of the anti-kickback statute in order to be found in violation of such law.

The anti-kickback statute contains certain exceptions, and the Office of the Inspector General of the Department of Health and Human Services (“OIG”) has issued regulations that provide for “safe harbors,” from the federal anti-kickback statute for various activities. These activities, which must meet certain requirements, include (but are not limited to) the following: investment interests, space rental, equipment rental, practitioner recruitment, personnel services and management contracts, sale of practice, referral services, warranties, discounts, employees, group purchasing organizations, waiver of beneficiary coinsurance and deductible amounts, managed care arrangements, obstetrical malpractice insurance subsidies, investments in group practices, freestanding surgery centers, donation of technology for electronic health records and referral agreements for specialty services. In 2020, the OIG issued a final rule that established an anti-kickback statute safe harbor for value based models. Although the final regulations provide safe harbors, there may remain regulatory risks for participating hospitals, as well as financial and operational risks. The fact that conduct or a business arrangement does not fall within a safe harbor or exception does not automatically render the conduct or business arrangement illegal under the anti-kickback statute. However, such conduct and business arrangements may lead to increased scrutiny by government enforcement authorities.

Although we believe that our arrangements with physicians and other referral sources have been structured to comply with current law and available interpretations, there can be no assurance that all arrangements comply with an available safe harbor or that regulatory authorities enforcing these laws will determine these financial arrangements do not violate the anti-kickback statute or other applicable laws. Violations of the anti-kickback statute may be punished by a criminal fine of up to \$100,000 for each violation or imprisonment, however, under 18 U.S.C. Section 3571, this fine may be increased to \$250,000 for individuals and \$500,000 for organizations. Civil money penalties may include fines of up to \$120,816 per violation and damages of up to three times the total amount of the remuneration and/or exclusion from participation in Medicare and Medicaid.

Similar State Laws: Many of the states in which we operate have adopted laws that prohibit payments to physicians in exchange for referrals similar to the anti-kickback statute and the Stark Law, some of which apply regardless of the source of payment for care. These statutes typically provide criminal and civil penalties as well as loss of licensure. In many instances, the state statutes provide that any arrangement falling in a federal safe harbor will be immune from scrutiny under the state statutes. However, in most cases, little precedent exists for the interpretation or enforcement of these state laws.

These laws and regulations are extremely complex and, in many cases, we don't have the benefit of regulatory or judicial interpretation. It is possible that different interpretations or enforcement of these laws and regulations could subject our current or past practices to allegations of impropriety or illegality or could require us to make changes in our facilities, equipment, personnel, services, capital expenditure programs and operating expenses. A determination that we have violated one or more of these laws, or the public announcement that we are being investigated for possible violations of one or more of these laws (see Item 3. Legal Proceedings), could have a material adverse effect on our business, financial condition or results of operations and our business reputation could suffer significantly. In addition, we cannot predict whether other legislation or regulations at the federal or state level will be adopted, what form such legislation or regulations may take or what their impact on us may be.

If we are deemed to have failed to comply with the anti-kickback statute, the Stark Law or other applicable laws and regulations, we could be subjected to liabilities, including criminal penalties, civil penalties (including the loss of our licenses to operate one or more facilities), and exclusion of one or more facilities from participation in the Medicare, Medicaid and other federal and state health care programs. The imposition of such penalties could have a material adverse effect on our business, financial condition or results of operations.

Federal False Claims Act and Similar State Regulations: A current trend affecting the health care industry is the increased use of the federal False Claims Act, and, in particular, actions being brought by individuals on the government's behalf under the False Claims Act's qui tam, or whistleblower, provisions. Whistleblower provisions allow private individuals to bring actions on behalf of the government by alleging that the defendant has defrauded the Federal government.

When a defendant is determined by a court of law to have violated the False Claims Act, the defendant may be liable for up to three times the actual damages sustained by the government, plus mandatory civil penalties of between \$13,508 to \$27,018 for each separate false claim. There are many potential bases for liability under the False Claims Act. Liability often arises when an entity knowingly submits a false claim for reimbursement to the federal government. The Fraud Enforcement and Recovery Act of 2009 ("FERA") amended and expanded the number of actions for which liability may attach under the False Claims Act, eliminating requirements that false claims be presented to federal officials or directly involve federal funds. FERA also clarifies that a false claim violation occurs upon the knowing retention, as well as the receipt, of overpayments. In addition, recent changes to the anti-kickback statute have made violations of that law punishable under the civil False Claims Act. Further, a number of states have adopted their own false claims provisions as well as their own whistleblower provisions whereby a private party may file a civil lawsuit on behalf of the state in state court. The False Claims Act require that federal healthcare program overpayments be returned within 60 days from the date the overpayment was identified, or by the date any corresponding cost report was due, whichever is later. Failure to return an overpayment within this period may result in additional civil False Claims Act liability.

Other Fraud and Abuse Provisions: The Social Security Act also imposes criminal and civil penalties for submitting false claims to Medicare and Medicaid. False claims include, but are not limited to, billing for services not rendered, billing for services without prescribed documentation, misrepresenting actual services rendered in order to obtain higher reimbursement and cost report fraud. Like the anti-kickback statute, these provisions are very broad.

Further, the Health Insurance Portability and Accountability Act of 1996 ("HIPAA") broadened the scope of the fraud and abuse laws by adding several criminal provisions for health care fraud offenses that apply to all health benefit programs, whether or not payments under such programs are paid pursuant to federal programs. HIPAA also introduced enforcement mechanisms to prevent fraud and abuse in Medicare. There are civil penalties for prohibited conduct, including, but not limited to billing for medically unnecessary products or services.

HIPAA Administrative Simplification and Privacy Requirements: The administrative simplification provisions of HIPAA, as amended by the Health Information Technology for Economic and Clinical Health Act ("HITECH"), require the use of uniform electronic data transmission standards for health care claims and payment transactions submitted or received electronically. These provisions are intended to encourage electronic commerce in the health care industry. HIPAA also established federal rules protecting the privacy and security of personal health information. The privacy and security regulations address the use and disclosure of

individual health care information and the rights of patients to understand and control how such information is used and disclosed. Violations of HIPAA can result in both criminal and civil fines and penalties.

We believe that we are in material compliance with the privacy regulations of HIPAA, as we continue to develop training and revise procedures to address ongoing compliance. The HIPAA security regulations require health care providers to implement administrative, physical and technical safeguards to protect the confidentiality, integrity and availability of patient information. HITECH has since strengthened certain HIPAA rules regarding the use and disclosure of protected health information, extended certain HIPAA provisions to business associates, and created new security breach notification requirements. HITECH has also extended the ability to impose civil money penalties on providers not knowing that a HIPAA violation has occurred. We believe that we have been in substantial compliance with HIPAA and HITECH requirements to date. Recent changes to the HIPAA regulations may result in greater compliance requirements for healthcare providers, including expanded obligations to report breaches of unsecured patient data, as well as create new liabilities for the actions of parties acting as business associates on our behalf.

Red Flags Rule: In addition, the Federal Trade Commission (“FTC”) Red Flags Rule requires financial institutions and businesses maintaining accounts to address the risk of identity theft. The Red Flag Program Clarification Act of 2010, signed on December 18, 2010, appears to exclude certain healthcare providers from the Red Flags Rule, but permits the FTC or relevant agencies to designate additional creditors subject to the Red Flags Rule through future rulemaking if the agencies determine that the person in question maintains accounts subject to foreseeable risk of identity theft. Compliance with any such future rulemaking may require additional expenditures in the future.

Patient Safety and Quality Improvement Act of 2005: On July 29, 2005, the Patient Safety and Quality Improvement Act of 2005 was enacted, which has the goal of reducing medical errors and increasing patient safety. This legislation establishes a confidential reporting structure in which providers can voluntarily report “Patient Safety Work Product” (“PSWP”) to “Patient Safety Organizations” (“PSOs”). Under the system, PSWP is made privileged, confidential and legally protected from disclosure. PSWP does not include medical, discharge or billing records or any other original patient or provider records but does include information gathered specifically in connection with the reporting of medical errors and improving patient safety. This legislation does not preempt state or federal mandatory disclosure laws concerning information that does not constitute PSWP. PSOs are certified by the Secretary of the HHS for three-year periods and analyze PSWP, provide feedback to providers and may report non-identifiable PSWP to a database. In addition, PSOs are expected to generate patient safety improvement strategies.

Environmental Regulations: Our healthcare operations generate medical waste that must be disposed of in compliance with federal, state and local environmental laws, rules and regulations. Infectious waste generators, including hospitals, face substantial penalties for improper disposal of medical waste, including civil penalties of up to \$25,000 per day of noncompliance, criminal penalties of up to \$50,000 per day, imprisonment, and remedial costs. In addition, our operations, as well as our purchases and sales of facilities are subject to various other environmental laws, rules and regulations. We believe that our disposal of such wastes is in material compliance with all state and federal laws.

Corporate Practice of Medicine: Several states, including Florida, Nevada, California and Texas, have laws and/or regulations that prohibit corporations and other entities from employing physicians and practicing medicine for a profit or that prohibit certain direct and indirect payments or fee-splitting arrangements between health care providers that are designed to induce or encourage the referral of patients to, or the recommendation of, particular providers for medical products and services. Possible sanctions for violation of these restrictions include loss of license and civil and criminal penalties. In addition, agreements between the corporation and the physician may be considered void and unenforceable. These statutes and/or regulations vary from state to state, are often vague and have seldom been interpreted by the courts or regulatory agencies. We do not expect these state corporate practice of medicine proscriptions to significantly affect our operations. Many states have laws and regulations which prohibit payments for referral of patients and fee-splitting with physicians. We do not make any such payments or have any such arrangements.

EMTALA: All of our hospitals are subject to the Emergency Medical Treatment and Active Labor Act (“EMTALA”). This federal law generally requires hospitals with an emergency department that are certified providers under Medicare to conduct a medical screening examination of every person who visits the hospital’s emergency room for treatment and, if the patient is suffering from a medical emergency, to either stabilize the patient’s condition or transfer the patient to a facility that can better handle the condition. Our obligation to screen and stabilize emergency medical conditions exists regardless of a patient’s ability to pay for treatment. There are severe penalties under EMTALA if a hospital fails to screen or appropriately stabilize or transfer a patient or if the hospital delays appropriate treatment in order to first inquire about the patient’s ability to pay. Penalties for violations of EMTALA include civil monetary penalties and exclusion from participation in the Medicare program. In addition to any liabilities that a hospital may incur under EMTALA, an injured patient, the patient’s family or a medical facility that suffers a financial loss as a direct result of another hospital’s violation of the law can bring a civil suit against the hospital unrelated to the rights granted under that statute.

The federal government broadly interprets EMTALA to cover situations in which patients do not actually present to a hospital’s emergency room, but present for emergency examination or treatment to the hospital’s campus, generally, or to a hospital-based clinic that treats emergency medical conditions or are transported in a hospital-owned ambulance, subject to certain exceptions. EMTALA does not generally apply to patients admitted for inpatient services; however, CMS has sought industry comments on the potential applicability of EMTALA to hospital inpatients and the responsibilities of hospitals with specialized capabilities, respectively. CMS

has not yet issued regulations or guidance in response to that request for comments. The government also has expressed its intent to investigate and enforce EMTALA violations actively in the future. We believe that we operate in substantial compliance with EMTALA.

Health Care Industry Investigations: We are subject to claims and suits in the ordinary course of business, including those arising from care and treatment afforded by our hospitals and are party to various government investigations and litigation. Please see *Item 3. Legal Proceedings* included herein for additional disclosure. In addition, currently, and from time to time, some of our facilities are subjected to inquiries and/or actions and receive notices of potential non-compliance of laws and regulations from various federal and state agencies. Providers that are found to have violated these laws and regulations may be excluded from participating in government healthcare programs, subjected to potential licensure, certification, and/or accreditation revocation, subjected to fines or penalties or required to repay amounts received from the government for previously billed patient services.

We monitor all aspects of our business and have developed a comprehensive ethics and compliance program that is designed to meet or exceed applicable federal guidelines and industry standards. Because the law in this area is complex and constantly evolving, governmental investigation or litigation may result in interpretations that are inconsistent with industry practices, including ours. Although we believe our policies, procedures and practices comply with governmental regulations, no assurance can be given that we will not be subjected to inquiries or actions, or that we will not be faced with sanctions, fines or penalties in connection with the investigations. Even if we were to ultimately prevail, the government's inquiry and/or action in connection with these matters could have a material adverse effect on our future operating results.

Our substantial Medicare, Medicaid and other governmental billings may result in heightened scrutiny of our operations. It is possible that governmental entities could initiate additional investigations or litigation in the future and that such matters could result in significant penalties as well as adverse publicity. It is also possible that our executives and/or managers could be included as targets or witnesses in governmental investigations or litigation and/or named as defendants in private litigation.

Revenue Rulings 98-15 and 2004-51: In March 1998 and May 2004, the IRS issued guidance regarding the tax consequences of joint ventures between for-profit and not-for-profit hospitals. As a result of the tax rulings, the IRS has proposed, and may in the future propose, to revoke the tax-exempt or public charity status of certain not-for-profit entities which participate in such joint ventures or to treat joint venture income as unrelated business taxable income to them. The tax rulings have limited development of joint ventures and any adverse determination by the IRS or the courts regarding the tax-exempt or public charity status of a not-for-profit partner or the characterization of joint venture income as unrelated business taxable income could further limit joint venture development with not-for-profit hospitals, and/or require the restructuring of certain existing joint ventures with not-for-profits.

State Rate Review: Some states where we operate hospitals have adopted legislation mandating rate or budget review for hospitals or have adopted taxes on hospital revenues, assessments or licensure fees to fund indigent health care within the state. In the aggregate, state rate reviews and indigent tax provisions have not materially, adversely affected our results of operations.

Medical Malpractice Tort Law Reform: Medical malpractice tort law has historically been maintained at the state level. All states have laws governing medical liability lawsuits. Over half of the states have limits on damages awards. Almost all states have eliminated joint and several liability in malpractice lawsuits, and many states have established limits on attorney fees. Many states had bills introduced in their legislative sessions to address medical malpractice tort reform. Proposed solutions include enacting limits on non-economic damages, malpractice insurance reform, and gathering lawsuit claims data from malpractice insurance companies and the courts for the purpose of assessing the connection between malpractice settlements and premium rates. Reform legislation has also been proposed, but not adopted, at the federal level that could preempt additional state legislation in this area.

Compliance Program: Our company-wide compliance program has been in place since 1998. Currently, the program's elements include a Code of Conduct, risk area specific policies and procedures, employee education and training, an internal system for reporting concerns, auditing and monitoring programs, and a means for enforcing the program's policies.

Since its initial adoption, the compliance program continues to be expanded and developed to meet the industry's expectations and our needs. Specific written policies, procedures, training and educational materials and programs, as well as auditing and monitoring activities have been prepared and implemented to address the functional and operational aspects of our business. Specific areas identified through regulatory interpretation and enforcement activities have also been addressed in our program. Claims preparation and submission, including coding, billing, and cost reports, comprise the bulk of these areas. Financial arrangements with physicians and other referral sources, including compliance with anti-kickback and Stark laws and emergency department treatment and transfer requirements are also the focus of policy and training, standardized documentation requirements, and review and audit.

United Kingdom Regulation: Our operations in the United Kingdom are also subject to a high level of regulation relating to registration and licensing requirements, employee regulation, clinical standards, environmental rules as well as other areas. We are also subject to a highly regulated business environment, and failure to comply with the various laws and regulations applicable to us could lead to substantial penalties and other adverse effects on our business.

Human Capital Management

Employees and Medical Staff

As of December 31, 2023, we had approximately 96,700 total employees consisting of: (i) approximately 84,450 employees located in the U.S., of which approximately 61,100 were employed full-time, and; (ii) approximately 12,250 employees located in the U.K. Our hospitals are staffed by licensed physicians who have been admitted to the medical staff of individual hospitals. In a number of our markets, physicians may have admitting privileges at other hospitals in addition to ours. Within our acute care division, approximately 380 physicians are employed by physician practice management subsidiaries of ours either directly or through contracts with affiliated group practices structured as 501A corporations. Members of the medical staffs of our hospitals also serve on the medical staffs of hospitals not owned by us and may terminate their affiliation with our hospitals at any time. In addition, within our behavioral health division, approximately 500 physicians are employed by subsidiaries of ours either directly or through contracts with affiliated group practices structured as 501A corporations. Each of our hospitals is managed on a day-to-day basis by a managing director employed by a subsidiary of ours. In addition, a Board of Governors, including members of the hospital's medical staff, governs the medical, professional and ethical practices at each hospital. We believe that our relations with our employees are satisfactory.

Labor Relations

Approximately 535 of our employees at four of our hospitals are unionized. At Valley Hospital Medical Center, housekeeping and dietary employees are represented by the Culinary Workers Union, Local 226, and engineers are represented by the International Union of Operating Engineers. At HRI Hospital in Boston, registered nurses, licensed practical nurses, certain technicians and some clerical employees are represented by the SEIU. At Brooke Glen Behavioral Hospital, unionized employees are represented by the Teamsters, and registered nurses are represented by the Northwestern Nurses Association/Pennsylvania Association of Staff Nurses and Allied Professionals. At Fairmount Behavioral Health, registered nurses and certain other professional job classifications are represented by District 1199C, National Union of Hospital and Health Care Employees, AFSCME, AFL-CIO, as are Licensed Practical Nurses who are currently organized in a separate bargaining unit.

Culture and Work Environment

During orientation, newly hired employees learn our mission, vision, principles and values, key policies and procedures, a summary of the various benefits and resources available, and perhaps most notably, an overview of our founding principle, Service Excellence. Learning key attributes of our Service Excellence standards, which include continuous improvement, employee development, ethical and fair treatment of all, teamwork, compassion and innovation in service delivery, provides newly hired employees a thorough understanding of our company culture. Other components of our Service Excellence standards, which include treating everyone as a guest, demonstrating professionalism and excellence and practicing teamwork, are shared to help guide the desired approach to day-to-day activities.

Service Excellence Facilitator Certification Workshops are available for facility employees identified by their leadership for consistently upholding and demonstrating our Service Excellence standards. Certified facilitators foster the Service Excellence culture and deliver training at their facilities. In 2023, we held 13 workshops with 134 individuals certified as Service Excellence Facilitators.

During 2023, we strengthened our recruitment efforts, improved the overall hiring and onboarding experience (89% very satisfied/satisfied with overall recruitment process), expanded the training resources employees need to do their jobs effectively and safely, facilitated more teamwork and collaboration, addressed burnout, expanded mentorship and increased employee engagement.

We conducted a Pulse Employee Engagement Survey and had an overall participation rate of 67% across the organization. 81% of staff indicated "I feel included on my team/work unit." Engagement efforts such as services awards, safety programs and employee-led service excellence/culture committees has assisted with increased employee retention.

Ethical Standards

Each member of our Board of Directors and senior management is committed to healthcare operations that are ethical and in compliance with all applicable laws and regulations.

We are committed to fostering a culture of accountability at all levels and encourage our employees to report anything they believe could be noncompliant with our values. We prohibit retaliation for the good faith reporting of compliance concerns and offer the ability for individuals to anonymously elevate any concerns. Our commitment to fairness and integrity extends to everyone with whom we interact and do business.

Health and Safety

Policies and training programs to encourage work safety are a major focus in our organization. We continue to promote the employee assistance program which has provided a superior level of service to all our employees and members of their households. We have continuous training on workplace safety and launched a "We Care" program guide to ensure our hospitals support employees in a detailed way in the event of an employee injury.

Employee Development

In keeping with our culture of continuous improvement, training opportunities are available for all employees, regardless of level or status. These include formal instructor-led, in-person or virtual training, informal mentoring or networking opportunities or self-administered online courses.

Training programs are designed to assist with personal and skill development, career advancement and succession planning. In addition to mandatory training that focus on keeping employees mindful and informed of key policies and skill sets, many are voluntary. All training is tailored to include potential Americans with Disabilities Act accommodations.

Across the company, we offer educational and work opportunities, including internships, externships and clinical field placement opportunities. We have partnered with Chamberlin University and Drexel University to provide their students with opportunities to earn clinical experience at our healthcare facilities. In 2023, Chamberlin University students participated in more than 1,000 clinical rotations at various acute care and behavioral health care facilities of ours nationwide.

We also offer financial assistance programs, such as educational reimbursement, to support employees participating in degree, certification and continuing education programs.

Equal Employment Opportunity

We are committed to the principle of Equal Employment Opportunity ("EEO") for all employees and applicants. As an EEO Employer we support, and are fully committed, to recruitment, selection, placement, promotion and compensation of all individuals without regard to race, color, religion, age (40 and over or as otherwise defined by applicable law), sex (including pregnancy, gender identity, and sexual orientation), genetic information (including family medical history), national origin, disability status, protected veteran status or any other characteristic protected by federal, state or local laws.

Diversity and Inclusion

We value each member of our team and are committed to treating everyone with dignity and respect. Our commitment to diversity, equality and inclusion includes regularly monitoring employment practices to ensure equity, regardless of an employee's gender, race or ethnicity and championing for inclusive behaviors through leadership example, policies and procedures, training and special events.

Employee Assistance

We continue to support the overall health and financial well-being of our employees across the extensive programs and benefit plans that we offer. In 2023, we continued to expand the UHS Resource Guide which provides details on access to the benefits, resources and support tools available to employees throughout our organization.

In 2023, the UHS Foundation continued to support employees and their families who suffered losses due to natural disasters across the country, including tornados in Arkansas and Hurricane Ian.

Environmental

We have implemented environmentally sustainable practices and we comply with applicable legal and regulatory environmental standards to protect our patients, visitors, staff and local communities. Our environmental stewardship includes following best practices when managing energy usage, constructing and designing new builds and/or major renovations and protecting the local environment.

- Our facilities located in the U.S. utilize a centralized utility billing management system to monitor energy usage and detect significant deviations from normal usage consumption patterns. Also, 23 of our acute care hospitals utilize automatic fault detection and diagnostics software to monitor the efficiencies of the heating, ventilation and air conditioning operations. Most of these facilities also undergo retro-commissioning and monitoring-based commissioning.
- Our newly built facilities, or those undergoing major renovations, are required to meet or exceed all federal, state and local energy efficiency stands and energy codes, and use mechanical-electrical-plumbing systems to optimize energy efficiencies and water conservation. Newly constructed acute care facilities are expected to achieve an ENERGY STAR® Portfolio Manager Score of 90 or higher. In addition, all new construction or major renovation projects costing \$20 million or more are required to be assessed for Green Globes and/or U.S. Green Building Council's Leadership in Energy and Environmental Design certifications.
- Our facilities have adopted policies and procedures that are compliant with the applicable laws from the Environmental Protection Agency, local departments of health and other regulatory bodies overseeing the responsible disposal of pollution and waste.
- Our water management program is designed to oversee potable, process and utility water programs through active management and hazard control validation. The program is designed to ensure safe water throughout our buildings and meets ANSI/ASHRAE Standard 188 (*Legionellosis: Risk Management for Building Water Systems*). The program also manages domestic potable, process water and utility water.

Our facilities located in the U.K. continue to procure 100% of their electricity from renewable sources, a practice that has been in place since 2021. Recently Cygnet updated its emissions targets:

- Net zero carbon for direct (Scope 1) and indirect (Scope 2) emissions by 2035
- Net zero carbon emissions in our supply chain (Scope 3) by 2040.

Our leadership teams actively manage opportunities and risks related to our facilities, including those related to climate change and other environmental risks.

Revenue and volume trends may be affected by seasonal and severe weather conditions, including the effects of extreme low temperatures, hurricanes and tornadoes, earthquakes, climate change, current local economic and demographic changes. We have a high concentration of facilities in various geographic areas, including states that have a potentially higher risk of experiencing events such as severe weather conditions and earthquakes. Given the location of our facilities, we are particularly susceptible to revenue loss, cost increase, or damage caused by severe weather conditions or natural disasters such as hurricanes, wildfires, earthquakes, or tornadoes. Any significant loss due to a natural disaster may not be covered by insurance and may lead to an increase in the cost of insurance or unavailability on acceptable terms. Climate change may also have effects on our business by increasing the cost of property insurance or making coverage unavailable on acceptable terms. To the extent that significant changes in the climate occur in areas where our facilities are located, we may experience increased frequency of severe 24 weather conditions or natural disasters or other changes to weather patterns, all of which may result in physical damage to or a decrease in demand for properties affected by these conditions. Should the impact of climate change be material in nature or occur for lengthy periods of time, our financial condition, revenues, results of operations, or cash flow may be adversely affected.

In addition, operations may be subject to increases in energy prices as well as increased government regulation, such as the limiting of greenhouse gas emissions, intended to mitigate the impact of climate change, severe weather patterns, or natural disasters. These could result in additional required capital and/or operational expenditures to comply with such regulation without a corresponding increase in our revenues.

Competition

The health care industry is highly competitive. In recent years, competition among healthcare providers for patients has intensified in the United States due to, among other things, regulatory and technological changes, increasing use of managed care payment systems, cost containment pressures and a shift toward outpatient treatment. In all of the geographical areas in which we operate, there are other facilities that provide services comparable to those offered by our facilities. In addition, some of our competitors include hospitals that are owned by tax-supported governmental agencies or by nonprofit corporations and may be supported by endowments and charitable contributions and exempt from property, sale and income taxes. Such exemptions and support are not available to us.

While our facilities tend to be located in fast growing, concentrated geographies, in some markets, certain of our competitors may have greater financial resources, be better equipped and offer a broader range of services than us. Certain hospitals that are located in the areas served by our facilities are specialty or large hospitals that provide medical, surgical and behavioral health services, facilities and equipment that are not available at our hospitals. The increase in outpatient treatment and diagnostic facilities, including outpatient surgical centers and addiction treatment centers, also increases competition for us. In addition, some of our hospitals face competition from hospitals or surgery centers that are physician owned.

The number and quality of the physicians on a hospital's staff are important factors in determining a hospital's success and competitive advantage. Typically, physicians are responsible for making hospital admissions decisions and for directing the course of patient treatment. We believe that physicians refer patients to a hospital primarily on the basis of the patient's needs, the quality of other physicians on the medical staff, the location of the hospital and the breadth and scope of services offered at the hospital's facilities. We strive to retain and attract qualified doctors by maintaining high ethical and professional standards and providing adequate support personnel, technologically advanced equipment and facilities that meet the needs of those physicians.

In addition, we depend on the efforts, abilities, and experience of our medical support personnel, including our nurses and other health care professionals, as well as non-professionals such as mental health technicians. We compete with other health care providers in recruiting and retaining qualified hospital management, nurses and other medical personnel. Our acute care and behavioral health care facilities are experiencing the effects of a nationwide staffing shortage, which has caused and may continue to cause an increase in salaries, wages and benefits expense in excess of the inflation rate. To the extent we cannot meet appropriate staffing levels, we may be required to limit the healthcare services provided in these markets which would have a corresponding adverse effect on our net operating revenues.

Certain states in which we operate hospitals have CON laws. The application process for approval of additional covered services, new facilities, changes in operations and capital expenditures is, therefore, highly competitive in these states. In those states that do not have CON laws or which set relatively high levels of expenditures before they become reviewable by state authorities, competition in the form of new services, facilities and capital spending is more prevalent. See "Regulation and Other Factors."

Our ability to negotiate favorable service contracts with purchasers of group health care services also affects our competitive position and significantly affects the revenues and operating results of our hospitals. Managed care plans, including managed

Medicare and Medicaid plans, attempt to direct and control the use of hospital services and to demand that we accept lower rates of payment. In addition, employers and traditional health insurers are increasingly interested in containing costs through negotiations with hospitals for managed care programs and discounts from established charges. In return, hospitals secure commitments for a larger number of potential patients. Generally, hospitals compete for service contracts with group health care service purchasers on the basis of price, market reputation, geographic location, quality and range of services, quality of the medical staff and convenience. The importance of obtaining contracts with managed care organizations varies from market to market depending on the market strength of such organizations.

An element of our growth strategy is expansion through the acquisition of additional hospitals in select markets. The competition to acquire hospitals is significant. We compete for acquisitions with other for-profit health care companies, private equity and venture capital firms, as well as not-for-profit entities. Some of our competitors have greater resources than we do. We intend to selectively seek opportunities to expand our base of operations by adhering to our disciplined program of rational growth, but may not be successful in accomplishing acquisitions on favorable terms.

Relationship with Universal Health Realty Income Trust

At December 31, 2023, we held approximately 5.7% of the outstanding shares of Universal Health Realty Income Trust (the “Trust”). We serve as Advisor to the Trust under an annually renewable advisory agreement, which is scheduled to expire on December 31st of each year, pursuant to the terms of which we conduct the Trust’s day-to-day affairs, provide administrative services and present investment opportunities. The advisory agreement was renewed by the Trust for 2024 at the same rate in place for 2023, 2022 and 2021, providing for an advisory computation at 0.70% of the Trust’s average invested real estate assets. We earned an advisory fee from the Trust, which is included in net revenues in the accompanying consolidated statements of income, of approximately \$5.3 million during 2023, approximately \$5.1 million during 2022 and \$4.4 million during 2021.

In addition, certain of our officers and directors are also officers and/or directors of the Trust. Management believes that it has the ability to exercise significant influence over the Trust, therefore we account for our investment in the Trust using the equity method of accounting.

Our pre-tax share of income from the Trust was \$874,000 during 2023, \$1.2 million during 2022 and \$6.2 million during 2021, which are included in other income (expense), net, on the accompanying consolidated statements of income for each year. We received dividends from the Trust amounting to \$2.3 million during 2023 and \$2.2 million during each of 2022 and 2021. Included in our share of the Trust’s income during 2021 was approximately \$5.0 million related to our share of gains on various transactions recorded by the Trust, including an asset purchase and sale transaction between the Trust and UHS, as discussed below.

The carrying value of our investment in the Trust was \$7.0 million and \$8.4 million at December 31, 2023 and 2022, respectively, and is included in other assets in the accompanying consolidated balance sheets. The market value of our investment in the Trust was \$34.1 million at December 31, 2023 and \$37.6 million at December 31, 2022, based on the closing price of the Trust’s stock on the respective dates.

The Trust commenced operations in 1986 by purchasing certain hospital properties from us and immediately leasing the properties back to our respective subsidiaries. The base rents are paid monthly and the bonus rents, which effective as of January 1, 2022 are applicable only to McAllen Medical Center, are computed and paid on a quarterly basis, based upon a computation that compares current quarter revenue to a corresponding quarter in the base year. The leases with those subsidiaries are unconditionally guaranteed by us and are cross-defaulted with one another.

On December 31, 2021, we entered into an asset purchase and sale agreement with the Trust, which was amended during the first quarter of 2022, pursuant to the terms of which:

- a wholly-owned subsidiary of ours purchased from the Trust, the real estate assets of the Inland Valley Campus of Southwest Healthcare System located in Wildomar, California, at its fair market value of \$79.6 million.
- two wholly-owned subsidiaries of ours transferred to the Trust, the real estate assets of the following properties:
 - o Aiken Regional Medical Center (“Aiken”), located in Aiken, South Carolina (which includes a 211-bed acute care hospital and a 62-bed behavioral health facility), at its fair-market value of approximately \$57.7 million, and;
 - o Canyon Creek Behavioral Health (“Canyon Creek”), a 102-bed facility located in Temple, Texas, at its fair-market value of approximately \$26.0 million.
- in connection with this transaction, since the fair-market value of Aiken and Canyon Creek, which totaled approximately \$83.7 million in the aggregate, exceeded the \$79.6 million fair-market value of the Inland Valley Campus of Southwest Healthcare System, we received approximately \$4.1 million in cash from the Trust. This transaction generated a gain of approximately \$68.4 million for the Trust, our share of which (approximately \$4.0 million) is included in our consolidated statement of income for the year ended December 31, 2021.

Also on December 31, 2021, Aiken and Canyon Creek (as lessees), entered into a master lease and individual property leases (with the Trust as lessor), as amended, for initial lease terms on each property of approximately twelve years, ending on December 31, 2033. Subject to the terms of the master lease, Aiken and Canyon Creek have the right to renew their leases, at the then current fair market rent (as defined in the master lease), for seven, five-year optional renewal terms. The aggregate annual rental during 2023

pursuant to the leases for these two facilities, amounted to approximately \$5.8 million (\$4.0 million related to Aiken and \$1.8 million related to Canyon Creek). The aggregate annual rental during 2022 pursuant to the leases for these two facilities, amounted to approximately \$5.7 million (\$3.9 million related to Aiken and \$1.8 million related to Canyon Creek). There is no bonus rental component applicable to either of these leases. On each January 1st through 2033, the annual rental will increase by 2.25% on a cumulative and compounded basis.

As a result of the purchase options within the lease agreements for Aiken and Canyon Creek, the asset purchase and sale transaction is accounted for as a failed sale leaseback in accordance with U.S. GAAP. We have accounted for the asset exchange and substitution transaction with the Trust as a financing arrangement and, since we did not derecognize the real property related to Aiken and Canyon Creek, we will continue to depreciate the assets. Our consolidated balance sheets as of December 31, 2023 and 2022 reflect a financial liability of \$77.5 million and \$80.9 million, respectively, which is included in debt, for the fair value of real estate assets that we exchanged as part of the transaction. Our monthly lease payments payable to the Trust will be recorded to interest expense and as a reduction to the outstanding financial liability. The amount allocated to interest expense is determined using our incremental borrowing rate and is based on the outstanding financial liability.

The aggregate rent payable to the Trust in connection with the leases on McAllen Medical Center, Wellington Regional Medical Center, Aiken Regional Medical Center and Canyon Creek Behavioral Health was approximately \$20.6 million during 2023 and \$20.2 million during 2022. Total aggregate rent expense under the operating leases on three hospital facilities with the Trust (McAllen Medical Center, Wellington Regional Medical Center and Inland Valley Campus of Southwest Healthcare System) was \$17.7 million during 2021.

Pursuant to the Master Leases by certain subsidiaries of ours and the Trust as described in the table below, dated 1986 and 2021 (“the Master Leases”) which govern the leases of McAllen Medical Center and Wellington Regional Medical Center (each of which is governed by the Master Lease dated 1986), and Aiken Regional Medical Center and Canyon Creek Behavioral Health (each of which is governed by the Master Lease dated 2021), we have the option to renew the leases at the lease terms described above and below by providing notice to the Trust at least 90 days prior to the termination of the then current term. We also have the right to purchase the respective leased hospitals at their appraised fair market value upon any of the following: (i) at the end of the lease terms or any renewal terms; (ii) upon one month’s notice should a change of control of the Trust occur, or; (iii) within the time period as specified in the lease in the event that we provide notice to the Trust of our intent to offer a substitution property/properties in exchange for one (or more) of the hospital properties leased from the Trust should we be unable to reach an agreement with the Trust on the properties to be substituted. In addition, we have rights of first refusal to: (i) purchase the respective leased facilities during and for a specified period after the lease terms at the same price, terms and conditions of any third-party offer, or; (ii) renew the lease on the respective leased facility at the end of, and for a specified period after, the lease term at the same terms and conditions pursuant to any third-party offer.

In addition, we are the managing, majority member in a joint venture with an unrelated third-party that operates Clive Behavioral Health, a 100-bed behavioral health care facility located in Clive, Iowa. The real property of this facility, which was completed and opened in late 2020, is also leased from the Trust (annual rental of approximately \$2.7 million, \$2.6 million and \$2.5 million during 2023, 2022 and 2021, respectively) pursuant to the lease terms as provided in the table below. In connection with the lease on this facility, the joint venture has the right to purchase the leased facility from the Trust at its appraised fair market value upon either of the following: (i) by providing notice at least 270 days prior to the end of the lease terms or any renewal terms, or; (ii) upon 30 days’ notice anytime within 12 months of a change of control of the Trust (UHS also has this right should the joint venture decline to exercise its purchase right). Additionally, the joint venture has rights of first offer to purchase the facility prior to any third-party sale.

The table below provides certain details for each of the hospitals leased from the Trust as of January 1, 2024:

<u>Hospital Name</u>	<u>Annual Minimum Rent</u>	<u>End of Lease Term</u>	<u>Renewal Term (years)</u>
McAllen Medical Center	\$ 5,485,000	December, 2026	5 (a)
Wellington Regional Medical Center	\$ 6,639,000	December, 2026	5 (b)
Aiken Regional Medical Center/Aurora Pavilion Behavioral Health Services	\$ 4,072,000	December, 2033	35 (c)
Canyon Creek Behavioral Health	\$ 1,841,000	December, 2033	35 (c)
Clive Behavioral Health	\$ 2,775,000	December, 2040	50 (d)

- (a) We have one 5-year renewal option at existing lease rates (through 2031).
- (b) We have one 5-year renewal option at fair market value lease rates (through 2031). Upon the December 31, 2021 expiration of the lease on Wellington Regional Medical Center, a wholly-owned subsidiary of ours exercised its fair market value renewal option and renewed the lease for a 5-year term scheduled to expire on December 31, 2026. Effective January 1, 2024, the annual lease rate for this hospital is \$6.6 million (there is no longer a bonus rental component of the lease payment). On each January 1st through 2026, the annual rent will increase by 2.50% on a cumulative and compounded basis.

- (c) We have seven 5-year renewal options at fair market value lease rates (2034 through 2068). On each January 1st through 2033, the annual rent will increase by 2.25% on a cumulative and compounded basis.
- (d) This facility is operated by a joint venture in which we are the managing, majority member and an unrelated third-party holds a minority ownership interest. The joint venture has three, 10-year renewal options at computed lease rates as stipulated in the lease (2041 through 2070) and two additional, 10-year renewal options at fair market values lease rates (2071 through 2090). In each January through 2040 (and potentially through 2070 if three, 10-year renewal options are exercised), the annual rental will increase by 2.75% on a cumulative and compounded basis.

In addition, certain of our subsidiaries are tenants in various medical office buildings (“MOBs”) and two free-standing emergency departments owned by the Trust or by limited liability companies in which the Trust holds 95% to 100% of the ownership interest.

During the third quarter of 2023, the Trust acquired the McAllen Doctor's Center, a 79,500 rentable square feet medical office building located in McAllen, Texas. A master lease was executed between a wholly-owned subsidiary of ours and the Trust, pursuant to the terms of which our subsidiary will master lease 100% of the rentable square feet of the MOB at an initial minimum rent of \$624,000 annually. The master lease commenced during August, 2023 and is scheduled to expire in twelve years.

During the first quarter of 2023, the Trust substantially completed construction on a new 86,000 rentable square feet multi-tenant MOB that is located on the campus of Northern Nevada Sierra Medical Center in Reno, Nevada. Northern Nevada Sierra Medical Center, a 170-bed newly constructed acute care hospital owned and operated by a wholly-owned subsidiary of ours, was completed and opened in April, 2022. In connection with this MOB, a ground lease and a master flex lease was executed between a wholly-owned subsidiary of ours and the Trust, pursuant to the terms of which our subsidiary will master lease approximately 68% of the rentable square feet of the MOB at an initial minimum rent of \$1.3 million annually plus a pro-rata share of the common area maintenance expenses. The master flex lease could be reduced during the term if certain conditions are met. The ground lease and master flex lease each commenced during the first quarter of 2023.

Executive Officers of the Registrant

The executive officers, whose terms will expire at such time as their successors are elected, are as follows:

<u>Name and Age</u>	<u>Present Position with the Company</u>
Marc D. Miller (53)	Chief Executive Officer, President and Director
Alan B. Miller (86)	Executive Chairman of the Board
Steve G. Filton (66)	Executive Vice President, Chief Financial Officer and Secretary
Matthew J. Peterson (54)	Executive Vice President, President of Behavioral Health Division
Edward H. Sim (52)	Executive Vice President, President of Acute Care Division

Mr. Marc D. Miller was appointed Chief Executive Officer and President effective January 1, 2021. He has served as President since May, 2009 and prior thereto served as Senior Vice President and co-head of our Acute Care Hospitals since 2007. He was elected a Director in May, 2006 and Vice President in 2005. He has served in various capacities related to our acute care division since 2000. He was elected to the Board of Trustees of Universal Health Realty Income Trust in December, 2008. In August, 2015, he was appointed to the Board of Directors of Premier, Inc., a publicly traded healthcare performance improvement alliance. See Note 9 to the Consolidated Financial Statements-*Relationship with Universal Health Realty Income Trust and Other Related Party Transactions* for additional disclosure regarding the Company’s group purchasing organization agreement with Premier, Inc. Marc D. Miller is the son of Alan B. Miller, our Executive Chairman of the Board.

Mr. Alan B. Miller was appointed Executive Chairman of the Board effective January 1, 2021. He had been Chairman of the Board and Chief Executive Officer since the Company’s inception and also served as President from inception until May, 2009. Prior thereto, he was President, Chairman of the Board and Chief Executive Officer of American Medicorp, Inc. He currently serves as Chairman of the Board, Chief Executive Officer and President of Universal Health Realty Income Trust. He is the father of Marc D. Miller, our Chief Executive Officer, President and Director.

Mr. Filton was elected Executive Vice President in 2017 and continues to serve as Chief Financial Officer since his appointment in 2003. He has also served as Secretary since 1999. He had served as Senior Vice President since 2003, as Vice President and Controller since 1991, and as Director of Corporate Accounting since 1985.

Mr. Peterson’s employment with us commenced in September, 2019 as Executive Vice President and President of our Behavioral Health Division. He was formerly employed at UnitedHealth Group for 11 years serving in various capacities including Chief Operating Officer for OptumGovernment, a health services and technology company, as well as various other Senior Vice President/Vice President roles. In addition to his civilian business career, Mr. Peterson also serves in the Air National Guard (“ANG”), U.S. Airforce, and was recently promoted to Brigadier General. He has also served for over 25 years with the ANG as a Healthcare Executive/Medical Service Corps Officer and has held numerous leadership roles.

Mr. Sim's employment with us commenced in December, 2022 as Executive Vice President and President of our Acute Care Division. He was formerly employed as Chief Operating Officer at Centura Health, since 2017. Prior to joining Centura Health, Mr. Sim served in senior leadership roles of increasing responsibility for 11 years at Baptist Health.

ITEM 1A. Risk Factors

We are subject to numerous known and unknown risks, many of which are described below and elsewhere in this Annual Report. Any of the events described below could have a material adverse effect on our business, financial condition and results of operations. Additional risks and uncertainties that we are not aware of, or that we currently deem to be immaterial, could also impact our business and results of operations.

Risks Related to Business Operations

A significant portion of our revenue is produced by facilities located in Texas, Nevada and California.

Texas: We own 7 inpatient acute care hospitals, 12 free-standing emergency departments and 21 inpatient behavioral healthcare facilities as listed in *Item 2. Properties*. On a combined basis, these facilities contributed 17% of our consolidated net revenues during both 2023 and 2022, respectively. On a combined basis, after deducting an allocation for corporate overhead expense, these facilities generated 26% in 2023 and 27% in 2022, of our income from operations after net income attributable to noncontrolling interest.

Nevada: We own 9 inpatient acute care hospitals, 9 free-standing emergency departments, 3 acute outpatient centers and 3 inpatient behavioral healthcare facilities as listed in *Item 2. Properties*. On a combined basis, these facilities contributed 16% and 17% of our consolidated net revenues during 2023 and 2022, respectively. On a combined basis, after deducting an allocation for corporate overhead expense, these facilities generated 16% in 2023 and 14% in 2022, of our income from operations after net income attributable to noncontrolling interest. Excluding the impact of the \$57.6 million provision for asset impairment recorded during 2022, as discussed in *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations - Provision for Asset Impairments*, after deducting an allocation for corporate overhead expense, these facilities generated 18% of our income from operations after net income attributable to noncontrolling interest during 2022.

California: We own 5 inpatient acute care hospitals, 2 acute outpatient centers, 9 inpatient behavioral healthcare facilities and 3 behavioral healthcare outpatient facilities as listed in *Item 2. Properties*. On a combined basis, these facilities contributed 11% our consolidated net revenues during both 2023 and 2022, respectively. On a combined basis, after deducting an allocation for corporate overhead expense, these facilities generated 12% in 2023 and 15% in 2022, of our income from operations after net income attributable to noncontrolling interest.

This geographic concentration makes us particularly sensitive to regulatory, economic, public health, environmental and competitive conditions in those states. Any material change in the current payment programs or regulatory, economic, public health, environmental or competitive conditions in those states could have a disproportionate effect on our overall business results. In addition, certain of our facilities and our operations in those states may be adversely impacted by wildfires, winter storms, and other severe weather conditions, which adverse weather conditions may be more frequent and/or severe as the result of climate change. Such wildfires, storms or other severe weather conditions may cause considerable disruptions in our operations due to property damage or electrical outages experienced in affected areas by our personnel, payers, vendors and others.

Our revenues and results of operations are significantly affected by payments received from the government and other third party payers.

We derive a significant portion of our revenue from third-party payers, including the Medicare and Medicaid programs. Changes in these government programs in recent years have resulted in limitations on reimbursement and, in some cases, reduced levels of reimbursement for healthcare services. Payments from federal and state government programs are subject to statutory and regulatory changes, administrative rulings, interpretations and determinations, requirements for utilization review, and federal and state funding restrictions, all of which could materially increase or decrease program payments, as well as affect the cost of providing service to patients and the timing of payments to facilities. We are unable to predict the effect of recent and future policy changes on our operations. In addition, the uncertainty and fiscal pressures placed upon federal and state governments as a result of, among other things, deterioration in general economic conditions and the funding requirements from the federal healthcare reform legislation, may affect the availability of taxpayer funds for Medicare and Medicaid programs. In addition, the vast majority of the net revenues generated at our behavioral health facilities located in the United Kingdom are derived from governmental payers. If the rates paid or the scope of services covered by governmental payers in the United States or United Kingdom are reduced, there could be a material adverse effect on our business, financial position and results of operations.

We receive annual Medicaid revenues of approximately \$100 million, or greater, from each of Texas, California, Nevada, Illinois, Pennsylvania, Washington, D.C., Florida, Kentucky, Massachusetts and Virginia. We also receive Medicaid disproportionate share hospital payments from certain states including, most significantly, Texas. We are therefore particularly sensitive to potential reductions in Medicaid and other state-based revenue programs as well as regulatory, economic, environmental and competitive changes in those states.

In addition to changes in government reimbursement programs, our ability to negotiate favorable contracts with private payers, including managed care organizations, significantly affects the revenues and operating results of our hospitals. Private payers, including managed care organizations, increasingly are demanding that we accept lower rates of payment.

We expect continued third-party efforts to aggressively manage reimbursement levels and cost controls. Reductions in reimbursement amounts received from third-party payers could have a material adverse effect on our financial position and our results of operations.

If we are not able to provide high quality medical care at a reasonable price, patients may choose to receive their health care from our competitors.

In recent years, the number of quality measures that hospitals are required to report publicly has increased. Centers for Medicare and Medicaid Services (“CMS”) publishes performance data related to quality measures and data on patient satisfaction surveys that hospitals submit in connection with the Medicare program. Federal law provides for the future expansion of the number of quality measures that must be reported. Additionally, the Patient Protection and Affordable Care Act (the “Legislation”) requires all hospitals to annually establish, update and make public a list of their standard charges for products and services. Also, the No Surprises Act, adopted as part of the Consolidated Appropriations Act, 2021 (“CAA”), creates additional price transparency requirements beginning January 1, 2022, including requiring providers to send health plans of insured patients and uninsured patients a good faith estimate of the expected charges and diagnostic codes prior to the scheduled date of the service or item. If any of our hospitals achieve poor results on the quality measures or patient satisfaction surveys (or results that are lower than our competitors) or if our standard charges are higher than our competitors, our patient volume could decline because patients may elect to use competing hospitals or other health care providers that have better metrics and pricing. This circumstance could harm our business and results of operations.

An increase in uninsured and underinsured patients in our acute care facilities or the deterioration in the collectability of the accounts of such patients could harm our results of operations.

Collection of receivables from third-party payers and patients is our primary source of cash and is critical to our operating performance. Our primary collection risks relate to uninsured patients and the portion of the bill that is the patient’s responsibility, which primarily includes co-payments and deductibles. However, we also have substantial receivables due to us from certain state-based funding programs. We estimate our provisions for doubtful accounts based on general factors such as payer mix, the agings of the receivables, historical collection experience and assessment of probability of future collections. We routinely review accounts receivable balances in conjunction with these factors and other economic conditions that might ultimately affect the collectability of the patient accounts and make adjustments to our allowances as warranted. Significant changes in business office operations, payer mix, economic conditions or trends in federal and state governmental health coverage could affect our collection of accounts receivable, cash flow and results of operations. If we experience unexpected increases in the growth of uninsured and underinsured patients or in bad debt expenses, our results of operations will be harmed.

Our hospitals face competition for patients from other hospitals and health care providers.

The healthcare industry is highly competitive, and competition among hospitals, and other healthcare providers for patients and physicians has intensified in recent years. In all of the geographical areas in which we operate, there are other facilities that provide services comparable to those offered by our facilities. Some of our competitors include hospitals that are owned by tax-supported governmental agencies or by nonprofit corporations and may be supported by endowments and charitable contributions and exempt from property, sales and income taxes. Such exemptions and support are not available to us.

In some markets, certain of our competitors may have greater financial resources, be better equipped and offer a broader range of services than we offer. The number of inpatient facilities, as well as outpatient surgical and diagnostic centers, many of which are fully or partially owned by physicians, in the geographic areas in which we operate has increased significantly. As a result, most of our hospitals operate in an increasingly competitive environment.

We also operate health care facilities in the United Kingdom where the National Health Service (the “NHS”) is the principal provider of healthcare services. In addition to the NHS, we face competition in the United Kingdom from independent sector providers and other publicly funded entities for patients.

If our competitors are better able to attract patients, recruit physicians and other healthcare professionals, expand services or obtain favorable managed care contracts at their facilities, we may experience a decline in patient volume and our business may be harmed.

Our performance depends on our ability to recruit and retain quality physicians.

Typically, physicians are responsible for making hospital admissions decisions and for directing the course of patient treatment. As a result, the success and competitive advantage of our hospitals depends, in part, on the number and quality of the physicians on the medical staffs of our hospitals, the admitting practices of those physicians and our maintenance of good relations with those physicians. Physicians generally are not employees of our hospitals, and, in a number of our markets, physicians have admitting privileges at other hospitals in addition to our hospitals. They may terminate their affiliation with us at any time. If we are unable to maintain high ethical and professional standards, adequate support personnel and technologically advanced equipment and facilities

that meet the needs of those physicians, they may be discouraged from referring patients to our facilities and our results of operations may decline.

It may become difficult for us to attract and retain an adequate number of physicians to practice in certain communities in which our hospitals are located. Our failure to recruit physicians to these communities or the loss of physicians in these communities could make it more difficult to attract patients to our hospitals and thereby may have a material adverse effect on our business, financial condition and results of operations. The loss of one or more of these physicians, even if temporary, could cause a material reduction in our revenues, which could take significant time to replace given the difficulty and cost associated with recruiting and retaining physicians.

Continued increase in hospital based physician expenses will materially affect our costs and results of operations.

In our acute care segment, we have experienced a significant increase in hospital based physician related expenses (especially in the areas of emergency room care and anesthesiology) which has had a material unfavorable impact on our results of operations during 2023. Increases in these physician related expenses could continue to have an unfavorable material impact on our results of operations for the foreseeable future.

If we do not continually enhance our hospitals with the most recent technological advances in diagnostic and surgical equipment, our ability to maintain and expand our markets will be adversely affected.

The technology used in medical equipment and related devices is constantly evolving and, as a result, manufacturers and distributors continue to offer new and upgraded products to health care providers. To compete effectively, we must continually assess our equipment needs and upgrade when significant technological advances occur. If our facilities do not stay current with technological advances in the health care industry, patients may seek treatment from other providers and/or physicians may refer their patients to alternate sources, which could adversely affect our results of operations and harm our business.

Our performance depends on our ability to attract and retain qualified nurses and medical support staff and we face competition for staffing that may increase our labor costs and harm our results of operations.

We depend on the efforts, abilities, and experience of our medical support personnel, including our nurses, pharmacists and lab technicians and other healthcare professionals. We compete with other healthcare providers in recruiting and retaining qualified hospital management, nurses and other medical personnel.

The nationwide shortage of nurses and other clinical staff and support personnel has been a significant operating issue facing us and other healthcare providers. In particular, like others in the healthcare industry, we continue to experience a shortage of nurses and other clinical staff and support personnel at our acute care and behavioral health care hospitals in many geographic areas, which shortage has been exacerbated by the COVID-19 pandemic. We are treating patients with COVID-19 in our facilities and, in some areas, the increased demand for care is putting a strain on our resources and staff, which has required us to utilize higher-cost temporary labor and pay premiums above standard compensation for essential workers. This staffing shortage may require us to further enhance wages and benefits to recruit and retain nurses and other clinical staff and support personnel or require us to hire expensive temporary personnel. To the extent we cannot maintain sufficient staffing levels at our hospitals, we may be required to limit the acute and behavioral health care services provided at certain of our hospitals which would have a corresponding adverse effect on our net revenues. In addition, in some markets such as California, there are requirements to maintain specified nurse-staffing levels which could adversely affect our net revenues to the extent we cannot meet those levels. If these states increase mandatory nurse-staffing ratios or additional states in which we operate adopt mandatory nurse-staffing ratios, such changes could significantly affect labor costs and have an adverse impact on revenues if we are required to limit admissions in order to meet the required ratios.

We cannot predict the degree to which we will be affected by the future availability or cost of attracting and retaining talented medical support staff. If our general labor and related expenses increase, we may not be able to raise our rates correspondingly. Our failure to either recruit and retain qualified hospital management, nurses and other medical support personnel or control our labor costs could harm our results of operations.

Increased labor union activity is another factor that could adversely affect our labor costs. Union organizing activities and certain potential changes in federal labor laws and regulations could increase the likelihood of employee unionization in the future, to the extent a greater portion of our employee base unionized, it is possible our labor costs could increase materially.

The failure of certain employers, or the closure of certain facilities, could have a disproportionate impact on our hospitals.

The economies in the communities in which our hospitals operate are often dependent on a small number of large employers. Those employers often provide income and health insurance for a disproportionately large number of community residents who may depend on our hospitals and other health care facilities for their care. The failure of one or more large employer or the closure or substantial reduction in the number of individuals employed at facilities located in or near the communities where our hospitals operate, could cause affected employees to move elsewhere to seek employment or lose insurance coverage that was otherwise available to them. The occurrence of these events could adversely affect our revenue and results of operations, thereby harming our business.

The trend toward value-based purchasing may negatively impact our revenues.

We believe that value-based purchasing initiatives of both governmental and private payers tying financial incentives to quality and efficiency of care will increasingly affect the results of operations of our hospitals and other healthcare facilities and may negatively impact our revenues if we are unable to meet expected quality standards. The Legislation contains a number of provisions intended to promote value-based purchasing in federal healthcare programs. Medicare now requires providers to report certain quality measures in order to receive full reimbursement increases for inpatient and outpatient procedures that were previously awarded automatically. In addition, hospitals that meet or exceed certain quality performance standards will receive increased reimbursement payments, and hospitals that have “excess readmissions” for specified conditions will receive reduced reimbursement. Furthermore, Medicare no longer pays hospitals additional amounts for the treatment of certain hospital-acquired conditions unless the conditions were present at admission. Beginning in federal fiscal year 2015, hospitals that rank in the worst 25% of all hospitals nationally for hospital acquired conditions in the previous year were subject to reduced Medicare reimbursements. The Legislation also prohibits the use of federal funds under the Medicaid program to reimburse providers for treating certain provider-preventable conditions.

There is a trend among private payers toward value-based purchasing of healthcare services, as well. Many large commercial payers require hospitals to report quality data, and several of these payers will not reimburse hospitals for certain preventable adverse events. We expect value-based purchasing programs, including programs that condition reimbursement on patient outcome measures, to become more common and to involve a higher percentage of reimbursement amounts. We are unable at this time to predict how this trend will affect our results of operations, but it could negatively impact our revenues if we are unable to meet or maintain high quality standards established by both governmental and private payers.

Controls designed to reduce inpatient services and increasing rates of “denials” may reduce our revenues.

Controls imposed by third-party payers designed to reduce admissions and lengths of stay, commonly referred to as “utilization review,” have affected and are expected to continue to affect our facilities. Utilization review entails the review of the admission and course of treatment of a patient by managed care plans. Inpatient utilization, average lengths of stay and occupancy rates continue to be negatively affected by payer-required preadmission authorization and utilization review and by payer pressure to maximize outpatient and alternative healthcare delivery services for less acutely ill patients. Efforts to impose more stringent cost controls are expected to continue. In addition, we have been experiencing increasing rates of denied claims (“denials”) from managed care payers which have reduced our net revenues and increased our operating costs as we devote additional resources to enhanced documentation and collection efforts. Although we cannot predict the effect these factors will have on our operations, significant limits on the scope of services reimbursed, and reimbursements withheld due to denials, could have a material adverse effect on our business, financial position and results of operations.

We depend heavily on key management personnel and the departure of one or more of our key executives or a significant portion of our local hospital management personnel could harm our business.

The expertise and efforts of our senior executives and key members of our local hospital management personnel are critical to the success of our business. The loss of the services of one or more of our senior executives or of a significant portion of our local hospital management personnel could significantly undermine our management expertise and our ability to provide efficient, quality healthcare services at our facilities, which could harm our business.

Risks Related to the COVID-19 Pandemic

COVID-19 and other pandemics, epidemics, or public health threats may adversely affect our business, results of operations and financial condition.

The impact of the COVID-19 pandemic, which began during the second half of March, 2020, has had a material effect on our operations and financial results since that time. Since the future volumes and severity of COVID-19 patients remain highly uncertain and subject to change, including potential increases in future COVID-19 patient volumes caused by new variants of the virus, as well as related pressures on staffing and wage rates, we are not able to fully quantify the impact that these factors will have on our future financial results. However, developments related to the COVID-19 pandemic could continue to materially affect our financial performance.

The healthcare industry is labor intensive and salaries, wages and benefits are subject to inflationary pressures, as are supplies expense and other operating expenses. Our ability to pass on increased costs associated with providing healthcare to Medicare and Medicaid patients is limited due to various federal, state and local laws which, in certain circumstances, limit our ability to increase prices.

In addition, the nationwide shortage of nurses and other clinical staff and support personnel has been a significant operating issue facing us and other healthcare providers. Like others in the healthcare industry, we continue to experience a shortage of nurses and other clinical staff and support personnel at our acute care and behavioral health care hospitals in many geographic areas. In some areas, the labor scarcity is putting a strain on our resources and staff, which has required us to utilize higher cost temporary labor and pay premiums above standard compensation for essential workers. This staffing shortage has required us to hire expensive temporary personnel and/or enhance wages and benefits to recruit and retain nurses and other clinical staff and support personnel. At certain facilities, particularly within our behavioral health care segment, we have been unable to fill all vacant positions and, consequently,

have been required to limit patient volumes. Many of these factors, which had a material unfavorable impact on our results of operations during 2022, moderated to a certain degree during 2023.

The COVID-19 pandemic has led to a constrained supply environment which could result in higher cost to procure, and potential unavailability of, critical personal protection equipment, pharmaceuticals and medical supplies. Should a supply disruption result in the inability to obtain especially high margin drugs and compound components necessary for patient care, our consolidated financial statements could be negatively impacted.

The extent to which the COVID-19 pandemic and measures taken in response thereto impact our business, results of operations and financial condition will depend on numerous factors and future developments, most of which are beyond our control or ability to predict. The ultimate impact of the COVID-19 pandemic, including the future volumes and severity of COVID-19 patients caused by new variants of the virus, as well as related pressures on staffing and wage rates and the strained supply environment, is highly uncertain and subject to change. We are not able to fully quantify the impact that these factors will have on our future financial results, but expect developments related to the COVID-19 pandemic to materially affect our financial performance for the foreseeable future. Even after the COVID-19 pandemic has subsided, we may continue to experience materially adverse impacts on our financial condition and our results of operations as a result of its macroeconomic impact, including any recession that has occurred or may occur in the future. If general economic conditions, including inflation, deteriorate or remain volatile or uncertain for an extended period of time, our liquidity and ability to repay our outstanding debt may be harmed and the trading price of our common stock could decline. These factors may affect the availability, terms or timing on which we may obtain any additional funding. There can be no assurance that we will be able to raise additional funds on terms acceptable to us, if at all.

The federal government had previously declared COVID-19 a national emergency, that declaration expired on May 11, 2023 at which time the favorable payment provisions available to us during the declared national emergency ended. Many of the federal and state legislative and regulatory measures allowing for flexibility in delivery of care and various financial supports for healthcare providers were available only for the duration of the public health emergency (“PHE”). Most states have ended their state-level emergency declarations. The end of the PHE status will result in the conclusion of those policies over various designated timeframes. On December 29, 2022, the Consolidated Appropriations Act, 2023, was signed into law and phased out the enhanced federal medical assistance percentage rate states have received during the COVID-19 PHE and fully eliminated the increase on December 31, 2023. States were also permitted to begin Medicaid eligibility redeterminations on March 31, 2023, which is anticipated to result in a large decrease in Medicaid enrollment. We cannot predict whether the loss of any such favorable conditions available to providers during the declared PHE will ultimately have a negative financial impact on us.

Compliance with the Coronavirus Aid, Relief, and Economic Security Act (the “CARES Act”) and the Paycheck Protection Program and Health Care Enhancement Act (“PPHCE Act”).

The federal Coronavirus Aid, Relief, and Economic Security Act (the “CARES Act”) created a \$175 billion “Public Health and Social Services Emergency Fund” to reimburse eligible health care providers for “health care related expenses or lost revenues that are attributable to coronavirus” (the “PHSSEF”). The retention of funds from the PHSSEF is conditioned on eligibility and the acceptance of terms and conditions, and other guidelines or requirements that may change from time to time, including with respect to recordkeeping and repayment requirements. We received payments from the targeted distributions of the PHSSEF. The CARES Act also makes other forms of financial assistance available to healthcare providers, including through Medicare and Medicaid payment adjustments and an expansion of the Medicare Accelerated and Advance Payment Program, which made available accelerated payments of Medicare funds in order to increase cash flow to providers. We received accelerated payments under this program during 2020, and returned early all of those funds during the first quarter of 2021. We, and other providers, will report healthcare related expenses attributable to COVID-19 that have not been reimbursed by another source, which may include general and administrative or healthcare related operating expenses. Funds may also be applied to lost revenues, represented as a negative change in year-over-year net patient care operating income.

The U.S. Department of Health and Human Services (“HHS”) is actively auditing recipients of PHSSEF funds to ensure compliance with the terms and conditions thereof. Failure to comply with such terms and conditions could result in recoupment, False Claims Act liability, or other penalty.

Risks Related to the Regulatory Environment

Reductions or changes in Medicare and Medicaid funding could have a material adverse effect on our future results of operations.

The Budget Control Act of 2011 (the “Budget Control Act”) mandated significant reductions in federal spending for fiscal years 2012-2021, including a reduction of 2% on all Medicare payments during this period. Subsequent legislation enacted by Congress eliminated the 2% reduction through 2021 but extended these reductions through 2030 in exchange. The payment reduction suspension was extended through March 31, 2022, with a 1% payment reduction from then until June 30, 2022 and the full 2% payment reduction thereafter. The most recent legislation extended these reductions through 2032. Please see *Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations, Sources of Revenue-Medicare*, for additional disclosure.

Beginning in 2024 and continuing through 2027, the Medicaid disproportionate share hospital (“DSH”) allotment to the states from federal funds will be reduced. Such reductions have been delayed several times, most recently under the CAA, which further

delays the DSH reductions through 2024. During the reduction period, state Medicaid DSH allotments from federal funds will be reduced by \$8 billion annually. Reductions are imposed on states based on percentage of uninsured individuals, Medicaid utilization and uncompensated care.

We are subject to uncertainties regarding health care reform.

On March 23, 2010, President Obama signed into law the Legislation. Two primary goals of the Legislation are to provide for increased access to coverage for healthcare and to reduce healthcare-related expenses.

Although it was expected that as a result of the Legislation there would be a reduction in uninsured patients, which would reduce our expense from uncollectible accounts receivable, the Legislation makes a number of other changes to Medicare and Medicaid which we believe may have an adverse impact on us. The Legislation revises reimbursement under the Medicare and Medicaid programs to emphasize the efficient delivery of high quality care and contains a number of incentives and penalties under these programs to achieve these goals. The Legislation implements a value-based purchasing program, which will reward the delivery of efficient care. Conversely, certain facilities will receive reduced reimbursement for failing to meet quality parameters; such hospitals will include those with excessive readmission or hospital-acquired condition rates. It remains unclear what portions of that legislation may remain, or what any replacement or alternative programs may be created by future legislation.

A 2012 U.S. Supreme Court ruling limited the federal government's ability to expand health insurance coverage by holding unconstitutional sections of the Legislation that sought to withdraw federal funding for state noncompliance with certain Medicaid coverage requirements. Pursuant to that decision, the federal government may not penalize states that choose not to participate in the Medicaid expansion program by reducing their existing Medicaid funding. Therefore, states can choose to accept or not to participate without risking the loss of federal Medicaid funding. As a result, many states, including Texas, have not expanded their Medicaid programs without the threat of loss of federal funding. CMS had granted section 1115 demonstration waivers providing for work and community engagement requirements for certain Medicaid eligible individuals. However, most recently, the Biden Administration has expressed disfavor with Medicaid program work requirements, with the understanding that such requirements pose a substantial risk that many potential demonstration beneficiaries would be prevented from initially enrolling in coverage or that the requirements would lead to a sizable number of eligibility suspensions and eventual disenrollments among beneficiaries who are initially able to enroll. Accordingly, CMS has recently revoked certain State Medicaid program approvals including work requirements.

The various provisions in the Legislation that directly or indirectly affect Medicare and Medicaid reimbursement are scheduled to take effect over a number of years. The impact of the Legislation on healthcare providers will be subject to implementing regulations, interpretive guidance and possible future legislation or legal challenges. Certain Legislation provisions, such as that creating the Medicare Shared Savings Program, create uncertainty in how healthcare may be reimbursed by federal programs in the future. Thus, we cannot predict the impact of the Legislation on our future reimbursement at this time and we can provide no assurance that the Legislation will not have a material adverse effect on our future results of operations.

The Legislation also contained provisions aimed at reducing fraud and abuse in healthcare. The Legislation amended several existing laws, including the federal Anti-Kickback Statute and the False Claims Act, making it easier for government agencies and private plaintiffs to prevail in lawsuits brought against healthcare providers. While Congress had previously revised the intent requirement of the Anti-Kickback Statute to provide that a person is not required to "have actual knowledge or specific intent to commit a violation of" the Anti-Kickback Statute in order to be found in violation of such law, the Legislation also provides that any claims for items or services that violate the Anti-Kickback Statute are also considered false claims for purposes of the federal civil False Claims Act. The Legislation provides that a healthcare provider that retains an overpayment in excess of 60 days is subject to the federal civil False Claims Act, although certain final regulations implementing this statutory requirement remain pending. The Legislation also expands the Recovery Audit Contractor program to Medicaid. These amendments also make it easier for severe fines and penalties to be imposed on healthcare providers that violate applicable laws and regulations.

We have partnered with local physicians in the ownership of certain of our facilities. These investments have been permitted under an exception to the physician self-referral law. The Legislation permits existing physician investments in a hospital to continue under a "grandfather" clause if the arrangement satisfies certain requirements and restrictions, but physicians are prohibited from increasing the aggregate percentage of their ownership in the hospital. The Legislation also imposes certain compliance and disclosure requirements upon existing physician-owned hospitals and restricts the ability of physician-owned hospitals to expand the capacity of their facilities. As discussed below, should the Legislation be repealed in its entirety, this aspect of the Legislation would also be repealed restoring physician ownership of hospitals and expansion right to its position and practice as it existed prior to the Legislation.

The impact of the Legislation on each of our hospitals may vary. Initiatives to repeal the Legislation, in whole or in part, to delay elements of implementation or funding, and to offer amendments or supplements to modify its provisions have been persistent. The ultimate outcomes of legislative attempts to repeal or amend the Legislation and legal challenges to the Legislation are unknown. Legislation has already been enacted that has eliminated the penalty for failing to maintain health coverage that was part of the original Legislation. In addition, Congress has considered legislation that would, if enacted, in material part: (i) eliminate the large employer mandate to obtain or provide health insurance coverage, respectively; (ii) permit insurers to impose a surcharge up to 30 percent on individuals who go uninsured for more than two months and then purchase coverage; (iii) provide tax credits towards the

purchase of health insurance, with a phase-out of tax credits accordingly to income level; (iv) expand health savings accounts; (v) impose a per capita cap on federal funding of state Medicaid programs, or, if elected by a state, transition federal funding to block grants, and; (vi) permit states to seek a waiver of certain federal requirements that would allow such state to define essential health benefits differently from federal standards and that would allow certain commercial health plans to take health status, including pre-existing conditions, into account in setting premiums.

It remains unclear what portions of the Legislation may remain, or whether any replacement or alternative programs may be created by any future legislation. Any such future repeal or replacement may have significant impact on the reimbursement for healthcare services generally, and may create reimbursement for services competing with the services offered by our hospitals. Accordingly, there can be no assurance that the adoption of any future federal or state healthcare reform legislation will not have a negative financial impact on our hospitals, including their ability to compete with alternative healthcare services funded by such potential legislation, or for our hospitals to receive payment for services.

While attempts to repeal the entirety of the Legislation have not been successful to date, a key provision of the Legislation was repealed as part of the Tax Cuts and Jobs Act and on December 14, 2018, a Texas Federal District Court Judge declared the Legislation unconstitutional, reasoning that the individual mandate tax penalty was essential to and not severable from the remainder of the Legislation. The case was appealed to the U.S. Supreme Court which ultimately held in *California v. Texas* that the plaintiffs lacked standing to challenge the Legislation's requirement to obtain minimum essential health insurance coverage, or the individual mandate. The Court dismissed the case without specifically ruling on the constitutionality of the Legislation. On September 7, 2022, the same Texas Federal District Court judge, in the case of *Braidwood Management v. Becerra*, ruled that the requirement that certain health plans cover services with an "A" or "B" recommendation from the U.S. Preventive Services Task Force without cost sharing violates the Appointments Clause of the U.S. Constitution and that the coverage of certain HIV prevention medication violates the Religious Freedom Restoration Act. The government has appealed the decision to the U.S. Circuit Court of Appeals for the Fifth Circuit. We are unable to predict the outcome of this litigation or its potential impact at this time. While the results of the 2020 elections potentially reduce the risk of the Legislation being eliminated in whole or in part, the continued uncertainties regarding implementation of the Legislation create unpredictability for the strategic and business planning efforts of health care providers, which in itself constitutes a risk.

On March 11, 2021, President Biden signed the American Rescue Plan ("ARP") into law. The ARP extends eligibility for Legislation health insurance subsidies to people buying their own health coverage on the Marketplace who have household incomes above 400% of the federal poverty level. ARP also increased the amount of financial assistance for people at lower incomes who were already eligible under the Legislation. The Inflation Reduction Act of 2022 ("IRA") was passed on August 16, 2022, which among other things, allows for CMS to negotiate prices for certain single-source drugs and biologics reimbursed under Medicare Part B and Part D, beginning with 10 high-cost drugs paid for by Medicare Part D starting in 2026, followed by 15 Part D drugs in 2027, 15 Part B or Part D drugs in 2028, and 20 Part B or Part D drugs in 2029 and beyond. The IRA also continued the expanded subsidies for individuals to obtain private health insurance under the Legislation through 2025. The effect of IRA on hospitals and the healthcare industry in general is not yet known.

Under the Legislation, hospitals are required to make public a list of their standard charges, and effective January 1, 2019, CMS has required that this disclosure be in machine-readable format and include charges for all hospital items and services and average charges for diagnosis-related groups. On November 27, 2019, CMS published a final rule on "Price Transparency Requirements for Hospitals to Make Standard Charges Public." This rule took effect on January 1, 2021 and requires all hospitals to also make public their payer-specific negotiated rates, minimum negotiated rates, maximum negotiated rates and cash for all items and services, including individual items and services and service packages, that could be provided by a hospital to a patient. On April 26, 2023, CMS announced updated enforcement processes that requires a shortened timeline for coming into compliance when a violation has been identified and the automatic imposition of a civil monetary penalties in certain circumstances of noncompliance. Failure to comply with these requirements may result in daily monetary penalties.

As part of the CAA, Congress passed legislation aimed at preventing or limiting patient balance billing in certain circumstances. The CAA addresses surprise medical bills stemming from emergency services, out-of-network ancillary providers at in-network facilities, and air ambulance carriers. The legislation prohibits surprise billing when out-of-network emergency services or out-of-network services at an in-network facility are provided, unless informed consent is received. In these circumstances providers are prohibited from billing the patient for any amounts that exceed in-network cost-sharing requirements. HHS, the Department of Labor and the Department of the Treasury have issued interim final rules that begin to implement the legislation. The rules have limited the ability of our hospital-based physicians to receive payments for services at usually higher out-of-network rates in certain circumstances, and, as a result, have caused us to increase subsidies to these physicians or to replace their services at a higher cost level. On February 28, 2022, a district judge in the Eastern District of Texas invalidated portions of the rule governing aspects of the Independent Dispute Resolution ("IDR") process. In light of this decision, the government issued a final rule on August 19, 2022 eliminating the rebuttable presumption in favor of the qualifying payment amount ("QPA") by the IDR entity and providing additional factors the IDR entity should consider when choosing between two competing offers. On September 22, 2022, the Texas Medical Association filed a lawsuit challenging the IDR process provided in the updated final rule and alleging that the final rule unlawfully elevates the QPA above other factors the IDR entity must consider. On February 6, 2023, a federal judge vacated parts of the rule,

including provisions related to considerations of the QPA. The government's appeal of the district court's order is pending in the U.S. Court of Appeals for the Fifth Circuit.

We are required to treat patients with emergency medical conditions regardless of ability to pay.

In accordance with our internal policies and procedures, as well as the Emergency Medical Treatment and Active Labor Act, or EMTALA, we provide a medical screening examination to any individual who comes to one of our hospitals while in active labor and/or seeking medical treatment (whether or not such individual is eligible for insurance benefits and regardless of ability to pay) to determine if such individual has an emergency medical condition. If it is determined that such person has an emergency medical condition, we provide such further medical examination and treatment as is required to stabilize the patient's medical condition, within the facility's capability, or arrange for transfer of such individual to another medical facility in accordance with applicable law and the treating hospital's written procedures. Our obligations under EMTALA may increase substantially going forward; CMS has sought stakeholder comments concerning the potential applicability of EMTALA to hospital inpatients and the responsibilities of hospitals with specialized capabilities, respectively, but has yet to issue further guidance in response to that request. If the number of indigent and charity care patients with emergency medical conditions we treat increases significantly, or if regulations expanding our obligations to inpatients under EMTALA is proposed and adopted, our results of operations will be harmed.

If we fail to continue to meet the promoting interoperability criteria related to electronic health record systems ("EHR"), our operations could be harmed.

Pursuant to Health Information Technology for Economic and Clinical Health ("HITECH") regulations, hospitals that did not qualify as a meaningful user of EHR by 2015 were subject to a reduced market basket update to the inpatient prospective payment system ("IPPS") standardized amount in 2015 and each subsequent fiscal year. In the 2019 IPPS final rule, CMS re-named the meaningful use program to "promoting interoperability". We believe that all of our acute care hospitals have met the applicable promoting interoperability criteria and therefore are not subject to a reduced market basket update to the IPPS standardized amount. However, under the HITECH Act, hospitals must continue to meet the applicable criteria in each fiscal year or they will be subject to a market basket update reduction in a subsequent fiscal year. Failure of our acute care hospitals to continue to meet the applicable meaningful use criteria would have an adverse effect on our future net revenues and results of operations.

If we fail to comply with extensive laws and government regulations, we could suffer civil or criminal penalties or be required to make significant changes to our operations that could reduce our revenue and profitability.

The healthcare industry is required to comply with extensive and complex laws and regulations at the federal, state and local government levels relating to, among other things: hospital billing practices and prices for services; relationships with physicians and other referral sources; adequacy of medical care and quality of medical equipment and services; ownership of facilities; qualifications of medical and support personnel; confidentiality, maintenance, privacy and security issues associated with health-related information and patient medical records; the screening, stabilization and transfer of patients who have emergency medical conditions; certification, licensure and accreditation of our facilities; operating policies and procedures, and; construction or expansion of facilities and services.

Among these laws are the federal False Claims Act, the Health Insurance Portability and Accountability Act of 1996, ("HIPAA"), the federal anti-kickback statute and the provision of the Social Security Act commonly known as the "Stark Law." These laws, and particularly the anti-kickback statute and the Stark Law, impact the relationships that we may have with physicians and other referral sources. We have a variety of financial relationships with physicians who refer patients to our facilities, including employment contracts, leases and professional service agreements. We also provide financial incentives, including minimum revenue guarantees, to recruit physicians into communities served by our hospitals. The Office of the Inspector General of the Department of Health and Human Services, or OIG, has enacted safe harbor regulations that outline practices that are deemed protected from prosecution under the anti-kickback statute. A number of our current arrangements, including financial relationships with physicians and other referral sources, may not qualify for safe harbor protection under the anti-kickback statute. Failure to meet a safe harbor does not mean that the arrangement necessarily violates the anti-kickback statute, but may subject the arrangement to greater scrutiny. We cannot assure that practices that are outside of a safe harbor will not be found to violate the anti-kickback statute. CMS published a Medicare self-referral disclosure protocol, which is intended to allow providers to self-disclose actual or potential violations of the Stark law. Because there are only a few judicial decisions interpreting the Stark law, there can be no assurance that our hospitals will not be found in violation of the Stark Law or that self-disclosure of a potential violation would result in reduced penalties.

Federal regulations issued under HIPAA contain provisions that require us to implement and, in the future, may require us to implement additional costly electronic media security systems and to adopt new business practices designed to protect the privacy and security of each of our patient's health and related financial information. Such privacy and security regulations impose extensive administrative, physical and technical requirements on us, restrict our use and disclosure of certain patient health and financial information, provide patients with rights with respect to their health information and require us to enter into contracts extending many of the privacy and security regulatory requirements to third parties that perform duties on our behalf. Additionally, recent changes to HIPAA regulations may result in greater compliance requirements, including obligations to report breaches of unsecured patient data, as well as create new liabilities for the actions of parties acting as business associates on our behalf.

These laws and regulations are extremely complex, and, in many cases, we do not have the benefit of regulatory or judicial interpretation. In the future, it is possible that different interpretations or enforcement of these laws and regulations could subject our current or past practices to allegations of impropriety or illegality or could require us to make changes in our facilities, equipment, personnel, services, capital expenditure programs and operating expenses. A determination that we have violated one or more of these laws (see *Note 8 to the Consolidated Financial Statements - Commitments and Contingencies*, as included this Form 10-K), or the public announcement that we are being investigated for possible violations of one or more of these laws, could have a material adverse effect on our business, financial condition or results of operations and our business reputation could suffer significantly. In addition, we cannot predict whether other legislation or regulations at the federal or state level will be adopted, what form such legislation or regulations may take or what their impact on us may be. See *Item 1 Business—Self-Referral and Anti-Kickback Legislation*.

If we are deemed to have failed to comply with the anti-kickback statute, the Stark Law or other applicable laws and regulations, we could be subjected to liabilities, including criminal penalties, civil penalties (including the loss of our licenses to operate one or more facilities), and exclusion of one or more facilities from participation in the Medicare, Medicaid and other federal and state healthcare programs. The imposition of such penalties could have a material adverse effect on our business, financial condition or results of operations.

We also operate health care facilities in the United Kingdom and have operations and commercial relationships with companies in other foreign jurisdictions and, as a result, are subject to certain U.S. and foreign laws applicable to businesses generally, including anti-corruption laws. The Foreign Corrupt Practices Act regulates U.S. companies in their dealings with foreign officials, prohibiting bribes and similar practices, and requires that they maintain records that fairly and accurately reflect transactions and appropriate internal accounting controls. In addition, the United Kingdom Bribery Act has wide jurisdiction over certain activities that affect the United Kingdom.

Our operations in the United Kingdom are also subject to a high level of regulation relating to registration and licensing requirements employee regulation, clinical standards, environmental rules as well as other areas. We are also subject to a highly regulated business environment, and failure to comply with the various laws and regulations, applicable to us could lead to substantial penalties, and other adverse effects on our business. Aspects of United Kingdom data protection law, including the UK Data Protection Act and legislation commonly referred to as the UK GDPR, remain unclear following the United Kingdom's exit from the European Union, including with respect to data transfers between the United Kingdom and other jurisdictions. We cannot fully predict how the Data Protection Act, the UK GDPR, and other United Kingdom data protection laws or regulations may develop in the medium to longer term nor the effects of divergent laws and guidance regarding data transfers.

We are subject to occupational health, safety and other similar regulations and failure to comply with such regulations could harm our business and results of operations.

We are subject to a wide variety of federal, state and local occupational health and safety laws and regulations. Regulatory requirements affecting us include, but are not limited to, those covering: (i) air and water quality control; (ii) occupational health and safety (e.g., standards regarding blood-borne pathogens and ergonomics, etc.); (iii) waste management; (iv) the handling of asbestos, polychlorinated biphenyls and radioactive substances; and (v) other hazardous materials. If we fail to comply with those standards, we may be subject to sanctions and penalties that could harm our business and results of operations.

We are subject to pending legal actions, purported stockholder class actions, governmental investigations and regulatory actions.

We and our subsidiaries are subject to pending legal actions, governmental investigations and regulatory actions (see *Note 8 to the Consolidated Financial Statements - Commitments and Contingencies*, as included this Form 10-K). We may become subject to additional medical malpractice lawsuits, product liability lawsuits, class action lawsuits and other legal actions in the ordinary course of business.

Defending ourselves against the allegations in the lawsuits and governmental investigations, or similar matters and any related publicity, could potentially entail significant costs and could require significant attention from our management and our reputation could suffer significantly. We are unable to predict the outcome of these matters or to reasonably estimate the amount or range of any such loss; however, these lawsuits and the related publicity and news articles that have been published concerning these matters could have a material adverse effect on our business, financial condition, results of operations and/or cash flows which in turn could cause a decline in our stock price. In an effort to resolve one or more of these matters, we may choose to negotiate a settlement. Amounts we pay to settle any of these matters may be material. All professional and general liability insurance we purchase is subject to policy limitations. We believe that, based on our past experience and actuarial estimates, our insurance coverage is adequate considering the claims arising from the operations of our hospitals. While we continuously monitor our coverage, our ultimate liability for professional and general liability claims could change materially from our current estimates. If such policy limitations should be partially or fully exhausted in the future, or payments of claims exceed our estimates or are not covered by our insurance, it could have a material adverse effect on our operations.

We are and may become subject to other loss contingencies, both known and unknown, which may relate to past, present and future facts, events, circumstances and occurrences. Should an unfavorable outcome occur in some or all of our legal proceedings or other loss contingencies, or if successful claims and other actions are brought against us in the future, there could be a material adverse impact on our financial position, results of operations and liquidity.

In particular, government investigations, as well as qui tam and stockholder lawsuits, may lead to material fines, penalties, damages payments or other sanctions, including exclusion from government healthcare programs. The federal False Claims Act permits private parties to bring qui tam, or whistleblower, lawsuits on behalf of the government against companies alleging that the defendant has defrauded the federal government. These private parties are entitled to share in any amounts recovered by the government, and, as a result, the number of whistleblower lawsuits that have been filed against providers has increased significantly in recent years. Because qui tam lawsuits are filed under seal, we could be named in one or more such lawsuits of which we are not aware. Settlements of lawsuits involving Medicare and Medicaid issues routinely require both monetary payments and corporate integrity agreements, each of which could have a material adverse effect on our business, financial condition, results of operations and/or cash flows.

If any of our existing health care facilities lose their accreditation or any of our new facilities fail to receive accreditation, such facilities could become ineligible to receive reimbursement under Medicare or Medicaid.

The construction and operation of healthcare facilities are subject to extensive federal, state and local regulation relating to, among other things, the adequacy of medical care, equipment, personnel, operating policies and procedures, fire prevention, rate-setting and compliance with building codes and environmental protection. Additionally, such facilities are subject to periodic inspection by government authorities to assure their continued compliance with these various standards.

All of our hospitals are deemed certified, meaning that they are accredited, properly licensed under the relevant state laws and regulations and certified under the Medicare program. The effect of maintaining certified facilities is to allow such facilities to participate in the Medicare and Medicaid programs. We believe that all of our healthcare facilities are in material compliance with applicable federal, state, local and other relevant regulations and standards. However, should any of our healthcare facilities lose their deemed certified status and thereby lose certification under the Medicare or Medicaid programs, such facilities would be unable to receive reimbursement from either of those programs and our business could be materially adversely effected.

State efforts to regulate the construction or expansion of health care facilities could impair our ability to expand.

Certain states in which we operate hospitals have certificates of need (“CON”) laws as a condition prior to hospital capital expenditures, construction, expansion, modernization or initiation of major new services. Our failure to obtain necessary state approval could result in our inability to complete a particular hospital acquisition, expansion or replacement, make a facility ineligible to receive reimbursement under the Medicare or Medicaid programs, result in the revocation of a facility’s license or impose civil or criminal penalties on us, any of which could harm our business.

In addition, significant CON reforms have been proposed in a number of states that would increase the capital spending thresholds and provide exemptions of various services from review requirements. In the past, we have not experienced any material adverse effects from those requirements, but we cannot predict the impact of these changes upon our operations.

Risks Related to Information Technology

A cyber security incident could cause a violation of HIPAA, breach of patient or other persons privacy, or other negative impacts.

We rely extensively on our information technology (“IT”) systems to manage clinical and financial data, communicate with our patients, payers, vendors and other third parties and summarize and analyze operating results. In addition, we have made significant investments in technology to adopt and utilize electronic health records and to become meaningful users of health information technology pursuant to the American Recovery and Reinvestment Act of 2009. Our IT systems, and the networks and information systems of third parties that we rely on, are subject to damage or interruption from power outages, facility damage, computer and telecommunications failures, computer viruses, security breaches including credit card or personally identifiable information breaches, vandalism, theft, natural disasters, catastrophic events, human error and potential cyber threats, including malicious codes, worms, phishing attacks, denial of service attacks, ransomware and other sophisticated cyber-attacks, and our disaster recovery planning cannot account for all eventualities. Our systems, in turn, interface with and rely on third-party systems that we do not control, including medical devices and other processes supporting the interoperability of healthcare infrastructures. Third parties to whom we outsource certain of our functions, or with whom our systems interface and who may, in some instances, store our sensitive and confidential data, are also subject to the risks outlined above and may not have or use controls effective to protect such information. An attack, breach or other system disruption affecting any of these third parties could similarly harm our business.

On February 22, 2024, UnitedHealth Group Incorporated (“UnitedHealth”) indicated in a Form 8-K filing, that a suspected nation-state associated cyber security threat actor had gained access to some of its Change Healthcare information technology systems. In the Form 8-K filing, UnitedHealth indicated that it cannot estimate the duration or extent of the disruption. To the best of our knowledge this did not directly have any impact on our information technology systems; however, as a result of the disruption to the Change Healthcare systems, certain of our patient billing and collections processes have been disrupted which may cause delays in a portion of our patient bills being received by commercial payers thereby delaying the related cash remittances to us. In addition, in connection with our acute care segment commercial health insurer, certain functions, including certain administrative functions, interface directly and/or indirectly with Change Healthcare systems. Such functions include, but are not limited to, eligibility and enrollment, patient access, claims management and payments, and billings and collections. As of the filing date of this report on Form

10-K, the Change Healthcare systems remain inoperable. As we continue to assess the potential impact of this event, we have not determined that this incident is reasonably likely to materially impact our cash flows, financial condition or results of operations.

As cyber criminals continue to become more sophisticated through evolution of their tactics, techniques and procedures, we have taken, and will continue to take, additional preventive measures to strengthen the cyber defenses of our networks and data. However, if any of our or our third-party service providers' systems are damaged, fail to function properly or otherwise become unavailable, we may incur substantial costs to repair or replace them, and may experience loss or corruption of critical data such as protected health information or other data subject to privacy laws and proprietary business information and interruptions or disruptions and delays in our ability to perform critical functions, which could materially and adversely affect our businesses and results of operations and could result in significant penalties or fines, litigation, loss of customers, significant damage to our reputation and business, and other losses. In the event of a material breach or cyber-attack, the associated expenses and losses may exceed our current insurance coverage for such events. In addition, some adverse consequences are not insurable, such as reputational harm and third-party business interruption. In addition, our future results of operations, as well as our reputation, could be adversely impacted by theft, destruction, loss, or misappropriation of public health information, other confidential data or proprietary business information. Further, consumer confidence in the integrity, availability and confidentiality of information systems and information, including patient personal information and critical operations data, in the healthcare industry generally could be impacted to the extent there are successful cyberattacks at other healthcare services companies, which could have a material adverse effect on our business, financial position or results of operations.

In September, 2020, we had experienced an information technology security incident which led us to suspend user access to our information technology applications related to operations located in the United States. While our information technology applications were offline, patient care was delivered safely and effectively at our facilities across the country utilizing established back-up processes, including offline documentation methods. We have investigated the nature and potential impact of the security incident and engaged third-party information technology and forensic vendors to assist. No evidence of unauthorized access, copying or misuse of any patient or employee data has been identified to date. Promptly after the incident, our information technology applications were restored at our acute care and behavioral health hospitals, as well as at the corporate level, thereby re-establishing connections to all major systems and applications, including electronic medical records, laboratory and pharmacy systems and our hospitals resumed normal operations.

Risks Related to the Market Conditions and Liquidity

Our revenues and volume trends may be adversely affected by certain factors over which we have no control.

Our revenues and volume trends are dependent on many factors, including physicians' clinical decisions and availability, payer programs shifting to a more outpatient-based environment, whether or not certain services are offered, seasonal and severe weather conditions, including the effects of extreme low temperatures, hurricanes and tornadoes, earthquakes, climate change, current local economic and demographic changes. We have a high concentration of facilities in various geographic areas, including states that have a potentially higher risk of experiencing events such as severe weather conditions and earthquakes. Given the location of our facilities, we are particularly susceptible to revenue loss, cost increase, or damage caused by severe weather conditions or natural disasters such as hurricanes, wildfires, earthquakes, or tornadoes. Any significant loss due to a natural disaster may not be covered by insurance and may lead to an increase in the cost of insurance or unavailability on acceptable terms. Climate change may also have effects on our business by increasing the cost of property insurance or making coverage unavailable on acceptable terms. To the extent that significant changes in the climate occur in areas where our facilities are located, we may experience increased frequency of severe weather conditions or natural disasters or other changes to weather patterns, all of which may result in physical damage to or a decrease in demand for properties affected by these conditions. Should the impact of climate change be material in nature or occur for lengthy periods of time, our financial condition, revenues, results of operations, or cash flow may be adversely affected. In addition, government regulation intended to mitigate the impact of climate change, severe weather patterns, or natural disasters could result in additional required capital expenditures to comply with such regulation without a corresponding increase in our revenues. In addition, technological developments and pharmaceutical improvements may reduce the demand for healthcare services or the profitability of the services we offer. Further, the Medicare program's three-year phase out and eventual elimination of the Inpatient Only List, a list of surgeries and procedures that are only covered by Medicare when provided in an inpatient setting, may reduce inpatient volumes.

A worsening of economic and employment conditions in the United States could materially affect our business and future results of operations.

Our patient volumes, revenues and financial results depend significantly on the universe of patients with health insurance, which to a large extent is dependent on the employment status of individuals in our markets. Worsening of economic conditions, including inflation and rising interest rates, may result in a higher unemployment rate which may increase the number of individuals without health insurance. As a result, our facilities may experience a decrease in patient volumes, particularly in less intense, more elective service lines, or an increase in services provided to uninsured patients. These factors could have a material unfavorable impact on our future patient volumes, revenues and operating results.

In addition, as of December 31, 2023, we had approximately \$3.9 billion of goodwill recorded on our consolidated balance sheets. Should the revenues and financial results of our acute care and/or behavioral health care facilities be materially, unfavorably

impacted due to, among other things, a worsening of the economic and employment conditions in the United States that could negatively impact our patient volumes and reimbursement rates, a continued rise in the unemployment rate and increases in the number of uninsured patients treated at our facilities, we may incur future charges to recognize impairment in the carrying value of our goodwill and other intangible assets, which could have a material adverse effect on our financial results.

Continuing Inflationary Pressures continue to increase our operating costs and we may not be able to pass on increases in costs commensurate with these increases in costs.

We are experiencing inflationary pressures, primarily in personnel costs, and we anticipate continuing impacts on other cost areas within the next twelve months. The extent of any future impacts from inflation on our business and our results of operations will be dependent upon how long the elevated inflation levels persist and the extent to which the rate of inflation further increases, if at all, neither of which we are able to predict. If elevated levels of inflation were to persist or if the rate of inflation were to accelerate, our expenses could increase faster than anticipated and we may utilize our capital resources sooner than expected. Further, given the complexities of the reimbursement landscape in which we operate, our ability to pass on increased costs associated with providing healthcare to Medicare and Medicaid patients is limited due to various federal, state and local laws, which in certain circumstances, limit our ability to increase prices, commercial payers may be unwilling or unable to increase reimbursement rates commensurate with the inflationary impacts on our costs.

The United Kingdom's exit from the European Union will continue to have uncertain effects and could adversely impact our business, results of operations and financial condition.

On January 31, 2020, the United Kingdom formally exited the European Union, which exit, commonly referred to as "Brexit", may cause disruptions to, and uncertainty surrounding, our business in the United Kingdom and elsewhere. The ultimate effects of the Brexit are still difficult to predict as there remain ongoing significant legal and regulatory uncertainty as the United Kingdom determines which European Union laws to replace or replicate and the resulting divergence between the national laws and regulations in the United Kingdom and the European Union laws and regulations. Changes related to Brexit could subject us to heightened risks in that region, including disruptions to trade and free movement of goods, services and people that may lead to increased costs of goods imported into the United Kingdom, disruptions to our employees in the United Kingdom and the workforce of our business partners, increased foreign exchange volatility with respect to the British pound and additional legal, political and economic uncertainty. Additional currency volatility could result in a weaker British pound, which may decrease the profitability of our operations in the United Kingdom. A weaker British pound versus the U.S. Dollar also causes local currency results of our United Kingdom operations to be translated into fewer U.S. Dollars during a reporting period. While we may elect to enter into hedging arrangements to protect our business against certain currency fluctuations, these hedging arrangements do not provide comprehensive protection, and our results of operations could be adversely affected by foreign exchange fluctuations. The exit of the United Kingdom from the European Union could also create future economic uncertainty, both in the United Kingdom and globally, and could cause disruptions to and create uncertainty surrounding our business. Any of these effects of Brexit, and others we cannot anticipate, could harm our business, financial condition or results of operations.

We continue to see rising costs in construction materials and labor. Such increased costs could have an adverse effect on the cash flow return on investment relating to our capital projects.

The cost of construction materials and labor has significantly increased. As we continue to invest in modern technologies, emergency rooms and operating room expansions, the construction of medical office buildings for physician expansion and reconfiguring the flow of patient care, we spend large amounts of money generated from our operating cash flow or borrowed funds. Although we evaluate the financial feasibility of such projects by determining whether the projected cash flow return on investment exceeds our cost of capital, such returns may not be achieved if the cost of construction continues to rise significantly or the expected patient volumes are not attained.

The deterioration of credit and capital markets may adversely affect our access to sources of funding and we cannot be certain of the availability and terms of capital to fund the growth of our business when needed.

We require substantial capital resources to fund our acquisition growth strategy and our ongoing capital expenditure programs for renovation, expansion, construction and addition of medical equipment and technology. We believe that our capital expenditure program is adequate to expand, improve and equip our existing hospitals. We cannot predict, however, whether financing for our growth plans and capital expenditure programs will be available to us on satisfactory terms when needed, which could harm our business.

To fund all or a portion of our future financing needs, we rely on borrowings from various sources including fixed rate, long-term debt as well as borrowings pursuant to our revolving credit facility and accounts receivable securitization program. If any of the lenders were unable to fulfill their future commitments, our liquidity could be impacted, which could have a material unfavorable impact our results of operations and financial condition. The increase in interest rates has substantially increased our borrowing costs and reduced our ability to access the capital markets on favorable terms. Additional increases in interest rates and the effect on capital markets could adversely affect our ability to carry out our strategy.

Risks Related to Our Common Stock

The number of outstanding shares of our Class B Common Stock is subject to potential increases or decreases.

At December 31, 2023, 20.5 million shares of Class B Common Stock were reserved for issuance upon conversion of shares of Class A, C and D Common Stock outstanding, for issuance upon exercise of options to purchase Class B Common Stock and for issuance of stock under other incentive plans. Class A, C and D Common Stock are convertible on a share for share basis into Class B Common Stock. To the extent that these shares were converted into or exercised for shares of Class B Common Stock, the number of shares of Class B Common Stock available for trading in the public market place would increase substantially and the current holders of Class B Common Stock would own a smaller percentage of that class.

In addition, from time-to-time, our Board of Directors approve stock repurchase programs authorizing us to purchase shares of our Class B Common Stock on the open market at prevailing market prices or in negotiated transactions off the market. Such repurchases decrease the number of outstanding shares of our Class B Common Stock. During 2023, in conjunction with our stock repurchase program, we have repurchased approximately 3.9 million shares at an aggregate cost of approximately \$525 million. As of December 31, 2023, we had an aggregate available repurchase authorization of approximately \$423 million. Pursuant to our stock repurchase program, shares of our Class B Common Stock may be repurchased, from time to time as conditions allow, on the open market or in negotiated private transactions. There is no expiration date for our stock repurchase programs.

Our ability to repurchase shares will depend upon, among other factors, our cash flows from operations, our available capital and potential future capital requirements for strategic transactions, including acquisitions, debt service requirements, and investing in our existing markets as well as our results of operations, financial condition, interest rates, our access to the capital markets and other factors beyond our control that our Board of Directors may deem relevant. A suspension or elimination of our share repurchase could have a negative effect on our stock price.

Conversely, as a potential means of generating additional funds to operate and expand our business, we may from time-to-time issue equity through the sale of stock which would increase the number of outstanding shares of our Class B Common Stock. Based upon factors such as, but not limited to, the market price of our stock, interest rate on borrowings and uses or potential uses for cash, repurchase or issuance of our stock could have a dilutive effect on our future basic and diluted earnings per share.

The right to elect the majority of our Board of Directors and the majority of the general shareholder voting power resides with the holders of Class A and C Common Stock, the majority of which is owned by Alan B. Miller, Executive Chairman of our Board of Directors.

Our Restated Certificate of Incorporation provides that, with respect to the election of directors, holders of Class A Common Stock vote as a class with the holders of Class C Common Stock, and holders of Class B Common Stock vote as a class with holders of Class D Common Stock, with holders of all classes of our Common Stock entitled to one vote per share.

As of March 22, 2023, the shares of Class A and Class C Common Stock constituted 10.3% of the aggregate outstanding shares of our Common Stock, had the right to elect five members of the Board of Directors and constituted 90.4% of our general voting power as of that date. And as of that date, the shares of Class B and Class D Common Stock (excluding shares issuable upon exercise of options) constituted 89.7% of the outstanding shares of our Common Stock, had the right to elect two members of the Board of Directors and constituted 9.6% of our general voting power as of that date.

As to matters other than the election of directors, our Restated Certificate of Incorporation provides that holders of Class A, Class B, Class C and Class D Common Stock all vote together as a single class, except as otherwise provided by law.

Each share of Class A Common Stock entitles the holder thereof to one vote; each share of Class B Common Stock entitles the holder thereof to one-tenth of a vote; each share of Class C Common Stock entitles the holder thereof to 100 votes (provided the holder of Class C Common Stock holds a number of shares of Class A Common Stock equal to ten times the number of shares of Class C Common Stock that holder holds); and each share of Class D Common Stock entitles the holder thereof to ten votes (provided the holder of Class D Common Stock holds a number of shares of Class B Common Stock equal to ten times the number of shares of Class D Common Stock that holder holds).

In the event a holder of Class C or Class D Common Stock holds a number of shares of Class A or Class B Common Stock, respectively, less than ten times the number of shares of Class C or Class D Common Stock that holder holds, then that holder will be entitled to only one vote for every share of Class C Common Stock, or one-tenth of a vote for every share of Class D Common Stock, which that holder holds in excess of one-tenth the number of shares of Class A or Class B Common Stock, respectively, held by that holder. The Board of Directors, in its discretion, may require beneficial owners to provide satisfactory evidence that such owner holds ten times as many shares of Class A or Class B Common Stock as Class C or Class D Common Stock, respectively, if such facts are not apparent from our stock records.

Since a substantial majority of the Class A shares and Class C shares are controlled by Mr. Alan B. Miller and members of his family, one of whom is Marc D. Miller, our Chief Executive Officer, President and a director, and they can elect a majority of our company's directors and effect or reject most actions requiring approval by stockholders without the vote of any other stockholders, there are potential conflicts of interest in overseeing the management of our company.

In addition, because this concentrated control could discourage others from initiating any potential merger, takeover or other change of control transaction that may otherwise be beneficial to our businesses, our business and prospects and the trading price of our securities could be adversely affected.

ITEM 1B. *Unresolved Staff Comments*

None.

ITEM 1C. *Cybersecurity*

Cybersecurity risk management and strategy

Protecting our data, which includes information related to our patients, members, and customers, is a primary area of our focus. Given the critical nature of this information, we have developed and implemented a robust cybersecurity risk management program to assess, identify, and manage risks associated with cybersecurity threats as identified in Item 106(a) of Regulation S-K. Cybersecurity is an important and integrated part of our risk management program that identifies, monitors and mitigates business, operational and legal risks.

This program has a multi-tier risk management structure that includes regular reviews of laws, policies, vulnerabilities, and resource levels to address risks facing our organization. Such risks include operational, intellectual property theft, fraud, risks that have potential unfavorable impacts on our employees and/or patients, and violation of data privacy or security laws.

To address cybersecurity risks facing our organization, we have adopted a “continuous risk assessment” process. We engage a third party to conduct a bi-annual National Institute of Technology-Cyber Security Framework assessment to determine the maturity of our program and related controls. The results of that assessment are shared with management, which drives prioritization and investment in resources to address those risks. Likewise, annual penetration tests occur to review the efficacy of our technical controls, results which are reviewed by management and resolved in a timely manner. Other factors that feed into our risk management practices are also operational events and incidents, which can lead to controls being reviewed and enhanced.

We also have a mature incident response process in place in the event a cybersecurity incident occurs. This process defines roles, responsibilities and action plans designed to contain, eradicate, and restore systems in the event of a major disruption. Regularly, we conduct tabletop exercises to simulate responses to an incident and implement any insight gained from those exercises to improve our recovery practices. As part of these processes, we regularly engage with assessors, consultants, auditors, and other third parties to review our cybersecurity program to help identify areas for continued focus, improvement, and compliance.

Third parties who provide services and solutions to our organization are also a source of cyber risk. Through a third-party risk management program, we review risks associated with these third parties through contractual reviews, vendor risk assessments, and continual risk reviews by monitoring the cybersecurity risk exposure these third parties pose and implementing remediation where necessary.

Based on the information available as of the date of this Form 10-K, during our fiscal year 2023 and through the date of this filing, we did not identify any risks from cybersecurity threats, including as a result of any previous cybersecurity incidents (as such terms are defined in Item 106(a) of Regulation S-K), that have materially affected or are reasonably likely to materially affect us, including our business strategy, results of operations or financial condition. For more information on risks to us from cybersecurity threats, see “*Risks Related to Information Technology - A cyber security incident could cause a violation of HIPAA, breach of patient or other persons privacy, or other negative impacts.*” under “*Item 1A. Risk Factors.*”

Governance of Cybersecurity

Cybersecurity is an integral part of our risk management program and is an area of focus for our Board of Directors and management. The Audit Committee of our Board of Directors is responsible for the oversight of risks from cybersecurity threats. Members of the Audit Committee receive updates, as warranted, including quarterly updates from our Chief Information Security Officer (“CISO”) regarding matters of cybersecurity, such as key risks facing the organization, core topics, review of incidents, as well as progress against key information security initiatives. Senior executive leadership also engage in ad-hoc discussions with management on cybersecurity topics. In addition, our Board of Directors are provided with an annual report regarding cybersecurity information and related topics.

Our cybersecurity risk management and strategy processes are overseen by our CISO along with leaders from our Information Security, Compliance, Legal and Internal Auditing teams. Such individuals have an average of over 20 years of prior work experience in various roles involving information technology, including security, auditing, compliance, systems and programming. These individuals monitor the prevention, mitigation, detection and remediation of cybersecurity incidents through their management of, and participation in, the cybersecurity risk management and strategy processes described above, including the operation of our incident response plan.

ITEM 2. Properties

Executive and Administrative Offices and Commercial Health Insurer

We own various office buildings in King of Prussia and Wayne, Pennsylvania, Brentwood, Tennessee, Denton, Texas and Reno, Nevada.

Facilities

The following tables set forth the name, location, type of facility and, for acute care hospitals and behavioral health care facilities, the number of licensed beds:

Acute Care Hospitals

Name of Facility	Location	Number of Beds	Real Property Ownership Interest
Aiken Regional Medical Centers (1).....	Aiken, South Carolina.....	211	Leased
Aurora Pavilion Behavioral Health Services (1).....	Aiken, South Carolina.....	62	Leased
ER at Sweetwater.....	North Augusta, South Carolina.....	—	Owned
Centennial Hills Hospital Medical Center.....	Las Vegas, Nevada.....	339	Owned
ER at Valley Vista.....	North Las Vegas, Nevada.....	—	Owned
ER at West Craig.....	Las Vegas, Nevada.....	—	Owned
Corona Regional Medical Center.....	Corona, California.....	259	Owned
Desert View Hospital.....	Pahrump, Nevada.....	25	Owned
Doctors Hospital of Laredo (6).....	Laredo, Texas.....	183	Owned
Doctors Hospital Emergency Room Saunders.....	Laredo, Texas.....	—	Owned
Doctors Hospital Emergency Room South.....	Laredo, Texas.....	—	Leased
Fort Duncan Regional Medical Center.....	Eagle Pass, Texas.....	101	Owned
The George Washington University Hospital (17).....	Washington, D.C.....	395	Leased
Henderson Hospital.....	Henderson, Nevada.....	303	Owned
ER at Green Valley Ranch.....	Henderson, Nevada.....	—	Owned
Lakewood Ranch Medical Center.....	Lakewood Ranch, Florida.....	120	Owned
ER at Fruitville.....	Sarasota, Florida.....	—	Owned
Manatee Memorial Hospital.....	Bradenton, Florida.....	295	Owned
ER at Sun City Center.....	Wimauma, Florida.....	—	Owned
Manatee ER at Bayshore Gardens.....	Bradenton, Florida.....	—	Owned

- (1) Real property leased from Universal Health Realty Income Trust.
- (2) These entities are consolidated under one license operating as the South Texas Health System.
- (3) We manage and own a noncontrolling interest of approximately 50% in the entity that operates this facility.
- (4) We manage and own a majority interest in an LLC that owns and operates this center.
- (5) We own a noncontrolling ownership interest of approximately 50% in the entity that operates this facility that is managed by a third-party.
- (6) We hold an 93% ownership interest in this facility through both general and limited partnership interests. The remaining 7% ownership interest is held by unaffiliated third parties.
- (7) Land of this facility is leased.
- (8) We manage and own a noncontrolling interest of 50% in this facility. The remaining 50% ownership interest is held by an unaffiliated third party. Land of this facility is leased from the unaffiliated third party member.
- (9) We manage and hold an 80% ownership interest in this facility. The remaining 20% ownership interest is held by an unaffiliated third party.
- (10) We hold a 51% ownership interest in this facility. The remaining 49% ownership interest is held by unaffiliated third parties.
- (11) We manage and hold a 52% ownership interest in this facility. The remaining 48% ownership interest is held by an unaffiliated third party.
- (12) We manage and hold a 51% ownership interest in this facility. The remaining 49% ownership interest is held by an unaffiliated third party.
- (13) We manage and hold a 80% ownership interest in this facility. The remaining 20% ownership interest is held by an unaffiliated third party.
- (14) We manage and hold a 70% ownership interest in this facility. The remaining 30% ownership interest is held by an unaffiliated third party.
- (15) We manage and hold a 75% ownership interest in this facility. The remaining 25% ownership interest is held by an unaffiliated third party.
- (16) We manage and hold a 74% ownership interest in this facility. The remaining 26% ownership interest is held by an unaffiliated third party.
- (17) The land of this facility is leased pursuant to the terms of a lease that is scheduled to expire in August, 2082. The lease contains one, twenty-five year renewal option.
- (18) We own a noncontrolling ownership interest of 30% in the entity that operates this facility that is managed by a third-party.

We own or lease medical office buildings adjoining some of our hospitals. We believe that the leases on the facilities, medical office buildings and other real estate leased or owned by us do not impose any material limitation on our operations. The aggregate lease payments on facilities leased by us were \$107 million in 2023, \$104 million in 2022 and \$93 million in 2021.

ITEM 3. *Legal Proceedings*

The information regarding our legal proceedings is contained in *Note 8 to the Consolidated Financial Statements - Commitments and Contingencies*, as included this Form 10-K, is incorporated herein by reference.

ITEM 4. *Mine Safety Disclosures*

Not applicable.

PART II

ITEM 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our Class B Common Stock is traded on the New York Stock Exchange under the symbol UHS. Shares of our Class A, Class C and Class D Common Stock are not traded in any public market, but are each convertible into shares of our Class B Common Stock on a share-for-share basis.

The number of stockholders of record as of January 31, 2024, were as follows:

Class A Common	17
Class B Common	656
Class C Common	1
Class D Common	81

Stock Repurchase Programs

As of January 1, 2023, we had an aggregate available repurchase authorization of \$947.37 million under our stock repurchase program. Pursuant to this program, shares of our Class B Common Stock may be repurchased, from time to time as conditions allow, on the open market or in negotiated private transactions. There is no expiration date for our stock repurchase programs.

As reflected below, during the fourth quarter of 2023, we have repurchased approximately 1.13 million shares at an aggregate cost of approximately \$157.32 million (approximately \$139.28 per share) pursuant to the terms of our stock repurchase program. In addition, during the three-month period ended December 31, 2023, 32,019 shares were repurchased in connection with income tax withholding obligations resulting from stock-based compensation programs. For the year ended December 31, 2023, we have repurchased approximately 3.86 million shares at an aggregate cost of approximately \$524.48 million (approximately \$136.05 per share). In addition, for the year ended December 31, 2023, 164,649 shares were repurchased in connection with income tax withholding obligations resulting from stock-based compensation programs. As of December 31, 2023, we had an aggregate available repurchase authorization of \$422.88 million pursuant to our stock repurchase program.

During the period of October 1, 2023 through December 31, 2023, we repurchased the following shares:

	Additional Dollars Authorized For Repurchase (in thousands)	Total number of shares purchased (1)	Total number of shares cancelled	Average price paid per share for forfeited restricted shares	Total Number of shares purchased as part of publicly announced programs (2)	Average price paid per share for shares purchased as part of publicly announced program	Aggregate purchase price paid (in thousands)	Maximum number of dollars that may yet be purchased under the program (in thousands)
October, 2023	—	388	40	\$ 0.01	—	\$ —	\$ —	\$ 580,204
November, 2023	—	681,009	46	\$ 0.01	679,495	\$ 131.47	\$ 89,334	\$ 490,870
December, 2023	—	480,746	543	\$ 0.01	450,000	\$ 151.08	\$ 67,987	\$ 422,883
Total October through December	\$ —	<u>1,162,143</u>	<u>629</u>	<u>\$ 0.01</u>	<u>1,129,495</u>	<u>\$ 139.28</u>	<u>\$ 157,321</u>	

- (1) Includes shares that were repurchased in connection with income tax withholding obligations resulting from the exercise of stock options and the vesting of restricted stock grants. Also includes 40, 46 and 543 restricted shares that were forfeited and canceled by former employees pursuant to the terms of our restricted stock purchase plan during October, November and December, 2023, respectively.
- (2) The only publicly announced program pursuant to which the shares were repurchased was the share repurchase program described above. There is no other plan or program that has expired during this time period. Also, there is no other plan or program that we have determined to terminate prior to expiration, or under which we do not intend to make further purchases.

Dividends

During the year ended December 31, 2023 we paid dividends of \$0.80 per share. Dividend equivalents are accrued on unvested restricted stock units and are paid upon vesting of the restricted stock unit.

Our Credit Agreement contains covenants that include limitations on, among other things, dividends and stock repurchases (see below in *Capital Resources-Credit Facilities and Outstanding Debt Securities*).

Equity Compensation

Refer to Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters, of this report for information regarding securities authorized for issuance under our equity compensation plans.

Stock Price Performance Graph

The following graph compares the cumulative total stockholder return on our common stock with the cumulative total return on the stock included in the Standard & Poor's 500 Index and a Peer Group Index during the five-year period ended December 31, 2023. The graph assumes an investment of \$100 made in our common stock and each Index as of January 1, 2019 and has been weighted based on market capitalization. Note that our common stock price performance shown below should not be viewed as being indicative of future performance.

Companies in the peer group, which consist of companies in the S&P 500 Index or S&P MidCap 400 Index are as follows: Acadia Healthcare Company, Inc., Community Health Systems, Inc., HCA Healthcare, Inc., and Tenet Healthcare Corporation.

<u>Company Name / Index</u>	<u>2018 Base</u>	<u>2019</u>	<u>2020</u>	<u>2021</u>	<u>2022</u>	<u>2023</u>
Universal Health Services, Inc.	\$ 100.00	\$ 123.62	\$ 118.67	\$ 112.54	\$ 123.09	\$ 133.96
S&P 500 Index	\$ 100.00	\$ 131.49	\$ 155.68	\$ 200.37	\$ 164.08	\$ 207.21
Peer Group	\$ 100.00	\$ 124.34	\$ 141.81	\$ 224.60	\$ 207.65	\$ 237.61

ITEM 6. [RESERVED]

ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is intended to promote an understanding of our operating results and financial condition. The MD&A is provided as a supplement to, and should be read in conjunction with, our consolidated financial statements and the accompanying notes to the Consolidated Financial Statements, as included in this Annual Report on Form 10-K. The MD&A contains forward-looking statements that involve risks, uncertainties, and assumptions. Actual results may differ materially from those anticipated in these forward-looking statements as a result of various factors, including, but not limited to, those presented under *Item 1A. Risk Factors*, and below in *Forward-Looking Statements and Risk Factors* and as included elsewhere in this Annual Report on Form 10-K. This section generally discusses our results of operations for the year ended December 31, 2023, as compared to the year ended December 31, 2022. For discussion of our result of operations and changes in our financial condition for the year ended December 31, 2022 as compared to the year ended December 31, 2021, please refer to *Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations* in our Annual Report on Form 10-K for the year ended December 31, 2022, as filed with the Securities and Exchange Commission on February 27, 2023.

Overview

Our principal business is owning and operating, through our subsidiaries, acute care hospitals and outpatient facilities and behavioral health care facilities.

As of February 27, 2024, we owned and/or operated 360 inpatient facilities and 48 outpatient and other facilities, including the following, located in 39 states, Washington, D.C., the United Kingdom and Puerto Rico:

Acute care facilities located in the U.S.:

- 27 inpatient acute care hospitals;
- 27 free-standing emergency departments, and;
- 10 outpatient centers & 1 surgical hospital.

Behavioral health care facilities (333 inpatient facilities and 10 outpatient facilities):

Located in the U.S.:

- 186 inpatient behavioral health care facilities, and;
- 8 outpatient behavioral health care facilities.

Located in the U.K.:

- 144 inpatient behavioral health care facilities, and;
- 2 outpatient behavioral health care facilities.

Located in Puerto Rico:

- 3 inpatient behavioral health care facilities.

Net revenues from our acute care hospitals, outpatient facilities and commercial health insurer accounted for 57% of our consolidated net revenues during each of 2023 and 2022. Net revenues from our behavioral health care facilities and commercial health insurer accounted for 43% of our consolidated net revenues during each of 2023 and 2022.

Our behavioral health care facilities located in the U.K. generated net revenues of approximately \$761 million in 2023 and \$685 million in 2022. Total assets at our U.K. behavioral health care facilities were approximately \$1.327 billion as of December 31, 2023 and \$1.235 billion as of December 31, 2022.

Services provided by our hospitals include general and specialty surgery, internal medicine, obstetrics, emergency room care, radiology, oncology, diagnostic care, coronary care, pediatric services, pharmacy services and/or behavioral health services. We provide capital resources as well as a variety of management services to our facilities, including central purchasing, information services, finance and control systems, facilities planning, physician recruitment services, administrative personnel management, marketing and public relations.

Forward-Looking Statements and Risk Factors

You should carefully review the information contained in this Annual Report, and should particularly consider any risk factors that we set forth in this Annual Report on Form 10-K for the year ended December 31, 2023, and in other reports or documents that we file from time to time with the Securities and Exchange Commission (the "SEC"). In this Annual Report, we state our beliefs of future events and of our future financial performance. This Annual Report contains "forward-looking statements" that reflect our current estimates, expectations and projections about our future results, performance, prospects and opportunities. Forward-looking statements include, among other things, the information concerning our possible future results of operations, business and growth

strategies, financing plans, expectations that regulatory developments or other matters will or will not have a material adverse effect on our business or financial condition, our competitive position and the effects of competition, the projected growth of the industry in which we operate, and the benefits and synergies to be obtained from our completed and any future acquisitions, and statements of our goals and objectives, and other similar expressions concerning matters that are not historical facts. Words such as “may,” “will,” “should,” “could,” “would,” “predicts,” “potential,” “continue,” “expects,” “anticipates,” “future,” “intends,” “plans,” “believes,” “estimates,” “appears,” “projects” and similar expressions, or the negative of those words and expressions, as well as statements in future tense, identify forward-looking statements. In evaluating those statements, you should specifically consider various factors, including the risks related to healthcare industry trends and those set forth herein in *Item 1A. Risk Factors*. Those factors may cause our actual results to differ materially from any of our forward-looking statements.

Forward-looking statements should not be read as a guarantee of future performance or results, and will not necessarily be accurate indications of the times at, or by which, such performance or results will be achieved. Forward-looking information is based on information available at the time and/or our good faith belief with respect to future events, and is subject to risks and uncertainties that are difficult to predict and many of which are outside of our control. Many factors, including those set forth herein in *Item 1A. Risk Factors*, and other important factors disclosed in this report, and from time to time in our other filings with the SEC, could cause actual performance or results to differ materially from those expressed in the statements. Such factors include, among other things, the following:

- in our acute care segment, we have experienced a significant increase in hospital based physician related expenses (especially in the areas of emergency room care and anesthesiology) which has had a material unfavorable impact on our results of operations during 2023. Although we have implemented various initiatives to mitigate the increased expense, to the degree possible, increases in these physician related expenses could continue to have an unfavorable material impact on our results of operations for the foreseeable future;
- the healthcare industry is labor intensive and salaries, wages and benefits are subject to inflationary pressures, as are supplies expense and other operating expenses. In addition, the nationwide shortage of nurses and other clinical staff and support personnel experienced by healthcare providers in the past has been a significant operating issue facing us and other healthcare providers. In the past, the staffing shortage has, at times, required us to hire expensive temporary personnel and/or enhance wages and benefits to recruit and retain nurses and other clinical staff and support personnel. At certain facilities, particularly within our behavioral health care segment, there have been occasions when we were unable to fill all vacant positions and, consequently, we were required to limit patient volumes. The staffing shortage has required us to enhance wages and benefits to recruit and retain nurses and other clinical staff and support personnel or required us to hire expensive temporary personnel. We have also experienced general inflationary cost increases related to medical supplies as well as certain of our other operating expenses. Many of these factors, which had a material unfavorable impact on our results of operations during 2022, moderated to a certain degree during 2023;
- in 2021, the rate of inflation in the United States began to increase and has since risen to levels not experienced in over 40 years. We are experiencing inflationary pressures, primarily in personnel costs, and we anticipate continuing impacts on other cost areas within the next twelve months. The extent of any future impacts from inflation on our business and our results of operations will be dependent upon how long the elevated inflation levels persist and the extent to which the rate of inflation further increases, if at all, neither of which we are able to predict. If elevated levels of inflation were to persist or if the rate of inflation were to accelerate, our expenses could increase faster than anticipated and we may utilize our capital resources sooner than expected. Further, given the complexities of the reimbursement landscape in which we operate, our ability to pass on increased costs associated with providing healthcare to Medicare and Medicaid patients is limited due to various federal, state and local laws, which in certain circumstances, limit our ability to increase prices. In addition, although we have been requesting and negotiating increased rates from commercial payers to defray our increased cost of providing patient care, commercial payers may be unwilling or unable to increase reimbursement rates commensurate with the inflationary impacts on our costs;
- The rapid increase in interest rates have increased our interest expense significantly increasing our expenses and reducing our free cash flow and our ability to access the capital markets on favorable terms. As such, the effects of inflation and increased borrowing rates may adversely impact our results of operations, financial condition and cash flows;
- on January 19, 2024, President Biden signed into law H.R. 2872 which provides fiscal year 2024 appropriations to federal agencies for continuing projects and activities funded in four of the 12 annual appropriations bills through March 1, 2024. The remaining eight annual appropriations bills are funded through March 8, 2024. We cannot predict whether or not there will be future legislation averting a federal government shutdown, however, our operating cash flows and results of operations could be materially unfavorably impacted by a federal government shutdown;
- in January 2020, the Centers for Disease Control and Prevention confirmed the spread of COVID-19 to the United States and, in March 2020, the World Health Organization declared the COVID-19 outbreak a pandemic. Although the federal government had previously declared COVID-19 a national emergency, that declaration expired on May 11, 2023 at which time the favorable payment provisions available to us during the declared national emergency ended. Many of the federal and state legislative and regulatory measures allowing for flexibility in delivery of care and various financial supports for healthcare

providers were available only for the duration of the public health emergency (“PHE”). Most states have ended their state-level emergency declarations. The end of the PHE status will result in the conclusion of those policies over various designated timeframes. We cannot predict whether the loss of any such favorable conditions available to providers during the declared PHE will ultimately have a negative financial impact on us. The federal Coronavirus Aid, Relief, and Economic Security Act (the “CARES Act”) created a \$175 billion “Public Health and Social Services Emergency Fund” to reimburse eligible health care providers for “health care related expenses or lost revenues that are attributable to coronavirus” (the “PHSSEF”). We received payments from the targeted distributions of the PHSSEF, as disclosed herein. The CARES Act also makes other forms of financial assistance available to healthcare providers, including through Medicare and Medicaid payment adjustments and an expansion of the Medicare Accelerated and Advance Payment Program, which made available accelerated payments of Medicare funds in order to increase cash flow to providers. We received accelerated payments under this program during 2020, and returned early all of those funds during the first quarter of 2021, as disclosed herein. Providers receiving PHSSEF payments were required to sign terms and conditions regarding utilization of the payments. We, and other providers, will report healthcare related expenses attributable to COVID-19 that have not been reimbursed by another source, which may include general and administrative or healthcare related operating expenses. Funds may also be applied to lost revenues, represented as a negative change in year-over-year net patient care operating income. On December 29, 2022, the Consolidated Appropriations Act, 2023, was signed into law and phases out the enhanced federal medical assistance percentage rate states have received during the COVID-19 PHE and fully eliminates the increase on December 31, 2023. States were also permitted to begin Medicaid eligibility redeterminations on March 31, 2023, which is anticipated to result in a large decrease in Medicaid enrollment. The impact of the COVID-19 pandemic, which began in March, 2020, has had a material effect on our operations and financial results, at various times, since that time. We cannot predict if there will be future disruptions caused by the COVID-19 pandemic;

- our ability to comply with the existing laws and government regulations, and/or changes in laws and government regulations;
- an increasing number of legislative initiatives have been passed into law that may result in major changes in the health care delivery system on a national or state level. For example, Congress has reduced to \$0 the penalty for failing to maintain health coverage that was part of the original Patient Protection and Affordable Care Act, as amended by the Health and Education Reconciliation Act (collectively, the "Legislation") as part of the Tax Cuts and Jobs Act. President Biden has undertaken and is expected to undertake additional executive actions that will strengthen the Legislation and reverse the policies of the prior administration. To date, the Biden administration has issued executive orders implementing a special enrollment period permitting individuals to enroll in health plans outside of the annual open enrollment period and reexamining policies that may undermine the Legislation or the Medicaid program. The Inflation Reduction Act of 2022 (“IRA”) was passed on August 16, 2022, which among other things, allows for CMS to negotiate prices for certain single-source drugs reimbursed under Medicare Part B and Part D. The American Rescue Plan Act’s expansion of subsidies to purchase coverage through a Legislation exchange, which the IRA continued through 2025, is anticipated to increase exchange enrollment.
- there have been numerous political and legal efforts to expand, repeal, replace or modify the Legislation, since its enactment, some of which have been successful, in part, in modifying the Legislation, as well as court challenges to the constitutionality of the Legislation. The U.S. Supreme Court rejected the latest such case on June 17, 2021, when the Court held in *California v. Texas* that the plaintiffs lacked standing to challenge the Legislation’s requirement to obtain minimum essential health insurance coverage, or the individual mandate. The Court dismissed the case without specifically ruling on the constitutionality of the Legislation. As a result, the Legislation will continue to remain law, in its entirety, likely for the foreseeable future. On September 7, 2022, the Legislation faced its most recent challenge when a Texas Federal District Court judge, in the case of *Braidwood Management v. Becerra*, ruled that a requirement that certain health plans cover services without cost sharing violates the Appointments Clause of the U.S. Constitution and that the coverage of certain HIV prevention medication violates the Religious Freedom Restoration Act. The government has appealed the decision to the U.S. Circuit Court of Appeals for the Fifth Circuit. Any future efforts to challenge, replace or amend the Legislation or expand or substantially amend its provision is unknown. See below in *Sources of Revenues and Health Care Reform* for additional disclosure;
- under the Legislation, hospitals are required to make public a list of their standard charges, and effective January 1, 2019, CMS has required that this disclosure be in machine-readable format and include charges for all hospital items and services and average charges for diagnosis-related groups. On November 27, 2019, CMS published a final rule on “Price Transparency Requirements for Hospitals to Make Standard Charges Public.” This rule took effect on January 1, 2021 and requires all hospitals to also make public their payer-specific negotiated rates, minimum negotiated rates, maximum negotiated rates, and discounted cash rates, for all items and services, including individual items and services and service packages, that could be provided by a hospital to a patient. Failure to comply with these requirements may result in daily monetary penalties. On November 2, 2021, CMS released a final rule amending several hospital price transparency policies and increasing the amount of penalties for noncompliance through the use of a scaling factor based on hospital bed count. On April 26, 2023, CMS announced updated enforcement processes that requires a shortened timeline for coming into compliance when a violation has been identified and the automatic imposition of a civil monetary penalties in certain circumstances of noncompliance;

- as part of the Consolidated Appropriations Act of 2021 (the "CAA"), Congress passed legislation aimed at preventing or limiting patient balance billing in certain circumstances. The CAA addresses surprise medical bills stemming from emergency services, out-of-network ancillary providers at in-network facilities, and air ambulance carriers. The legislation prohibits surprise billing when out-of-network emergency services or out-of-network services at an in-network facility are provided, unless informed consent is received. In these circumstances providers are prohibited from billing the patient for any amounts that exceed in-network cost-sharing requirements. HHS, the Department of Labor and the Department of the Treasury have issued interim final rules, which begin to implement the legislation. The rules have limited the ability of our hospital-based physicians to receive payments for services at usually higher out-of-network rates in certain circumstances, and, as a result, have caused us to increase subsidies to these physicians or to replace their services at a higher cost level. On February 28, 2022, a district judge in the Eastern District of Texas invalidated portions of the rule governing aspects of the Independent Dispute Resolution ("IDR") process. In light of this decision, the government issued a final rule on August 19, 2022 eliminating the rebuttable presumption in favor of the qualifying payment amount ("QPA") by the IDR entity and providing additional factors the IDR entity should consider when choosing between two competing offers. On September 22, 2022, the Texas Medical Association filed a lawsuit challenging the IDR process provided in the updated final rule and alleging that the final rule unlawfully elevates the QPA above other factors the IDR entity must consider. On February 6, 2023, a federal judge vacated parts of the rule, including provisions related to considerations of the QPA. The government's appeal of the district court's order is pending in the U.S. Court of Appeals for the Fifth Circuit;
- possible unfavorable changes in the levels and terms of reimbursement for our charges by third party payers or government based payers, including Medicare or Medicaid in the United States, and government based payers in the United Kingdom;
- our ability to enter into managed care provider agreements on acceptable terms and the ability of our competitors to do the same;
- the outcome of known and unknown litigation, government investigations, false claims act allegations, and liabilities and other claims asserted against us and other matters as disclosed in *Note 8 to the Consolidated Financial Statements - Commitments and Contingencies* and the effects of adverse publicity relating to such matters;
- competition from other healthcare providers (including physician owned facilities) in certain markets;
- technological and pharmaceutical improvements that increase the cost of providing, or reduce the demand for healthcare;
- our ability to attract and retain qualified personnel, nurses, physicians and other healthcare professionals and the impact on our labor and related expenses resulting from a shortage of nurses, physicians and other healthcare professionals;
- demographic changes;
- there is a heightened risk of future cybersecurity threats, including ransomware attacks targeting healthcare providers. If successful, future cyberattacks could have a material adverse effect on our business. Any costs that we incur as a result of a data security incident or breach, including costs to update our security protocols to mitigate such an incident or breach could be significant. Any breach or failure in our operational security systems, or any third-party security systems that we rely on, can result in loss of data or an unauthorized disclosure of or access to sensitive or confidential member or protected personal or health information and could result in violations of applicable privacy and other laws, significant penalties or fines, litigation, loss of customers, significant damage to our reputation and business, and other liability or losses. We may also incur additional costs related to cybersecurity risk management and remediation. There can be no assurance that we or our service providers, if applicable, will not suffer losses relating to cyber-attacks or other information security breaches in the future or that our insurance coverage will be adequate to cover all the costs resulting from such events;
- the availability of suitable acquisition and divestiture opportunities and our ability to successfully integrate and improve our acquisitions since failure to achieve expected acquisition benefits from certain of our prior or future acquisitions could result in impairment charges for goodwill and purchased intangibles;
- the impact of severe weather conditions, including the effects of hurricanes and climate change;
- our business, results of operations, financial condition, or stock price may be adversely affected if we are not able to achieve our environmental, social and governance ("ESG") goals or comply with emerging ESG regulations, or otherwise meet the expectations of our stakeholders with respect to ESG matters;
- as discussed below in *Sources of Revenue*, we receive revenues from various state and county-based programs, including Medicaid in all the states in which we operate. We receive annual Medicaid revenues of approximately \$100 million, or greater, from each of Texas, California, Nevada, Illinois, Pennsylvania, Washington, D.C., Kentucky, Florida, Massachusetts and Virginia. We also receive Medicaid disproportionate share hospital ("DSH") payments in certain states including Texas and South Carolina. We are therefore particularly sensitive to potential reductions in Medicaid and other state-based revenue programs as well as regulatory, economic, environmental and competitive changes in those states;
- our ability to continue to obtain capital on acceptable terms, including borrowed funds, to fund the future growth of our business;
- our inpatient acute care and behavioral health care facilities may experience decreasing admission and length of stay trends;

- our financial statements reflect large amounts due from various commercial and private payers and there can be no assurance that failure of the payers to remit amounts due to us will not have a material adverse effect on our future results of operations;
- the Budget Control Act of 2011 (the “2011 Act”) imposed annual spending limits for most federal agencies and programs aimed at reducing budget deficits by \$917 billion between 2012 and 2021, according to a report released by the Congressional Budget Office. Among its other provisions, the law established a bipartisan Congressional committee, known as the Joint Select Committee on Deficit Reduction (the “Joint Committee”), which was tasked with making recommendations aimed at reducing future federal budget deficits by an additional \$1.5 trillion over 10 years. The Joint Committee was unable to reach an agreement by the November 23, 2011 deadline and, as a result, across-the-board cuts to discretionary, national defense and Medicare spending were implemented on March 1, 2013 resulting in Medicare payment reductions of up to 2% per fiscal year with a uniform percentage reduction across all Medicare programs. The Bipartisan Budget Act of 2015, enacted on November 2, 2015, continued the 2% reductions to Medicare reimbursement imposed under the 2011 Act. Recent legislation suspended payment reductions through December 31, 2021 in exchange for extended cuts through 2030. Subsequent legislation extended the payment reduction suspension through March 31, 2022, with a 1% payment reduction from then until June 30, 2022 and the full 2% payment reduction thereafter. The most recent legislation extended these reductions through 2032. We cannot predict whether Congress will restructure the implemented Medicare payment reductions or what other federal budget deficit reduction initiatives may be proposed by Congress going forward. See below in *2019 Novel Coronavirus Disease Medicare and Medicaid Payment Related Legislation – Medicare Sequestration Relief*, for additional disclosure related to the favorable effect the legislative extensions have had on our results of operations;
- uninsured and self-pay patients treated at our acute care facilities unfavorably impact our ability to satisfactorily and timely collect our self-pay patient accounts;
- changes in our business strategies or development plans;
- we have exposure to fluctuations in foreign currency exchange rates, primarily the pound sterling. We have international subsidiaries that operate in the United Kingdom. We routinely hedge our exposures to foreign currencies with certain financial institutions in an effort to minimize the impact of certain currency exchange rate fluctuations, but these hedges may be inadequate to protect us from currency exchange rate fluctuations. To the extent that these hedges are inadequate, our reported financial results or the way we conduct our business could be adversely affected. Furthermore, if a financial counterparty to our hedges experiences financial difficulties or is otherwise unable to honor the terms of the foreign currency hedge, we may experience material financial losses;
- the impact of a shift of care from inpatient to lower cost outpatient settings and controls designed to reduce inpatient services on our revenue, and;
- other factors referenced herein or in our other filings with the Securities and Exchange Commission.

Given these uncertainties, risks and assumptions, as outlined above, you are cautioned not to place undue reliance on such forward-looking statements. Our actual results and financial condition could differ materially from those expressed in, or implied by, the forward-looking statements. Forward-looking statements speak only as of the date the statements are made. We assume no obligation to publicly update any forward-looking statements to reflect actual results, changes in assumptions or changes in other factors affecting forward-looking information, except as may be required by law. All forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by this cautionary statement.

Critical Accounting Policies and Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires us to make estimates and assumptions that affect the amounts reported in our consolidated financial statements and accompanying notes.

A summary of our significant accounting policies is outlined in *Note 1 to the Consolidated Financial Statements*. We consider our critical accounting policies to be those that require us to make significant judgments and estimates when we prepare our financial statements, including the following:

Revenue Recognition: We report net patient service revenue at the estimated net realizable amounts from patients and third-party payers and others for services rendered. We have agreements with third-party payers that provide for payments to us at amounts different from our established rates. Payment arrangements include rates per discharge, reimbursed costs, discounted charges and per diem payments. Estimates of contractual allowances under managed care plans, which represent explicit price concessions, are based upon the payment terms specified in the related contractual agreements. We closely monitor our historical collection rates, as well as changes in applicable laws, rules and regulations and contract terms, to assure that provisions are made using the most accurate information available. However, due to the complexities involved in these estimations, actual payments from payers may be different from the amounts we estimate and record.

See *Note 10 to the Consolidated Financial Statements-Revenue Recognition*, for additional disclosure related to our revenues including a disaggregation of our consolidated net revenues by major source for each of the periods presented herein.

We estimate our Medicare and Medicaid revenues using the latest available financial information, patient utilization data, government provided data and in accordance with applicable Medicare and Medicaid payment rules and regulations. The laws and regulations governing the Medicare and Medicaid programs are extremely complex and subject to interpretation and as a result, there is at least a reasonable possibility that recorded estimates will change by material amounts in the near term. Certain types of payments by the Medicare program and state Medicaid programs (e.g. Medicare Disproportionate Share Hospital, Medicare Allowable Bad Debts and Inpatient Psychiatric Services) are subject to retroactive adjustment in future periods as a result of administrative review and audit and our estimates may vary from the final settlements. Such amounts are included in accounts receivable, net, on our consolidated balance sheets. The funding of both federal Medicare and state Medicaid programs are subject to legislative and regulatory changes. As such, we cannot provide any assurance that future legislation and regulations, if enacted, will not have a material impact on our future Medicare and Medicaid reimbursements. Adjustments related to the final settlement of these retrospectively determined amounts did not materially impact our results in 2023, 2022 or 2021. If it were to occur, each 1% adjustment to our estimated net Medicare revenues that are subject to retrospective review and settlement as of December 31, 2023, would change our after-tax net income by approximately \$2 million.

Charity Care, Uninsured Discounts and Other Adjustments to Revenue: Collection of receivables from third-party payers and patients is our primary source of cash and is critical to our operating performance. Our primary collection risks relate to uninsured patients and the portion of the bill which is the patient's responsibility, primarily co-payments and deductibles. We estimate our revenue adjustments for implicit price concessions based on general factors such as payer mix, the aging of the receivables and historical collection experience. We routinely review accounts receivable balances in conjunction with these factors and other economic conditions which might ultimately affect the collectability of the patient accounts and make adjustments to our allowances as warranted. At our acute care hospitals, third party liability accounts are pursued until all payment and adjustments are posted to the patient account. For those accounts with a patient balance after third party liability is finalized or accounts for uninsured patients, the patient receives statements and collection letters.

Historically, a significant portion of the patients treated throughout our portfolio of acute care hospitals are uninsured patients which, in part, has resulted from patients who are employed but do not have health insurance or who have policies with relatively high deductibles. Patients treated at our hospitals for non-elective services, who have gross income of various amounts, dependent upon the state, ranging from 200% to 400% of the federal poverty guidelines, are deemed eligible for charity care. The federal poverty guidelines are established by the federal government and are based on income and family size. Because we do not pursue collection of amounts that qualify as charity care, the transaction price is fully adjusted and there is no impact in our net revenues or in our accounts receivable, net.

A portion of the accounts receivable at our acute care facilities are comprised of Medicaid accounts that are pending approval from third-party payers but we also have smaller amounts due from other miscellaneous payers such as county indigent programs in certain states. Our patient registration process includes an interview of the patient or the patient's responsible party at the time of registration. At that time, an insurance eligibility determination is made and an insurance plan code is assigned. There are various pre-established insurance profiles in our patient accounting system which determine the expected insurance reimbursement for each patient based on the insurance plan code assigned and the services rendered. Certain patients may be classified as Medicaid pending at registration based upon a screening evaluation if we are unable to definitively determine if they are currently Medicaid eligible. When a patient is registered as Medicaid eligible or Medicaid pending, our patient accounting system records net revenues for services provided to that patient based upon the established Medicaid reimbursement rates, subject to the ultimate disposition of the patient's Medicaid eligibility. When the patient's ultimate eligibility is determined, reclassifications may occur which impacts net revenues in future periods. Although the patient's ultimate eligibility determination may result in adjustments to net revenues, these adjustments did not have a material impact on our results of operations in 2023 or 2022 since our facilities make estimates at each financial reporting period to adjust revenue based on historical collections.

We also provide discounts to uninsured patients (included in "uninsured discounts" amounts below) who do not qualify for Medicaid or charity care. Because we do not pursue collection of amounts classified as uninsured discounts, the transaction price is fully adjusted and there is no impact in our net revenues or in our net accounts receivable. In implementing the discount policy, we first attempt to qualify uninsured patients for governmental programs, charity care or any other discount program. If an uninsured patient does not qualify for these programs, the uninsured discount is applied.

Uncompensated care (charity care and uninsured discounts):

The following table shows the amounts recorded at our acute care hospitals for charity care and uninsured discounts, based on charges at established rates, for the years ended December 31, 2023 and 2022:

	(dollar amounts in thousands)			
	2023		2022	
	Amount	%	Amount	%
Charity care	\$ 843,449	32%	\$ 786,962	35%
Uninsured discounts	1,792,493	68%	1,474,933	65%
Total uncompensated care	\$ 2,635,942	100%	\$ 2,261,895	100%

The estimated cost of providing uncompensated care:

The estimated cost of providing uncompensated care, as reflected below, were based on a calculation which multiplied the percentage of operating expenses for our acute care hospitals to gross charges for those hospitals by the above-mentioned total uncompensated care amounts. The percentage of cost to gross charges is calculated based on the total operating expenses for our acute care facilities divided by gross patient service revenue for those facilities. An increase in the level of uninsured patients to our facilities and the resulting adverse trends in the adjustments to net revenues and uncompensated care provided could have a material unfavorable impact on our future operating results.

	(amounts in thousands)	
	2023	2022
Estimated cost of providing charity care	\$ 83,383	\$ 85,434
Estimated cost of providing uninsured discounts	177,206	160,122
Estimated cost of providing uncompensated care	\$ 260,589	\$ 245,556

Self-Insured/Other Insurance Risks: We provide for self-insured risks, primarily general and professional liability claims, workers' compensation claims and healthcare and dental claims. Our estimated liability for self-insured professional and general liability claims is based on a number of factors including, among other things, the number of asserted claims and reported incidents, estimates of losses for these claims based on recent and historical settlement amounts, estimate of incurred but not reported claims based on historical experience, and estimates of amounts recoverable under our commercial insurance policies. All relevant information, including our own historical experience is used in estimating the expected amount of claims. While we continuously monitor these factors, our ultimate liability for professional and general liability claims could change materially from our current estimates due to inherent uncertainties involved in making this estimate. Our estimated self-insured reserves are reviewed and changed, if necessary, at each reporting date and changes are recognized currently as additional expense or as a reduction of expense.

In addition, we also: (i) own commercial health insurers headquartered in Nevada and Puerto Rico, and; (ii) maintain self-insured employee benefits programs for employee healthcare and dental claims. The ultimate costs related to these programs/operations include expenses for claims incurred and paid in addition to an accrual for the estimated expenses incurred in connection with claims incurred but not yet reported. Given our significant insurance-related exposure, there can be no assurance that a sharp increase in the number and/or severity of claims asserted against us will not have a material adverse effect on our future results of operations.

See *Note 8 to the Consolidated Financial Statements-Commitments and Contingencies* for additional disclosure related to our self-insured general and professional liability and workers' compensation liability.

Long-Lived Assets: We review our long-lived assets for impairment whenever events or circumstances indicate that the carrying value of these assets may not be recoverable. The assessment of possible impairment is based on our ability to recover the carrying value of our asset based on our estimate of its undiscounted future cash flow. If the analysis indicates that the carrying value is not recoverable from future cash flows, the asset is written down to its estimated fair value and an impairment loss is recognized. Fair values are determined based on estimated future cash flows using appropriate discount rates. Please see additional disclosure below in *Provision for Asset Impairments*.

Goodwill and Intangible Assets: Goodwill and indefinite-lived intangible assets are reviewed for impairment at the reporting unit level on an annual basis or more often if indicators of impairment arise. Our judgments regarding the existence of impairment indicators are based on market conditions and operational performance of each reporting unit. We have designated October 1st as our annual impairment assessment date for our goodwill and indefinite-lived intangible assets.

We performed an impairment assessment as of October 1, 2023 which indicated no impairment of goodwill. There was no goodwill impairment during 2022.

Future changes in the estimates used to conduct the impairment review, including profitability and market value projections, could indicate impairment in future periods potentially resulting in a write-off of a portion or all of our goodwill or indefinite-lived intangible assets.

Income Taxes: Deferred tax assets and liabilities are recognized for the amount of taxes payable or deductible in future years as a result of differences between the tax bases of assets and liabilities and their reported amounts in the financial statements. We believe that future income will enable us to realize our deferred tax assets net of recorded valuation allowances relating to state and foreign net operating loss carry-forwards, tax credits, and interest deduction limitations.

Due to recent guidance and enacted laws surrounding the global 15% minimum tax rate that will be effective after 2024 from the Organization for Economic Co-operation and Development ("OECD") as well as jurisdictions that we operate in, we anticipate adverse effects to our provision for income taxes as well as cash taxes. We do not expect these adverse effects to be material and will continue to monitor changes in tax policies and laws issued by the OECD and jurisdictions that we operate in.

We operate in multiple jurisdictions with varying tax laws. We are subject to audits by any of these taxing authorities. We believe that adequate accruals have been provided for federal, foreign and state taxes.

See *Note 6 to the Consolidated Financial Statements-Income Taxes* for additional disclosure of our effective tax rates.

Recent Accounting Pronouncements: For a summary of recent accounting pronouncements, please see *Note 1 to the Consolidated Financial Statements-Business and Summary of Significant Accounting Standards* as included in this Report on Form 10-K for the year ended December 31, 2023.

Results of Operations

Clinical Staffing, Physician Related Expenses and Effects of Inflation:

The healthcare industry is labor intensive and salaries, wages and benefits are subject to inflationary pressures, as are supplies expense and other operating expenses. In addition, the nationwide shortage of nurses and other clinical staff and support personnel experienced by healthcare providers in the past has been a significant operating issue facing us and other healthcare providers. In some areas, the labor scarcity has strained our resources and staff, which has required us to utilize higher-cost temporary labor and pay premiums above standard compensation for essential workers. In the past, the staffing shortage has, at times, required us to hire expensive temporary personnel and/or enhance wages and benefits to recruit and retain nurses and other clinical staff and support personnel. At certain facilities, particularly within our behavioral health care segment, there have been occasions when we were unable to fill all vacant positions and, consequently, we were required to limit patient volumes. The staffing shortage has required us to enhance wages and benefits to recruit and retain nurses and other clinical staff and support personnel or required us to hire expensive temporary personnel. We have also experienced general inflationary cost increases related to medical supplies as well as certain of our other operating expenses. Many of these factors, which had a material unfavorable impact on our results of operations during 2022, moderated to a certain degree during 2023.

In our acute care segment, we have experienced a significant increase in hospital-based physician related expenses (especially in the areas of emergency room care and anesthesiology) which has had a material unfavorable impact on our results of operations during 2023. Although we have implemented various initiatives to mitigate the increased expense, to the degree possible, increases in these physician related expenses could continue to have an unfavorable material impact on our results of operations for the foreseeable future.

Although our ability to pass on increased costs associated with providing healthcare to Medicare and Medicaid patients is limited due to various federal, state and local laws which, in certain circumstances, limit our ability to increase prices, we have been requesting and negotiating increased rates from commercial insurers to defray our increased cost of providing patient care. In addition, we have implemented various productivity enhancement programs and cost reduction initiatives including, but not limited to, the following: team-based patient care initiatives designed to optimize the level of patient care services provided by our licensed nurses/clinicians; efforts to reduce utilization of, and rates paid for, premium pay labor; consolidation of medical supply vendors to increase purchasing discounts; review and reduction of clinical variation in connection with the utilization of medical supplies, and; various other efforts to increase productivity and/or reduce costs including investments in new information technology applications.

The following table summarizes our results of operations, and is used in the discussion below, for the years ended December 31, 2023 and 2022 (dollar amounts in thousands):

	Year Ended December 31,			
	2023		2022	
	Amount	% of Net Revenues	Amount	% of Net Revenues
Net revenues	\$ 14,281,976	100.0%	\$ 13,399,370	100.0%
Operating charges:				
Salaries, wages and benefits	7,107,484	49.8%	6,762,256	50.5%
Other operating expenses	3,757,216	26.3%	3,445,733	25.7%
Supplies expense	1,532,828	10.7%	1,474,339	11.0%
Depreciation and amortization	568,041	4.0%	581,861	4.3%
Lease and rental expense	141,026	1.0%	131,626	1.0%
Subtotal-operating expenses	13,106,595	91.8%	12,395,815	92.5%
Income from operations	1,175,381	8.2%	1,003,555	7.5%
Interest expense, net	206,674	1.4%	126,889	0.9%
Other (income) expense, net	28,281	0.2%	10,406	0.1%
Income before income taxes	940,426	6.6%	866,260	6.5%
Provision for income taxes	221,119	1.5%	209,278	1.6%
Net income	719,307	5.0%	656,982	4.9%
Less: Net income (loss) attributable to noncontrolling interests	1,512	0.0%	(18,627)	-0.1%
Net income attributable to UHS	\$ 717,795	5.0%	\$ 675,609	5.0%

Net revenues increased by 6.6%, or \$883 million, to \$14.28 billion during 2023 as compared to \$13.40 billion during 2022. The increase in net revenues was primarily attributable to:

- a \$1.01 billion or 7.8% increase in net revenues generated from our acute care and behavioral health care operations owned during both periods (which we refer to as “same facility”), and;
- \$123 million of other combined net decreases including \$162 million of decreased revenues at Desert Springs which discontinued all inpatient operations during the first quarter of 2023.

Income before income taxes increased by \$74 million to \$940 million during 2023 as compared to \$866 million during 2022. The increase was attributable to:

- an increase of \$111 million at our acute care facilities, as discussed below in *Acute Care Hospital Services*;
- an increase of \$103 million at our behavioral health care facilities, as discussed below in *Behavioral Health Services*;
- a decrease of \$80 million due to an increase in interest expense due to increases in our weighted average cost of borrowings and aggregate average borrowings outstanding, as discussed below in *Other Operating Results-Interest Expense*, and;
- \$60 million of other combined net decreases, including a \$28 million increase in the unrealized loss in the market value of certain equity securities.

Net income attributable to UHS increased by \$42 million to \$718 million during 2023 as compared to \$676 million during 2022. This increase was attributable to:

- an increase of \$74 million in income before income taxes, as discussed above;
- a decrease of \$20 million due to an increase in the income attributable to noncontrolling interests, and;
- a decrease of \$12 million resulting from an increase in the provision for income taxes due primarily to the income tax expense recorded in connection with the \$54 million increase in pre-tax income. Please see additional disclosure below in *Other Operating Results-Provision for Income Taxes and Effective Tax Rates*.

Adjustments to self-insured professional and general liability and workers' compensation liability reserves:

Professional and general liability:

Our estimated liability for self-insured professional and general liability claims is based on a number of factors including, among other things, the number of asserted claims and reported incidents, estimates of losses for these claims based on recent and

historical settlement amounts, estimates of incurred but not reported claims based on historical experience, and estimates of amounts recoverable under our commercial insurance policies.

As a result of unfavorable trends experienced during 2023 and 2022, our results of operations included pre-tax increases to our reserves for self-insured professional and general liability claims amounting to approximately \$25 million during 2023 and \$16 million during 2022. During 2023, approximately \$18 million of the reserves increase is included in our Same Facility basis acute care hospitals services' results, and approximately \$7 million is included in our behavioral health services' results. During 2022, approximately \$10 million of the reserves increase is included in our Same Facility basis acute care hospitals services' results, and approximately \$6 million is included in our behavioral health services' results.

Workers' compensation liability:

As a result of favorable trends experienced recently, our results of operations during 2023 included a decrease to our reserves for self-insured workers' compensation liability claims amounting to approximately \$10 million, of which approximately \$4 million is included in our same facility basis acute care hospitals services' results, and approximately \$5 million is included in our behavioral health services' results.

Acute Care Hospital Services

The following table sets forth certain operating statistics for our acute care hospital services for the years ended December 31, 2023 and 2022.

	Same Facility Basis		All	
	2023	2022	2023	2022
Average licensed beds	6,604	6,640	6,691	6,923
Average available beds	6,432	6,468	6,519	6,751
Patient days	1,564,390	1,512,013	1,576,074	1,569,611
Average daily census	4,286.0	4,142.5	4,318.0	4,300.3
Occupancy-licensed beds	64.9%	62.4%	64.5%	62.1%
Occupancy-available beds	66.6%	64.0%	66.2%	63.7%
Admissions	319,829	300,507	322,218	311,537
Length of stay	4.9	5.0	4.9	5.0

Acute Care Hospital Services-Same Facility Basis

We believe that providing our results on a "Same Facility" basis (which is a non-GAAP measure), which includes the operating results for facilities and businesses operated in both the current year and prior year periods, is helpful to our investors as a measure of our operating performance. Our Same Facility results also neutralize (if applicable) the effect of items that are non-operational in nature including items such as, but not limited to, gains/losses on sales of assets and businesses, impacts of settlements, legal judgments and lawsuits, impairments of long-lived and intangible assets and other amounts that may be reflected in the current or prior year financial statements that relate to prior periods.

Our Same Facility basis results reflected on the tables below also exclude from net revenues and other operating expenses, provider tax assessments incurred in each period as discussed below *Sources of Revenue-Summary of Various State Medicaid Supplemental Payment Programs*. However, these provider tax assessments are included in net revenues and other operating expenses as reflected in the table below under *All Acute Care Hospital Services*. The provider tax assessments had no impact on the income before income taxes as reflected on the tables below since the amounts offset between net revenues and other operating expenses. To obtain a complete understanding of our financial performance, the Same Facility results should be examined in connection with our net income as determined in accordance with U.S. GAAP and as presented in the consolidated financial statements and notes thereto as contained in this Annual Report on Form 10-K.

The following table summarizes the results of operations for our acute care hospital services on a Same Facility basis and is used in the discussions below for the years ended December 31, 2023 and 2022 (dollar amounts in thousands):

	Year Ended December 31, 2023		Year Ended December 31, 2022	
	Amount	% of Net Revenues	Amount	% of Net Revenues
Net revenues	\$ 7,840,740	100.0%	\$ 7,284,868	100.0%
Operating charges:				
Salaries, wages and benefits	3,363,213	42.9%	3,225,039	44.3%
Other operating expenses	2,144,102	27.3%	1,863,414	25.6%
Supplies expense	1,303,018	16.6%	1,226,294	16.8%
Depreciation and amortization	358,308	4.6%	369,493	5.1%
Lease and rental expense	95,565	1.2%	85,915	1.2%
Subtotal-operating expenses	7,264,206	92.6%	6,770,155	92.9%
Income from operations	576,534	7.4%	514,713	7.1%
Interest (income) expense, net	(2,501)	0.0%	1,109	0.0%
Other (income) expense, net	6,099	0.1%	1,493	0.0%
Income before income taxes	\$ 572,936	7.3%	\$ 512,111	7.0%

During 2023, as compared to 2022, net revenues from our acute care hospital services, on a Same Facility basis, increased by \$556 million or 7.6%. Income before income taxes (and before income attributable to noncontrolling interests) increased by \$61 million, or 11.9%, amounting to \$573 million, or 7.3% of net revenues during 2023, as compared to \$512 million, or 7.0% of net revenues during 2022.

During 2023, net revenue per adjusted admission decreased by 0.6% while net revenue per adjusted patient day increased by 2.2%, as compared to 2022. During 2023, as compared to 2022, the net revenue per adjusted admission, and per adjusted patient day, were pressured by the following: (i) a greater percentage of lower acuity procedures; (ii) an increase in denied claims and challenges to patient status classifications by certain of our commercial payers, and; (iii) a decrease in the number of patients with a COVID-19 diagnosis treated at our acute care hospitals and less incremental government reimbursement associated with COVID-19 patients.

During 2023, as compared to 2022, inpatient admissions to our acute care hospitals increased by 6.4% and adjusted admissions (adjusted for outpatient activity) increased by 7.6%. Patient days at these facilities increased by 3.5% and adjusted patient days increased by 4.7% during 2023, as compared to 2022. The average length of inpatient stay at these facilities was 4.9 days during 2023 and 5.0 days during 2022. The occupancy rate, based on the average available beds at these facilities, was 67% during 2023, as compared to 64% during 2022.

On a Same Facility basis during 2023, as compared to 2022, salaries, wages and benefits expense increased by \$138 million, or 4.3%. As a percentage of net revenues, salaries, wages and benefits expense decreased to 42.9% during 2023 as compared to 44.3% during 2022.

Other operating expenses increased \$281 million, or 15.1%, during 2023, as compared to 2022. Operating expenses incurred by our commercial health insurer, consisting primarily of medical costs, increased approximately \$40 million during 2023 as compared to 2022. Excluding the operating expenses incurred by our commercial health insurer, other operating expenses increased \$241 million, or 16.4% during 2023 as compared to 2022. The increase during 2023, as compared to 2022, was due primarily to a \$127 million, or 26.6%, increase in physician-related expenses (as discussed above in *Results of Operations - Clinical Staffing, Physician Related Expenses and Effects of Inflation*), as well as the expenses related to the increase in patient volumes.

Supplies expense increased \$77 million, or 6.3%, during 2023, as compared to 2022. The increase was due, in part, to the increase in patient volumes experienced during 2023, as compared to 2022. As a percentage of net revenues, supplies expense decreased to 16.6% during 2023 as compared to 16.8% during 2022.

All Acute Care Hospital Services

The following table summarizes the results of operations for all our acute care operations during 2023 and 2022. These amounts include: (i) our acute care results on a same facility basis, as indicated above; (ii) the impact of provider tax assessments which increased net revenues and other operating expenses but had no impact on income before income taxes, and; (iii) certain other amounts including, if applicable, the operating results of recently acquired/opened facilities, or divested/closed facilities, including the operating results and provision for asset impairment (recorded during 2022) for Desert Springs Hospital which discontinued all inpatient operations during the first quarter of 2023. Dollar amounts below are reflected in thousands.

	Year Ended December 31, 2023		Year Ended December 31, 2022	
	Amount	% of Net Revenues	Amount	% of Net Revenues
	Net revenues	\$ 8,081,402	100.0%	\$ 7,646,749
Operating charges:				
Salaries, wages and benefits	3,406,060	42.1%	3,332,535	43.6%
Other operating expenses	2,347,560	29.0%	2,146,196	28.1%
Supplies expense	1,317,917	16.3%	1,264,688	16.5%
Depreciation and amortization	367,644	4.5%	383,115	5.0%
Lease and rental expense	96,589	1.2%	86,654	1.1%
Subtotal-operating expenses	7,535,770	93.2%	7,213,188	94.3%
Income from operations	545,632	6.8%	433,561	5.7%
Interest (income) expense, net	(2,501)	0.0%	1,109	0.0%
Other (income) expense, net	7,788	0.1%	2,788	0.0%
Income before income taxes	\$ 540,345	6.7%	\$ 429,664	5.6%

During 2023, as compared to 2022, net revenues from our acute care hospital services increased by \$435 million, or 5.7%, due to: (i) the \$556 million, or 7.6% increase in Same Facility revenues, as discussed above, and; (ii) \$121 million of other combined net decreases consisting primarily of decreased revenues at Desert Springs Hospital and decreased provider tax assessments, partially offset by the revenues generated at a 170-bed acute care hospital located in Reno, Nevada, that opened in early April, 2022 (this facility was reflected in our acute care hospital services' operating results effective May 1st of each year).

Income before income taxes increased by \$111 million, or 25.8%, to \$540 million, or 6.7% of net revenues during 2023, as compared to \$430 million, or 5.6% of net revenues during 2022. The \$111 million increase in income before income taxes from our acute care hospital services resulted from the \$61 million, or 12%, increase in income before income taxes at our acute care hospital services, on a Same Facility basis, as discussed above, and \$50 million of other combined net increases resulting primarily from decreased losses incurred at Desert Springs Hospital (a \$58 million provision for asset impairment was recorded for Desert Springs Hospital during 2022).

During 2023, as compared to 2022, salaries, wages and benefits expense increased by \$74 million, or 2.2%. The increase was due primarily to the above-mentioned \$138 million increase related to our acute care hospital services, on a Same Facility basis, partially offset by a combined net decrease of \$64 million resulting primarily from decreased salaries, wages and benefits expense related to Desert Springs Hospital.

Other operating expenses increased \$201 million, or 9.4%, during 2023, as compared to 2022. The increase was due primarily to the \$281 million above-mentioned increase related to our acute care hospital services, on a Same Facility basis, partially offset by a combined net decrease of \$80 million resulting primarily from decreased operating expenses related to Desert Springs Hospital (2022 included a \$58 million provision for asset impairment).

Supplies expense increased by \$53 million, or 4.2%, during 2023, as compared to 2022. The increase was due primarily to the above-mentioned \$77 million increase related to our acute care hospital services, on a Same Facility basis, partially offset by a combined net decrease of \$24 million resulting primarily from decreased supplies expense related to Desert Springs Hospital.

Please see *Results of Operations - Clinical Staffing, Physician Related Expenses and Effects of Inflation* above for additional disclosure regarding the factors impacting our operating costs.

Behavioral Health Care Services

The following table sets forth certain operating statistics for our behavioral health care services for the years ended December 31, 2023 and 2022.

	Same Facility Basis		All	
	2023	2022	2023	2022
Average licensed beds	24,016	24,014	24,224	24,259
Average available beds	23,916	23,914	24,124	24,159
Patient days	6,289,388	6,175,143	6,336,927	6,230,124
Average daily census	17,231.2	16,918.2	17,361.4	17,068.8
Occupancy-licensed beds	71.7%	70.5%	71.7%	70.4%
Occupancy-available beds	72.0%	70.7%	72.0%	70.7%
Admissions	468,131	454,441	472,307	459,245
Length of stay	13.4	13.6	13.4	13.6

Behavioral Health Care Services-Same Facility Basis

We believe that providing our results on a “Same Facility” basis (which is a non-GAAP measure), which includes the operating results for facilities and businesses operated in both the current year and prior year periods, is helpful to our investors as a measure of our operating performance. Our Same Facility results also neutralize (if applicable) the effect of items that are non-operational in nature including items such as, but not limited to, gains/losses on sales of assets and businesses, impacts of settlements, legal judgments and lawsuits, impairments of long-lived and intangible assets and other amounts that may be reflected in the current or prior year financial statements that relate to prior periods.

Our Same Facility basis results reflected on the table below also excludes from net revenues and other operating expenses, provider tax assessments incurred in each period as discussed below *Sources of Revenue-Summary of Various State Medicaid Supplemental Payment Programs*. However, these provider tax assessments are included in net revenues and other operating expenses as reflected in the table below under *All Behavioral Health Care Services*. The provider tax assessments had no impact on the income before income taxes as reflected on the tables below since the amounts offset between net revenues and other operating expenses. To obtain a complete understanding of our financial performance, the Same Facility results should be examined in connection with our net income as determined in accordance with U.S. GAAP and as presented in the consolidated financial statements and notes thereto as contained in this Annual Report on Form 10-K.

The following table summarizes the results of operations for our behavioral health care services, on a same facility basis, and is used in the discussions below for the years ended December 31, 2023 and 2022 (dollar amounts in thousands):

	Year Ended December 31, 2023		Year Ended December 31, 2022	
	Amount	% of Net Revenues	Amount	% of Net Revenues
Net revenues	\$6,048,883	100.0%	\$5,598,764	100.0%
Operating charges:				
Salaries, wages and benefits	3,343,222	55.3%	3,088,108	55.2%
Other operating expenses	1,163,365	19.2%	1,078,918	19.3%
Supplies expense	216,879	3.6%	210,903	3.8%
Depreciation and amortization	187,105	3.1%	184,684	3.3%
Lease and rental expense	43,785	0.7%	41,951	0.7%
Subtotal-operating expenses	4,954,356	81.9%	4,604,564	82.2%
Income from operations	1,094,527	18.1%	994,200	17.8%
Interest expense, net	4,434	0.1%	5,169	0.1%
Other (income) expense, net	(3,426)	-0.1%	(6,343)	-0.1%
Income before income taxes	\$1,093,519	18.1%	\$ 995,374	17.8%

During 2023, as compared to 2022, net revenues from our behavioral health services, on a Same Facility basis, increased by \$450 million or 8.0%. Income before income taxes increased by \$98 million, or 9.9%, amounting to \$1.094 billion or 18.1% of net revenues during 2023, as compared to \$995 million or 17.8% of net revenues during 2022.

During 2023, net revenue per adjusted admission increased by 4.7% while net revenue per adjusted patient day increased by 5.9%, as compared to 2022. During 2023, as compared to 2022, inpatient admissions and adjusted admissions to our behavioral health care hospitals increased by 3.0% and 3.2%, respectively. Patient days at these facilities increased by 1.9% and adjusted patient days increased by 2.1% during 2023, as compared to 2022. The average length of inpatient stay at these facilities was 13.4 days and 13.6 days during 2023 and 2022, respectively. The occupancy rate, based on the average available beds at these facilities, was 72% and 71% during 2023 and 2022, respectively.

On a Same Facility basis during 2023, as compared to 2022, salaries, wages and benefits expense increased \$255 million or 8.3%. The increase during 2023, as compared to 2022, was due to a 4.1% increase in salaries, wages and benefits expense per average full-time equivalent employee, as well as a 4.0% increase in the average number of full time equivalent employees. The increased staffing was due, in part, to increased patient volumes. As a percentage of net revenues during each year, salaries, wages and benefits expense increased slightly to 55.3% during 2023 as compared to 55.2% during 2022.

Other operating expenses increased \$84 million, or 7.8%, during 2023, as compared to 2022. The increase during 2023, as compared to 2022, was due, in part, to increased patient volumes. As a percentage of net revenues during each year, other operating expenses decreased slightly to 19.2% during 2023 as compared to 19.3% during 2022.

Supplies expense increased \$6 million, or 2.8%, during 2023, as compared to 2022.

All Behavioral Health Care Services

The following table summarizes the results of operations for all our behavioral health care services during 2023 and 2022. These amounts include: (i) our behavioral health care results on a same facility basis, as indicated above; (ii) the impact of provider tax assessments which increased net revenues and other operating expenses but had no impact on income before income taxes, and; (iii) certain other amounts, if applicable, including the results of facilities acquired or opened during the past year as well as the results of certain facilities that were closed or restructured during the past year. Dollar amounts below are reflected in thousands.

	Year Ended December 31, 2023		Year Ended December 31, 2022	
	Amount	% of Net Revenues	Amount	% of Net Revenues
Net revenues	\$6,190,921	100.0%	\$5,729,758	100.0%
Operating charges:				
Salaries, wages and benefits	3,353,008	54.2%	3,107,216	54.2%
Other operating expenses	1,303,311	21.1%	1,201,563	21.0%
Supplies expense	217,310	3.5%	211,786	3.7%
Depreciation and amortization	189,297	3.1%	186,555	3.3%
Lease and rental expense	44,028	0.7%	43,868	0.8%
Subtotal-operating expenses	<u>5,106,954</u>	<u>82.5%</u>	<u>4,750,988</u>	<u>82.9%</u>
Income from operations	1,083,967	17.5%	978,770	17.1%
Interest expense, net	4,558	0.1%	5,323	0.1%
Other (income) expense, net	(4,271)	-0.1%	(6,843)	-0.1%
Income before income taxes	<u>\$1,083,680</u>	<u>17.5%</u>	<u>\$ 980,290</u>	<u>17.1%</u>

During 2023, as compared to 2022, net revenues generated from our behavioral health services increased by \$461 million, or 8.0%. The increase was primarily attributable to the \$450 million, or 8.0%, increase in net revenues at our behavioral health facilities, on a Same Facility basis, as discussed above.

Income before income taxes increased by \$103 million, or 11%, to \$1.084 billion or 17.5% of net revenues during 2023, as compared to \$980 million or 17.1% of net revenues during 2022. The increase in income before income taxes at our behavioral health facilities during 2023, as compared to 2022, was primarily attributable to the \$98 million, or 10%, increase in income before income taxes generated at our behavioral health facilities, on a Same Facility basis, as discussed above.

During 2023, as compared to 2022, salaries, wages and benefits expense increased by \$246 million or 7.9%. The increase was due primarily to the above-mentioned \$255 million, or 8.3%, increase related to our behavioral health facilities, on a Same Facility basis.

Other operating expenses increased by \$102 million, or 8.5%, during 2023, as compared to 2022. The increase was due primarily to the above-mentioned \$84 million, or 7.8%, increase related to our behavioral health facilities, on a Same Facility basis, as well as a \$23 million increase in provider tax assessments.

Supplies expense increased \$6 million, or 2.6%, during 2023, as compared to 2022.

Please see *Results of Operations - Clinical Staffing, Physician Related Expenses and Effects of Inflation* above for additional disclosure regarding the factors impacting our operating costs.

Sources of Revenue

Overview: We receive payments for services rendered from private insurers, including managed care plans, the federal government under the Medicare program, state governments under their respective Medicaid programs and directly from patients.

Hospital revenues depend upon inpatient occupancy levels, the medical and ancillary services and therapy programs ordered by physicians and provided to patients, the volume of outpatient procedures and the charges or negotiated payment rates for such services. Charges and reimbursement rates for inpatient routine services vary depending on the type of services provided (e.g., medical/surgical, intensive care or behavioral health) and the geographic location of the hospital. Inpatient occupancy levels fluctuate for various reasons, many of which are beyond our control. The percentage of patient service revenue attributable to outpatient services has generally increased in recent years, primarily as a result of advances in medical technology that allow more services to be provided on an outpatient basis, as well as increased pressure from Medicare, Medicaid and private insurers to reduce hospital stays and provide services, where possible, on a less expensive outpatient basis. We believe that our experience with respect to our increased outpatient levels mirrors the general trend occurring in the health care industry and we are unable to predict the rate of growth and resulting impact on our future revenues.

Patients are generally not responsible for any difference between customary hospital charges and amounts reimbursed for such services under Medicare, Medicaid, some private insurance plans, and managed care plans, but are responsible for services not

covered by such plans, exclusions, deductibles or co-insurance features of their coverage. The amount of such exclusions, deductibles and co-insurance has generally been increasing each year. Indications from recent federal and state legislation are that this trend will continue. Collection of amounts due from individuals is typically more difficult than from governmental or business payers which unfavorably impacts the collectability of our patient accounts.

Sources of Revenues and Health Care Reform: Given increasing budget deficits, the federal government and many states are currently considering additional ways to limit increases in levels of Medicare and Medicaid funding, which could also adversely affect future payments received by our hospitals. In addition, the uncertainty and fiscal pressures placed upon the federal government as a result of, among other things, impacts on state revenue and expenses resulting from the COVID-19 pandemic, economic recovery stimulus packages, responses to natural disasters, and the federal and state budget deficits in general may affect the availability of government funds to provide additional relief in the future. We are unable to predict the effect of future policy changes on our operations.

In 2010, the Patient Protection and Affordable Care Act, as amended by the Health and Education Reconciliation Act (collectively, the “Legislation”) was enacted and its two primary goals were to provide for increased access to coverage for healthcare and to reduce healthcare-related expenses. The Legislation revised reimbursement under the Medicare and Medicaid programs to emphasize the efficient delivery of high-quality care and contains a number of incentives and penalties under these programs to achieve these goals. The Legislation provides for reductions to Medicaid DSH payments which are scheduled to begin in 2024.

A 2012 U.S. Supreme Court ruling limited the federal government’s ability to expand health insurance coverage by holding unconstitutional sections of the Legislation that sought to withdraw federal funding for state noncompliance with certain Medicaid coverage requirements. Pursuant to that decision, the federal government may not penalize states that choose not to participate in the Medicaid expansion by reducing their existing Medicaid funding. Therefore, states can choose to expand or not to expand their Medicaid program without risking the loss of federal Medicaid funding. As a result, many states, including Texas, have not expanded their Medicaid programs without the threat of loss of federal funding. CMS has previously granted section 1115 demonstration waivers providing for work and community engagement requirements for certain Medicaid eligible individuals. CMS has also released guidance to states interested in receiving their Medicaid funding through a block grant mechanism. The Biden administration withdrew certain previously issued section 1115 demonstrations aligned with these policies, but Georgia has imposed work and community engagement requirements under a Medicaid demonstration program that launched July 1, 2023. If additional section 1115 demonstrations that include work and community requirements are implemented, we anticipate that they would lead to reductions in coverage and likely increases in uncompensated care in those states where these demonstration waivers are granted.

On December 14, 2018, a Texas Federal District Court deemed the Legislation to be unconstitutional in its entirety. The Court concluded that the Individual Mandate is no longer permissible under Congress’s taxing power as a result of the Tax Cut and Jobs Act of 2017 (“TCJA”) reducing the individual mandate’s tax to \$0 (i.e., it no longer produces revenue, which is an essential feature of a tax), rendering the Legislation unconstitutional. The Court also held that because the individual mandate is “essential” to the Legislation and is inseparable from the rest of the law, the entire Legislation is unconstitutional. That ruling was ultimately appealed to the United States Supreme Court, which decided in *California v. Texas* that the plaintiffs in the matter lacked standing to bring their constitutionality claims. The Court did not reach the plaintiffs’ merits arguments, which specifically challenged the constitutionality of the Legislation’s individual mandate and the entirety of the Legislation itself. As a result, the Legislation will continue to be law, and HHS and its respective agencies will continue to enforce regulations implementing the law. However, on September 7, 2022, the Legislation faced its most recent challenge when a Texas Federal District Court judge, in the case of *Braidwood Management v. Becerra*, ruled that a requirement that certain health plans cover services without cost sharing violates the Appointments Clause of the U.S. Constitution and that the coverage of certain HIV prevention medication violates the Religious Freedom Restoration Act. The government has appealed the decision to the U.S. Circuit Court of Appeals for the Fifth Circuit.

The Legislation also contained provisions aimed at reducing fraud and abuse in healthcare. The Legislation amends several existing laws, including the federal Anti-Kickback Statute and the False Claims Act, making it easier for government agencies and private plaintiffs to prevail in lawsuits brought against healthcare providers. While Congress had previously revised the intent requirement of the Anti-Kickback Statute to provide that a person is not required to “have actual knowledge or specific intent to commit a violation of” the Anti-Kickback Statute in order to be found in violation of such law, the Legislation also provides that any claims for items or services that violate the Anti-Kickback Statute are also considered false claims for purposes of the federal civil False Claims Act. The Legislation provides that a healthcare provider that retains an overpayment in excess of 60 days is subject to the federal civil False Claims Act. In December, 2022, CMS proposed to change the standard for identification of an overpayment and would require the report and return of an overpayment if a provider or supplier has actual knowledge of the existence of an overpayment or acts in reckless disregard or deliberate ignorance of an overpayment. The Legislation also expands the Recovery Audit Contractor program to Medicaid. These amendments also make it easier for severe fines and penalties to be imposed on healthcare providers that violate applicable laws and regulations.

We have partnered with local physicians in the ownership of certain of our facilities. These investments have been permitted under an exception to the physician self-referral law. The Legislation permits existing physician investments in a hospital to continue under a “grandfather” clause if the arrangement satisfies certain requirements and restrictions, but physicians are prohibited from

increasing the aggregate percentage of their ownership in the hospital. The Legislation also imposes certain compliance and disclosure requirements upon existing physician-owned hospitals and restricts the ability of physician-owned hospitals to expand the capacity of their facilities. As discussed below, should the Legislation be repealed in its entirety, this aspect of the Legislation would also be repealed restoring physician ownership of hospitals and expansion right to its position and practice as it existed prior to the Legislation.

In addition to legislative changes, the Legislation can be significantly impacted by executive branch actions. President Biden has taken executive actions that will strengthen the Legislation and may reverse the policies of the prior administration. To date, the Biden administration has issued executive orders implementing a special enrollment period permitting individuals to enroll in health plans outside of the annual open enrollment period and reexamining policies that may undermine the ACA or the Medicaid program. The American Rescue Plan Act of 2021's expansion of subsidies to purchase coverage through an exchange contributed to increased exchange enrollment in 2021. The IRA's extension of the subsidies through 2025 is expected to increase exchange enrollment in future years. The recent and on-going COVID-19 pandemic and related U.S. National Emergency declaration may significantly increase the number of uninsured patients treated at our facilities extending beyond the most recent CBO published estimates due to increased unemployment and loss of group health plan health insurance coverage. It is also anticipated that these policies may create additional cost and reimbursement pressures on hospitals.

It remains unclear what portions of the Legislation may remain, or whether any replacement or alternative programs may be created by any future legislation. Any such future repeal or replacement may have significant impact on the reimbursement for healthcare services generally, and may create reimbursement for services competing with the services offered by our hospitals. Accordingly, there can be no assurance that the adoption of any future federal or state healthcare reform legislation will not have a negative financial impact on our hospitals, including their ability to compete with alternative healthcare services funded by such potential legislation, or for our hospitals to receive payment for services.

For additional disclosure related to our revenues including a disaggregation of our consolidated net revenues by major source for each of the periods presented herein, please see *Note 10 to the Consolidated Financial Statements-Revenue*.

Medicare: Medicare is a federal program that provides certain hospital and medical insurance benefits to persons aged 65 and over, some disabled persons and persons with end-stage renal disease. All of our acute care hospitals and many of our behavioral health centers are certified as providers of Medicare services by the appropriate governmental authorities. Amounts received under the Medicare program are generally significantly less than a hospital's customary charges for services provided. Since a substantial portion of our revenues will come from patients under the Medicare program, our ability to operate our business successfully in the future will depend in large measure on our ability to adapt to changes in this program.

Under the Medicare program, for inpatient services, our general acute care hospitals receive reimbursement under the inpatient prospective payment system ("IPPS"). Under the IPPS, hospitals are paid a predetermined fixed payment amount for each hospital discharge. The fixed payment amount is based upon each patient's Medicare severity diagnosis related group ("MS-DRG"). Every MS-DRG is assigned a payment rate based upon the estimated intensity of hospital resources necessary to treat the average patient with that particular diagnosis. The MS-DRG payment rates are based upon historical national average costs and do not consider the actual costs incurred by a hospital in providing care. This MS-DRG assignment also affects the predetermined capital rate paid with each MS-DRG. The MS-DRG and capital payment rates are adjusted annually by the predetermined geographic adjustment factor for the geographic region in which a particular hospital is located and are weighted based upon a statistically normal distribution of severity. While we generally will not receive payment from Medicare for inpatient services, other than the MS-DRG payment, a hospital may qualify for an "outlier" payment if a particular patient's treatment costs are extraordinarily high and exceed a specified threshold. MS-DRG rates are adjusted by an update factor each federal fiscal year, which begins on October 1. The index used to adjust the MS-DRG rates, known as the "hospital market basket index," gives consideration to the inflation experienced by hospitals in purchasing goods and services. Generally, however, the percentage increases in the MS-DRG payments have been lower than the projected increase in the cost of goods and services purchased by hospitals.

In August, 2023, CMS published its IPPS 2024 final payment rule which provides for a 3.1% market basket increase to the base Medicare MS-DRG blended rate. When statutorily mandated budget neutrality factors, annual geographic wage index updates (including a change in the Medicare Rural Floor calculation), documenting and coding adjustments, and adjustments mandated by the Legislation are considered, without consideration for the required Medicare DSH payments changes and increase to the Medicare Outlier threshold, the overall increase in IPPS payments is approximately 6.6%. Including DSH payments, an increase to the Medicare Outlier threshold and certain other adjustments, we estimate our overall increase from the final IPPS 2024 rule (covering the period of October 1, 2023 through September 30, 2024) will approximate 5.4%.

In August, 2022, CMS published its IPPS 2023 final payment rule which provides for a 4.1% market basket increase to the base Medicare MS-DRG blended rate. When statutorily mandated budget neutrality factors, annual geographic wage index updates, documenting and coding adjustments, and adjustments mandated by the Legislation are considered, without consideration for the required Medicare DSH payments changes and increase to the Medicare Outlier threshold, the overall increase in IPPS payments is approximately 4.6%. Including DSH payments, an increase to the Medicare Outlier threshold and certain other adjustments, we estimate our overall increase from the final IPPS 2023 rule (covering the period of October 1, 2022 through September 30, 2023) will

approximate 4.4%. This projected impact from the IPPS 2023 final rule includes an increase of approximately 0.5% to partially restore cuts made as a result of the American Taxpayer Relief Act of 2012 (“ATRA”), as required by the 21st Century Cures Act, but excludes the impact of the sequestration reductions related to the 2011 Act, Bipartisan Budget Act of 2015, and Bipartisan Budget Act of 2018.

In June, 2019, the Supreme Court of the United States issued a decision favorable to hospitals impacting prior year Medicare DSH payments (*Azar v. Allina Health Services*, No. 17-1484 (U.S. Jun. 3, 2019)). In *Allina*, the hospitals challenged the Medicare DSH adjustments for federal fiscal year 2012, specifically challenging CMS’s decision to include inpatient hospital days attributable to Medicare Part C enrollee patients in the numerator and denominator of the Medicare/SSI fraction used to calculate a hospital’s DSH payments. This ruling addresses CMS’s attempts to impose the policy espoused in its vacated 2004 rulemaking to a fiscal year in the 2004–2013 time period without using notice-and-comment rulemaking. This decision should require CMS to recalculate hospitals’ DSH Medicare/SSI fractions, with Medicare Part C days excluded, for at least federal fiscal year 2012, but likely federal fiscal years 2005 through 2013. In August, 2020, CMS issued a rule that proposed to retroactively negate the effects of the aforementioned Supreme Court decision, which rule has yet to be finalized. Although we can provide no assurance that we will ultimately receive additional funds, we estimate that the favorable impact of this court ruling on certain prior year hospital Medicare DSH payments could range between \$18 million to \$28 million in the aggregate.

The 2011 Act included the imposition of annual spending limits for most federal agencies and programs aimed at reducing budget deficits by \$917 billion between 2012 and 2021, according to a report released by the Congressional Budget Office. Among its other provisions, the law established a bipartisan Congressional committee, known as the Joint Committee, which was responsible for developing recommendations aimed at reducing future federal budget deficits by an additional \$1.5 trillion over 10 years. The Joint Committee was unable to reach an agreement by the November 23, 2011 deadline and, as a result, across-the-board cuts to discretionary, national defense and Medicare spending were implemented on March 1, 2013 resulting in Medicare payment reductions of up to 2% per fiscal year. Subsequent legislation has extended this sequestration through 2032. The CARES Act, as amended, temporarily suspended or limited the application of this sequestration from May 1, 2020 through June 30, 2022, with a return to the full 2% Medicare payment reduction thereafter.

Inpatient services furnished by psychiatric hospitals under the Medicare program are paid under a Psychiatric Prospective Payment System (“Psych PPS”). Medicare payments to psychiatric hospitals are based on a prospective per diem rate with adjustments to account for certain facility and patient characteristics. The Psych PPS also contains provisions for outlier payments and an adjustment to a psychiatric hospital’s base payment if it maintains a full-service emergency department.

In July, 2023, CMS published its Psych PPS final rule for the federal fiscal year 2024. Under this final rule, payments to our behavioral health care hospitals and units are estimated to increase by 3.3% compared to federal fiscal year 2023. This amount includes the effect of the 3.5% net market basket update which reflects the offset of a 0.2% productivity adjustment.

In July, 2022, CMS published its Psych PPS final rule for the federal fiscal year 2023. Under this final rule, payments to our behavioral health care hospitals and units are estimated to increase by 3.8% compared to federal fiscal year 2022. This amount includes the effect of the 4.1% net market basket update which reflects the offset of a 0.3% productivity adjustment.

On November 2, 2023, in light of the Supreme Court’s decision in *American Hospital Association v. Becerra* (142 S. Ct. 1896 (2022)) and the district court’s remand to the agency, CMS issued a final rule outlining the remedy for the 340B-acquired drug payment policy for calendar years 2018-2022. CMS published the final rule to remedy the payment rates the Court held were invalid aspects of their past policy and will affect nearly all hospitals paid under the OPPS. As part of the final remedy, CMS will make an adjustment to the update factor to maintain budget neutrality as required by statute. CMS finalized the 340B policy for calendar year 2018 in 2017 in a budget neutral manner that included increasing payments for non-drug items and services; this payment increase was in effect from calendar years 2018 through 2022. CMS estimates that hospitals were paid \$7.8 billion more for non-drug items and services during this time period than they would have been paid in the absence of the 340B payment policy. Because CMS is now making additional payments to affected 340B covered entity hospitals to pay them what they would have been paid had the 340B policy never been implemented, CMS will make a corresponding offset to maintain budget neutrality as if the 340B payment policy had never been in effect. To carry out this required \$7.8 billion budget neutrality adjustment, CMS will reduce future non-drug item and service payments by adjusting the OPPS conversion factor by minus 0.5% starting in calendar year 2026 and continuing for 16 years. The impact of this 0.5% reduction on our 2026 results of operations is approximately \$4 million.

In November, 2023, CMS issued its OPPS final rule for 2024. The hospital market basket increase is 3.3% and the productivity adjustment reduction is 0.2% for a net market basket increase of 3.1%. When other statutorily required adjustments and hospital patient service mix are considered, we estimate that our overall Medicare OPPS update for 2024 will aggregate to a net increase of 9.7%. This percentage reflects the impact resulting from rural floor changes to the Medicare wage index adjustment factor where certain states, such as California and Nevada, will materially benefit from this change.

In November, 2022, CMS issued its OPPS final rule for 2023. The hospital market basket increase is 4.1% and the productivity adjustment reduction is -0.3% for a net market basket increase of 3.8%. The final rule provides that in light of the Supreme Court decision in *American Hospital Association v. Becerra*, CMS is applying the default rate, generally average sales price plus 6%, to

340B acquired drugs and biologicals for 2023. CMS stated they will address the remedy for 340B drug payments from 2018-2022 in future rulemaking prior to the CY 2024 OPPTS/ASC proposed rule. During the 2018-2022 time period, we recorded an aggregate of approximately \$45 million to \$50 million of Medicare revenues related to the prior 340B payment policy. When other statutorily required adjustments and hospital patient service mix are considered as well as impact of the aforementioned 340B Program policy change, we estimate that our overall Medicare OPPTS update for 2023 will aggregate to a net increase of 0.9% which includes a 0.3% increase to behavioral health division partial hospitalization rates.

On November 2, 2021, CMS issued its OPPTS final rule for 2022. The hospital market basket increase is 2.7% and the productivity adjustment reduction is -0.7% for a net market basket increase of 2.0%. When other statutorily required adjustments and hospital patient service mix are considered, we estimate that our overall Medicare OPPTS update for 2022 will aggregate to a net increase of 2.4% which includes a 3.0% increase to behavioral health division partial hospitalization rates.

In November, 2019, CMS finalized its Hospital Price Transparency rule that implements certain requirements under the June 24, 2019 Presidential Executive Order related to Improving Price and Quality Transparency in American Healthcare to Put Patients First. Under this final rule, effective January 1, 2021, CMS will require: (1) hospitals make public their standard charges (both gross charges and payer-specific negotiated charges) for all items and services online in a machine-readable format, and; (2) hospitals to make public standard charge data for a limited set of “shoppable services” the hospital provides in a form and manner that is more consumer friendly. On November 2, 2021, CMS released a final rule increasing the monetary penalty that CMS can impose on hospitals that fail to comply with the price transparency requirements. We believe that our hospitals are in full compliance with the applicable federal regulations. In July, 2023, CMS proposed multiple provisions, effective as of January 1, 2024, focused on increasing hospital price transparency and compliance enforcement including but not limited to: (1) standard charges data would be posted online using a CMS template, instead of using the hospital’s own form/format; (2) all standard charge information would be encoded with a specified set of data elements (e.g., hospital name; license number; payer/plan name; description of service; billing codes, among others); (3) other technical changes related to increasing consumers’ automated accessibility to hospital standard charges, and; (4) certifications regarding accuracy of standard charge data and related compliance warning notices from CMS and requiring accessibility to health system leadership regarding transparency noncompliance.

In July, 2023, the Departments of Labor, Health and Human Services and the Treasury announced proposed rules that would:

- Mandate that insurers analyze the outcomes of their coverage to ensure there's equivalent access to mental health care, including provider networks, prior authorization rates and payment for out-of-network providers, and take action to get in compliance;
- Establish when health plans can't use prior authorization or other tactics to make it more difficult to access mental health and substance use treatment;
- Require additional insurers to comply with the 2008 Mental Health Parity and Addiction Equity Act.

While these proposed rules, if adopted, would likely improve patient access to inpatient and outpatient mental health services, we are unable to estimate the related potential impact on our results of operations.

Medicaid: Medicaid is a joint federal-state funded health care benefit program that is administered by the states to provide benefits to qualifying individuals. Most state Medicaid payments are made under a PPS-like system, or under programs that negotiate payment levels with individual hospitals. Amounts received under the Medicaid program are generally significantly less than a hospital’s customary charges for services provided. In addition to revenues received pursuant to the Medicare program, we receive a large portion of our revenues either directly from Medicaid programs or from managed care companies managing Medicaid. All of our acute care hospitals and most of our behavioral health centers are certified as providers of Medicaid services by the appropriate governmental authorities.

We receive revenues from various state and county-based programs, including Medicaid in all the states in which we operate. We receive annual Medicaid revenues of approximately \$100 million, or greater, from each of Texas, California, Nevada, Illinois, Pennsylvania, Washington, D.C., Kentucky, Florida, Massachusetts and Virginia. We also receive Medicaid disproportionate share hospital payments in certain states including, most significantly, Texas. We are therefore particularly sensitive to potential reductions in Medicaid and other state-based revenue programs as well as regulatory, economic, environmental and competitive changes in those states. We can provide no assurance that reductions to revenues earned pursuant to these programs, particularly in the above-mentioned states, will not have a material adverse effect on our future results of operations.

The Legislation substantially increases the federally and state-funded Medicaid insurance program, and authorizes states to establish federally subsidized non-Medicaid health plans for low-income residents not eligible for Medicaid starting in 2014. However, the Supreme Court has struck down portions of the Legislation requiring states to expand their Medicaid programs in exchange for increased federal funding. Accordingly, many states in which we operate have not expanded Medicaid coverage to individuals at 133% of the federal poverty level. Facilities in states not opting to expand Medicaid coverage under the Legislation may be additionally penalized by corresponding reductions to Medicaid disproportionate share hospital payments beginning in fiscal year 2024, as discussed below. We can provide no assurance that further reductions to Medicaid revenues, particularly in the above-mentioned states, will not have a material adverse effect on our future results of operations.

In January, 2020, CMS announced a new opportunity to support states with greater flexibility to improve the health of their Medicaid populations. The new 1115 Waiver Block Grant Type Demonstration program, titled Healthy Adult Opportunity (“HAO”), emphasizes the concept of value-based care while granting states extensive flexibility to administer and design their programs within a defined budget. CMS believes this state opportunity will enhance the Medicaid program’s integrity through its focus on accountability for results and quality improvement, making the Medicaid program stronger for states and beneficiaries. The Biden administration has signaled its intent to withdraw the HAO demonstration and it has not been implemented in any states. Accordingly, we are unable to predict whether the HAO demonstration will impact our future results of operations.

Summary of Various State Medicaid Supplemental Payment Programs:

The following table summarizes the revenues, healthcare provider taxes (“Provider Taxes”) and net benefit related to each of the above-mentioned Medicaid supplemental programs for the years ended December 31, 2023 and 2022. The Provider Taxes are recorded in other operating expenses on the consolidated statements of income as included herein.

	(amounts in millions)		
	Estimated 2024	2023	2022
<u>Texas Supplemental Payment Programs:</u>			
Revenues	\$ 300	\$ 247	\$ 285
Provider Taxes	(120)	(82)	(110)
Net benefit	<u>\$ 180</u>	<u>\$ 165</u>	<u>\$ 175</u>
<u>Nevada SDP:</u>			
Revenues	\$ 265	\$ 13	\$ 0
Provider Taxes	(107)	(4)	0
Net benefit	<u>\$ 158</u>	<u>\$ 9</u>	<u>\$ 0</u>
<u>Various Other State Programs:</u>			
Revenues	\$ 662	\$ 593	\$ 499
Provider Taxes	(246)	(211)	(177)
Net benefit	<u>\$ 416</u>	<u>\$ 382</u>	<u>\$ 322</u>
<u>Subtotal-Provider Tax Programs:</u>			
Revenues	\$ 1,227	\$ 853	\$ 784
Provider Taxes	(473)	(297)	(287)
Aggregate net benefit from Provider Tax Programs	<u>\$ 754</u>	<u>\$ 556</u>	<u>\$ 497</u>
<u>Texas, Nevada and South Carolina DSH/SPA Programs:</u>			
Revenues	\$ 55	\$ 73	\$ 75
Provider Taxes	0	0	0
Net benefit	<u>\$ 55</u>	<u>\$ 73</u>	<u>\$ 75</u>
<u>Total Supplemental Medicaid Programs:</u>			
Revenues	\$ 1,282	\$ 926	\$ 859
Provider Taxes	(473)	(297)	(287)
Aggregate net benefit from all Supplemental Programs	<u>\$ 809</u>	<u>\$ 629</u>	<u>\$ 572</u>

Texas Supplemental Payment Programs:

Certain of our acute care hospitals located in various counties of Texas participate in Medicaid supplemental payment Section 1115 Waiver indigent care programs. The 1115 Waiver has been approved by CMS through September 30, 2030. These hospitals also have affiliation agreements with third-party hospitals to provide free hospital and physician care to qualifying indigent residents of these counties. Our hospitals receive both supplemental payments from the Medicaid program and indigent care payments from third-party, affiliated hospitals. The supplemental payments are contingent on the county or hospital district making an Inter-Governmental Transfer (“IGT”) to the state Medicaid program while the indigent care payment is contingent on a transfer of funds from the applicable affiliated hospitals. However, the county or hospital district is prohibited from entering into an agreement to condition any IGT on the amount of any private hospital’s indigent care obligation.

CHIRP (including QIF)

On March 26, 2021, THHSC published a final rule that will apply to program periods on or after September 1, 2021, and Uniform Hospital Rate Increase Program (“UHRIP”) was re-named the Comprehensive Hospital Increase Reimbursement Program (“CHIRP”). CHIRP will be comprised of a UHRIP component and an Average Commercial Incentive Award component. CHIRP has

a pool size of \$4.7 billion. On March 25, 2022, CMS approved the CHIRP program retroactive to September 1, 2021 through August 31, 2022. The impact of the CHIRP program is reflected in the State Medicaid Supplemental Payment Program Table below including approximately \$12 million of estimated CHIRP revenues which were recorded during the first quarter of 2022, attributable to the period September 1, 2021 through December 31, 2021, net of associated provider taxes. On August 1, 2022, CMS approved the CHIRP program, with a pool of \$5.2 billion, for the rate period effective September 1, 2022 to August 31, 2023. On July 31, 2023, CMS approved the CHIRP program, with a pool of \$6.5 billion, for the rate period of September 1, 2023 to August 31, 2024.

On January 26, 2024, THHSC issued a final rule that will modify the CHIRP payments beginning with the State Fiscal Year (SFY) 2025 rate period to promote the advancement of the quality goals and strategies the program is designed to advance.

The final modifications include:

- Creation of a new a pay-for-performance incentive payment through a third component in CHIRP, the Alternate Participating Hospital Reimbursement for Improving Quality Award ("APHRIQA"). For state fiscal years beginning with SFY 2025, THHSC does not anticipate that behavioral health hospitals or rural hospitals will be included in a pay-for-performance program.
- The funds for payment of the APHRIQA component will be transitioned from the existing uniform rate increase components of the UHRIP and the Average Commercial Incentive Award and will be paid using a scorecard that directs managed care organizations to pay providers for performance achievements on quality outcome measures. Payments will be distributed under APHRIQA on a monthly, quarterly, semi-annual, or annual basis that aligns with the measurement period determined for quality metrics reporting.

We cannot determine the impact of this final rule. However, CHIRP payment levels could be reduced materially if: (1) the pool size of the new APHRIQA component is materially less than THHSC carve-out of the current CHIRP pool, or; (2) if our hospitals are not able meet the required APHRIQA pay-for-performance metrics.

Certain of our acute care hospitals located in Texas recorded an aggregate of \$33 million in Quality Incentive Fund ("QIF") revenues during each of 2023 and 2022. The amounts recorded during 2023 were applicable to the period of September 1, 2021 to August 31, 2022; and the amounts recorded during 2022 were applicable to the period of September 1, 2020 to August 31, 2021. This revenue was earned pursuant to contract terms with various Medicaid managed care plans which requires the annual payout of QIF funds when a managed care service delivery area's actual claims-based CHIRP payments are less than targeted CHIRP payments for a specific rate year. We also anticipate these hospitals may be entitled to a comparable amount of aggregate QIF revenue during 2024.

UC

Included in these provider pax programs are reimbursements received in connection with the Texas Uncompensated Care program ("UC"). The size and distribution of the UC pool are determined based on charity care costs reported to THHSC in accordance with Medicare cost report Worksheet S-10 principles.

HARP

On September 24, 2021, THHSC finalized New Fee-for-Service Supplemental Payment Program: Hospital Augmented Reimbursement Program ("HARP") to be effective October 1, 2021. The HARP program continues the financial transition for providers who have historically participated in the Delivery System Reform Incentive Payment program described below. The program, which was approved by CMS on August 15, 2023, will provide additional funding to hospitals to help offset the cost hospitals incur while providing Medicaid services. Included in our results of operations during 2023 was approximately \$20 million, approximately \$13 million of which is applicable to the period of October 1, 2021 through September 30, 2022. During 2024, we expect to record HARP revenues of approximately \$28 million. The HARP program is technically a Medicaid Upper Payment Limit as payment under this program is based on a reasonable estimate of the amount that would be paid for the services under Medicare payment principles but is referred to as HARP by THHSC.

DSRIP

In addition, the Texas Medicaid Section 1115 Waiver included a Delivery System Reform Incentive Payments ("DSRIP") pool to incentivize hospitals and other providers to transform their service delivery practices to improve quality, health status, patient experience, coordination, and cost-effectiveness. DSRIP pool payments are incentive payments to hospitals and other providers that develop programs or strategies to enhance access to health care, increase the quality of care, the cost-effectiveness of care provided and the health of the patients and families served. In FFY 2022, DSRIP funding under the waiver is eliminated except for certain carryover DSRIP projects. No revenues were recorded by us during 2023 in connection with this DSRIP program. Included in our results of operations during 2022, was approximately \$18 million of DSRIP revenues.

Nevada State Directed Payment Program ("SDP"):

As previously reported, in February, 2023, the Nevada Division of Health Care Financing and Policy ("DHCFP") outlined a new provider fee on private hospitals located in Nevada that would effectively capture new Medicaid federal share for certain categories of services eligible for the new payment program. In late December, 2023, the Centers for Medicare and Medicaid Services ("CMS") approved the Medicaid managed care component of the Nevada SDP program, with an effective date of January 1, 2024. Based upon financial data provided by the DHCFP for our facilities located in Nevada, we estimate that our aggregate net

reimbursements pursuant to the Medicaid managed care component of the Nevada SDP program (net of related provider taxes) will approximate \$140 million during the year ended December 31, 2024. Payments made pursuant to this component of the Nevada SDP program, which requires annual approval by CMS, are subject to reconciliation by DHCFP based on actual Medicaid managed care utilization during 2024. There can be no assurance that the Medicaid managed care component of the Nevada SDP will continue for any period after December 31, 2024, or that it will not be modified.

Including the impact of the Medicaid fee for service upper payment limit component of the Nevada SDP program (estimated net reimbursements of \$18 million attributable to our Nevada facilities during the year ended December 31, 2024), which was approved by CMS in November and December of 2023, we estimate that our aggregate net reimbursements pursuant to both components of the Nevada SDP program (net of related provider taxes) will approximate \$158 million during the year ended December 31, 2024.

Various Other State Programs:

We receive substantial reimbursement from multiple states in connection with various supplemental Medicaid payment programs. The states include, but are not limited to, the state programs listed below from which we receive significant reimbursements.

Kentucky Hospital Rate Increase Program (“HRIP”):

In early 2021, CMS approved the Kentucky Medicaid Managed Care Hospital Rate Increase Program (“HRIP”). Included in our financial results was approximately \$73 million during 2023 and approximately \$69 million during 2022. Programs such as HRIP require an annual state submission and approval by CMS. In January, 2024, CMS approved the program for the period of January 1, 2024 through December 31, 2024 at rates comparable to the prior year. We estimate that our reimbursements pursuant to HRIP will approximate \$71 million during the year ended December 31, 2024.

California SPA:

In California, the state continues to operate Medicaid supplemental payment programs consisting of three components: Fee For Service Payment, Managed Care-Pass-Through Payment and Managed Care-Directed Payment. The non-federal share for these programs are financed by a statewide provider tax. The Directed Payment method will be based on actual concurrent hospital Medicaid managed care in-network patient volume whereas the other programs are based on prior year Medicaid utilization. The CMS program approval status is outlined in the table below.

California Hospital Fee Program CMS Approval Status:

Hospital Fee Program Component	CMS Methodology Approval Status	CMS Rate Setting Approval Status
Fee For Service Payment	Approved through December 31, 2024	Approved through December 31, 2024; Paid through December 31, 2022
Managed Care-Pass-Through Payment	Approved through December 31, 2022	Approved through December 31, 2021 and paid in advance through December 31, 2022
Managed Care-Directed Payment	Approved through December 31, 2022	Approved through December 31, 2021 and paid through December 31, 2021

In connection with this program, included in our financial results was approximately \$46 million during 2023 and approximately \$50 million during 2022. We estimate that our reimbursements pursuant to this program will approximate \$51 million during the year ended December 31, 2024.

Mississippi Hospital Access Program

In September, 2023, subject to CMS approval, Mississippi announced a \$689 million, two-part Medicaid payment proposal, effective retroactively to July 1, 2023, that would be funded by annual hospital assessments to the state's Medicaid program. These hospital assessments are calculated using a formula provided under state law. The first part of the proposal, known as the Mississippi Hospital Access Program (“MHAP”), would provide direct payments for hospitals that serve patients in the state's Medicaid managed care delivery system. Hospitals would be reimbursed near the average commercial rate, which is the upper limit for Medicaid managed care reimbursements. The second part of the proposal would supplement Medicaid payment rates for hospitals providing inpatient and outpatient services up to Medicaid's regulated upper payment limit. In December, 2023, CMS approved the MHAP program component.

In connection with this new program and the prior program, included in our financial results was approximately \$33 million during 2023 and \$16 million during 2022. We estimate that our reimbursements pursuant to these supplemental payment programs will approximate \$45 million during the year ended December 31, 2024.

Florida Medicaid Managed Care Directed Payment Program (“DPP”):

The Florida DPP provides for an additional payment for Medicaid managed care contracted services. In connection with this program, included in our financial results was approximately \$43 million during 2023 and \$36 million during 2022 (recorded during fourth quarters of each year). We estimate that our reimbursements pursuant to this DPP will approximate \$41 million during the year ended December 31, 2024.

Illinois Medicaid Supplemental Payment Programs

The Illinois Medicaid Supplemental Payment Programs are comprised of three components: (1) Medicaid managed care directed payment program; (2) Medicaid managed care pass-through program, and; (3) Medicaid fee for service supplemental payment program. These programs require various related legislative and regulatory approvals each year.

In connection with these programs, included in our financial results was approximately \$36 million during 2023 and \$49 million during 2022. Included in the 2022 amount was a non-recurring Medicaid managed care claims processing catchup payment amounting to approximately \$10 million. We estimate that our reimbursements pursuant to these supplemental payment programs will approximate \$38 million during the year ended December 31, 2024.

Indiana Medicaid Managed Care DPP

The Indiana DPP provides for an additional payment for Medicaid managed care contracted services. In connection with this program, included in our financial results was approximately \$31 million during 2023 and \$27 million during 2022. We estimate that our reimbursements pursuant to this program will approximate \$34 million during the year ended December 31, 2024.

Oklahoma (Transition to Managed Care and Implementation of a Medicaid Managed Care DPP)

The current Oklahoma Medicaid supplemental payment program in effect, prior to the planned implementation of the new DPP in 2024, is the Supplemental Hospital Offset Payment Program (“SHOPP”). The SHOPP component will remain in place for certain categories of Medicaid patients that will continue to be enrolled in the traditional Medicaid Fee for Service program.

In May, 2022, Oklahoma enacted legislation that directs the Oklahoma Health Care Authority (“OHCA”) to: (i) transition its Medicaid program from a fee for service payment model to a managed care payment model by no later than October 1, 2023, and; (ii) concurrently implement a Medicaid managed care DPP using a managed care gap of 90% of average commercial rates. In December, 2022, the OHCA delayed the implementation date of the Medicaid managed care change and related DPP until April 1, 2024. In September, 2023, CMS approved the DPP program effective as of April 1, 2024.

In connection with the SHOPP program, included in our financial results was approximately \$12 million during 2023 and \$9 million during 2022. We estimate that our reimbursements pursuant to these two supplemental payment programs (i.e. SHOPP and DPP) will approximate \$21 million during the year ended December 31, 2024.

South Carolina Health Access, Workforce and Quality (“HAWQ”) Program

In September 2023, CMS approved the South Carolina HAWQ Program retroactive to July 1, 2023. This program is Medicaid managed care directed payment program that provides for a rate enhancement to Medicaid managed care encounters. In connection with this new program and the prior program, included in our financial results was approximately \$11 million during 2023. We estimate that our reimbursements pursuant to these supplemental payment programs will approximate \$21 million during the year ended December 31, 2024.

Texas, Nevada and South Carolina DSH/Other Programs:

Texas DSH:

Upon meeting certain conditions and serving a disproportionately high share of Texas’ low income patients, our qualifying facilities located in Texas receive additional reimbursement from the state’s DSH fund. The Texas DSH program was renewed for the state’s 2024 DSH fiscal year (covering the period of October 1, 2023 through September 30, 2024).

In connection with this DSH program, included in our financial results was an aggregate of approximately \$47 million and \$48 million during 2023 and 2022, respectively. We estimate that our aggregate reimbursements earned pursuant to the Texas DSH program will approximate \$34 million during 2024.

The Legislation and subsequent federal legislation provides for a significant reduction in Medicaid disproportionate share payments beginning in federal fiscal year 2024 (see above in *Sources of Revenues and Health Care Reform-Medicaid* for additional disclosure related to the delay of these DSH reductions). HHS is to determine the amount of Medicaid DSH payment cuts imposed on each state based on a defined methodology. As Medicaid DSH payments to states will be cut, consequently, payments to Medicaid-participating providers, including our hospitals in Texas, will be reduced in the coming years. Based on the CMS final rule published in September, 2019, beginning in fiscal year 2024 (as amended by the CARES Act and the CAA), annual Medicaid DSH payments in Texas could be reduced by approximately 41% from current DSH payment levels. A series of federal continuing resolutions (“CR”) were passed by the federal government which provided for ongoing federal funding.

We continue to maintain reserves in the financial statements for cumulative Medicaid DSH and UC reimbursements related to our behavioral health hospitals located in Texas that amounted to \$31 million as of December 31, 2023 and \$42 million as of December 31, 2022 related to certain DSH and UC adverse federal court decisions including the *Children's Hospital Association of Texas v. Azar* ("CHAT").

Nevada State Plan Amendment ("SPA")

CMS initially approved an SPA in Nevada in August, 2014 and this SPA has been approved for additional state fiscal years, including the 2023 fiscal year covering the period of July 1, 2022 through June 30, 2023. CMS approval for the 2024 fiscal year, which is still pending, is expected to occur.

In connection with this program, included in our financial results was approximately \$25 million and \$21 million during 2023 and 2022, respectively. We estimate that our reimbursements pursuant to this program will approximate \$21 million during 2024.

South Carolina DSH:

One of our facilities located in South Carolina received additional reimbursement from the state's DSH fund. However, the South Carolina HAWQ Program, as described above, ended our DSH payment eligibility in the South Carolina DSH program during 2023. In connection with this DSH program, included in our financial results was approximately \$6 million during 2022.

Future changes to these terms and conditions could materially reduce our net benefit derived from the programs which could have a material adverse impact on our future consolidated results of operations. In addition, Provider Taxes are governed by both federal and state laws and are subject to future legislative changes that, if reduced from current rates in several states, could have a material adverse impact on our future consolidated results of operations. As described below in *2019 Novel Coronavirus Disease Medicare and Medicaid Payment Related Legislation*, a 6.2% increase to the Medicaid Federal Matching Assistance Percentage ("FMAP") was included in the Families First Coronavirus Response Act. The Consolidated Appropriations Act of 2023 ("CAA of 2023") provided for the transitional reduction of the 6.2% enhanced FMAP during 2023 to 5.0% during the second quarter, 2.5% during the third quarter and 1.5% during the fourth quarter of 2023. The impact of the enhanced FMAP Medicaid supplemental and DSH payments are reflected in our financial results for the years ended December 31, 2023 and 2022.

Risk Factors Related To State Supplemental Medicaid Payments:

As outlined above, we receive substantial reimbursement from multiple states in connection with various supplemental Medicaid payment programs. Failure to renew these programs beyond their scheduled termination dates, failure of the public hospitals to provide the necessary IGTs for the states' share of the DSH programs, failure of our hospitals that currently receive supplemental Medicaid revenues to qualify for future funds under these programs, or reductions in reimbursements, could cause our estimates to differ by material amounts which could have a material adverse effect on our future results of operations.

In April, 2016, CMS published its final Medicaid Managed Care Rule which explicitly permits but phases out the use of pass-through payments (including supplemental payments) by Medicaid Managed Care Organizations ("MCO") to hospitals over ten years but allows for a transition of the pass-through payments into value-based payment structures, delivery system reform initiatives or payments tied to services under a MCO contract. Since we are unable to determine the financial impact of this aspect of the final rule, we can provide no assurance that the final rule will not have a material adverse effect on our future results of operations. In November, 2020, CMS issued a final rule permitting pass-through supplemental provider payments during a time-limited period when states transition populations or services from fee-for-service Medicaid to managed care.

We receive Medicaid SDP payments from managed care organizations ("MCO's") authorized by CMS under 42 CFR §438.6 (c). Consistent with capitated rates paid by Medicaid state agencies to MCO's for managing Medicaid beneficiary lives under a risk-based arrangement, SDP program related capitated rates must also be developed by the state in accordance with actuarial soundness standards noted at 42 CFR §438.4 and non-compliance could result in a reduction to SDP payment levels.

We incur Provider Taxes imposed by states in the form of a licensing fee, assessment or other mandatory payment which are related to: (i) healthcare items or services; (ii) the provision of, or the authority to provide, the health care items or services, or; (iii) the payment for the health care items or services that are used by respective states to finance the non-federal share of SDP's (or other Medicaid supplemental payment programs). Such Provider Taxes are subject to various federal regulations that limit the scope and amount of the taxes that can be levied by states in order to secure federal matching funds as part of their respective state Medicaid supplemental payment programs. States are subject to CMS both concurrent and retrospective review for their compliance with the applicable Provider Tax regulations and related federal statute. If CMS determines Provider Taxes used by a state Medicaid program to finance the non-federal share of a SDP (or other Medicaid supplemental payment programs) are not in compliance with the applicable Provider Tax regulations and related federal statute, Company SDP payments (and other Medicaid supplemental payments) could be subject to recoupment by the respective state agency when non-compliance is determined by CMS to exist.

We believe that the SDP (and other state supplemental payment) programs are designed by each state to be in full compliance with the applicable federal regulations and federal statutes. However, we are unable to provide assurance CMS will determine on a

retroactive basis that a state's SDP (or other Medicaid supplemental payment program) design and Medicaid financing structures is in full compliance with the applicable federal regulations and federal statute(s).

On April 27, 2023, CMS released two proposed rules addressing access, quality and payment in Medicaid, Children's Health Insurance Program ("CHIP"), and Medicaid/CHIP Managed Care plans. Together, the Access NPRM and Managed Care NPRM ("Managed Care Rule") include new and updated proposed requirements for states and managed care plans that would establish consistent access standards, and a standardized approach to transparently review and assess Medicaid payment rates across states. The Managed Care Rule also proposes standards to allow enrollees to easily compare plans based on quality and access to providers through the state's website.

The Managed Care Rule proposes several new requirements related to Medicaid State Directed Payments. These proposed changes would include:

- A broader requirement that states ensure each provider receiving a state directed payment attest that it does not participate in any arrangement that holds taxpayers harmless for the cost of a tax in violation of federal requirements.
- Requiring that provider payment levels for inpatient and outpatient hospital services not exceed the average commercial rate.
- Removing unnecessary regulatory barriers to help states use state directed payments to implement value-based payment arrangements.

The Managed Care proposed rule, if implemented, could have a significant impact on the means by which states finance the non-federal share of their Medicaid programs. Under the proposal, CMS would have the ability to strike down common financing arrangements such as a provider taxes. These changes could have detrimental impacts on state Medicaid programs. If finalized as proposed, the rule could potentially force states to raise taxes or cut their Medicaid budgets. In subsequent years, it could have an unfavorable impact on Medicaid beneficiaries by likely limiting access to providers and requiring states to consider reductions to their Medicaid programs.

As disclosed herein, we receive a significant amount of Medicaid and Medicaid managed care revenue from both base payments and supplemental payments. Although we are unable to estimate the impact of the Managed Care Rule on our future results of operations, if implemented as proposed, Managed Care Rule related changes could have a material adverse impact on our future results of operations.

HITECH Act: In July 2010, HHS published final regulations implementing the health information technology ("HIT") provisions of the American Recovery and Reinvestment Act (referred to as the "HITECH Act"). The final regulation defines the "meaningful use" of Electronic Health Records ("EHR") and establishes the requirements for the Medicare and Medicaid EHR payment incentive programs. The final rule established an initial set of standards and certification criteria. The implementation period for these Medicare and Medicaid incentive payments started in federal fiscal year 2011 and can end as late as 2016 for Medicare and 2021 for the state Medicaid programs. State Medicaid program participation in this federally funded incentive program is voluntary but all of the states in which our eligible hospitals operate have chosen to participate. Our acute care hospitals qualified for these EHR incentive payments upon implementation of the EHR application assuming they meet the "meaningful use" criteria. The government's ultimate goal is to promote more effective (quality) and efficient healthcare delivery through the use of technology to reduce the total cost of healthcare for all Americans and utilizing the cost savings to expand access to the healthcare system.

All of our acute care hospitals have met the applicable meaningful use criteria. However, under the HITECH Act, hospitals must continue to meet the applicable meaningful use criteria in each fiscal year or they will be subject to a market basket update reduction in a subsequent fiscal year. Failure of our acute care hospitals to continue to meet the applicable meaningful use criteria would have an adverse effect on our future net revenues and results of operations.

In the 2019 IPPS final rule, CMS overhauled the Medicare and Medicaid EHR Incentive Program to focus on interoperability, improve flexibility, relieve burden and place emphasis on measures that require the electronic exchange of health information between providers and patients. We can provide no assurance that the changes will not have a material adverse effect on our future results of operations.

Managed Care: A significant portion of our net patient revenues are generated from managed care companies, which include health maintenance organizations, preferred provider organizations and managed Medicare (referred to as Medicare Part C or Medicare Advantage) and Medicaid programs. In general, we expect the percentage of our business from managed care programs to continue to grow. The consequent growth in managed care networks and the resulting impact of these networks on the operating results of our facilities vary among the markets in which we operate. Typically, we receive lower payments per patient from managed care payers than we do from traditional indemnity insurers, however, during the past few years we have secured price increases from many of our commercial payers including managed care companies.

Commercial Insurance: Our hospitals also provide services to individuals covered by private health care insurance. Private insurance carriers typically make direct payments to hospitals or, in some cases, reimburse their policy holders, based upon the

particular hospital's established charges and the particular coverage provided in the insurance policy. Private insurance reimbursement varies among payers and states and is generally based on contracts negotiated between the hospital and the payer.

Commercial insurers are continuing efforts to limit the payments for hospital services by adopting discounted payment mechanisms, including predetermined payment or DRG-based payment systems, for more inpatient and outpatient services. To the extent that such efforts are successful and reduce the insurers' reimbursement to hospitals and the costs of providing services to their beneficiaries, such reduced levels of reimbursement may have a negative impact on the operating results of our hospitals.

Surprise Billing Interim Final Rule: On September 30, 2021, the Department of Labor, and the Department of the Treasury, along with the Office of Personnel Management ("OPM"), released an interim final rule with comment period, entitled "Requirements Related to Surprise Billing; Part II." This rule is related to Title I (the "No Surprises Act") of Division BB of the Consolidated Appropriations Act, 2021, and establishes new protections from surprise billing and excessive cost sharing for consumers receiving health care items/services. It implements additional protections against surprise medical bills under the No Surprises Act, including provisions related to the independent dispute resolution process, good faith estimates for uninsured (or self-pay) individuals, the patient-provider dispute resolution process, and expanded rights to external review. On February 28, 2022, a district judge in the Eastern District of Texas invalidated portions of the rule governing aspects of the Independent Dispute Resolution ("IDR") process. In light of this decision, the government issued a final rule on August 19, 2022 eliminating the rebuttable presumption in favor of the qualifying payment amount ("QPA") by the IDR entity and providing additional factors the IDR entity should consider when choosing between two competing offers. CMS regulations and guidance implementing the IDR process has been subject to a significant amount of provider-initiated litigation. As a result, portions of those regulations and guidance materials have been vacated by a federal district court, causing CMS to, on several occasions, pause and resume IDR process operations, causing significant delay in the processing of claims. On October 27, 2023, HHS, the Department of Labor, the Department of the Treasury, and OPM issued a proposed rule intended to improve the functioning of the federal IDR process. Additionally, arguments made by the plaintiffs in such litigation have included allegations that CMS's regulations and guidance materials are favorable to payers. We cannot predict the impact of the proposed rule on our operations at this time.

Other Sources: Our hospitals provide services to individuals that do not have any form of health care coverage. Such patients are evaluated, at the time of service or shortly thereafter, for their ability to pay based upon federal and state poverty guidelines, qualifications for Medicaid or other state assistance programs, as well as our local hospitals' indigent and charity care policy. Patients without health care coverage who do not qualify for Medicaid or indigent care write-offs are offered substantial discounts in an effort to settle their outstanding account balances.

Health Care Reform: Listed below are the Medicare, Medicaid and other health care industry changes which have been, or are scheduled to be, implemented as a result of the Legislation.

Medicaid Federal DSH Allotment:

Although the implementation has been delayed several times, the Legislation (as amended by subsequent federal legislation) requires annual aggregate reductions in federal Medicaid DSH allotment from FFY 2024 through FFY 2027. Commencing in federal fiscal year 2024, and continuing through 2027, DSH payments are scheduled to be reduced by \$8 billion annually. The most recent CR (H.R. 2872) enacted into law on January 17, 2024, funds four appropriations bills through March 1, 2024, and eight appropriations bills through March 8, 2024. This CR also delayed the aforementioned Medicaid Disproportionate Share Hospital cuts through March 8, 2024.

Value-Based Purchasing:

There is a trend in the healthcare industry toward value-based purchasing of healthcare services. These value-based purchasing programs include both public reporting of quality data and preventable adverse events tied to the quality and efficiency of care provided by facilities. Governmental programs including Medicare and Medicaid currently require hospitals to report certain quality data to receive full reimbursement updates. In addition, Medicare does not reimburse for care related to certain preventable adverse events. Many large commercial payers currently require hospitals to report quality data, and several commercial payers do not reimburse hospitals for certain preventable adverse events.

The Legislation required HHS to implement a value-based purchasing program for inpatient hospital services which became effective on October 1, 2012. The Legislation requires HHS to reduce inpatient hospital payments for all discharges by 2% in FFY 2017 and subsequent years. HHS will pool the amount collected from these reductions to fund payments to reward hospitals that meet or exceed certain quality performance standards established by HHS. HHS will determine the amount each hospital that meets or exceeds the quality performance standards will receive from the pool of dollars created by these payment reductions. As part of the FFY 2022 IPPS final rule and FFY 2023 final rule, as discussed above, and as a result of the COVID-19 pandemic, CMS has implemented a budget neutral payment policy to fully offset the 2% VBP withhold during each of FFY 2022 and FFY 2023. In FFY 2024, as part of the FFY 2024 IPPS final rule, CMS removed the budget neutral policy that was in place in FFY 2022 and FFY 2023.

Hospital Acquired Conditions:

The Legislation prohibits the use of federal funds under the Medicaid program to reimburse providers for medical assistance provided to treat hospital acquired conditions (“HAC”). Beginning in FFY 2015, hospitals that fall into the top 25% of national risk-adjusted HAC rates for all hospitals in the previous year will receive a 1% reduction in their total Medicare payments. As part of the FFY 2023 final rule discussed above, and as a result of the on-going COVID-19 pandemic, CMS will suppress all six measures in the HAC Reduction Program for the FY 2023 program year and eliminate the HAC reduction program’s one percent payment penalty. In FFY 2024, as part of the FFY 2024 IPPS final rule, CMS eliminated the suppression of the applicable HAC measures and as a result reinstated the HAC reduction program.

Readmission Reduction Program:

In the Legislation, Congress also mandated implementation of the hospital readmission reduction program (“HRRP”). Hospitals with excessive readmissions for conditions designated by HHS will receive reduced payments for all inpatient discharges, not just discharges relating to the conditions subject to the excessive readmission standard. The HRRP currently assesses penalties on hospitals having excess readmission rates for heart failure, myocardial infarction, pneumonia, acute exacerbation of chronic obstructive pulmonary disease (“COPD”) and elective total hip arthroplasty (“THA”) and/or total knee arthroplasty (“TKA”), excluding planned readmissions, when compared to expected rates. In the fiscal year 2015 IPPS final rule, CMS added readmissions for coronary artery bypass graft (“CABG”) surgical procedures beginning in fiscal year 2017. To account for excess readmissions, an applicable hospital’s base operating DRG payment amount is adjusted for each discharge occurring during the fiscal year. Readmissions payment adjustment factors can be no more than a 3 percent reduction. As part of the FFY 2023 IPPS final rule discussed above, CMS will modify all of the condition-specific readmission measures to include an adjustment for patient history of COVID-19 for FFY 2024.

Accountable Care Organizations:

The Legislation requires HHS to establish a Medicare Shared Savings Program that promotes accountability and coordination of care through the creation of accountable care organizations (“ACOs”). The ACO program allows providers (including hospitals), physicians and other designated professionals and suppliers to voluntarily work together to invest in infrastructure and redesign delivery processes to achieve high quality and efficient delivery of services. The program is intended to produce savings as a result of improved quality and operational efficiency. ACOs that achieve quality performance standards established by HHS will be eligible to share in a portion of the amounts saved by the Medicare program. CMS is also developing and implementing more advanced ACO payment models that require ACOs to assume greater risk for attributed beneficiaries. On December 21, 2018, CMS published a final rule that, in general, requires ACO participants to take on additional risk associated with participation in the program. On April 30, 2020, CMS issued an interim final rule with comment in response to the COVID-19 national emergency permitting ACOs with current agreement periods expiring on December 31, 2020 the option to extend their existing agreement period by one year, and permitting certain ACOs to retain their participation level through 2021. It remains unclear to what extent providers will pursue federal ACO status or whether the required investment would be warranted by increased payment.

2019 Novel Coronavirus Disease Medicare and Medicaid Payment Related Legislation

In response to the growing threat of COVID-19, on March 13, 2020 a national emergency was declared. The declaration empowered the HHS Secretary to waive certain Medicare, Medicaid and CHIP program requirements and Medicare conditions of participation under Section 1135 of the Social Security Act. Having been granted this authority by HHS, CMS issued a broad range of blanket waivers, which eased certain requirements for impacted providers, including: (i) Waivers and Flexibilities for hospitals and other healthcare facilities including those for physical environment requirements and certain Emergency Medical Treatment & Labor Act provisions; (ii) Provider Enrollment Flexibilities; (iii) Flexibility and Relief for State Medicaid Programs including those under section 1135 Waivers, and; (iv) Suspension of Certain Enforcement Activities.

In addition to the national emergency declaration, various forms of legislation were enacted intended to support state and local authority responses to COVID-19 as well as provide fiscal support to businesses, individuals, financial markets, hospitals and other healthcare providers.

Some of the financial support included in the various legislative actions include:

Medicaid FMAP Enhancement

- The FMAP was increased by 6.2% retroactive to the federal fiscal quarter beginning January 1, 2020 and each subsequent federal fiscal quarter for all states and U.S. territories during the declared public health emergency through December 31, 2022, in accordance with specified conditions. The CAA of 2023, signed into law on December 29, 2022, provided for the transitional reduction of the 6.2% enhanced FMAP during 2023 to 5.0% during the second quarter, 2.5% during the third quarter and 1.5% during the fourth quarter of 2023.
- Effective April 1, 2023, the CAA of 2023 allows states to initiate Medicaid renewals, post-enrollment verifications, and redeterminations over a 12-month period for all individuals who are enrolled in such plan (or waiver) as of April 1, 2023. This activity was previously prohibited as a condition for the receipt of the enhanced FMAP during the PHE. This Medicaid enrollment related activity is likely to reduce Medicaid beneficiary enrollment. In the states in which we

operate, we cannot predict the extent to which disenrolled Medicaid beneficiaries will be able to replace their Medicaid coverage with employer-based insurance coverage or via coverage obtained through the ACA Health Insurance Exchange. We are therefore unable to estimate the impact of this Medicaid enrollment activity on our results of operations.

Public Health Emergency Declaration

- Up to its expiration on May 11, 2023, the PHE provided for certain Medicare payment provisions that were contingent on the PHE including the twenty percent (20%) Medicare add-on for inpatient hospital COVID-19 patients noted below.

Reimburse hospitals at Medicare rates for uncompensated COVID-19 care for the uninsured

- Our financial results for 2023 included no revenues recorded in connection with the COVID-19 uninsured program while our financial results for 2022 included revenues of approximately \$22 million.
- Effective March 22, 2022, HHS announced that the HRSA COVID-19 Uninsured Program and Coverage Assistance Fund is no longer accepting claims due to insufficient funding.

Medicare Sequestration Relief

- Suspension of the 2% Medicare sequestration offset for Medicare services provided from May 1, 2020 through December 31, 2021 by various legislative extensions. In December, 2021, the suspended 2% payment reduction was extended until June 30, 2022 and partially suspended at a 1% payment reduction for an additional three-month period that ended on June 30, 2022, with a return to the full 2% Medicare payment reduction thereafter.
- Our financial results for 2023 included no revenues recorded in connection with the Medicare sequestration relief program while our financial results for 2022 included revenues of approximately \$17 million.

Medicare add-on for inpatient hospital COVID-19 patients

- Increases the payment that would otherwise be made to a hospital for treating a Medicare patient admitted with COVID-19 by twenty percent (20%) for the duration of the COVID-19 public health emergency.
- Included in our financial results were revenues recorded in connection with the COVID-19 add-on program amounting to approximately \$6 million during 2023 and \$30 million during 2022. These payments were intended to offset the increased expenses associated with the treatment of Medicare COVID-19 patients.

In addition to statutory and regulatory changes to the Medicare program and each of the state Medicaid programs, our operations and reimbursement may be affected by administrative rulings, new or novel interpretations and determinations of existing laws and regulations, post-payment audits, requirements for utilization review and new governmental funding restrictions, all of which may materially increase or decrease program payments as well as affect the cost of providing services and the timing of payments to our facilities. The final determination of amounts we receive under the Medicare and Medicaid programs often takes many years, because of audits by the program representatives, providers' rights of appeal and the application of numerous technical reimbursement provisions. We believe that we have made adequate provisions for such potential adjustments. Nevertheless, until final adjustments are made, certain issues remain unresolved and previously determined allowances could become either inadequate or more than ultimately required.

Finally, we expect continued third-party efforts to aggressively manage reimbursement levels and cost controls. Reductions in reimbursement amounts received from third-party payers could have a material adverse effect on our financial position and our results.

Other Operating Results

Interest Expense

As reflected on the schedule below, interest expense was \$207 million during 2023 and \$127 million during 2022 (amounts in thousands):

	<u>2023</u>	<u>2022</u>
Revolving credit & demand notes (a.)	\$ 23,139	\$ 9,791
Tranche A term loan facility (a.)	155,673	68,782
\$800 million, 2.65% Senior Notes due 2030 (b.)	21,426	21,426
\$700 million, 1.65% Senior Notes due 2026 (c.)	11,725	11,725
\$500 million, 2.65% Senior Notes due 2032 (d.)	13,380	13,380
Accounts receivable securitization program (e.)	—	39
Subtotal - revolving credit, demand notes, Senior Notes, term loan facilities and accounts receivable securitization program	225,343	125,143
Amortization of financing fees	5,035	4,903
Other combined interest expense	1,290	5,844
Capitalized interest on major projects	(24,422)	(8,623)
Interest income	(572)	(378)
Interest expense, net	<u>\$ 206,674</u>	<u>\$ 126,889</u>

(a.) As of December 31, 2023, our credit agreement dated November 15, 2010, as amended, provided for the following:

- a \$1.2 billion aggregate amount revolving credit facility that is scheduled to mature in August, 2026 (which, as of December 31, 2023, had \$701 million of aggregate available borrowing capacity net of \$496 million of outstanding borrowings and \$3 million of letters of credit), and;
- a tranche A term loan facility with \$2.26 billion of outstanding borrowings as of December 31, 2023 (including the \$700 million increase that occurred in June, 2022).

(b.) In September, 2020, we completed the offering of \$800 million aggregate principal amount of 2.65% Senior Notes due in 2030.

(c.) In August, 2021, we completed the offering of \$700 million aggregate principal amount of 1.65% Senior Notes due in 2026.

(d.) In August, 2021, we completed the offering of \$500 million aggregate principal amount of 2.65% Senior Notes due in 2032.

(e.) The accounts receivable securitization program expired on its maturity date in December, 2022 and was not renewed or replaced.

Interest expense increased by \$80 million during 2023 to \$207 million as compared to \$127 million during 2022. The increase was primarily due to: (i) a net \$102 million increase in aggregate interest expense on our revolving credit, demand notes, senior notes, term loan facilities and accounts receivable securitization program, resulting from an increase in our aggregate average cost of borrowings pursuant to these facilities (4.8% during 2023 as compared to 2.8% during 2022), as well as an increase in the aggregate average outstanding borrowings (\$4.63 billion during 2023 as compared to \$4.40 billion during 2022), partially offset by; (ii) a net \$22 million decrease in other combined interest expenses, including a \$16 million increase in capitalized interest on major projects.

The average effective interest rate, including amortization of deferred financing costs, original issue discount and designated interest rate swap expense/income, on borrowings outstanding under our revolving credit, demand notes, senior notes, term loan A facility and accounts receivable securitization program, which amounted to approximately \$4.63 billion during 2023 and \$4.40 billion during 2022, were 4.9% during 2023 and 2.9% during 2022.

Provision for Asset Impairments

Our financial statements for the year ended December 31, 2022, include a pre-tax provision for asset impairment of approximately \$58 million, which is included in other operating expenses on the accompanying consolidated statements of income, to write-down the asset value of Desert Springs Hospital Medical Center, a 282-bed acute care hospital located in Las Vegas, Nevada. In early 2023, as a result of various competitive pressures and operational challenges experienced in the market, which had a significant unfavorable impact on the hospital's results of operations during the past year, as well as physical plant constraints and limitations resulting from the advanced age of the facility (which opened in 1971), we announced plans to discontinue all inpatient operations by March of 2023. For a period of time, we plan to continue providing emergency department services within a portion of the existing facility while we construct a new free-standing emergency department on the hospital's campus. The provision for asset impairment reduced the asset values of the facility's real estate and equipment to their estimated fair values.

During 2021, in connection with the discontinuation of a certain module of a new clinical/financial information technology application under development, our financial results included a pre-tax provision for asset impairment of approximately \$14 million to write-off the applicable portion of the capitalized costs incurred and is included in other operating expenses on the accompanying consolidated statements of income.

Provision for Income Taxes and Effective Tax Rates

The effective tax rates, as calculated by dividing the provision for income taxes by income before income taxes, were as follows for each of the years ended December 31, 2023 and 2022 (dollar amounts in thousands):

	<u>2023</u>	<u>2022</u>
Provision for income taxes	\$ 221,119	\$ 209,278
Income before income taxes	940,426	866,260
Effective tax rate	<u>23.5%</u>	<u>24.2%</u>

The provision for income taxes increased \$12 million during 2023, as compared to 2022, due primarily to the income tax provision recorded in connection with the \$54 million increase in pre-tax income (\$74 million increase in income before income taxes partially offset by a \$20 million increase in net income attributable to noncontrolling interests).

Due to recent guidance and enacted laws surrounding the global 15% minimum tax rate that will be effective after 2024 from the Organization for Economic Co-operation and Development ("OECD") as well as jurisdictions that we operate in, we anticipate adverse effects to our provision for income taxes as well as cash taxes. We do not expect these adverse effects to be material and will continue to monitor changes in tax policies and laws issued by the OECD and jurisdictions that we operate in.

Effects of Inflation and Seasonality

Seasonality —Our acute care services business is typically seasonal, with higher patient volumes and net patient service revenue in the first and fourth quarters of the year. This seasonality occurs because, generally, more people become ill during the winter months, which results in significant increases in the number of patients treated in our hospitals during those months.

Inflation — See disclosure above in *Results of Operations-Clinical Staffing, Physician Related Expenses and Effects of Inflation*.

Liquidity

Year ended December 31, 2023 as compared to December 31, 2022:

Net cash provided by operating activities

Net cash provided by operating activities was \$1.268 billion during 2023 as compared to \$996 million during 2022. The net increase of \$272 million was primarily attributable to the following:

- a favorable change of \$114 million from other working capital accounts due primarily to the timing of disbursements for accrued compensation and certain other accrued liabilities;
- a favorable change of \$76 million in accounts receivable;
- a favorable change of \$29 million in other assets and deferred charges, and;
- \$53 million of other combined net favorable changes.

Days sales outstanding ("DSO"): Our DSO are calculated by dividing our net revenue by the number of days in the year. The result is divided into the accounts receivable balance at the end of the year. Our DSO were 57 days at December 31, 2023 and 55 days at December 31, 2022.

Net cash used in investing activities

Net cash used in investing activities was \$763 million during 2023 and \$647 million during 2022.

2023:

The \$763 million of net cash used in investing activities during 2023 consisted of:

- \$743 million spent on capital expenditures including capital expenditures for equipment, renovations and new projects at various existing facilities;
- \$41 million paid in connection with net cash outflows from forward exchange contracts that hedge our investment in the U.K. against movements in exchange rates;
- \$24 million of proceeds received from sales of assets and businesses, and;

- \$4 million spent on the acquisition of businesses and property.

2022:

The \$647 million of net cash used in investing activities during 2022 consisted of:

- \$734 million spent on capital expenditures including capital expenditures for equipment, renovations and new projects at various existing facilities;
- \$95 million received in connection with net cash inflows from forward exchange contracts that hedge our investment in the U.K. against movements in exchange rates;
- \$20 million spent on the acquisition of businesses and property, and;
- \$12 million of proceeds received from sales of assets and businesses.

Net cash used in financing activities

Net cash used in financing activities was \$494 million during 2023 and \$318 million during 2022.

2023:

The \$494 million of net cash used in financing activities during 2023 consisted of the following:

- generated \$185 million of proceeds from additional borrowings pursuant to our revolving credit facility;
- spent \$547 million to repurchase shares of our Class B Common Stock in connection with: (i) open market purchases pursuant to our stock repurchase program (\$524 million), and; (ii) income tax withholding obligations related to stock-based compensation programs (\$23 million);
- spent \$85 million on net repayment of debt as follows: (i) \$79 million related to our tranche A term loan facility, and; (ii) \$6 million related to other debt facilities;
- spent \$55 million to pay quarterly cash dividends of \$.20 per share;
- generated \$14 million from the issuance of shares of our Class B Common Stock pursuant to the terms of employee stock purchase plans;
- spent \$7 million to pay profit distributions related to noncontrolling interests in majority owned businesses, and;
- received \$3 million for the purchase of minority ownership interests in majority owned businesses.

2022:

The \$318 million of net cash used in financing activities during 2022 consisted of the following:

- generated \$705 million of proceeds from new borrowings consisting primarily of \$700 million of proceeds generated from the new tranche A term loan facility which commenced in June, 2022;
- spent \$833 million to repurchase shares of our Class B Common Stock in connection with: (i) open market purchases pursuant to our stock repurchase program (\$811 million), and; (ii) income tax withholding obligations related to stock-based compensation programs (\$22 million);
- spent \$89 million on net repayment of debt as follows: (i) \$51 million related to our tranche A term loan facility; (ii) \$32 million related to our revolving credit facility, and; (iii) \$6 million related to other debt facilities;
- spent \$58 million to pay quarterly cash dividends of \$.20 per share;
- spent \$49 million in connection with the purchase of ownership interests from minority members, net of sales, consisting primarily of our purchase of George Washington University's 20% ownership in the George Washington University Hospital (we now own 100% of the hospital);
- generated \$14 million from the issuance of shares of our Class B Common Stock pursuant to the terms of employee stock purchase plans;
- spent \$5 million to pay profit distributions related to noncontrolling interests in majority owned businesses, and;
- spent \$3 million to pay financing costs.

2024 Expected Capital Expenditures:

During 2024, we expect to spend approximately \$850 million to \$1.000 billion on capital expenditures which includes expenditures for capital equipment, construction of new facilities, and renovations and expansions at existing hospitals. We believe that our capital expenditure program is adequate to expand, improve and equip our existing hospitals. We expect to finance all capital expenditures and acquisitions with internally generated funds and/or additional funds, as discussed below.

Capital Resources:

Credit Facilities and Outstanding Debt Securities

In June, 2022, we entered into a ninth amendment to our credit agreement dated as of November 15, 2010, as amended and restated as of September, 2012, August, 2014, October, 2018, August, 2021, and September, 2021, among UHS, as borrower, the several banks and other financial institutions from time to time parties thereto, as lenders, and JPMorgan Chase Bank, N.A., as administrative agent, (the “Credit Agreement”). The ninth amendment provided for, among other things, the following: (i) a new incremental tranche A term loan facility in the aggregate principal amount of \$700 million which is scheduled to mature on August 24, 2026, and; (ii) replaces the option to make Eurodollar borrowings (which bear interest by reference to the LIBO Rate) with Term Benchmark Loans, which will bear interest by reference to the Secured Overnight Financing Rate (“SOFR”). The net proceeds generated from the incremental tranche A term loan facility were used to repay a portion of the borrowings that were previously outstanding under our revolving credit facility.

As of December 31, 2023, our Credit Agreement provided for the following:

- a \$1.2 billion aggregate amount revolving credit facility that is scheduled to mature in August, 2026 (which, as of December 31, 2023, had \$701 million of aggregate available borrowing capacity net of \$496 million of outstanding borrowings and \$3 million of letters of credit), and;
- a tranche A term loan facility with \$2.26 billion of outstanding borrowings as of December 31, 2023.

The tranche A term loan facility provides for installment payments of \$30.0 million per quarter through June, 2026. The unpaid principal balance at June 30, 2026 is payable on the August 24, 2026 scheduled maturity date of the Credit Agreement.

Revolving credit and tranche A term loan borrowings under the Credit Agreement bear interest at our election at either (1) the ABR rate which is defined as the rate per annum equal to the greatest of (a) the lender’s prime rate, (b) the weighted average of the federal funds rate, plus 0.5% and (c) one month term SOFR rate plus 1%, in each case, plus an applicable margin based upon our consolidated leverage ratio at the end of each quarter ranging from 0.25% to 0.625%, or (2) the one, three or six month term SOFR rate plus 0.1% (at our election), plus an applicable margin based upon our consolidated leverage ratio at the end of each quarter ranging from 1.25% to 1.625%. As of December 31, 2023, the applicable margins were 0.50% for ABR-based loans and 1.50% for SOFR-based loans under the revolving credit and term loan A facilities. The revolving credit facility includes a \$125 million sub-limit for letters of credit. The Credit Agreement is secured by certain assets of the Company and our material subsidiaries (which generally excludes asset classes such as substantially all of the patient-related accounts receivable of our acute care hospitals, if sold to a receivables facility pursuant to the Credit Agreement, and certain real estate assets and assets held in joint-ventures with third parties) and is guaranteed by our material subsidiaries.

The Credit Agreement includes a material adverse change clause that must be represented at each draw. The Credit Agreement also contains covenants that include a limitation on sales of assets, mergers, change of ownership, liens, indebtedness, transactions with affiliates, dividends and stock repurchases; and requires compliance with financial covenants including maximum leverage. We were in compliance with all required covenants as of December 31, 2023 and 2022.

The average amounts outstanding under our Credit Agreement were \$2.629 billion during 2023, \$2.396 billion during 2022 and \$2.214 billion during 2021. The average effective interest rate on borrowings under our Credit Agreement, including amortization of deferred financing costs, were 6.80% during 2023, 3.33% during 2022 and 1.69% during 2021.

On August 24, 2021, we completed the following via private offerings to qualified institutional buyers under Rule 144A and to non-U.S. persons outside the United States in reliance on Regulation S under the Securities Act of 1933, as amended:

- Issued \$700 million of aggregate principal amount of 1.65% senior secured notes due on September 1, 2026, and;
- Issued \$500 million of aggregate principal amount of 2.65% senior secured notes due on January 15, 2032.

On September 13, 2021, we redeemed \$400 million of aggregate principal amount of 5.00% senior secured notes, that were scheduled to mature on June 1, 2026, at 102.50% of the aggregate principal, or \$410 million.

As of December 31, 2023, we had combined aggregate principal of \$2.0 billion from the following senior secured notes:

- \$700 million aggregate principal amount of 1.65% senior secured notes due in September, 2026 (“2026 Notes”) which were issued on August 24, 2021.
- \$800 million aggregate principal amount of 2.65% senior secured notes due in October, 2030 (“2030 Notes”) which were issued on September 21, 2020.
- \$500 million of aggregate principal amount of 2.65% senior secured notes due in January, 2032 (“2032 Notes”) which were issued on August 24, 2021.

Interest on the 2026 Notes is payable on March 1st and September 1st until the maturity date of September 1, 2026. Interest on the 2030 Notes is payable on April 15th and October 15th, until the maturity date of October 15, 2030. Interest on the 2032 Notes is payable on January 15th and July 15th until the maturity date of January 15, 2032.

The 2026 Notes, 2030 Notes and 2032 Notes (collectively “The Notes”) were initially issued only to qualified institutional buyers under Rule 144A and to non-U.S. persons outside the United States in reliance on Regulation S under the Securities Act of 1933, as amended (the “Securities Act”). In December, 2022, we completed a registered exchange offer in which virtually all previously outstanding Notes were exchanged for identical Notes that were registered under the Securities Act, and thereby became freely transferable (subject to certain restrictions applicable to affiliates and broker dealers). Notes originally issued under Rule 144A or Regulation S that were not exchanged remain outstanding and may not be offered or sold in the United States absent registration under the Securities Act or an applicable exemption from registration requirements thereunder.

The Notes are guaranteed (the “Guarantees”) on a senior secured basis by all of our existing and future direct and indirect subsidiaries (the “Subsidiary Guarantors”) that guarantee our Credit Agreement, or other first lien obligations or any junior lien obligations. The Notes and the Guarantees are secured by first-priority liens, subject to permitted liens, on certain of the Company’s and the Subsidiary Guarantors’ assets now owned or acquired in the future by the Company or the Subsidiary Guarantors (other than real property, accounts receivable sold pursuant to the Company’s Existing Receivables Facility (as defined in the Indenture pursuant to which The Notes were issued (the “Indenture”)), and certain other excluded assets). The Company’s obligations with respect to The Notes, the obligations of the Subsidiary Guarantors under the Guarantees, and the performance of all of the Company’s and the Subsidiary Guarantors’ other obligations under the Indenture, are secured equally and ratably with the Company’s and the Subsidiary Guarantors’ obligations under the Credit Agreement and The Notes by a perfected first-priority security interest, subject to permitted liens, in the collateral owned by the Company and its Subsidiary Guarantors, whether now owned or hereafter acquired. However, the liens on the collateral securing The Notes and the Guarantees will be released if: (i) The Notes have investment grade ratings; (ii) no default has occurred and is continuing, and; (iii) the liens on the collateral securing all first lien obligations (including the Credit Agreement and The Notes) and any junior lien obligations are released or the collateral under the Credit Agreement, any other first lien obligations and any junior lien obligations is released or no longer required to be pledged. The liens on any collateral securing The Notes and the Guarantees will also be released if the liens on that collateral securing the Credit Agreement, other first lien obligations and any junior lien obligations are released.

As discussed in *Note 9 to the Consolidated Financial Statements-Relationship with Universal Health Realty Income Trust and Other Related Party Transactions*, on December 31, 2021, we (through wholly-owned subsidiaries of ours) entered into an asset purchase and sale agreement with Universal Health Realty Income Trust (the “Trust”). Pursuant to the terms of the agreement, which was amended during the first quarter of 2022, we, among other things, transferred to the Trust, the real estate assets of Aiken Regional Medical Center (“Aiken”) and Canyon Creek Behavioral Health (“Canyon Creek”). In connection with this transaction, Aiken and Canyon Creek (as lessees), entered into a master lease and individual property leases, as amended, (with the Trust as lessor), for initial lease terms on each property of approximately twelve years, ending on December 31, 2033. As a result of our purchase option within the Aiken and Canyon Creek lease agreements, this asset purchase and sale transaction is accounted for as a failed sale leaseback in accordance with U.S. GAAP and we have accounted for the transaction as a financing arrangement. Our lease payments payable to the Trust are recorded to interest expense and as a reduction of the outstanding financial liability, and the amount allocated to interest expense is determined based upon our incremental borrowing rate and the outstanding financial liability. In connection with this transaction, our consolidated balance sheets at December 31, 2023 and December 31, 2022 reflect financial liabilities, which are included in debt, of approximately \$77 million and \$81 million, respectively.

At December 31, 2023, the carrying value and fair value of our debt were approximately \$4.9 billion and \$4.6 billion, respectively. At December 31, 2022, the carrying value and fair value of our debt were approximately \$4.8 billion and \$4.4 billion, respectively. The fair value of our debt was computed based upon quotes received from financial institutions. We consider these to be “level 2” in the fair value hierarchy as outlined in the authoritative guidance for disclosures in connection with debt instruments.

Our total debt as a percentage of total capitalization was approximately 44% at December 31, 2023 and 45% at December 31, 2022.

We expect to finance all capital expenditures and acquisitions and pay dividends and potentially repurchase shares of our common stock utilizing internally generated and additional funds. Additional funds may be obtained through: (i) borrowings under our existing revolving credit facility, which had \$701 million of available borrowing capacity as of December 31, 2023, or through refinancing the existing Credit Agreement; (ii) the issuance of other short-term and/or long-term debt, and/or; (iii) the issuance of equity. We believe that our operating cash flows, cash and cash equivalents, available commitments under existing agreements, as well as access to the capital markets, provide us with sufficient capital resources to fund our operating, investing and financing requirements for the next twelve months. However, in the event we need to access the capital markets or other sources of financing, there can be no assurance that we will be able to obtain financing on acceptable terms or within an acceptable time. Our inability to obtain financing on terms acceptable to us could have a material unfavorable impact on our results of operations, financial condition and liquidity.

Supplemental Guarantor Financial Information

As of December 31, 2023, we had combined aggregate principal of \$2.0 billion from The Notes:

- \$700 million aggregate principal amount of the 2026 Notes;

- \$800 million aggregate principal amount of the 2030 Notes, and;
- \$500 million of aggregate principal amount of the 2032 Notes.

The Notes are fully and unconditionally guaranteed pursuant to the Guarantees on a senior secured basis by the Subsidiary Guarantors. The Notes and the Guarantees are secured by first-priority liens, subject to permitted liens, on certain of the Company's and the Subsidiary Guarantors' assets now owned or acquired in the future by the Company or the Subsidiary Guarantors (other than real property, accounts receivable sold pursuant to the Company's existing receivables facility (as defined in the Indentures pursuant to which The Notes were issued), and certain other excluded assets). The Company's obligations with respect to The Notes, the obligations of the Subsidiary Guarantors under the Guarantees, and the performance of all of the Company's and the Subsidiary Guarantors' other obligations under the Indentures, are secured equally and ratably with the Company's and the Subsidiary Guarantors' obligations under the Credit Agreement and The Notes by a perfected first-priority security interest, subject to permitted liens, in the collateral owned by the Company and its Subsidiary Guarantors, whether now owned or hereafter acquired. However, the liens on the collateral securing The Notes and the Guarantees will be released if: (i) The Notes have investment grade ratings; (ii) no default has occurred and is continuing, and; (iii) the liens on the collateral securing all first lien obligations (including the Credit Agreement and The Notes) and any junior lien obligations are released or the collateral under the Credit Agreement, any other first lien obligations and any junior lien obligations is released or no longer required to be pledged. The liens on any collateral securing The Notes and the Guarantees will also be released if the liens on that collateral securing the Credit Agreement, other first lien obligations and any junior lien obligations are released.

The Notes will be structurally subordinated to all obligations of our existing and future subsidiaries that are not and do not become Subsidiary Guarantors of The Notes. No appraisal of the value of the collateral has been made, and the value of the collateral in the event of liquidation will depend on market and economic conditions, the availability of buyers and other factors. Consequently, liquidating the collateral securing The Notes may not produce proceeds in an amount sufficient to pay any amounts due on The Notes.

We and our subsidiaries may be able to incur significant additional indebtedness in the future. Although our Credit Agreement contains restrictions on the incurrence of additional indebtedness and our Credit Agreement and The Notes contain restrictions on our ability to incur liens to secure additional indebtedness, these restrictions are subject to a number of qualifications and exceptions, and the additional indebtedness incurred in compliance with these restrictions could be substantial. These restrictions also will not prevent us from incurring obligations that do not constitute indebtedness. In addition, if we incur any additional indebtedness secured by liens that rank equally with The Notes, subject to collateral arrangements, the holders of that debt will be entitled to share ratably with you in any proceeds distributed in connection with any insolvency, liquidation, reorganization, dissolution or other winding up of our company. This may have the effect of reducing the amount of proceeds paid to holders of The Notes.

Federal and state fraudulent transfer and conveyance statutes may apply to the issuance of The Notes and the incurrence of the Guarantees. Under federal bankruptcy law and comparable provisions of state fraudulent transfer or conveyance laws, which may vary from state to state, The Notes or the Guarantees (or the grant of collateral securing any such obligations) could be voided as a fraudulent transfer or conveyance if we or any of the Subsidiary Guarantors, as applicable, (a) issued The Notes or incurred the Guarantees with the intent of hindering, delaying or defrauding creditors or (b) under certain circumstances received less than reasonably equivalent value or fair consideration in return for either issuing The Notes or incurring the Guarantees.

Basis of Presentation

The following tables include summarized financial information of Universal Health Services, Inc. and the other obligors in respect of debt issued by Universal Health Services, Inc. The summarized financial information of each obligor group is presented on a combined basis with balances and transactions within the obligor group eliminated. Investments in and the equity in earnings of non-guarantor subsidiaries, which would otherwise be consolidated in accordance with GAAP, are excluded from the below summarized financial information pursuant to SEC Regulation S-X Rule 13-01.

The summarized balance sheet information for the consolidated obligor group of debt issued by Universal Health Services, Inc. is presented in the table below:

(in thousands)	<u>December 31, 2023</u>	<u>December 31, 2022</u>
Current assets	\$ 2,292,716	\$ 2,062,900
Noncurrent assets (1)	\$ 8,876,623	\$ 8,773,036
Current liabilities	\$ 1,786,642	\$ 1,686,005
Noncurrent liabilities	\$ 5,728,371	\$ 5,587,141
Due to non-guarantors	\$ 913,481	\$ 942,731

(1) Includes goodwill of \$3,267 million and \$3,273 million as of December 31, 2023 and 2022, respectively.

The summarized results of operations information for the consolidated obligor group of debt issued by Universal Health Services, Inc. is presented in the table below:

(in thousands)	Twelve Months Ended December 31, 2023	Twelve Months Ended December 31, 2022
Net revenues	\$ 11,454,260	\$ 10,853,259
Operating charges	10,416,176	9,947,778
Interest expense, net	277,521	193,486
Other (income) expense, net	24,996	7,487
Net income	<u>\$ 556,423</u>	<u>\$ 532,047</u>

Affiliates Whose Securities Collateralize the Senior Secured Notes

The Notes and the Guarantees are secured by, among other things, pledges of the capital stock of our subsidiaries held by us or by our secured Guarantors, in each case other than certain excluded assets and subject to permitted liens. Such collateral securities are secured equally and ratably with our and the Guarantors' obligations under our Credit Agreement. For a list of our subsidiaries the capital stock of which has been pledged to secure The Notes, see Exhibit 22.1 to this Report.

Upon the occurrence and during the continuance of an event of default under the indentures governing The Notes, subject to the terms of the Security Agreement relating to The Notes provide for (among other available remedies) the foreclosure upon and sale of the Collateral (including the pledged stock) and the distribution of the net proceeds of any such sale to the holders of The Notes, the lenders under the Credit Agreement and the holders of any other permitted first priority secured obligations on a pro rata basis, subject to any prior liens on the collateral.

No appraisal of the value of the collateral securities has been made, and the value of the collateral securities in the event of liquidation will depend on market and economic conditions, the availability of buyers and other factors. Consequently, liquidating the collateral securities securing The Notes may not produce proceeds in an amount sufficient to pay any amounts due on The Notes.

The security agreement relating to The Notes provides that the representative of the lenders under our Credit Agreement will initially control actions with respect to that collateral and, consequently, exercise of any right, remedy or power with respect to enforcing interests in or realizing upon such collateral will initially be at the direction of the representative of the lenders.

No trading market exists for the capital stock pledged as collateral.

The assets, liabilities and results of operations of the combined affiliates whose securities are pledged as collateral are not materially different than the corresponding amounts presented in the consolidated financial information of Universal Health Services, Inc.

Contractual Obligations and Off-Balance Sheet Arrangements

As of December 31, 2023 we were party to certain off balance sheet arrangements consisting of standby letters of credit and surety bonds which totaled \$189 million consisting of: (i) \$170 million related to our self-insurance programs, and; (ii) \$19 million of other debt and public utility guarantees.

Obligations under operating leases for real property, real property master leases and equipment amount to \$915 million as of December 31, 2023. The real property master leases are leases for buildings on or near hospital property for which we guarantee a certain level of rental income. We sublease space in these buildings and any amounts received from these subleases are offset against the expense. In addition, we lease certain hospital facilities from Universal Health Realty Trust (the "Trust") with terms scheduled to expire in 2026, 2033 and 2040. These leases contain various renewal options, as disclosed in *Note 9 to the Consolidated Financial Statements-Relationship with Universal Health Realty Income Trust and Other Related Party Transactions*. We also lease two free-standing emergency departments and space in certain medical office buildings which are owned by the Trust. In addition, we lease the real property of certain other facilities from non-related parties as indicated in *Item 2. Properties*, as included herein.

The following represents the scheduled maturities of our contractual obligations as of December 31, 2023:

	Payments Due by Period (dollars in thousands)				
	Total	Less than 1 year	2-3 years	4-5 years	After 5 years
Long-term debt obligations (a)	\$4,912,469	\$ 126,686	\$3,339,067	\$ 14,942	\$1,431,774
Estimated future interest payments on debt outstanding as of December 31, 2023 (b)	913,689	261,671	416,509	81,515	153,994
Construction commitments (c)	98,601	54,327	44,274	0	0
Purchase and other obligations (d)	327,380	75,678	100,288	78,144	73,270
Operating leases (e)	914,913	84,621	146,211	88,333	595,748
Estimated future payments for defined benefit pension plan, and other retirement plan (f)	165,073	22,675	13,983	15,427	112,988
Health and dental unpaid claims (g)	109,803	109,803	0	0	0
Total contractual cash obligations	<u>\$7,441,928</u>	<u>\$ 735,461</u>	<u>\$4,060,332</u>	<u>\$ 278,361</u>	<u>\$2,367,774</u>

- (a) Reflects debt outstanding, after unamortized financing costs, as of December 31, 2023 as discussed in *Note 4 to the Consolidated Financial Statements*.
- (b) Assumes that all debt outstanding as of December 31, 2023, including borrowings under our Credit Agreement, remain outstanding until the final maturity of the debt agreements at the same interest rates (some of which are floating) which were in effect as of December 31, 2023. We have the right to repay borrowings upon short notice and without penalty, pursuant to the terms of the Credit Agreement.
- (c) Our share of the estimated construction cost of two behavioral health care facilities scheduled to be completed in 2025 that, subject to approval of certain regulatory conditions, we are required to build pursuant to joint-venture agreements with third parties. In addition, we had various other projects under construction as of December 31, 2023. Because we can terminate substantially all of the construction contracts related to the various other projects at any time without paying a termination fee, these costs are excluded from the table above.
- (d) Consists of: (i) \$65 million related to long-term contracts with third-parties consisting primarily of certain revenue cycle data processing services for our acute care facilities; (ii) \$188 million related to the future expected costs to be paid to a third-party vendor in connection with the ongoing operation of an electronic health records application and purchase and implementation of a revenue cycle and other applications for our facilities; (iii) \$4 million for other software applications, and; (iv) \$70 million in healthcare infrastructure in Washington D.C. in connection with various agreements with the District of Columbia, as discussed below.
- (e) Reflects our future minimum operating lease payment obligations related to our operating lease agreements outstanding as of December 31, 2023 as discussed in *Note 7 to the Consolidated Financial Statements*. Some of the lease agreements provide us with the option to renew the lease and our future lease obligations would change if we exercised these renewal options. In connection with these operating lease commitments, our consolidated balance sheet as of December 31, 2023 includes right of use assets amounting to \$455 million and aggregate operating lease liabilities of \$454 million (\$72 million included in current liabilities and \$383 million included in noncurrent liabilities).
- (f) Consists of \$139 million of estimated future payments related to our non-contributory, defined benefit pension plan (estimated through 2080), as disclosed in *Note 8 to the Consolidated Financial Statements*, and \$26 million of estimated future payments related to other retirement plan liabilities (\$22 million of liabilities recorded in other non-current liabilities as of December 31, 2023 in connection with these retirement plans).
- (g) Consists of accrued and unpaid estimated claims expense incurred in connection with our commercial health insurers and self-insured employee benefit plans.

As of December 31, 2023, the total net accrual for our professional and general liability claims was \$431 million, of which \$70 million is included in other current liabilities and \$361 million is included in other non-current liabilities. We exclude the \$431 million for professional and general liability claims from the contractual obligations table because there are no significant contractual obligations associated with these liabilities and because of the uncertainty of the dollar amounts to be ultimately paid as well as the timing of such payments. Please see *Self-Insured/Other Insurance Risks* above for additional disclosure related to our professional and general liability claims and reserves.

During 2020, we entered into various agreements with the District of Columbia (the "District") related to the development, leasing and operation of an acute care hospital and certain other facilities/structures on land owned by the District ("District Facilities"). The agreements contemplate that we will serve as manager for development and construction of the District Facilities on behalf of the District, with a projected aggregate cost of approximately \$439 million, approximately \$210 million of which was incurred as of December 31, 2023, which is being entirely funded by the District. Construction of the District Facilities is expected to be completed during 2025. Upon completion of the District Facilities, we will lease the District Facilities for a nominal rental amount for a period of 75 years and are obligated to operate the District Facilities during the lease term. We have certain lease termination rights in connection with the District Facilities beginning on the tenth anniversary of the lease commencement date for various and

decreasing amounts as provided for in the agreements. Additionally, any time after the 10th anniversary of the lease term, we have a right to purchase the District Facilities for a price equal to the greater of fair market value of the District Facilities or the amount necessary to defease the bonds issued by the District to fund the construction of the District Facilities. The lease agreement also entitles the District to participation rent should certain specified earnings before interest, taxes, depreciation and amortization thresholds be achieved by the acute care hospital. Additionally, we have committed to expend no less than \$75 million, over a projected 12-year period, in healthcare infrastructure including expenditures related to the District Facilities as well as other healthcare related expenditures in certain specified areas of Washington, D.C. This financial commitment is included in “Purchase and other obligations” as reflected on the contractual obligations table above. Pursuant to the agreements, the District is entitled to certain termination fees and other amounts as specified in the agreements in the event we, within certain specified periods of time, cease to operate the acute care hospital or there is a transfer of control of us or our subsidiary operating the hospital.

ITEM 7A. Quantitative and Qualitative Disclosures About Market Risk

We manage our ratio of fixed and floating rate debt with the objective of achieving a mix that management believes is appropriate. To manage this risk in a cost-effective manner, we, from time to time, enter into interest rate swap agreements in which we agree to exchange various combinations of fixed and/or variable interest rates based on agreed upon notional amounts. We account for our derivative and hedging activities using the Financial Accounting Standard Board’s guidance which requires all derivative instruments, including certain derivative instruments embedded in other contracts, to be carried at fair value on the balance sheet. For derivative transactions designated as hedges, we formally document all relationships between the hedging instrument and the related hedged item, as well as its risk-management objective and strategy for undertaking each hedge transaction.

Derivative instruments designated in a hedge relationship to mitigate exposure to variability in expected future cash flows, or other types of forecasted transactions, are considered cash flow hedges. Cash flow hedges are accounted for by recording the fair value of the derivative instrument on the balance sheet as either an asset or liability, with a corresponding amount recorded in accumulated other comprehensive income (“AOCI”) within shareholders’ equity. Amounts are reclassified from AOCI to the income statement in the period or periods the hedged transaction affects earnings. From time to time, we use interest rate derivatives in our cash flow hedge transactions. Such derivatives are designed to be highly effective in offsetting changes in the cash flows related to the hedged liability.

For hedge transactions that do not qualify for the short-cut method, at the hedge’s inception and on a regular basis thereafter, a formal assessment is performed to determine whether changes in the fair values or cash flows of the derivative instruments have been highly effective in offsetting changes in cash flows of the hedged items and whether they are expected to be highly effective in the future.

The fair value of interest rate swap agreements approximates the amount at which they could be settled, based on estimates obtained from the counterparties. When applicable, we assess the effectiveness of our hedge instruments on a quarterly basis. Although we do not anticipate nonperformance by our counterparties to interest rate swap agreements, the counterparties expose us to credit risk in the event of nonperformance. We do not hold or issue derivative financial instruments for trading purposes.

When applicable, we measure our interest rate swaps at fair value on a recurring basis. The fair value of our interest rate swaps is based on quotes from our counterparties. We consider those inputs to be “level 2” in the fair value hierarchy as outlined in the authoritative guidance for disclosures in connection with derivative instruments and hedging activities.

The table below presents information about our long-term financial instruments that are sensitive to changes in interest rates as of December 31, 2023. For debt obligations, the table presents principal cash flows and related weighted-average interest rates by contractual maturity dates.

Maturity Date, Fiscal Year Ending December 31
(dollar amounts in thousands)

	2024	2025	2026	2027	2028	Thereafter	Total
Long-term debt:							
Fixed rate:							
Debt	\$ 6,686	\$ 6,345	\$ 702,847	\$ 7,191	\$ 7,751	\$ 1,431,774	\$ 2,162,594
Average interest rates	2.4%	2.4%	2.4%	2.8%	2.8%	3.2%	2.7%
Variable rate:							
Debt	\$ 120,000	\$ 120,000	2,509,875	0	0	0	\$ 2,749,875
Average interest rates	7.0%	7.0%	7.0%	0.0%	0.0%	0.0%	7.0%
Interest rate swaps:							
Notional amount							
Average interest rates							

As calculated based upon our variable rate debt outstanding as of December 31, 2023 that is subject to interest rate fluctuations, each 1% change in interest rates would impact our pre-tax income by approximately \$27 million.

ITEM 8. Financial Statements and Supplementary Data

Our Consolidated Balance Sheets, Consolidated Statements of Income, Consolidated Statements of Changes in Equity, Consolidated Statements of Cash Flows and Consolidated Statements of Comprehensive Income, together with the reports of PricewaterhouseCoopers LLP, independent registered public accounting firm, are included elsewhere herein. Reference is made to the “Index to Financial Statements and Financial Statement Schedule.”

ITEM 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

ITEM 9A. Controls and Procedures.

As of December 31, 2023, under the supervision and with the participation of our management, including our Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”), we performed an evaluation of the effectiveness of our disclosure controls and procedures as defined in Rule 13a-15(e) or Rule 15d-15(e) of the Securities Exchange Act of 1934, as amended. Based on this evaluation, the CEO and CFO have concluded that our disclosure controls and procedures are effective to ensure that material information is recorded, processed, summarized and reported by management on a timely basis in order to comply with our disclosure obligations under the Securities Exchange Act of 1934, as amended, and the SEC rules thereunder.

Changes in Internal Control Over Financial Reporting

There have been no changes in our internal control over financial reporting or in other factors during the fourth quarter of 2023 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Management’s Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining an adequate system of internal control over our financial reporting. In order to evaluate the effectiveness of internal control over financial reporting, as required by Section 404 of the Sarbanes-Oxley Act, management has conducted an assessment, including testing, using the criteria on *Internal Control—Integrated Framework (2013)*, issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Our system of internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation and fair presentation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness of internal control over financial reporting to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Based on its assessment, management has concluded that we maintained effective internal control over financial reporting as of December 31, 2023, based on criteria in *Internal Control—Integrated Framework (2013)*, issued by the COSO. The effectiveness of the Company’s internal control over financial reporting as of December 31, 2023 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm as stated in its report which appears herein.

ITEM 9B *Other Information*

None of the Company's directors or officers adopted, modified or terminated a Rule 10b5-1 trading arrangement or a non-Rule 10b5-1 trading arrangement during the Company's quarter ended December 31, 2023, as such terms are defined under Item 408(a) of Regulation S-K.

ITEM 9C *Disclosure Regarding Foreign Jurisdictions that Prevent Inspections. Other Information*

Not applicable.

PART III

ITEM 10. *Directors, Executive Officers and Corporate Governance*

There is hereby incorporated by reference the information to appear under the captions “Election of Directors”, “Section 16(a) Beneficial Ownership Reporting Compliance” and “Corporate Governance” in our Proxy Statement, to be filed with the Securities and Exchange Commission within 120 days after December 31, 2023. See also “Executive Officers of the Registrant” appearing in Item 1 hereof.

ITEM 11. *Executive Compensation*

There is hereby incorporated by reference the information to appear under the caption “Executive Compensation” in our Proxy Statement to be filed with the Securities and Exchange Commission within 120 days after December 31, 2023.

ITEM 12. *Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters*

There is hereby incorporated by reference the information to appear under the caption “Security Ownership of Certain Beneficial Owners and Management” and “Executive Compensation” in our Proxy Statement, to be filed with the Securities and Exchange Commission within 120 days after December 31, 2023.

ITEM 13. *Certain Relationships and Related Transactions, and Director Independence*

There is hereby incorporated by reference the information to appear under the captions “Certain Relationships and Related Transactions” and “Corporate Governance” in our Proxy Statement, to be filed with the Securities and Exchange Commission within 120 days after December 31, 2023.

ITEM 14. *Principal Accountant Fees and Services.*

There is hereby incorporated by reference the information to appear under the caption “Relationship with Independent Auditors” in our Proxy Statement, to be filed with the Securities and Exchange Commission within 120 days after December 31, 2023.

PART IV

ITEM 15. Exhibits and Financial Statement Schedules

(a) Documents filed as part of this report:

(1) Financial Statements:

See “Index to Financial Statements and Financial Statement Schedule.”

(2) Financial Statement Schedules:

See “Index to Financial Statements and Financial Statement Schedule.”

(3) Exhibits:

<u>No.</u>	<u>Description</u>
3.1	Registrant’s Restated Certificate of Incorporation, and Amendments thereto, previously filed as Exhibit 3.1 to the Company’s Quarterly Report on Form 10-Q for the quarter ended June 30, 1997, are incorporated herein by reference (P).
3.2	<u>Amended and Restated Bylaws of Registrant, previously filed as Exhibit 3.1 to the Company’s Current Report on Form 8-K dated September 21, 2022, is incorporated herein by reference.</u>

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Universal Health Services, Inc.

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Universal Health Services, Inc. and its subsidiaries (the “Company”) as of December 31, 2023 and 2022, and the related consolidated statements of income, of comprehensive income, of changes in equity and of cash flows for each of the three years in the period ended December 31, 2023, including the related notes and financial statement schedule listed in the accompanying index (collectively referred to as the “consolidated financial statements”). We also have audited the Company's internal control over financial reporting as of December 31, 2023, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2023 and 2022, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2023 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2023, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the COSO.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control Over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that (i) relates to accounts or disclosures that are

material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Valuation of accounts receivable

As described in Notes 1, 10 and 12 to the consolidated financial statements, the Company reports net patient service revenue at the estimated net realizable amounts from patients and third-party payers and others for services rendered. The Company has agreements with third-party payers that provide for payments to the Company at amounts different from established rates. Payment arrangements include rates per discharge, reimbursed costs, discounted charges and per diem payments. Estimates of contractual allowances, which represent explicit price concessions, under managed care plans are based upon the payment terms specified in the related contractual agreements. Management estimates Medicare and Medicaid revenues using the latest available financial information, patient utilization data, government provided data and in accordance with applicable Medicare and Medicaid payment rules and regulations. Management monitors the historical collection rates, as well as changes in applicable laws, rules and regulations and contract terms, to assure that provisions are made using the most accurate information available. In addition to explicit price concessions, management estimates revenue adjustments for implicit price concessions based on general factors such as payer mix, the aging of the receivables and historical collection experience. Management routinely reviews accounts receivable balances in conjunction with these factors and other economic conditions which might ultimately affect the collectability of the patient accounts and make adjustments to the allowances as warranted. As of December 31, 2023, the net accounts receivable balance was \$2.2 billion.

The principal considerations for our determination that performing procedures relating to the valuation of accounts receivable is a critical audit matter are the significant judgment by management in estimating net accounts receivable, specifically as it relates to developing the estimate for explicit and implicit price concessions, which in turn led to significant auditor judgment, subjectivity and effort in performing procedures and evaluating audit evidence obtained related to the estimation of price concessions.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the valuation of accounts receivable, including controls over management's valuation approach, assumptions and data used to estimate the explicit and implicit price concessions. These procedures also included, among others, (i) testing management's process for developing the estimate for price concessions, as well as the relevance of the historical billing and collection data as an input to the valuation approach; (ii) testing the accuracy of a sample of revenue transactions and a sample of cash collections from the historical billing data and historical collection data used in management's estimation of price concessions; (iii) evaluating the historical accuracy of management's process for developing the estimate of the amount which will ultimately be collected by comparing actual cash collections to the previously recorded net accounts receivable balance; and (iv) developing an independent expectation of the net accounts receivable balance. Developing an independent expectation involved calculating the percentage of cash collections as compared to the recorded net accounts receivable balance as of the end of the prior year, applying those calculated percentages to the recorded accounts receivable balance as of December 31, 2023, and comparing the calculated balance to management's estimate of the net accounts receivable balance.

The accompanying notes are an integral part of these consolidated financial statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1) BUSINESS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Services provided by our hospitals, all of which are operated by subsidiaries of ours, include general and specialty surgery, internal medicine, obstetrics, emergency room care, radiology, oncology, diagnostic care, coronary care, pediatric services, pharmacy services and/or behavioral health services. We, through our subsidiaries, provide capital resources as well as a variety of management services to our facilities, including central purchasing, information services, finance and control systems, facilities planning, physician recruitment services, administrative personnel management, marketing and public relations.

Principles of Consolidation: The consolidated financial statements include the accounts of our majority-owned subsidiaries and partnerships controlled by us or our subsidiaries as the managing general partner. All intercompany accounts and transactions have been eliminated.

Revenue Recognition: We report net patient service revenue at the estimated net realizable amounts from patients and third-party payers and others for services rendered. We have agreements with third-party payers that provide for payments to us at amounts different from our established rates. Payment arrangements include rates per discharge, reimbursed costs, discounted charges and per diem payments. Estimates of contractual allowances under managed care plans, which represent explicit price concessions, are based upon the payment terms specified in the related contractual agreements. We closely monitor our historical collection rates, as well as changes in applicable laws, rules and regulations and contract terms, to assure that provisions are made using the most accurate information available. However, due to the complexities involved in these estimations, actual payments from payers may be different from the amounts we estimate and record.

See *Note 10-Revenue Recognition*, for additional disclosure related to our revenues including a disaggregation of our consolidated net revenues by major source for each of the periods presented herein.

We estimate our Medicare and Medicaid revenues using the latest available financial information, patient utilization data, government provided data and in accordance with applicable Medicare and Medicaid payment rules and regulations. The laws and regulations governing the Medicare and Medicaid programs are extremely complex and subject to interpretation and as a result, there is at least a reasonable possibility that recorded estimates will change by material amounts in the near term. Certain types of payments by the Medicare program and state Medicaid programs (e.g. Medicare Disproportionate Share Hospital, Medicare Allowable Bad Debts and Inpatient Psychiatric Services) are subject to retroactive adjustment in future periods as a result of administrative review and audit and our estimates may vary from the final settlements. Such amounts are included in accounts receivable, net, on our consolidated balance sheets. The funding of both federal Medicare and state Medicaid programs are subject to legislative and regulatory changes. As such, we cannot provide any assurance that future legislation and regulations, if enacted, will not have a material impact on our future Medicare and Medicaid reimbursements. Adjustments related to the final settlement of these retrospectively determined amounts did not materially impact our results in 2023, 2022 or 2021. If it were to occur, each 1% adjustment to our estimated net Medicare revenues that are subject to retrospective review and settlement as of December 31, 2023, would change our after-tax net income by approximately \$2 million.

Charity Care, Uninsured Discounts and Other Adjustments to Revenue: Collection of receivables from third-party payers and patients is our primary source of cash and is critical to our operating performance. Our primary collection risks relate to uninsured patients and the portion of the bill which is the patient's responsibility, primarily co-payments and deductibles. We estimate our revenue adjustments for implicit price concessions based on general factors such as payer mix, the aging of the receivables and historical collection experience. We routinely review accounts receivable balances in conjunction with these factors and other economic conditions which might ultimately affect the collectability of the patient accounts and make adjustments to our allowances as warranted. At our acute care hospitals, third party liability accounts are pursued until all payment and adjustments are posted to the patient account. For those accounts with a patient balance after third party liability is finalized or accounts for uninsured patients, the patient receives statements and collection letters.

Historically, a significant portion of the patients treated throughout our portfolio of acute care hospitals are uninsured patients which, in part, has resulted from patients who are employed but do not have health insurance or who have policies with relatively high deductibles. Patients treated at our hospitals for non-elective services, who have gross income of various amounts, dependent upon the state, ranging from 200% to 400% of the federal poverty guidelines, are deemed eligible for charity care. The federal poverty guidelines are established by the federal government and are based on income and family size. Because we do not pursue collection of amounts that qualify as charity care, the transaction price is fully adjusted and there is no impact in our net revenues or in our accounts receivable, net.

A portion of the accounts receivable at our acute care facilities are comprised of Medicaid accounts that are pending approval from third-party payers but we also have smaller amounts due from other miscellaneous payers such as county indigent programs in certain states. Our patient registration process includes an interview of the patient or the patient's responsible party at the time of registration. At that time, an insurance eligibility determination is made and an insurance plan code is assigned. There are various pre-

established insurance profiles in our patient accounting system which determine the expected insurance reimbursement for each patient based on the insurance plan code assigned and the services rendered. Certain patients may be classified as Medicaid pending at registration based upon a screening evaluation if we are unable to definitively determine if they are currently Medicaid eligible. When a patient is registered as Medicaid eligible or Medicaid pending, our patient accounting system records net revenues for services provided to that patient based upon the established Medicaid reimbursement rates, subject to the ultimate disposition of the patient's Medicaid eligibility. When the patient's ultimate eligibility is determined, reclassifications may occur which impacts net revenues in future periods. Although the patient's ultimate eligibility determination may result in adjustments to net revenues, these adjustments do not have a material impact on our results of operations in 2023, 2022 or 2021 since our facilities make estimates at each financial reporting period to adjust revenue based on historical collections.

We also provide discounts to uninsured patients (included in "uninsured discounts" amounts below) who do not qualify for Medicaid or charity care. Because we do not pursue collection of amounts classified as uninsured discounts, the transaction price is fully adjusted and there is no impact in our net revenues or in our net accounts receivable. In implementing the discount policy, we first attempt to qualify uninsured patients for governmental programs, charity care or any other discount program. If an uninsured patient does not qualify for these programs, the uninsured discount is applied.

Uncompensated care (charity care and uninsured discounts):

The following table shows the amounts recorded at our acute care hospitals for charity care and uninsured discounts, based on charges at established rates, for the years ended December 31, 2023, 2022 and 2021:

	(dollar amounts in thousands)					
	2023		2022		2021	
	Amount	%	Amount	%	Amount	%
Charity care	\$ 843,449	32%	\$ 786,962	35%	\$ 661,965	33%
Uninsured discounts	1,792,493	68%	1,474,933	65%	1,336,319	67%
Total uncompensated care	\$ 2,635,942	100%	\$ 2,261,895	100%	\$ 1,998,284	100%

The estimated cost of providing uncompensated care:

The estimated cost of providing uncompensated care, as reflected below, were based on a calculation which multiplied the percentage of operating expenses for our acute care hospitals to gross charges for those hospitals by the above-mentioned total uncompensated care amounts. The percentage of cost to gross charges is calculated based on the total operating expenses for our acute care facilities divided by gross patient service revenue for those facilities. An increase in the level of uninsured patients to our facilities and the resulting adverse trends in the adjustments to net revenues and uncompensated care provided could have a material unfavorable impact on our future operating results.

	(amounts in thousands)		
	2023	2022	2021
Estimated cost of providing charity care	\$ 83,383	\$ 85,434	\$ 72,095
Estimated cost of providing uninsured discounts	177,206	160,122	145,538
Estimated cost of providing uncompensated care	\$ 260,589	\$ 245,556	\$ 217,633

Concentration of Revenues: Our seven acute care hospitals and seven free-standing emergency departments in the Las Vegas, Nevada, market contributed, on a combined basis, 14% in 2023, 15% in 2022 and 16% in 2021 of our consolidated net revenues.

Cash, Cash Equivalents and Restricted Cash: We consider all highly liquid investments purchased with maturities of three months or less to be cash equivalents.

Cash, cash equivalents, and restricted cash as reported in the consolidated statements of cash flows are presented separately on our consolidated balance sheets as follow:

	(amounts in thousands)		
	2023	2022	2021
Cash and cash equivalents	\$ 119,439	\$ 102,818	\$ 115,301
Restricted cash (a)	95,031	98,019	63,633
Total cash, cash equivalents and restricted cash	\$ 214,470	\$ 200,837	\$ 178,934

- (a) Restricted cash is included in other assets on the accompanying consolidated balance sheets and consists of statutorily required capital reserves related to our commercial insurance subsidiary.

The fair value of our restricted cash was computed based upon quotes received from financial institutions. We consider these to be "level 1" in the fair value hierarchy as outlined in the authoritative guidance for disclosures in connection with financial securities.

Property and Equipment: Property and equipment are stated at cost. Expenditures for renewals and improvements are charged to the property accounts. Replacements, maintenance and repairs which do not improve or extend the life of the respective asset are expensed as incurred. We remove the cost and the related accumulated depreciation from the accounts for assets sold or retired and the resulting gains or losses are included in the results of operations. Construction-in-progress includes both construction projects and equipment not yet placed into service.

Our financial statements for the year ended December 31, 2022, include a pre-tax provision for asset impairment of approximately \$58 million, which is included in other operating expenses on the accompanying consolidated statements of income, to write-down the asset value of Desert Springs Hospital Medical Center, a 282-bed acute care hospital located in Las Vegas, Nevada. In early 2023, as a result of various competitive pressures and operational challenges experienced in the market, which had a significant unfavorable impact on the hospital's results of operations during the past year, as well as physical plant constraints and limitations resulting from the advanced age of the facility (which opened in 1971), we announced plans to discontinue all inpatient operations by March of 2023. For a period of time, we plan to continue providing emergency department services within a portion of the existing facility while we construct a new free-standing emergency department on the hospital's campus. The provision for asset impairment reduced the asset values of the facility's real estate and equipment to their estimated fair values.

We capitalized interest during the construction period of major construction projects and during the development and implementation of information technology applications amounting to \$24.4 million during 2023, \$8.6 million during 2022 and \$4.4 million during 2021.

Depreciation is provided on the straight-line method over the estimated useful lives of buildings and improvements (twenty to forty years) and equipment (three to fifteen years). Depreciation expense was \$535.6 million during 2023, \$544.0 million during 2022 and \$501.6 million during 2021.

Long-Lived Assets: We review our long-lived assets, including intangible assets, for impairment whenever events or circumstances indicate that the carrying value of these assets may not be recoverable. The assessment of possible impairment is based on our ability to recover the carrying value of our asset based on our estimate of its undiscounted future cash flows. If the analysis indicates that the carrying value is not recoverable from future cash flows, the asset is written down to its estimated fair value and an impairment loss is recognized. Fair values are determined based on estimated future cash flows using appropriate discount rates.

Goodwill: Goodwill is reviewed for impairment at the reporting unit level on an annual basis or sooner if the indicators of impairment arise. Our judgments regarding the existence of impairment indicators are based on market conditions and operational performance of each reporting unit. We have designated October 1st as our annual impairment assessment date and performed quantitative impairment assessments as of October 1, 2023 which indicated no impairment of goodwill. There were also no goodwill impairments during 2022 or 2021. Future changes in the estimates used to conduct the impairment reviews, including profitability and market value projections, could indicate impairment in future periods potentially resulting in a write-off of a portion or all of our goodwill.

Changes in the carrying amount of goodwill for the two years ended December 31, 2023 were as follows (in thousands):

	<u>Acute Care Services</u>	<u>Behavioral Health Services</u>	<u>Total Consolidated</u>
Balance, January 1, 2022	\$ 515,936	\$ 3,446,688	\$ 3,962,624
Goodwill acquired during the period	0	0	—
Goodwill divested during the period	0	0	0
Adjustments to goodwill (a)	690	(53,858)	(53,168)
Balance, December 31, 2022	516,626	3,392,830	3,909,456
Goodwill acquired during the period	0	4,598	4,598
Goodwill divested during the period	0	(6,062)	(6,062)
Adjustments to goodwill (a)	2	24,413	24,415
Balance, December 31, 2023	<u>\$ 516,628</u>	<u>\$ 3,415,779</u>	<u>\$ 3,932,407</u>

- (a) The changes in the Behavioral Health Services' goodwill consist of foreign currency translation adjustments.

Other Assets and Intangible Assets: Other assets consist primarily of amounts related to: (i) intangible assets acquired in connection with our acquisitions of Cambian Group, PLC's adult services' division during 2015, Ascend Health Corporation during 2012 and Psychiatric Solutions, Inc. during 2010; (ii) prepaid fees for various software and other applications used by our hospitals; (iii) costs incurred in connection with the purchase and implementation of an electronic health records application for each of our acute care facilities; (iv) statutorily required capital reserves related to our commercial insurance subsidiary (\$113 million and \$116 million as of December 31, 2023 and 2022, respectively); (v) deposits; (vi) investments in various businesses, including Universal Health Realty Income Trust (\$7 million and \$8 million as of as of December 31, 2023 and 2022, respectively) and Premier, Inc. (\$50 million and \$78 million as of December 31, 2023 and 2022, respectively); (vii) the invested assets related to a deferred compensation

plan that is held by an independent trustee in a rabbi-trust and that has a related payable included in other noncurrent liabilities, and; (viii) other miscellaneous assets.

Intangible assets are reviewed for impairment on an annual basis or more often if indicators of impairment arise. Our judgments regarding the existence of impairment indicators are based on market conditions and operational performance of each asset. We have designated October 1st as our annual impairment assessment date and performed impairment assessments as of October 1, 2023. There were no impairments in 2023 or 2022. In connection with the discontinuation of a certain module of a new clinical/financial information technology application under development, our financial results for the year ended December 31, 2021 include a pre-tax provision for asset impairment of approximately \$14 million to write-off the applicable portion of the capitalized costs incurred and is included in other operating expenses on the accompanying consolidated statement of income.

The following table shows the amounts recorded as net intangible assets for the years ended December 31, 2023 and 2022:

	(amounts in thousands)	
	2023	2022
Medicare licenses (a)	\$ 57,226	\$ 57,226
Certificates of need	7,501	7,989
Contract relationships and other (net of \$56,288 and \$55,353 of accumulated amortization for 2023 and 2022, respectively)	12,291	12,887
Net Intangible Assets	<u>\$ 77,018</u>	<u>\$ 78,102</u>

(a) Indefinite lives.

Supplies: Supplies, which consist primarily of medical supplies, are stated at the lower of cost (first-in, first-out basis) or market.

Self-Insured/Other Insurance Risks: We provide for self-insured risks, primarily general and professional liability claims, workers' compensation claims and healthcare and dental claims. Our estimated liability for self-insured professional and general liability claims is based on a number of factors including, among other things, the number of asserted claims and reported incidents, estimates of losses for these claims based on recent and historical settlement amounts, estimate of incurred but not reported claims based on historical experience, and estimates of amounts recoverable under our commercial insurance policies. All relevant information, including our own historical experience is used in estimating the expected amount of claims. While we continuously monitor these factors, our ultimate liability for professional and general liability claims could change materially from our current estimates due to inherent uncertainties involved in making this estimate. Our estimated self-insured reserves are reviewed and changed, if necessary, at each reporting date and changes are recognized currently as additional expense or as a reduction of expense.

In addition, we also: (i) own commercial health insurers headquartered in Nevada and Puerto Rico, and; (ii) maintain self-insured employee benefits programs for employee healthcare and dental claims. The ultimate costs related to these programs/operations include expenses for claims incurred and paid in addition to an accrual for the estimated expenses incurred in connection with claims incurred but not yet reported. See *Note 8 - Commitments and Contingencies* for additional disclosure related to our self-insured general and professional liability and workers' compensation liability.

Income Taxes: Deferred tax assets and liabilities are recognized for the amount of taxes payable or deductible in future years as a result of differences between the tax bases of assets and liabilities and their reported amounts in the financial statements. We believe that future income will enable us to realize our deferred tax assets net of recorded valuation allowances relating to state and foreign net operating loss carry-forwards, tax credits, and interest deduction limitations.

Due to recent guidance and enacted laws surrounding the global 15% minimum tax rate that will be effective after 2024 from the Organization for Economic Co-operation and Development ("OECD") as well as jurisdictions that we operate in. We do not expect these adverse effects to be material and will continue to monitor changes in tax policies and laws issued by the OECD and jurisdictions that we operate in.

We operate in multiple jurisdictions with varying tax laws. We are subject to audits by any of these taxing authorities. We believe that adequate accruals have been provided for federal, foreign and state taxes.

See *Note 6-Income Taxes* for additional disclosure.

Other Noncurrent Liabilities: Other noncurrent liabilities include the long-term portion of our professional and general liability, workers' compensation reserves, pension and deferred compensation liabilities, and liabilities incurred in connection with split-dollar life insurance agreements on the lives of our executive chairman of the board and his wife.

Redeemable Noncontrolling Interests and Noncontrolling Interest: As of December 31, 2023, outside owners held noncontrolling, minority ownership interests of: (i) approximately 7% in an acute care facility located in Texas; (ii) 49%, 20%, 30%, 20%, 25%, 48% and 26% in seven behavioral health care facilities located in Arizona, Pennsylvania, Ohio, Washington, Missouri, Iowa and Michigan, respectively, and; (iii) approximately 5% in an acute care facility located in Nevada. The noncontrolling interest

and redeemable noncontrolling interest balances of \$48 million and \$5 million, respectively, as of December 31, 2023, consist primarily of the third-party ownership interests in these hospitals.

In August, 2022, we purchased the 20% noncontrolling ownership interest in a hospital majority owned by us, located in Washington D.C. for \$51 million. We now have 100% ownership interest in the hospital. The noncontrolling interest balance was reclassified to retained earnings and is included in common stockholders' equity in the accompanying consolidated balance sheets and in retained earnings in the accompanying consolidated statements of changes in equity.

In connection with the two behavioral health care facilities located in Pennsylvania and Ohio, the minority ownership interests of which are reflected as redeemable noncontrolling interests on our consolidated balance sheets, the outside owners have "put options" to put their entire ownership interest to us at any time. If exercised, the put option requires us to purchase the minority member's interest at fair market value. Accordingly, the amounts recorded as redeemable noncontrolling interests on our consolidated balance sheets reflect the estimated fair market value of these ownership interests.

Accumulated Other Comprehensive Income: The accumulated other comprehensive income ("AOCI") component of stockholders' equity includes: net unrealized gains and losses on effective cash flow hedges, foreign currency translation adjustments and the net minimum pension liability of a non-contributory defined benefit pension plan which covers employees at one of our subsidiaries. See *Note 11 - Pension Plan* for additional disclosure regarding the defined benefit pension plan.

The amounts recognized in AOCI for the two years ended December 31, 2023 were as follows (in thousands):

	Net Unrealized Gains (Losses) on Effective Cash Flow Hedges	Foreign Currency Translation Adjustment	Minimum Pension Liability	Total AOCI
Balance, January 1, 2022, net of income tax	\$ (17)	\$ 33,524	\$ (3,216)	\$ 30,291
2022 activity:				
Pretax amount	0	(37,310)	(2,869)	(40,179)
Income tax effect	0	(469)	689	220
Change, net of income tax	<u>0</u>	<u>(37,779)</u>	<u>(2,180)</u>	<u>(39,959)</u>
Balance, January 1, 2023, net of income tax	(17)	(4,255)	(5,396)	(9,668)
2023 activity:				
Pretax amount	0	15,271	4,166	19,437
Income tax effect	0	520	(1,000)	(480)
Change, net of income tax	<u>0</u>	<u>15,791</u>	<u>3,166</u>	<u>18,957</u>
Balance, December 31, 2023, net of income tax	<u>\$ (17)</u>	<u>\$ 11,536</u>	<u>\$ (2,230)</u>	<u>\$ 9,289</u>

Accounting for Derivative Financial Investments and Hedging Activities and Foreign Currency Forward Exchange

Contracts: We manage our ratio of fixed and floating rate debt with the objective of achieving a mix that management believes is appropriate. To manage this risk in a cost-effective manner, we, from time to time, enter into interest rate swap agreements in which we agree to exchange various combinations of fixed and/or variable interest rates based on agreed upon notional amounts. We account for our derivative and hedging activities using the Financial Accounting Standard Board's ("FASB") guidance which requires all derivative instruments, including certain derivative instruments embedded in other contracts, to be carried at fair value on the balance sheet. For derivative transactions designated as hedges, we formally document all relationships between the hedging instrument and the related hedged item, as well as its risk-management objective and strategy for undertaking each hedge transaction.

Derivative instruments designated in a hedge relationship to mitigate exposure to variability in expected future cash flows, or other types of forecasted transactions, are considered cash flow hedges. Cash flow hedges are accounted for by recording the fair value of the derivative instrument on the balance sheets as either an asset or liability, with a corresponding amount recorded in accumulated other comprehensive income ("AOCI") within statements of changes in equity. Amounts are reclassified from AOCI to the income statement in the period or periods the hedged transaction affects earnings. From time to time, we use interest rate derivatives in our cash flow hedge transactions. Such derivatives are designed to be highly effective in offsetting changes in the cash flows related to the hedged liability.

For hedge transactions that do not qualify for the short-cut method, at the hedge's inception and on a regular basis thereafter, a formal assessment is performed to determine whether changes in the fair values or cash flows of the derivative instruments have been highly effective in offsetting changes in cash flows of the hedged items and whether they are expected to be highly effective in the future.

We use forward exchange contracts to hedge our net investment in foreign operations against movements in exchange rates. The effective portion of the unrealized gains or losses on these contracts is recorded in foreign currency translation adjustment within accumulated other comprehensive income and remains there until either the sale or liquidation of the subsidiary.

Stock-Based Compensation: We have a number of stock-based employee compensation plans. Pursuant to the FASB’s guidance, we expense the grant-date fair value of stock options and other equity-based compensation pursuant to the straight-line method over the stated vesting period of the award using the Black-Scholes option-pricing model. The expense associated with share-based compensation arrangements is a non-cash charge. In the consolidated statements of cash flows, share-based compensation expense is an adjustment to reconcile net income to cash provided by operating activities.

Earnings per Share: Basic earnings per share are based on the weighted average number of common shares outstanding during the year. Diluted earnings per share are based on the weighted average number of common shares outstanding during the year adjusted to give effect to common stock equivalents.

The following table sets forth the computation of basic and diluted earnings per share, for the periods indicated (in thousands, except per share data):

	Twelve Months Ended December 31,		
	2023	2022	2021
Basic and diluted:			
Net Income	\$ 719,307	\$ 656,982	\$ 987,632
Less: Net (income) loss attributable to noncontrolling interest ("NCI")	(1,512)	18,627	3,958
Less: Net income attributable to unvested restricted share grants	(308)	(748)	(2,059)
Net income attributable to UHS—basic and diluted	<u>\$ 717,487</u>	<u>\$ 674,861</u>	<u>\$ 989,531</u>
Basic earnings per share attributable to UHS:			
Weighted average number of common shares—basic	69,321	73,118	82,519
Total basic earnings per share	<u>\$ 10.35</u>	<u>\$ 9.23</u>	<u>\$ 11.99</u>
Diluted earnings per share attributable to UHS:			
Weighted average number of common shares	69,321	73,118	82,519
Net effect of dilutive stock options and grants based on the treasury stock method	<u>804</u>	<u>714</u>	<u>1,173</u>
Weighted average number of common shares and equivalents—diluted	<u>70,125</u>	<u>73,832</u>	<u>83,692</u>
Total diluted earnings per share	<u>\$ 10.23</u>	<u>\$ 9.14</u>	<u>\$ 11.82</u>

The “Net effect of dilutive stock options and grants based on the treasury stock method”, for all years presented above, excludes certain outstanding stock options applicable to each year since the effect would have been anti-dilutive. The excluded weighted-average stock options totaled approximately 5.1 million during 2023, 6.0 million during 2022 and 4.2 million during 2021.

Fair Value of Financial Instruments: The fair values of our debt and investments are based on quoted market prices. The fair values of other long-term debt, including capital lease obligations, are estimated by discounting cash flows using period-end interest rates and market conditions for instruments with similar maturities and credit quality. The carrying amounts reported in the balance sheets for cash, accounts receivable, accounts payable, and short-term borrowings approximates their fair values due to the short-term nature of these instruments. Accordingly, these items have been excluded from the fair value disclosures included elsewhere in these notes to consolidated financial statements.

Use of Estimates: The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Mergers and Acquisitions: The acquisition method of accounting for business combinations requires that the assets acquired and liabilities assumed be recorded at the date of acquisition at their respective fair values with limited exceptions. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Any excess of the purchase price (consideration transferred) over the estimated fair values of net assets acquired is recorded as goodwill. Transaction costs and costs to restructure the acquired company are expensed as incurred. The fair value of intangible assets, including Medicare licenses, certificates of need, tradenames and certain contracts, is based on significant judgments made by our management, and accordingly, for significant items we typically obtain assistance from third party valuation specialists.

GPO Agreement/Minority Ownership Interest: During 2013, we entered into a new group purchasing organization agreement (“GPO”) with Premier, Inc. (“Premier”), a healthcare performance improvement alliance, and acquired a minority interest in the GPO for a nominal amount. During the fourth quarter of 2013, in connection with the completion of an initial public offering of the stock of Premier, we received cash proceeds for the sale of a portion of our ownership interest in the GPO, which were recorded as

deferred income, on a pro rata basis, as a reduction to our supplies expense over the initial expected life of the GPO agreement. Also in connection with this GPO agreement, we received shares of restricted stock in Premier which vest ratably over a seven-year period (2014 through 2020), contingent upon our continued participation and minority ownership interest in the GPO. We recognized the fair value of this restricted stock, as a reduction to our supplies expense, in our consolidated statements of income, on a pro rata basis, over the vesting period. During the third quarter of 2020, we entered into an agreement with Premier pursuant to the terms of which, among other things, our ownership interest in Premier was converted into shares of Class A Common Stock of Premier. We have elected to retain a portion of the previously vested shares of Premier, the value of which is included in other assets on our consolidated balance sheets. Based upon the closing price of Premier's stock on each respective date, the market value of our shares of Premier was \$50 million and \$78 million as of December 31, 2023 and 2022, respectively. The change in market value of these shares is recorded as an unrealized gain/loss and included in "Other (income) expense, net" on our consolidated statements of income. Additionally, Premier paid cash dividends of \$1.9 million during 2023, \$1.8 million during 2022 and \$1.7 million during 2021, which are included in "Other (income) expense, net" in our consolidated statements of income.

Provider Taxes: We incur health-care related taxes ("Provider Taxes") imposed by states in the form of a licensing fee, assessment or other mandatory payment which are related to: (i) healthcare items or services; (ii) the provision of, or the authority to provide, the health care items or services, or; (iii) the payment for the health care items or services. Such Provider Taxes are subject to various federal regulations that limit the scope and amount of the taxes that can be levied by states in order to secure federal matching funds as part of their respective state Medicaid programs. We derive a related Medicaid reimbursement benefit from assessed Provider Taxes in the form of Medicaid claims based payment increases and/or lump sum Medicaid supplemental payments.

Under these programs, including the impact of the Texas Uncompensated Care and Upper Payment Limit program, the Texas Delivery System Reform Incentive program, and various other state programs, we earned revenues (before Provider Taxes) of approximately \$853 million during 2023, \$784 million during 2022 and \$641 million during 2021. These revenues were offset by Provider Taxes of approximately \$297 million during 2023, \$287 million during 2022 and \$211 million during 2021, which are recorded in other operating expenses on the consolidated statements of income as included herein. The aggregate net benefit from these programs was \$556 million during 2023, \$497 million during 2022 and \$430 million during 2021. The aggregate net benefit pursuant to these programs is earned from multiple states and therefore no particular state's portion is individually material to our consolidated financial statements. In addition, under various disproportionate share hospital payment programs and state plan amendment programs, we earned revenues of \$73 million in 2023, \$75 million in 2022 and \$74 million in 2021.

CARES Act and Other Governmental Grants and Medicare Accelerated Payments: During 2021, we received approximately \$189 million of additional funds from the federal government in connection with the CARES Act, which we returned during the year utilizing a portion of our cash and cash equivalents held on deposit. Therefore, there was no impact on our earnings during 2021 in connection with receipt of those funds.

Also during 2021, we made an early repayment of \$695 million of funds received during 2020 pursuant to the Medicare Accelerated and Advance Payment Program ("MAAPP"). These funds, which were required to be repaid to the government beginning in the second quarter of 2021 through the third quarter of 2022, were returned to the government utilizing a portion of our cash and cash equivalents held on deposit.

Recent Accounting Standards: In November 2023, the FASB issued ASU 2023-07, "Improvements to Reportable Segment Disclosures (Topic 280)". ASU 2023-07 modifies reportable segment disclosure requirements, primarily through enhanced disclosures about segment expenses categorized as significant or regularly provided to the Chief Operating Decision Maker (CODM). In addition, the amendments enhance interim disclosure requirements, clarify circumstances in which an entity can disclose multiple segment measures of profit or loss, and contain other disclosure requirements. The purpose of the amendments is to enable investors to better understand an entity's overall performance and assess potential future cash flows. This ASU is effective for annual periods beginning after December 15, 2023, and interim periods within annual periods beginning after December 15, 2024, with early adoption permitted. We are currently evaluating the impact this new standard will have on the related disclosures in the consolidated financial statements, but do not believe there will be a material impact.

In December 2023, the FASB issued ASU 2023-09, "Improvements to Income Tax Disclosures (Topic 740)". ASU 2023-09 requires enhanced disclosures on income taxes paid, adds disaggregation of continuing operations before income taxes between foreign and domestic earnings and defines specific categories for the reconciliation of jurisdictional tax rate to effective tax rate. This ASU is effective for fiscal years beginning after December 15, 2024, and can be applied on a prospective basis. We are currently evaluating the impact this new standard will have on the related disclosures in the consolidated financial statements.

From time to time, new accounting guidance is issued by the FASB or other standard setting bodies that is adopted by us as of the effective date or, in some cases where early adoption is permitted, in advance of the effective date. We have assessed the recently issued guidance that are not yet effective and, unless otherwise indicated above, we believe the new guidance will not have a material impact on our results of operations, cash flows or financial position.

Foreign Currency Translation: Assets and liabilities of our U.K. subsidiaries are denominated in pound sterling and translated into U.S. dollars at: (i) the rates of exchange at the balance sheet date, and; (ii) average rates of exchange prevailing during the year

for revenues and expenses. The currency translation adjustments are reported as a component of accumulated other comprehensive income. See *Note 3 - Financial Instruments and Fair Value Measurement* for additional disclosure.

2) ACQUISITIONS AND DIVESTITURES

Year ended December 31, 2023:

2023 Acquisitions of Assets and Businesses:

During 2023, we spent \$4 million on the acquisition of businesses and properties.

2023 Divestiture of Assets and Businesses:

During 2023, we received \$24 million from the sale of assets and businesses.

Year ended December 31, 2022:

2022 Acquisitions of Assets and Businesses:

During 2022, we spent \$20 million to acquire various businesses and properties.

2022 Divestiture of Assets:

During 2022, we received \$12 million from the sales of various assets.

Year ended December 31, 2021:

2021 Acquisitions of Assets and Businesses:

During 2021, we spent \$105 million on the acquisition of businesses and property, consisting primarily of a micro acute care hospital located in Las Vegas, Nevada, and a physician practice management company located in California.

2021 Divestiture of Assets and Businesses:

During 2021, we received \$25 million from the sale of assets and businesses.

3) FINANCIAL INSTRUMENTS AND FAIR VALUE MEASUREMENT

Cash Flow Hedges:

When applicable, we measure our interest rate swaps at fair value on a recurring basis. The fair value of our interest rate swaps is based on quotes from our counterparties. We consider those inputs to be “level 2” in the fair value hierarchy as outlined in the authoritative guidance for disclosures in connection with derivative instruments and hedging activities. During the years ended December 31, 2023, 2022 and 2021, we had no cash flow hedges outstanding.

Foreign Currency Forward Exchange Contracts:

We use forward exchange contracts to hedge our net investment in foreign operations against movements in exchange rates. The effective portion of the unrealized gains or losses on these contracts is recorded in foreign currency translation adjustment within accumulated other comprehensive income and remains there until either the sale or liquidation of the subsidiary. In connection with these forward exchange contracts, we recorded net cash outflows of approximately \$41 million during 2023, and net cash inflows of approximately \$95 million during 2022 and \$1 million during 2021.

Derivatives Hedging Relationships:

The following table presents the effects of our foreign currency foreign exchange contracts on our results of operations for the three years ended December 31 (in thousands):

	<u>Gain/(Loss) recognized in AOCI</u>		
	<u>December 31,</u> <u>2023</u>	<u>December 31,</u> <u>2022</u>	<u>December 31,</u> <u>2021</u>
<u>Net Investment Hedge relationships</u>			
Foreign currency foreign exchange contracts	\$ (45,748)	\$ 96,698	\$ (7,272)

No other gains or losses were recognized in income related to derivatives in Subtopic 815-20.

Fair Value Measurement

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The following fair value hierarchy classifies the inputs to valuation techniques used to measure fair value into one of three levels:

- Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities.
- Level 2: Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly. These included quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active.
- Level 3: Unobservable inputs that reflect the reporting entity's own assumptions.

The following tables present the assets and liabilities recorded at fair value on a recurring basis:

(in thousands)	Balance at	Balance Sheet Location	Basis of Fair Value Measurement		
	December 31, 2023		Level 1	Level 2	Level 3
<u>Assets:</u>					
Money market mutual funds	\$ 111,129	Other noncurrent assets	\$ 111,129		
Certificates of deposit	2,300	Other noncurrent assets		2,300	
Equity securities	49,923	Other noncurrent assets	49,923		
Deferred compensation assets	43,060	Other noncurrent assets	43,060		
	<u>\$ 206,412</u>		<u>\$ 204,112</u>	<u>\$ 2,300</u>	<u>-</u>
<u>Liabilities:</u>					
Foreign currency foreign exchange contracts	\$ 1,911	Accrued liabilities other		\$ 1,911	
Deferred compensation liability	43,060	Other noncurrent liabilities	43,060		
	<u>\$ 44,971</u>		<u>\$ 43,060</u>	<u>\$ 1,911</u>	<u>-</u>

(in thousands)	Balance at	Balance Sheet Location	Basis of Fair Value Measurement		
	December 31, 2022		Level 1	Level 2	Level 3
<u>Assets:</u>					
Money market mutual funds	\$ 113,649	Other noncurrent assets	\$ 113,649		
Certificates of deposit	2,200	Other noncurrent assets		2,200	
Equity securities	78,099	Other noncurrent assets	78,099		
Deferred compensation assets	38,032	Other noncurrent assets	38,032		
Foreign currency foreign exchange contracts	3,142	Other current assets		3,142	
	<u>\$ 235,122</u>		<u>\$ 229,780</u>	<u>\$ 5,342</u>	<u>-</u>
<u>Liabilities:</u>					
Deferred compensation liability	\$ 38,032	Other noncurrent liabilities	\$ 38,032		
	<u>\$ 38,032</u>		<u>\$ 38,032</u>	<u>-</u>	<u>-</u>

The fair value of our money market mutual funds, certificates of deposit and equity securities with a readily determinable fair value are computed based upon quoted market prices in an active market. The fair value of deferred compensation assets and the offsetting liability are computed based on market prices in an active market held in a rabbi trust. The fair value of our foreign currency exchange contracts is valued using quoted forward exchange rates and spot rates at the reporting date.

4) LONG-TERM DEBT

A summary of long-term debt follows:

	December 31,	
	2023	2022
	(amounts in thousands)	
Long-term debt:		
Notes and Mortgages payable (including obligations under finance leases of \$72,693 in 2023 and \$75,595 in 2022) and term loans with varying maturities through 2099; weighted average interest rates of 3.5% in 2023 and 3.6% in 2022 (see <i>Note 7</i> regarding finance leases)	\$ 178,511	\$ 184,800
Tranche A term loan	2,258,750	2,338,125
Revolving credit facility	495,500	310,400
2.65% Senior Secured Notes due 2030, net of unamortized discount of \$1,517 in 2023 and \$1,742 in 2022	798,483	798,258
1.65% Senior Secured Notes due 2026, net of unamortized discount of \$463 in 2023 and \$638 in 2022	699,537	699,362
2.65% Senior Secured Notes due 2032, net of unamortized discount of \$994 in 2023 and \$1,124 in 2022	499,006	498,876
Total debt before unamortized financing costs	4,929,787	4,829,821
Less-Unamortized financing costs	(17,318)	(21,841)
Total debt after unamortized financing costs	4,912,469	4,807,980
Less-Amounts due within one year	(126,686)	(81,447)
Long-term debt	<u>\$ 4,785,783</u>	<u>\$ 4,726,533</u>

Credit Facilities and Outstanding Debt Securities

In June, 2022, we entered into a ninth amendment to our credit agreement dated as of November 15, 2010, as amended and restated as of September, 2012, August, 2014, October, 2018, August, 2021, and September, 2021, among UHS, as borrower, the several banks and other financial institutions from time to time parties thereto, as lenders, and JPMorgan Chase Bank, N.A., as administrative agent, (the "Credit Agreement"). The ninth amendment provided for, among other things, the following: (i) a new incremental tranche A term loan facility in the aggregate principal amount of \$700 million which is scheduled to mature on August 24, 2026, and; (ii) replaces the option to make Eurodollar borrowings (which bear interest by reference to the LIBO Rate) with Term Benchmark Loans, which will bear interest by reference to the Secured Overnight Financing Rate ("SOFR"). The net proceeds generated from the incremental tranche A term loan facility were used to repay a portion of the borrowings that were previously outstanding under our revolving credit facility.

As of December 31, 2023, our Credit Agreement provided for the following:

- a \$1.2 billion aggregate amount revolving credit facility that is scheduled to mature in August, 2026 (which, as of December 31, 2023, had \$701 million of aggregate available borrowing capacity net of \$496 million of outstanding borrowings and \$3 million of letters of credit), and;
- a tranche A term loan facility with \$2.26 billion of outstanding borrowings as of December 31, 2023.

The tranche A term loan facility provides for installment payments of \$30.0 million per quarter through June, 2026. The unpaid principal balance at June 30, 2026 is payable on the August 24, 2026 scheduled maturity date of the Credit Agreement.

Revolving credit and tranche A term loan borrowings under the Credit Agreement bear interest at our election at either (1) the ABR rate which is defined as the rate per annum equal to the greatest of (a) the lender's prime rate, (b) the weighted average of the federal funds rate, plus 0.5% and (c) one month term SOFR rate plus 1%, in each case, plus an applicable margin based upon our consolidated leverage ratio at the end of each quarter ranging from 0.25% to 0.625%, or (2) the one, three or six month term SOFR rate plus 0.1% (at our election), plus an applicable margin based upon our consolidated leverage ratio at the end of each quarter ranging from 1.25% to 1.625%. As of December 31, 2023, the applicable margins were 0.50% for ABR-based loans and 1.50% for SOFR-based loans under the revolving credit and term loan A facilities. The revolving credit facility includes a \$125 million sub-limit for letters of credit. The Credit Agreement is secured by certain assets of the Company and our material subsidiaries (which generally excludes asset classes such as substantially all of the patient-related accounts receivable of our acute care hospitals, if sold to a receivables facility pursuant to the Credit Agreement, and certain real estate assets and assets held in joint-ventures with third parties) and is guaranteed by our material subsidiaries.

The Credit Agreement includes a material adverse change clause that must be represented at each draw. The Credit Agreement also contains covenants that include a limitation on sales of assets, mergers, change of ownership, liens, indebtedness, transactions with affiliates, dividends and stock repurchases; and requires compliance with financial covenants including maximum leverage. We were in compliance with all required covenants as of December 31, 2023 and 2022.

The average amounts outstanding under our Credit Agreement were \$2.629 billion during 2023, \$2.396 billion during 2022 and \$2.214 billion during 2021. The average effective interest rate on borrowings under our Credit Agreement, including amortization of deferred financing costs, were 6.80% during 2023, 3.33% during 2022 and 1.69% during 2021.

On August 24, 2021, we completed the following via private offerings to qualified institutional buyers under Rule 144A and to non-U.S. persons outside the United States in reliance on Regulation S under the Securities Act of 1933, as amended:

- Issued \$700 million of aggregate principal amount of 1.65% senior secured notes due on September 1, 2026, and;
- Issued \$500 million of aggregate principal amount of 2.65% senior secured notes due on January 15, 2032.

On September 13, 2021, we redeemed \$400 million of aggregate principal amount of 5.00% senior secured notes, that were scheduled to mature on June 1, 2026, at 102.50% of the aggregate principal, or \$410 million.

As of December 31, 2023, we had combined aggregate principal of \$2.0 billion from the following senior secured notes:

- \$700 million aggregate principal amount of 1.65% senior secured notes due in September, 2026 (“2026 Notes”) which were issued on August 24, 2021.
- \$800 million aggregate principal amount of 2.65% senior secured notes due in October, 2030 (“2030 Notes”) which were issued on September 21, 2020.
- \$500 million of aggregate principal amount of 2.65% senior secured notes due in January, 2032 (“2032 Notes”) which were issued on August 24, 2021.

Interest on the 2026 Notes is payable on March 1st and September 1st until the maturity date of September 1, 2026. Interest on the 2030 Notes is payable on April 15th and October 15th, until the maturity date of October 15, 2030. Interest on the 2032 Notes is payable on January 15th and July 15th until the maturity date of January 15, 2032.

The 2026 Notes, 2030 Notes and 2032 Notes (collectively “The Notes”) were initially issued only to qualified institutional buyers under Rule 144A and to non-U.S. persons outside the United States in reliance on Regulation S under the Securities Act of 1933, as amended (the “Securities Act”). In December, 2022, we completed a registered exchange offer in which virtually all previously outstanding Notes were exchanged for identical Notes that were registered under the Securities Act, and thereby became freely transferable (subject to certain restrictions applicable to affiliates and broker dealers). Notes originally issued under Rule 144A or Regulation S that were not exchanged remain outstanding and may not be offered or sold in the United States absent registration under the Securities Act or an applicable exemption from registration requirements thereunder.

The Notes are guaranteed (the “Guarantees”) on a senior secured basis by all of our existing and future direct and indirect subsidiaries (the “Subsidiary Guarantors”) that guarantee our Credit Agreement, or other first lien obligations or any junior lien obligations. The Notes and the Guarantees are secured by first-priority liens, subject to permitted liens, on certain of the Company’s and the Subsidiary Guarantors’ assets now owned or acquired in the future by the Company or the Subsidiary Guarantors (other than real property, accounts receivable sold pursuant to the Company’s Existing Receivables Facility (as defined in the Indenture pursuant to which The Notes were issued (the “Indenture”)), and certain other excluded assets). The Company’s obligations with respect to The Notes, the obligations of the Subsidiary Guarantors under the Guarantees, and the performance of all of the Company’s and the Subsidiary Guarantors’ other obligations under the Indenture, are secured equally and ratably with the Company’s and the Subsidiary Guarantors’ obligations under the Credit Agreement and The Notes by a perfected first-priority security interest, subject to permitted liens, in the collateral owned by the Company and its Subsidiary Guarantors, whether now owned or hereafter acquired. However, the liens on the collateral securing The Notes and the Guarantees will be released if: (i) The Notes have investment grade ratings; (ii) no default has occurred and is continuing, and; (iii) the liens on the collateral securing all first lien obligations (including the Credit Agreement and The Notes) and any junior lien obligations are released or the collateral under the Credit Agreement, any other first lien obligations and any junior lien obligations is released or no longer required to be pledged. The liens on any collateral securing The Notes and the Guarantees will also be released if the liens on that collateral securing the Credit Agreement, other first lien obligations and any junior lien obligations are released.

As discussed in *Note 9 to the Consolidated Financial Statements-Relationship with Universal Health Realty Income Trust and Other Related Party Transactions*, on December 31, 2021, we (through wholly-owned subsidiaries of ours) entered into an asset purchase and sale agreement with Universal Health Realty Income Trust (the “Trust”). Pursuant to the terms of the agreement, which was amended during the first quarter of 2022, we, among other things, transferred to the Trust, the real estate assets of Aiken Regional Medical Center (“Aiken”) and Canyon Creek Behavioral Health (“Canyon Creek”). In connection with this transaction, Aiken and Canyon Creek (as lessees), entered into a master lease and individual property leases, as amended, (with the Trust as lessor), for initial lease terms on each property of approximately twelve years, ending on December 31, 2033. As a result of our purchase option within the Aiken and Canyon Creek lease agreements, this asset purchase and sale transaction is accounted for as a failed sale leaseback in accordance with U.S. GAAP and we have accounted for the transaction as a financing arrangement. Our lease payments payable to the Trust are recorded to interest expense and as a reduction of the outstanding financial liability, and the amount allocated to interest expense is determined based upon our incremental borrowing rate and the outstanding financial liability. In connection with this

transaction, our consolidated balance sheets at December 31, 2023 and December 31, 2022 reflect financial liabilities, which are included in debt, of approximately \$77 million and \$81 million, respectively.

At December 31, 2023, the carrying value and fair value of our debt were approximately \$4.9 billion and \$4.6 billion, respectively. At December 31, 2022, the carrying value and fair value of our debt were approximately \$4.8 billion and \$4.4 billion, respectively. The fair value of our debt was computed based upon quotes received from financial institutions. We consider these to be “level 2” in the fair value hierarchy as outlined in the authoritative guidance for disclosures in connection with debt instruments.

The aggregate scheduled maturities of our total debt outstanding as of December 31, 2023 are as follows:

	(000s)
2024	\$ 126,686
2025	126,345
2026	3,220,447
2027	7,191
2028	7,751
Later	1,441,367
Total maturities before unamortized financing costs	4,929,787
Less-Unamortized financing costs	(17,318)
Total	<u>\$ 4,912,469</u>

5) COMMON STOCK

Dividends

We declared and paid cash dividends of \$.80 per share during each of the last three years amounting to, in the aggregate, \$55.5 million during 2023, \$58.4 million during 2022 and \$65.9 million during 2021. All classes of our common stock have similar economic rights.

Stock Repurchase Programs

As of January 1, 2023, we had an aggregate available purchase authorization of \$947.37 million. As of December 31, 2023, we had an aggregate available repurchase authorization of \$422.88 million. Pursuant to this program, shares of our Class B Common Stock may be repurchased, from time to time as conditions allow, on the open market or in negotiated private transactions. There is no expiration date for our stock repurchase programs.

The following schedule provides information related to our stock repurchase program for each of the three years ended December 31, 2023. During 2023, 3,855,046 shares (\$524.5 million in the aggregate) were repurchased pursuant to the terms of the stock repurchase program and 164,649 shares (\$22.9 million in the aggregate) were repurchased in connection with the income tax withholding obligations resulting from stock-based compensation programs. During 2022, 6,666,547 shares (\$810.9 million in the aggregate) were repurchased pursuant to the terms of the stock repurchase program and 153,305 shares (\$22.0 million in the aggregate) were repurchased in connection with the income tax withholding obligations resulting from stock-based compensation programs. During 2021, 8,409,721 shares (\$1.20 billion in the aggregate) were repurchased pursuant to the terms of the stock repurchase program and 134,464 shares (\$19.5 million in the aggregate) were repurchased in connection with the income tax withholding obligations resulting from stock-based compensation programs.

(a.) Includes 2,356, 8,467 and 15,756 of restricted shares that were forfeited by former employees pursuant to the terms of our restricted stock purchase plan during 2023, 2022 and 2021, respectively.

Stock-based Compensation Plans

At December 31, 2023, we have a number of stock-based employee compensation plans. Pursuant to the FASB's guidance, we expense the grant-date fair value of stock options (computed utilizing the Black-Scholes option-pricing model) and other equity-based compensation pursuant to the straight-line method over the stated vesting period of the awards.

Pre-tax share-based compensation costs of \$64.2 million during 2023, \$66.2 million during 2022 and \$59.3 million during 2021 were recognized related to outstanding stock options. In addition, pre-tax compensation costs of \$22.0 million during 2023, \$19.1 million during 2022 and \$14.4 million during 2021 were recognized related to amortization of restricted stock and units as well as discounts provided in connection with shares purchased pursuant to our 2005 Employee Stock Purchase Plan. As of December 31, 2023, there was approximately \$158.5 million of unrecognized compensation cost related to unvested stock options and restricted stock which is expected to be recognized over the remaining average vesting period of 2.4 years.

The expense associated with stock-based compensation arrangements is a non-cash charge. In the consolidated statements of cash flows, stock-based compensation expense is an adjustment to reconcile net income to cash provided by operating activities and aggregated to \$87.7 million in 2023, \$85.4 million in 2022 and \$73.7 million in 2021. In connection with our January 1, 2017 adoption of ASU 2016-09, "Compensation-Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting", our provision for income taxes and our net income attributable to UHS were unfavorably impacted by \$4.7 million during 2023, unfavorably impacted by \$636,000 during 2022 and favorably impacted by \$2.4 million in 2021.

In 2005, we adopted the 2005 Stock Incentive Plan (the "Stock Incentive Plan") which was amended in 2008, 2010, 2015 and 2017 and was canceled in 2020, as discussed below. An aggregate of 35.6 million shares of Class B Common Stock had been reserved under the Stock Incentive Plan, the remaining balance of which was canceled in 2020. During 2020 stock options, net of cancellations, of approximately 2.2 million were granted under the Stock Incentive Plan. Stock options to purchase Class B Common Stock have been granted to our officers, key employees and members of our Board of Directors. Commencing in 2018, our key employees and non-executive officers began receiving a portion of their stock-based compensation in the form of restricted stock (as discussed below) in addition to receiving options to purchase Class B Common Stock.

In 2020, we adopted the 2020 Omnibus Stock and Incentive Plan (the "2020 Stock Incentive Plan") which was amended in 2022. An aggregate of 12.1 million shares of Class B Common Stock has been reserved for issuance under the 2020 Stock Incentive Plan. Under the 2020 Stock Incentive Plan, shares that are subject to stock options shall be counted as one share per stock option, and every share that is subject to restricted stock awards or restricted stock units shall be counted as four shares. Various other types of equity awards are also permitted under the 2020 Stock Incentive Plan. During 2023, approximately 1.8 million stock options, net of cancellations, and 271,093 restricted stock units (including 93,606 performance based restricted stock units, net of cancellations) were granted under the 2020 Stock Incentive Plan. During 2022, approximately 1.5 million stock options, net of cancellations, and 215,244 restricted stock units (including 65,768 performance based restricted stock units, net of cancellations) were granted under the 2020 Stock Incentive Plan. During 2021, approximately 2.0 million stock options, net of cancellations, and 119,004 of restricted stock units, net of cancellations, were granted under the 2020 Stock Incentive Plan. Restricted stock and restricted stock units issued under the 2020 Stock Incentive Plan do not have rights to receive dividends on unvested restricted awards, however, the accrual of dividend equivalents on unvested restricted awards may be permitted. Upon adoption of the 2020 Stock Incentive Plan, no additional awards were granted under the 2005 Stock Incentive Plan or the 2010 Employees' Restricted Stock Purchase Plan (discussed below), and reserves for future issuance pursuant to each plan were canceled.

The per option weighted-average grant-date fair value of options granted during 2023 under the 2020 Stock Incentive Plan was \$41.88. The per option weighted-average grant-date fair value of options granted during 2022 under the 2020 Stock Incentive Plan was \$45.63. The per option weighted-average grant-date fair value of options granted during 2021 under the 2020 Stock Incentive Plan was \$39.66. All stock options issued in 2023 and 2022 were granted with an exercise price equal to the fair market value on the date of the grant. Stock options granted during 2021 were either granted with an exercise price equal to the fair market value on the date of grant, or for our named executive officers, half of their total option award value was issued with a premium exercise price of 10% above the grant date fair market value. The majority of options are exercisable ratably over a four-year period beginning one year after the date of the grant. All outstanding options expire five years after the date of the grant. As of December 31, 2023, approximately 4.31 million shares of Class B Common Stock remain available for issuance pursuant to the 2020 Stock Incentive Plan.

The fair value of each option grant was estimated on the date of grant using the Black-Scholes option-pricing model. The following weighted average assumptions were derived from averaging the number of options granted during the most recent five-year period. The weighted-average assumptions reflected below were based upon thirty option grants for the five-year period ending

December 31, 2023, twenty-nine option grants for the five-year period ending December 31, 2022 and twenty-eight option grants for the five-year period ending December 31, 2021.

<u>Year Ended December 31,</u>	<u>2023</u>	<u>2022</u>	<u>2021</u>
Expected volatility	36%	33%	31%
Risk free Interest rate	2%	2%	2%
Expected life (years)	3.5	3.6	3.5
Forfeiture rate	7%	7%	8%
Dividend yield	0.7%	0.6%	0.5%

The risk-free rate is based on the U.S. Treasury zero coupon four year yield curve in effect at the time of grant. The expected life of the stock options granted was estimated using the historical behavior of employees. Expected volatility was based on historical volatility for a period equal to the stock option's expected life. Expected dividend yield is based on our dividend yield at the time of grant. The forfeiture rate is based upon the actual historical forfeitures utilizing the 5-year term of the option.

The table below summarizes our stock option activity during the year ended December 31, 2023:

<u>Outstanding Options</u>	<u>Number of Shares</u>	<u>Weighted Average Exercise Price</u>
Balance, January 1, 2023	7,875,667	\$ 122.04
Granted	1,916,756	\$ 118.78
Exercised	(2,575,468)	\$ 121.22
Cancelled	(422,161)	\$ 126.87
Balance, December 31, 2023	6,794,794	\$ 121.13
Outstanding options vested and exercisable as of December 31, 2023	2,450,613	\$ 114.96

The following table provides information about unvested options for the year ended December 31, 2023:

	<u>Shares</u>	<u>Weighted Average Grant Date Fair Value</u>
Unvested options as of January 1, 2023	4,801,953	\$ 35.09
Granted	1,916,756	\$ 41.88
Vested	(1,989,313)	\$ 31.64
Cancelled	(385,215)	\$ 40.09
Unvested options as of December 31, 2023	4,344,181	\$ 39.22

The following table provides information regarding all options outstanding at December 31, 2023:

	<u>Options Outstanding</u>	<u>Options Exercisable</u>
Number of options outstanding	6,794,794	2,450,613
Weighted average exercise price	\$ 121.13	\$ 114.96
Aggregate intrinsic value as of December 31, 2023	\$212,853,349	\$91,893,004
Weighted average remaining contractual life (years)	2.6	1.5

The total in-the-money value of all stock options exercised during the years ended December 31, 2023, 2022 and 2021 were \$57.1 million, \$49.4 million and \$52.0 million, respectively.

The weighted average remaining contractual life for options outstanding and weighted average exercise price per share for exercisable options at December 31, 2021, 2022 and 2023 were as follows:

<u>Year Ended:</u>	<u>Options Outstanding Shares</u>	<u>Weighted Average Exercise Price Per Share</u>	<u>Weighted Average Remaining Contractual Life (in Years)</u>	<u>Exercisable Options Shares</u>	<u>Weighted Average Exercise Price Per Share</u>	<u>Expected to Vest Options Shares</u>	<u>Weighted Average Exercise Price Per Share</u>
2021	8,556,115	116.80	2.6	2,997,296	119.00	5,005,113	116.94
2022	7,875,667	122.04	2.5	3,073,714	116.89	4,508,480	121.89
2023	6,794,794	121.13	2.6	2,450,613	114.96	4,178,237	124.86

As mentioned above, in 2020, we adopted the 2020 Stock Incentive Plan. During 2023, 2022 and 2021 restricted stock units, net of cancellations, of approximately 271,093 (including 93,606 performance based restricted stock units), 215,244 (including 65,768 performance based restricted stock units, net of cancellations) and 119,004, respectively, were granted under the 2020 Stock Incentive Plan with four-year vesting periods from the date of grant. The weighted average grant-date fair value of the restricted stock units issued during 2023, 2022 and 2021 under the 2020 Stock Incentive Plan was \$118.14, \$142.70 and \$138.80, respectively. The fair value of each restricted stock unit was determined as the closing UHS market price on the date of grant. Restricted shares and/or units of Class B Common Stock have been granted to our officers, key employees and members of our Board of Directors.

In addition to the 2020 Stock Incentive Plan, we have our 2005 Employee Stock Purchase Plan (the “Employee Stock Plan”) which allows eligible employees to purchase shares of Class B Common Stock at a ten percent discount. There were 100,507, 127,538 and 96,179 shares issued pursuant to the Employee Stock Purchase Plan during 2023, 2022 and 2021, respectively. In connection with the Employee Stock Plan, we have reserved 2.0 million shares of Class B Common Stock for issuance and have issued approximately 1.8 million shares as of December 31, 2023. As of December 31, 2023, approximately 200,000 shares of Class B Common Stock remain available for issuance pursuant to this plan.

At December 31, 2023, 20,543,028 shares of Class B Common Stock were reserved for issuance upon conversion of shares of Class A, C and D Common Stock outstanding, for issuance upon exercise of options to purchase Class B Common Stock and for issuance of stock under other incentive plans. Class A, C and D Common Stock are convertible on a share for share basis into Class B Common Stock.

6) INCOME TAXES

Components of income tax expense/(benefit) are as follows (amounts in thousands):

	<u>Year Ended December 31,</u>		
	<u>2023</u>	<u>2022</u>	<u>2021</u>
Current			
Federal	\$ 202,895	\$ 178,666	\$ 276,471
Foreign	6,505	14,740	13,754
State	29,677	33,423	44,993
	<u>239,077</u>	<u>226,829</u>	<u>335,218</u>
Deferred			
Federal	(19,716)	(9,935)	(26,638)
Foreign	3,367	(1,509)	1,521
State	(1,609)	(6,107)	(4,420)
	<u>(17,958)</u>	<u>(17,551)</u>	<u>(29,537)</u>
Total	<u>\$ 221,119</u>	<u>\$ 209,278</u>	<u>\$ 305,681</u>

Our provision for income taxes for the years ended December 31, 2023, 2022 and 2021 included tax expenses of \$5 million, tax expenses of \$1 million and tax benefits of \$2 million, respectively, related to employee share-based payments. Excess tax benefits (when the deductible amount related to the settlement of employee equity awards for tax purposes exceeds the cumulative compensation cost recognized for financial reporting purposes) and deficiencies, if applicable, are recorded as a component of our tax provision.

The foreign provision for income taxes is based on foreign pre-tax earnings of \$80 million in 2023, \$76 million in 2022 and \$79 million in 2021. In the future, we anticipate repatriating only previously taxed foreign earnings subjected as well as any future earnings that would qualify for a full dividend received deduction for distributions post-December 31, 2017. As of December 31, 2023, the amount of previously taxed earnings and earnings that would qualify for a full dividend received deduction total \$100 million. At this time, there are no material tax effects related to future cash repatriation of undistributed foreign earnings. As such, we have not recognized a deferred tax liability related to existing undistributed earnings.

On August 16, 2022, the U.S. federal government enacted the Inflation Reduction Act of 2022 (“the Act”). The Act includes tax provisions, among other things, which implements (i) a 15 percent minimum tax on book income of certain large corporations; (ii) a

one percent excise tax on net stock repurchases; and (iii) several tax incentives to promote clean energy. The Act does not have a material impact on our income tax provision.

A reconciliation between the federal statutory rate and the effective tax rate is as follows:

	Year Ended December 31,		
	2023	2022	2021
Federal statutory rate	21.0%	21.0%	21.0%
State taxes, net of federal income tax benefit	2.4%	2.4%	2.5%
Tax effects of foreign operations	-0.7%	-0.3%	-0.1%
Tax benefit from settlement of employee equity awards	0.4%	0.1%	-0.2%
Other items	0.4%	0.5%	0.3%
Impact of income attributable to noncontrolling interests	0.0%	0.5%	0.1%
Effective tax rate	<u>23.5%</u>	<u>24.2%</u>	<u>23.6%</u>

Our effective tax rates were 23.5%, 24.2% and 23.6% for the years ended December 31, 2023, 2022 and 2021, respectively. The decrease in our effective tax rate for the year ended December 31, 2023, as compared to 2022, is due primarily to the increase in net income attributable to noncontrolling interests during 2023, as compared to 2022. The increase in our effective tax rate for the year ended December 31, 2022, as compared to 2021, is due to the decrease in net income attributable to noncontrolling interests during 2022, as compared to 2021.

Included in “Other current assets” on our consolidated balance sheets are prepaid federal, state and foreign income taxes amounting to approximately \$37 million and \$17 million as of December 31, 2023 and 2022, respectively.

The components of deferred taxes are as follows (amounts in thousands):

	Year Ended December 31,			
	2023		2022	
	Assets	Liabilities	Assets	Liabilities
Self-insurance reserves	\$ 118,824	\$	\$ 103,528	\$
Compensation accruals	81,747		77,269	
Doubtful accounts and other reserves	123,634		141,511	
Other currently non-deductible accrued liabilities	19,926		12,520	
Depreciable and amortizable assets		280,678		281,203
Operating lease liabilities	106,590		108,704	
Right of use assets-operating leases		101,853		106,675
State and foreign net operating loss carryforwards and other state and foreign deferred tax assets	96,117		80,823	
Net pension liabilities – OCI only	701		1,702	
Other liabilities		6,715		6,457
	<u>\$ 547,539</u>	<u>\$ 389,246</u>	<u>\$ 526,057</u>	<u>\$ 394,335</u>
Valuation allowance	(72,667)	0	(63,325)	0
Total deferred income taxes	<u>\$ 474,872</u>	<u>\$ 389,246</u>	<u>\$ 462,732</u>	<u>\$ 394,335</u>

At December 31, 2023, state net operating loss carryforwards (losses originating in tax years beginning prior to January 1, 2023, expiring in years 2024 through 2042), and credit carryforwards available to offset future taxable income approximated \$1 billion representing approximately \$72 million in deferred state tax benefit (net of the federal benefit); and state related interest expense carryforwards approximated \$58 million representing approximately \$3 million in deferred state tax benefit (net of the federal benefit). At December 31, 2023, there were foreign net operating losses and interest expense carryforwards of approximately \$77 million, most of which are carried forward indefinitely, representing approximately \$19 million in deferred foreign tax benefit. At December 31, 2023, related to a prior year stock acquisition, there were federal net operating losses of approximately \$8 million carried forward indefinitely for federal purposes representing approximately \$2 million in deferred federal tax benefits.

A valuation allowance is required when it is more likely than not that some portion of the deferred tax assets will not be realized. Based on available evidence, it is more likely than not that certain of our state tax benefits will not be realized. Therefore, valuation allowances of approximately \$68 million and \$59 million have been reflected as of December 31, 2023 and 2022, respectively. During 2023, the valuation allowance on these state tax benefits increased by \$9 million primarily due to additional net operating losses incurred. In addition, valuation allowances of approximately \$4 million have been reflected as of December 31, 2023 and 2022, related to foreign net operating losses and credit carryforwards.

During 2023 and 2022, the estimated liabilities for uncertain tax positions (including accrued interest and penalties) were increased less than \$1 million due to tax positions taken in the current and prior years. The balance at each of the years ended

December 31, 2023 and 2022, if subsequently recognized, that would favorably affect the effective tax rate and the provision for income taxes is approximately \$2 million as of each date.

We recognize accrued interest and penalties associated with uncertain tax positions as part of the tax provision. As of December 31, 2023 and 2022, we have accrued interest and penalties of less than \$1 million as of each date. The U.S. federal statute of limitations remains open for the 2020 and subsequent years. Foreign and U.S. state and local jurisdictions have statutes of limitations generally ranging for 3 to 4 years. The statute of limitations on certain jurisdictions could expire within the next twelve months. It is reasonably possible that the amount of unrecognized tax benefits will change during the next 12 months, however, it is anticipated that any such change, if it were to occur, would not have a material impact on our results of operations.

The tabular reconciliation of unrecognized tax benefits for the years ended December 31, 2023, 2022 and 2021 is as follows (amounts in thousands):

	As of December 31,		
	2023	2022	2021
Balance at January 1,	\$ 2,727	\$ 2,544	\$ 2,806
Additions based on tax positions related to the current year	500	500	500
Additions for tax positions of prior years	180	159	213
Reductions for tax positions of prior years	(557)	(461)	(261)
Settlements	0	(15)	(714)
Balance at December 31,	<u>\$ 2,850</u>	<u>\$ 2,727</u>	<u>\$ 2,544</u>

7) LEASE COMMITMENTS

We follow FASB ASU 2016-02 ("Topic 842") "Leases." Under Topic 842, lessees are required to recognize assets and liabilities on the balance sheets for most leases and provide enhanced disclosures. Leases will be classified as either finance or operating.

We have elected the policy exemption that allows lessees to choose to not separate lease and non-lease components by class of underlying asset and are applying this expedient to all relevant asset classes.

We determine if an arrangement is or contains a lease at inception of the contract. Our right-of-use assets represent our right to use the underlying assets for the lease term and our lease liabilities represent our obligation to make lease payments arising from the leases. Right-of-use assets and lease liabilities are recognized at commencement date based on the present value of lease payments over the lease term. We use the implicit rate noted within the contract if known or determinable. If the implicit rate is not readily available, we use our estimated incremental borrowing rate, which is derived using a collateralized borrowing rate for the same currency and term as the associated lease. A right-of-use asset and lease liability is not recognized for leases with an initial term of 12 months or less and we recognize lease expense for these leases on a straight-line basis over the lease term within lease and rental expense.

Our operating leases are primarily for real estate, including certain acute care facilities, off-campus outpatient facilities, medical office buildings, and corporate and other administrative offices. Our real estate lease agreements typically have initial terms of five to ten years. These real estate leases may include one or more options to renew, with renewals that can extend the lease term from five to ten years. The exercise of lease renewal options is at our sole discretion. When determining the lease term, we included options to extend or terminate the lease when it is reasonably certain that we will exercise that option.

Five of our hospital facilities are held under operating leases with Universal Health Realty Income Trust with two hospital terms expiring in 2026, two expiring in 2033, and one expiring in 2040 (see Note 9 for additional disclosure). We also lease the real property of certain facilities (see Item 2. Properties for additional disclosure).

The components of lease expense for the years ended December 31, 2023, 2022 and 2021 are as follows (in thousands):

	Twelve months ended December 31,		
	2023	2022	2021
Operating lease cost	\$ 99,812	\$ 90,326	\$ 77,420
Variable and short term lease cost (a)	41,214	41,300	41,443
Total lease and rental expense	<u>\$ 141,026</u>	<u>\$ 131,626</u>	<u>\$ 118,863</u>
Finance lease cost:			
Amortization of property under capital lease	\$ 4,998	\$ 5,110	\$ 3,626
Interest on debt of property under capital lease	3,771	3,903	4,124
Total finance lease cost	<u>\$ 8,769</u>	<u>\$ 9,013</u>	<u>\$ 7,750</u>

(a) Includes equipment, month-to-month and leases with a maturity of less than 12 months.

Supplemental cash flow information related to leases for the years ended December 31, 2023, 2022 and 2021 are as follows (in thousands):

	Twelve months ended December 31,		
	2023	2022	2021
Cash paid for amounts included in the measurement of lease liabilities:			
Operating cash flows from operating leases	\$ 129,299	\$ 124,704	\$ 118,433
Operating cash flows from finance leases	\$ 3,832	\$ 3,963	\$ 4,612
Financing cash flows from finance leases	\$ 3,817	\$ 3,454	\$ 2,849

Weighted Average discount rate		
Operating leases	5.2%	5.0%
Finance leases	5.5%	5.4%

Future maturities of lease liabilities as of December 31, 2023 are as follows (in thousands):

	<u>Operating Leases</u>	<u>Finance Leases</u>
Year ending December 31,		
2024	\$ 84,621	\$ 6,716
2025	77,848	5,943
2026	68,363	5,948
2027	50,291	6,104
2028	38,042	6,265
Later years	<u>595,748</u>	<u>95,309</u>
Total lease payments	914,913	126,285
less imputed interest	<u>(460,754)</u>	<u>(53,592)</u>
Total	<u>\$ 454,159</u>	<u>\$ 72,693</u>

We assumed approximately \$1 million in finance lease obligations during each of 2023 and 2022 and \$29 million during 2021. In the ordinary course of business, our facilities routinely lease equipment pursuant to new lease arrangements that will likely result in future lease and rental expense in excess of amounts indicated above.

8) COMMITMENTS AND CONTINGENCIES

Professional and General Liability, Workers' Compensation Liability

The vast majority of our subsidiaries are self-insured for professional and general liability exposure up to: (i) \$20 million for professional liability and \$3 million for general liability per occurrence in 2023, 2022 and 2021; (ii) \$10 million and \$3 million per occurrence in 2020; (iii) \$5 million and \$3 million per occurrence, respectively, during 2019, 2018 and 2017, and; (iv) \$10 million and \$3 million per occurrence, respectively, prior to 2017.

These subsidiaries are provided with several excess policies through commercial insurance carriers which provide for coverage in excess of the applicable per occurrence and aggregate self-insured retention or underlying policy limits up to approximately

\$165 million in 2023; \$162 million in 2022; \$155 million in 2021 and \$250 million during each of 2014 through 2020. In addition, from time to time based upon marketplace conditions, we may elect to purchase additional commercial coverage for certain of our facilities or businesses. Our behavioral health care facilities located in the U.K. have policies through a commercial insurance carrier located in the U.K. that provides for £16 million of professional liability coverage, and £25 million of general liability coverage.

As of December 31, 2023, the total net accrual for our professional and general liability claims was \$431 million, of which \$70 million was included in current liabilities. As of December 31, 2022, the total net accrual for our professional and general liability claims was \$372 million, of which \$74 million was included in current liabilities.

As a result of unfavorable trends experienced during the last three years, our results of operations included pre-tax increases to our reserves for self-insured professional and general liability claims amounting to approximately \$25 million during 2023, \$16 million during 2022 and \$52 million during 2021. Our estimated liability for self-insured professional and general liability claims is based on a number of factors including, among other things, the number of asserted claims and reported incidents, estimates of losses for these claims based on recent and historical settlement amounts, estimates of incurred but not reported claims based on historical experience, and estimates of amounts recoverable under our commercial insurance policies. While we continuously monitor these factors, our ultimate liability for professional and general liability claims could change materially from our current estimates due to inherent uncertainties involved in making this estimate. Given our significant self-insured exposure for professional and general liability claims, there can be no assurance that a sharp increase in the number and/or severity of claims asserted against us will not have a material adverse effect on our future results of operations.

As of December 31, 2023, the total accrual for our workers' compensation liability claims was \$130 million, \$55 million of which was included in current liabilities. As of December 31, 2022, the total accrual for our workers' compensation liability claims was \$125 million, \$55 million of which was included in current liabilities. As a result of favorable trends experienced during the year, included in our results of operations during 2023 was a pre-tax decrease to our reserves for self-insured workers' compensation liability claims of approximately \$10 million.

Although we are unable to predict whether or not our future financial statements will require updates to estimates for our prior year reserves for self-insured general and professional and workers' compensation claims, given the relatively unpredictable nature of these potential liabilities and the factors impacting these reserves, as discussed above, it is reasonably likely that our future financial results may include material adjustments to prior period reserves.

Below is a schedule showing the changes in our general and professional liability and workers' compensation reserves during the three years ended December 31, 2023 (amount in thousands):

	<u>General and Professional Liability</u>	<u>Workers' Compensation</u>	<u>Total</u>
Balance at January 1, 2021	\$ 263,779	\$ 105,185	\$ 368,964
Plus: Accrued insurance expense, net of commercial premiums paid	129,690	56,525	186,215
Less: Payments made in settlement of self-insured claims	<u>(44,776)</u>	<u>(46,725)</u>	<u>(91,501)</u>
Balance at January 1, 2022	348,693	114,985	463,678
Plus: Accrued insurance expense, net of commercial premiums paid	111,763	62,960	174,723
Less: Payments made in settlement of self-insured claims	<u>(88,556)</u>	<u>(53,429)</u>	<u>(141,985)</u>
Balance at January 1, 2023	371,900	124,516	496,416
Plus: Accrued insurance expense, net of commercial premiums paid	127,445	56,017	183,462
Less: Payments made in settlement of self-insured claims	<u>(67,860)</u>	<u>(50,229)</u>	<u>(118,089)</u>
Balance at December 31, 2023	<u>\$ 431,485</u>	<u>\$ 130,304</u>	<u>\$ 561,789</u>

Property Insurance

We have commercial property insurance policies for our properties providing property and business interruption coverage for losses in excess of \$25 million per occurrence or per location (as applicable based upon the event) up to a \$1 billion annual policy limitation for certain catastrophic events or perils. These commercial policies provide for coverage of up to \$250 million of annual aggregate coverage for losses resulting from windstorm damage. Losses resulting from named windstorms are subject to deductibles between 3% and 5% of the total insurable value of the property. In addition, we have commercial property insurance policies covering catastrophic losses resulting from earthquake and flood damage, each subject to aggregated loss limits (as opposed to per occurrence losses). Commercially insured earthquake coverage for our facilities is subject to various deductibles and limitations including: (i) \$100 million limitation for our facilities located in California, New Madrid Seismic Zone, Pacific Northwest Seismic Zone, Alaska and various counties in Nevada; (ii) \$100 million limitation for our facilities located in fault zones within the United States; (iii) \$40 million limitation for our facilities located in Puerto Rico, and; (iv) \$250 million limitation for many of our facilities

located in other states. Our commercially insured flood coverage has a limit of \$100 million annually. There is also a \$10 million sublimit for one of our facilities located in Houston, Texas, and a \$1 million sublimit for our facilities located in Puerto Rico. Property insurance for our behavioral health facilities located in the U.K. are provided on an all risk basis up to a £1.5 billion policy limit, with coverage caps per location, that includes coverage for real and personal property as well as business interruption losses.

These commercial policies are subject to a deductible of: (i) \$5 million per location for damage resulting from earthquake, wind, hail and flood, and; (ii) \$5 million per occurrence for all other events. For per location or per occurrence losses in excess of the applicable deductible, we are self-insured, through our wholly-owned captive, for up to \$20 million of annual aggregate losses. Should the \$20 million self-insured annual aggregate limitation be exhausted during the policy year, we have commercial insurance coverage for the next \$20 million of annual aggregate losses in excess of the applicable deductible. In the event the \$20 million of commercial coverage is also exhausted, we are self-insured for all per location or per occurrence losses up to \$25 million, including the \$5 million deductible.

Commitment to Develop, Lease and Operate an Acute Care Hospital in Washington, D.C.

During 2020, we entered into various agreements with the District of Columbia (the “District”) related to the development, leasing and operation of an acute care hospital and certain other facilities/structures on land owned by the District (“District Facilities”). The agreements contemplate that we will serve as manager for development and construction of the District Facilities on behalf of the District, with a projected aggregate cost of approximately \$439 million, approximately \$210 million of which was incurred as of December 31, 2023, which will be entirely funded by the District. Construction of the District Facilities is expected to be completed during 2025.

Upon completion of the District Facilities, we will lease the District Facilities for a nominal rental amount for a period of 75 years and are obligated to operate the District Facilities during the lease term. We have certain lease termination rights in connection with the District Facilities beginning on the tenth anniversary of the lease commencement date for various and decreasing amounts as provided for in the agreements. Additionally, any time after the 10th anniversary of the lease term, we have a right to purchase the District Facilities for a price equal to the greater of fair market value of the District Facilities or the amount necessary to defease the bonds issued by the District to fund the construction of the District Facilities. The lease agreement also entitles the District to participation rent should certain specified earnings before interest, taxes, depreciation and amortization thresholds be achieved by the acute care hospital.

Additionally, we have committed to expend no less than \$75 million (approximately \$5 million of which has been incurred as of December 31, 2023), over a projected 12-year period, in healthcare infrastructure including expenditures related to the District Facilities as well as other healthcare related expenditures in certain specified areas of Washington, D.C. Pursuant to the agreements, the District is entitled to certain termination fees and other amounts as specified in the agreements in the event we, within certain specified periods of time, cease to operate the acute care hospital or there is a transfer of control of us or our subsidiary operating the hospital.

Information Technology Incident

In connection with an information technology security incident in late September, 2020, our results of operations for the years ended December 31, 2022 and 2021 were favorably impacted by an aggregate of approximately \$13 million and \$45 million, respectively, resulting from receipt of commercial cyber insurance proceeds (approximately \$41 million in the aggregate during 2022 and 2021), and; (ii) collection of revenues previously reserved during 2020 (approximately \$17 million during 2021).

Other Contractual Commitments:

In addition to our long-term debt obligations as discussed in *Note 4 - Long-Term Debt* and our operating lease obligations as discussed in *Note 7 - Lease Commitments*, we have various other contractual commitments outstanding as of December 31, 2023 as follows: (i) other combined estimated future purchase obligations of \$327 million related to a long-term contract with third-parties consisting primarily of certain revenue cycle data processing services for our acute care facilities (\$65 million), expected future costs to be paid to a third-party vendor in connection with the ongoing operation of an electronic health records application and purchase implementation of a revenue cycle and other applications for our acute care facilities (\$188 million), healthcare infrastructure in Washington D.C. in connection with various agreements with the District of Columbia (\$70 million), and other software applications (\$4 million); (ii) estimated construction commitment of \$99 million representing our share of the construction cost of two behavioral health care facilities scheduled to be completed in 2025 that, subject to approval of certain regulatory conditions, we are required to build pursuant to joint-venture agreements with a third-party; (iii) combined estimated future payments of \$165 million related to our non-contributory, defined benefit pension plan (\$139 million consisting of estimated payments through 2080) and other retirement plan liabilities (\$26 million), and; (iv) accrued and unpaid estimated claims expense incurred in connection with our commercial health insurers and self-insured employee benefit plans (\$110 million).

Legal Proceedings

We operate in a highly regulated and litigious industry which subjects us to various claims and lawsuits in the ordinary course of business as well as regulatory proceedings and government investigations. These claims or suits include claims for damages for

personal injuries, medical malpractice, commercial/contractual disputes, wrongful restriction of, or interference with, physicians' staff privileges, and employment related claims. In addition, health care companies are subject to investigations and/or actions by various state and federal governmental agencies or those bringing claims on their behalf. Government action has increased with respect to investigations and/or allegations against healthcare providers concerning possible violations of fraud and abuse and false claims statutes as well as compliance with clinical and operational regulations. Currently, and from time to time, we and some of our facilities are subjected to inquiries in the form of subpoenas, Civil Investigative Demands, audits and other document requests from various federal and state agencies. These inquiries can lead to notices and/or actions including repayment obligations from state and federal government agencies associated with potential non-compliance with laws and regulations. Further, the federal False Claims Act allows private individuals to bring lawsuits (qui tam actions) against healthcare providers that submit claims for payments to the government. Various states have also adopted similar statutes. When such a claim is filed, the government will investigate the matter and decide if they are going to intervene in the pending case. These qui tam lawsuits are placed under seal by the court to comply with the False Claims Act's requirements. If the government chooses not to intervene, the private individual(s) can proceed independently on behalf of the government. Health care providers that are found to violate the False Claims Act may be subject to substantial monetary fines/penalties as well as face potential exclusion from participating in government health care programs or be required to comply with Corporate Integrity Agreements as a condition of a settlement of a False Claims Act matter. In September 2014, the Criminal Division of the Department of Justice ("DOJ") announced that all qui tam cases will be shared with their Division to determine if a parallel criminal investigation should be opened. The DOJ has also announced an intention to pursue civil and criminal actions against individuals within a company as well as the corporate entity or entities. In addition, health care facilities are subject to monitoring by state and federal surveyors to ensure compliance with program Conditions of Participation. In the event a facility is found to be out of compliance with a Condition of Participation and unable to remedy the alleged deficiency(s), the facility faces termination from the Medicare and Medicaid programs or compliance with a System Improvement Agreement to remedy deficiencies and ensure compliance.

The laws and regulations governing the healthcare industry are complex covering, among other things, government healthcare participation requirements, licensure, certification and accreditation, privacy of patient information, reimbursement for patient services as well as fraud and abuse compliance. These laws and regulations are constantly evolving and expanding. Further, the Legislation has added additional obligations on healthcare providers to report and refund overpayments by government healthcare programs and authorizes the suspension of Medicare and Medicaid payments "pending an investigation of a credible allegation of fraud." We monitor our business and have developed an ethics and compliance program with respect to these complex laws, rules and regulations. Although we believe our policies, procedures and practices comply with government regulations, there is no assurance that we will not be faced with the sanctions referenced above which include fines, penalties and/or substantial damages, repayment obligations, payment suspensions, licensure revocation, and expulsion from government healthcare programs. Even if we were to ultimately prevail in any action brought against us or our facilities or in responding to any inquiry, such action or inquiry could have a material adverse effect on us.

Certain legal matters are described below:

Knight v. Miller, et. al.

In July 2021, a shareholder derivative lawsuit was filed by plaintiff, Robin Knight, in the Chancery Court in Delaware against the members of the Board of Directors of the Company as well as certain officers (C.A. No.: 2021-0581-SG). The Company was named as a nominal defendant. The lawsuit alleges that in March 2020 stock options were awarded with exercise prices that did not reflect the Company's fundamentals and business prospects, and in anticipation of future market rebound resulting in excessive gains. The lawsuit makes claims of breaches of fiduciary duties, waste of corporate assets, and unjust enrichment. The lawsuit seeks monetary damages allegedly incurred by the Company, disgorgement of the March 2020 stock awards as well as any proceeds derived therefrom and unspecified equitable relief. Defendants deny the allegations. We filed a motion to dismiss the complaint and the court granted part and denied part of our motion. During the third quarter of 2022, we reached a preliminary settlement, which would not have had a material impact on our consolidated financial statements. The settlement required court approval which the court declined to provide. Our Board of Directors has authorized the formation of a Special Litigation Committee to review the matter and determine whether it is in the best interests of the Company to pursue this claim. The court has stayed the litigation until March 31, 2024 while the Special Litigation Committee conducts their review. We are uncertain as to potential liability or financial exposure, if any, which may be associated with this matter.

Disproportionate Share Hospital Payment Matter:

In late September, 2015, many hospitals in Pennsylvania, including certain of our behavioral health care hospitals located in the state, received letters from the Pennsylvania Department of Human Services (the "Department") demanding repayment of allegedly excess Medicaid Disproportionate Share Hospital payments ("DSH"), primarily consisting of managed care payments characterized as DSH payments, for the federal fiscal year ("FFY") 2011 amounting to approximately \$4 million in the aggregate. Since that time, certain of our behavioral health care hospitals in Pennsylvania have received similar requests for repayment for alleged DSH overpayments for FFYs 2012 through 2015. For FFY 2012, the claimed overpayment amounts to approximately \$4 million. For FFY 2013, FFY 2014 and FFY 2015 the initial claimed overpayments and attempted recoupment by the Department were approximately \$7

million, \$8 million and \$7 million, respectively. The Department has agreed to a change in methodology which, upon confirmation of the underlying data being accepted by the Department, could reduce the initial claimed overpayments for FFY 2013, FFY 2014 and FFY 2015 to approximately \$2 million, \$2 million and \$3 million, respectively. We filed administrative appeals for all of our facilities contesting the recoupment efforts for FFYs 2011 through 2015 as we believe the Department's calculation methodology is inaccurate and conflicts with applicable federal and state laws and regulations. The Department has agreed to postpone the recoupment of the state's share for FFY 2011 to 2013 until all hospital appeals are resolved but started recoupment of the federal share. For FFY 2014 and FFY 2015, the Department has initiated the recoupment of the alleged overpayments. Starting in FY 2016, the first full fiscal year after the January 1, 2015 effective date of Medicaid expansion in Pennsylvania, the Department no longer characterized managed care payments received by the hospitals as DSH payments. We can provide no assurance that we will ultimately be successful in our legal and administrative appeals related to the Department's repayment demands. If our legal and administrative appeals are unsuccessful, our future consolidated results of operations and financial condition could be adversely impacted by these repayments.

Other Matters:

Various other suits, claims and investigations, including government subpoenas, arising against, or issued to, us are pending and additional such matters may arise in the future. Management will consider additional disclosure from time to time to the extent it believes such matters may be or become material. The outcome of any current or future litigation or governmental or internal investigations, including the matters described above, cannot be accurately predicted, nor can we predict any resulting penalties, fines or other sanctions that may be imposed at the discretion of federal or state regulatory authorities. We record accruals for such contingencies to the extent that we conclude it is probable that a liability has been incurred and the amount of the loss can be reasonably estimated. No estimate of the possible loss or range of loss in excess of amounts accrued, if any, can be made at this time regarding the matters described above or that are otherwise pending because the inherently unpredictable nature of legal proceedings may be exacerbated by various factors, including, but not limited to: (i) the damages sought in the proceedings are unsubstantiated or indeterminate; (ii) discovery is not complete; (iii) the matter is in its early stages; (iv) the matters present legal uncertainties; (v) there are significant facts in dispute; (vi) there are a large number of parties, or; (vii) there is a wide range of potential outcomes. It is possible that the outcome of these matters could have a material adverse impact on our future results of operations, financial position, cash flows and, potentially, our reputation.

9) RELATIONSHIP WITH UNIVERSAL HEALTH REALTY INCOME TRUST AND OTHER RELATED PARTY TRANSACTIONS

Relationship with Universal Health Realty Income Trust:

At December 31, 2023, we held approximately 5.7% of the outstanding shares of Universal Health Realty Income Trust (the "Trust"). We serve as Advisor to the Trust under an annually renewable advisory agreement, which is scheduled to expire on December 31st of each year, pursuant to the terms of which we conduct the Trust's day-to-day affairs, provide administrative services and present investment opportunities. The advisory agreement was renewed by the Trust for 2024 at the same rate in place for 2023, 2022 and 2021, providing for an advisory computation at 0.70% of the Trust's average invested real estate assets. We earned an advisory fee from the Trust, which is included in net revenues in the accompanying consolidated statements of income, of approximately \$5.3 million during 2023, \$5.1 million during 2022 and \$4.4 million during 2021.

In addition, certain of our officers and directors are also officers and/or directors of the Trust. Management believes that it has the ability to exercise significant influence over the Trust, therefore we account for our investment in the Trust using the equity method of accounting.

Our pre-tax share of income from the Trust was \$874,000 during 2023, \$1.2 million during 2022 and \$6.2 million during 2021, which are included in other income (expense), net, on the accompanying consolidated statements of income for each year. We received dividends from the Trust amounting to \$2.3 million during 2023 and \$2.2 million during each of 2022 and 2021. Included in our share of the Trust's income during 2021 was approximately \$5.0 million related to our share of gains on various transactions recorded by the Trust, including an asset purchase and sale transaction between the Trust and UHS, as discussed below.

The carrying value of our investment in the Trust was \$7.0 million and \$8.4 million at December 31, 2023 and 2022, respectively, and is included in other assets in the accompanying consolidated balance sheets. The market value of our investment in the Trust was \$34.1 million at December 31, 2023 and \$37.6 million at December 31, 2022, based on the closing price of the Trust's stock on the respective dates.

The Trust commenced operations in 1986 by purchasing certain hospital properties from us and immediately leasing the properties back to our respective subsidiaries. The base rents are paid monthly and the bonus rents, which effective as of January 1, 2022 are applicable only to McAllen Medical Center, are computed and paid on a quarterly basis, based upon a computation that compares current quarter revenue to a corresponding quarter in the base year. The leases with those subsidiaries are unconditionally guaranteed by us and are cross-defaulted with one another.

On December 31, 2021, we entered into an asset purchase and sale agreement with the Trust, which was amended during the first quarter of 2022, pursuant to the terms of which:

- a wholly-owned subsidiary of ours purchased from the Trust, the real estate assets of the Inland Valley Campus of Southwest Healthcare System located in Wildomar, California, at its fair market value of \$79.6 million.
- two wholly-owned subsidiaries of ours transferred to the Trust, the real estate assets of the following properties:
 - o Aiken Regional Medical Center (“Aiken”), located in Aiken, South Carolina (which includes a 211-bed acute care hospital and a 62-bed behavioral health facility), at its fair-market value of approximately \$57.7 million, and;
 - o Canyon Creek Behavioral Health (“Canyon Creek”), a 102-bed facility located in Temple, Texas, at its fair-market value of approximately \$26.0 million.
- in connection with this transaction, since the fair-market value of Aiken and Canyon Creek, which totaled approximately \$83.7 million in the aggregate, exceeded the \$79.6 million fair-market value of the Inland Valley Campus of Southwest Healthcare System, we received approximately \$4.1 million in cash from the Trust. This transaction generated a gain of approximately \$68.4 million for the Trust, our share of which (approximately \$4.0 million) is included in our consolidated statement of income for the year ended December 31, 2021.

Also on December 31, 2021, Aiken and Canyon Creek (as lessees), entered into a master lease and individual property leases (with the Trust as lessor), as amended, for initial lease terms on each property of approximately twelve years, ending on December 31, 2033. Subject to the terms of the master lease, Aiken and Canyon Creek have the right to renew their leases, at the then current fair market rent (as defined in the master lease), for seven, five-year optional renewal terms. The aggregate annual rental during 2023 pursuant to the leases for these two facilities, amounted to approximately \$5.8 million (\$4.0 million related to Aiken and \$1.8 million related to Canyon Creek). The aggregate annual rental during 2022 pursuant to the leases for these two facilities, amounted to approximately \$5.7 million (\$3.9 million related to Aiken and \$1.8 million related to Canyon Creek). There is no bonus rental component applicable to either of these leases. On each January 1st through 2033, the annual rental will increase by 2.25% on a cumulative and compounded basis.

As a result of the purchase options within the lease agreements for Aiken and Canyon Creek, the asset purchase and sale transaction is accounted for as a failed sale leaseback in accordance with U.S. GAAP. We have accounted for the asset exchange and substitution transaction with the Trust as a financing arrangement and, since we did not derecognize the real property related to Aiken and Canyon Creek, we will continue to depreciate the assets. Our consolidated balance sheets as of December 31, 2023 and 2022 reflects a financial liability of \$77.5 million and \$80.9 million, respectively, which is included in debt, for the fair value of real estate assets that we exchanged as part of the transaction. Our monthly lease payments payable to the Trust will be recorded to interest expense and as a reduction to the outstanding financial liability. The amount allocated to interest expense is determined using our incremental borrowing rate and is based on the outstanding financial liability.

The aggregate rent payable to the Trust in connection with the leases on McAllen Medical Center, Wellington Regional Medical Center, Aiken Regional Medical Center and Canyon Creek Behavioral Health was approximately \$20.6 million during 2023 and \$20.2 million during 2022. Total aggregate rent expense under the operating leases on three hospital facilities with the Trust (McAllen Medical Center, Wellington Regional Medical Center and Inland Valley Campus of Southwest Healthcare System) was \$17.7 million during 2021.

Pursuant to the Master Leases by certain subsidiaries of ours and the Trust as described in the table below, dated 1986 and 2021 (“the Master Leases”) which govern the leases of McAllen Medical Center and Wellington Regional Medical Center (each of which is governed by the Master Lease dated 1986), and Aiken Regional Medical Center and Canyon Creek Behavioral Health (each of which is governed by the Master Lease dated 2021), we have the option to renew the leases at the lease terms described above and below by providing notice to the Trust at least 90 days prior to the termination of the then current term. We also have the right to purchase the respective leased hospitals at their appraised fair market value upon any of the following: (i) at the end of the lease terms or any renewal terms; (ii) upon one month’s notice should a change of control of the Trust occur, or; (iii) within the time period as specified in the lease in the event that we provide notice to the Trust of our intent to offer a substitution property/properties in exchange for one (or more) of the hospital properties leased from the Trust should we be unable to reach an agreement with the Trust on the properties to be substituted. In addition, we have rights of first refusal to: (i) purchase the respective leased facilities during and for a specified period after the lease terms at the same price, terms and conditions of any third-party offer, or; (ii) renew the lease on the respective leased facility at the end of, and for a specified period of time after, the lease term at the same terms and conditions pursuant to any third-party offer.

In addition, we are the managing, majority member in a joint venture with an unrelated third-party that operates Clive Behavioral Health, a 100-bed behavioral health care facility located in Clive, Iowa. The real property of this facility, which was completed and opened in late, 2020, is also leased from the Trust (annual rental of approximately \$2.7 million, \$2.6 million and \$2.5 million during 2023, 2022 and 2021, respectively) pursuant to the lease terms as provided in the table below. In connection with the lease on this facility, the joint venture has the right to purchase the leased facility from the Trust at its appraised fair market value upon either of the following: (i) by providing notice at least 270 days prior to the end of the lease terms or any renewal terms, or; (ii)

upon 30 days' notice anytime within 12 months of a change of control of the Trust (UHS also has this right should the joint venture decline to exercise its purchase right). Additionally, the joint venture has rights of first offer to purchase the facility prior to any third-party sale.

The table below provides certain details for each of the hospitals leased from the Trust as of January 1, 2024:

<u>Hospital Name</u>	<u>Annual Minimum Rent</u>	<u>End of Lease Term</u>	<u>Renewal Term (years)</u>
McAllen Medical Center	\$ 5,485,000	December, 2026	5 (a)
Wellington Regional Medical Center	\$ 6,639,000	December, 2026	5 (b)
Aiken Regional Medical Center/Aurora Pavilion Behavioral Health Services	\$ 4,072,000	December, 2033	35 (c)
Canyon Creek Behavioral Health	\$ 1,841,000	December, 2033	35 (c)
Clive Behavioral Health	\$ 2,775,000	December, 2040	50 (d)

- (a) We have one 5-year renewal option at existing lease rates (through 2031).
- (b) We have one 5-year renewal option at fair market value lease rates (through 2031). Upon the December 31, 2021 expiration of the lease on Wellington Regional Medical Center, a wholly-owned subsidiary of ours exercised its fair market value renewal option and renewed the lease for a 5-year term scheduled to expire on December 31, 2026. Effective January 1, 2024, the annual lease rate for this hospital is \$6.6 million (there is no longer a bonus rental component of the lease payment). On each January 1st through 2026, the annual rent will increase by 2.50% on a cumulative and compounded basis.
- (c) We have seven 5-year renewal options at fair market value lease rates (2034 through 2068). On each January 1st through 2033, the annual rent will increase by 2.25% on a cumulative and compounded basis.
- (d) This facility is operated by a joint venture in which we are the managing, majority member and an unrelated third-party holds a minority ownership interest. The joint venture has three, 10-year renewal options at computed lease rates as stipulated in the lease (2041 through 2070) and two additional, 10-year renewal options at fair market value lease rates (2071 through 2090). In each January through 2040 (and potentially through 2070 if three, 10-year renewal options are exercised), the annual rental will increase by 2.75% on a cumulative and compounded basis.

In addition, certain of our subsidiaries are tenants in various medical office buildings (“MOBs”) and two free-standing emergency departments owned by the Trust or by limited liability companies in which the Trust holds 95% to 100% of the ownership interest.

During the third quarter of 2023, the Trust acquired the McAllen Doctor's Center, a 79,500 rentable square feet medical office building located in McAllen, Texas. A master lease was executed between a wholly-owned subsidiary of ours and the Trust, pursuant to the terms of which our subsidiary will master lease 100% of the rentable square feet of the MOB at an initial minimum rent of \$624,000 annually. The master lease commenced during August, 2023 and is scheduled to expire in twelve years.

During the first quarter of 2023, the Trust substantially completed construction on a new 86,000 rentable square feet multi-tenant MOB that is located on the campus of Northern Nevada Sierra Medical Center in Reno, Nevada. Northern Nevada Sierra Medical Center, a 170-bed newly constructed acute care hospital owned and operated by a wholly-owned subsidiary of ours, was completed and opened in April, 2022. In connection with this MOB, a ground lease and a master flex lease was executed between a wholly-owned subsidiary of ours and the Trust, pursuant to the terms of which our subsidiary will master lease approximately 68% of the rentable square feet of the MOB at an initial minimum rent of \$1.3 million annually plus a pro-rata share of the common area maintenance expenses. The master flex lease could be reduced during the term if certain conditions are met. The ground lease and master flex lease each commenced during the first quarter of 2023.

Other Related Party Transactions:

In December, 2010, our Board of Directors approved the Company’s entering into supplemental life insurance plans and agreements on the lives of Alan B. Miller (our Executive Chairman of the Board) and his wife. As a result of these agreements, as amended in October, 2016, based on actuarial tables and other assumptions, during the life expectancies of the insureds, we would pay approximately \$28 million in premiums, and certain trusts owned by our Executive Chairman of the Board, would pay approximately \$9 million in premiums. Based on the projected premiums mentioned above, and assuming the policies remain in effect until the death of the insureds, we will be entitled to receive death benefit proceeds of no less than approximately \$37 million representing the \$28 million of aggregate premiums paid by us as well as the \$9 million of aggregate premiums paid by the trusts. In connection with these policies, we paid approximately \$1.0 million, net, in premium payments during 2023, 2022 and 2021.

In August, 2015, Marc D. Miller, our President and Chief Executive Officer and member of our Board of Directors, was appointed to the Board of Directors of Premier, Inc. (“Premier”), a healthcare performance improvement alliance. During 2013, we entered into a new group purchasing organization agreement (“GPO”) with Premier. In conjunction with the GPO agreement, we acquired a minority interest in Premier for a nominal amount. During the fourth quarter of 2013, in connection with the completion of

an initial public offering of the stock of Premier, we received cash proceeds for the sale of a portion of our ownership interest in the GPO. Also in connection with this GPO agreement, we received shares of restricted stock of Premier which vested ratably over a seven-year period (2014 through 2020), contingent upon our continued participation and minority ownership interest in the GPO. During the third quarter of 2020, we entered into an agreement with Premier pursuant to the terms of which, among other things, our ownership interest in Premier was converted into shares of Class A Common Stock of Premier. We have elected to retain a portion of the previously vested shares of Premier, the market value of which is included in other assets on our consolidated balance sheets. Based upon the closing price of Premier's stock on each respective date, the market value of our shares of Premier was \$50 million as of December 31, 2023 and \$78 million as of December 31, 2022. The \$28 million decrease in market value of our vested Premier shares since December 31, 2021 was recorded as an unrealized loss and included in "Other (income) expense, net" in our consolidated statements of income for the year ended December 31, 2023. A \$14 million decrease in the market value of our vested Premier shares during 2022 was recorded as an unrealized loss and included in "Other (income) expense, net" in our consolidated statements of income for the year ended December 31, 2022. A \$14 million increase in the market value of our vested Premier shares during 2021 was recorded as an unrealized gain and included in "Other (income) expense, net" in our consolidated statements of income for the year ended December 31, 2021.

Additionally, we received cash dividends from Premier amounting to \$1.9 million during 2023, \$1.8 million during 2022 and \$1.7 million during 2021, which are included in "Other (income) expense, net" in our consolidated statements of income.

A member of our Board of Directors and member of the Executive Committee and Finance Committee is a partner in Norton Rose Fulbright US LLP, a law firm engaged by us for a variety of legal services. The Board member and his law firm also provide personal legal services to our Executive Chairman and he acts as trustee of certain trusts for the benefit of our Executive Chairman and his family.

10) REVENUE RECOGNITION

We recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which we expect to be entitled in exchange for those goods or services. Our estimate for amounts not expected to be collected based on historical experience will continue to be recognized as a reduction to net revenue. However, subsequent changes in estimate of collectability due to a change in the financial status of a payer, for example a bankruptcy, will be recognized as bad debt expense in operating charges.

The performance obligation is separately identifiable from other promises in the customer contract. As the performance obligations are met (i.e.: room, board, ancillary services, level of care), revenue is recognized based upon allocated transaction price. The transaction price is allocated to separate performance obligations based upon the relative standalone selling price. In instances where we determine there are multiple performance obligations across multiple months, the transaction price will be allocated by applying an estimated implicit and explicit rate to gross charges based on the separate performance obligations.

In assessing collectability, we have elected the portfolio approach. This portfolio approach is being used as we have large volume of similar contracts with similar classes of customers. We reasonably expect that the effect of applying a portfolio approach to a group of contracts would not differ materially from considering each contract separately. Management's judgment to group the contracts by portfolio is based on the payment behavior expected in each portfolio category. As a result, aggregating all of the contracts (which are at the patient level) by the particular payer or group of payers, will result in the recognition of the same amount of revenue as applying the analysis at the individual patient level.

We group our revenues into categories based on payment behaviors. Each component has its own reimbursement structure which allows us to disaggregate the revenue into categories that share the nature and timing of payments. The other patient revenue consists primarily of self-pay, government-funded non-Medicaid, and other.

The following table disaggregates our revenue by major source for the years ended December 31, 2023, 2022 and 2021 (in thousands):

	For the year ended December 31, 2023							
	Acute Care		Behavioral Health		Other	Total		
Medicare	\$ 1,297,084	16%	\$ 310,321	5%		\$ 1,607,405	11%

11) PENSION PLAN

We maintain contributory and non-contributory retirement plans for eligible employees. Our contributions to the contributory plan amounted to \$73.9 million, \$72.0 million and \$69.8 million in 2023, 2022 and 2021, respectively. The non-contributory plan is a defined benefit pension plan which covers employees of one of our subsidiaries. The benefits are based on years of service and the employee's highest compensation for any five years of employment. Our funding policy is to contribute annually at least the minimum amount that should be funded in accordance with the provisions of ERISA.

For defined benefit pension plans, the benefit obligation is the "projected benefit obligation", the actuarial present value, as of December 31 measurement date, of all benefits attributed by the pension benefit formula to employee service rendered to that date. The amount of benefit to be paid depends on a number of future events incorporated into the pension benefit formula, including estimates of the average life of employees/survivors and average years of service rendered. It is measured based on assumptions

concerning future interest rates and future compensation levels. The following table shows the reconciliation of the defined benefit pension plan as of December 31, 2023 and 2022:

	<u>2023</u>	<u>2022</u>
	(000s)	
Change in plan assets:		
Fair value of plan assets at beginning of year	\$ 96,627	\$ 127,360
Actual return (loss) on plan assets	8,779	(23,674)
Benefits paid	(6,417)	(6,448)
Administrative expenses	(574)	(611)
Fair value of plan assets at end of year	<u>\$ 98,415</u>	<u>\$ 96,627</u>
Change in benefit obligation:		
Benefit obligation at beginning of year	\$ 87,277	\$ 116,034
Service cost	803	607
Interest cost	4,118	2,836
Benefits paid	(6,417)	(6,448)
Actuarial (gain) loss	(156)	(25,752)
Benefit obligation at end of year	<u>\$ 85,625</u>	<u>\$ 87,277</u>
Amounts recognized in the Consolidated Balance Sheet:		
Other noncurrent assets	<u>\$ 12,790</u>	<u>\$ 9,350</u>
Total amounts recognized at end of year	<u>\$ 12,790</u>	<u>\$ 9,350</u>

	<u>2023</u>	<u>2022</u>	<u>2021</u>
	(000s)		
Components of net periodic cost (benefit)			
Service cost	\$ 803	\$ 607	\$ 546
Interest cost	4,118	2,836	2,493
Expected return on plan assets	(4,195)	(4,335)	(4,490)
Net periodic cost	<u>\$ 726</u>	<u>\$ (892)</u>	<u>\$ (1,451)</u>

	<u>2023</u>	<u>2022</u>
Measurement Dates		
Benefit obligations	12/31/2023	12/31/2022
Fair value of plan assets	12/31/2023	12/31/2022

	<u>2023</u>	<u>2022</u>
Weighted average assumptions as of December 31		
Discount rate	4.71%	4.91%
Rate of compensation increase	4.00%	4.00%

	<u>2023</u>	<u>2022</u>	<u>2021</u>
Weighted-average assumptions for net periodic benefit cost calculations			
Discount rate	4.91%	2.52%	2.08%
Expected long-term rate of return on plan assets	4.50%	3.50%	3.50%
Rate of compensation increase	4.00%	4.00%	4.00%

The “accumulated benefit obligation” for our pension plan represents the actuarial present value of benefits based on employee service and compensation as of a certain date and does not include an assumption about future compensation levels. The accumulated benefit obligation for our plan was \$85.6 million and \$87.3 million as of December 31, 2023 and 2022, respectively. The fair value of plan assets exceeded the accumulated benefit obligation by \$12.8 million and \$9.4 million as of December 31, 2023 and 2022, respectively.

We estimate that there will be no net loss or prior service cost amortized from accumulated other comprehensive income during 2024.

The market values of our pension plan assets at December 31, 2023 and 2022, reported using net asset value as a practical expedient, by asset category are as follows (in thousands):

	<u>2023</u>	<u>2022</u>
Equities:		
U.S. Large Cap	\$ 5,423	\$ 5,301
U.S. Mid Cap	1,480	1,451
U.S. Small Cap	1,491	1,452
International Developed	3,943	3,867
Emerging Markets	2,540	2,426
Fixed income:		
Core Fixed Income	17,492	17,074
Long Duration Fixed Income	65,289	64,277
Cash/Currency:		
Cash Equivalents	757	779
Total market value	<u>\$ 98,415</u>	<u>\$ 96,627</u>

To develop the expected long-term rate of return on plan assets assumption, we considered the historical returns and the future expectations for returns for each asset class, as well as the target asset allocation of the pension portfolio.

The following table shows expected benefit payments for the years 2024 through 2033 for our defined pension plan. There will be benefit payments under this plan beyond 2033.

Estimated Future Benefit Payments (000s)

2024	\$ 6,752
2025	6,745
2026	6,714
2027	6,671
2028	6,601
2029-2033	31,330
Total	<u>\$ 64,813</u>

	<u>2023</u>	<u>2022</u>
Plan Assets		
Asset Category		
Equity securities	15%	15%
Fixed income securities	84%	84%
Other	1%	1%
Total	<u>100%</u>	<u>100%</u>

Investment Policy, Guidelines and Objectives have been established for the defined benefit pension plan. The investment policy is in keeping with the fiduciary requirements under existing federal laws and managed in accordance with the Prudent Investor Rule. Total portfolio risk is regularly evaluated and compared to that of the plan's policy target allocation and judged on a relative basis over a market cycle. The following asset allocation policy and ranges have been established in accordance with the overall risk and return objectives of the portfolio:

	<u>As of 12/31/2023</u>	<u>Permitted Range</u>
Total Equity	15%	10-30%
Total Fixed Income	84%	70-90%
Other	1%	0-10%

In accordance with the investment policy, the portfolio will invest in high quality, large and small capitalization companies traded on national exchanges, and investment grade securities. The investment managers will not write or buy options for speculative purposes; securities may not be margined or sold short. The manager may employ futures or options for the purpose of hedging exposure, and will not purchase unregistered sectors, private placements, partnerships or commodities.

12) SEGMENT REPORTING

Our reportable operating segments consist of acute care hospital services and behavioral health care services. The "Other" segment column below includes centralized services including, but not limited to, information technology, purchasing, reimbursement, accounting and finance, taxation, legal, advertising and design and construction. The chief operating decision making group for our acute care services and behavioral health care services is comprised of our Chief Executive Officer and the Presidents of each operating segment. The Presidents for each operating segment also manage the profitability of each respective segment's various

facilities. The operating segments are managed separately because each operating segment represents a business unit that offers different types of healthcare services or operates in different healthcare environments. The accounting policies of the operating segments are the same as those described in the summary of significant accounting policies included in *Note 1-Business and Summary of Significant Accounting Policies*. The corporate overhead allocations, as reflected below, are utilized for internal reporting purposes and are comprised of each period's projected corporate-level operating expenses (excluding interest expense). The overhead expenses are captured and allocated directly to each segment, to the extent possible, based upon each segment's respective percentage of total operating expenses.

<u>2023</u>	<u>Acute Care Hospital Services</u>	<u>Behavioral Health Services (a.)</u>	<u>Other</u>	<u>Total Consolidated</u>
	(Dollar amounts in thousands)			
Gross inpatient revenues	\$ 44,687,035	\$ 10,648,996	\$ —	\$ 55,336,031
Gross outpatient revenues	\$ 29,858,874	\$ 1,087,595	\$ —	\$ 30,946,469
